

Global Perspectives

Year 2

Cambridge Early Years

Student Manual

The Field Notebook

A light beige background featuring a stylized world map. Dashed lines represent expedition routes across the continents. Three flags are placed along these routes: a blue flag in Europe, a yellow flag in Africa, and another blue flag in South America. In the bottom right corner, there is a small illustration of two penguins, one adult and one chick.

The Field Notebook: Global Perspectives, Year 2, Student Book

First edition, published 2026 by Prime Books, the publishing imprint of Prime School, Lisbon, Portugal.

Text, illustration, diagrams, page design and typography © Prime School 2026. All rights reserved.

AN INDEPENDENT PUBLICATION

This book is an independent publication of Prime School. It is written, designed and produced in house by the Prime School curriculum team for use by Prime School pupils and by any school that finds it useful. It is **not** published by, endorsed by, licensed by, affiliated with or approved by Cambridge Assessment International Education, Cambridge University Press & Assessment, the University of Cambridge, or any other examination board or awarding body.

Where this book refers to a published curriculum framework, it does so for the sole purpose of identifying the educational stage the material is written for. Any such reference is descriptive and nominative. It carries no claim of approval, and it grants the reader no rights in the referenced work.

TRADEMARK ACKNOWLEDGEMENTS

Cambridge, Cambridge Assessment International Education and Cambridge Early Years are trade marks of the University of Cambridge and its assessment organisations. UNICEF is a trade mark of the United Nations Children's Fund. UNESCO is a trade mark of the United Nations Educational, Scientific and Cultural Organization. Paralympic and the Agitos device are trade marks of the International Paralympic Committee. QR Code is a registered trade mark of Denso Wave Incorporated. Wikipedia and Wikimedia Commons are trade marks of the Wikimedia Foundation. BBC and BBC Bitesize are trade marks of the British Broadcasting Corporation. Euro coin designs are reproduced by reference to the European Central Bank. All other product, organisation and place names appearing in this book may be the trade marks or registered trade marks of their respective owners. They are used here for identification and educational comment only, and no claim of ownership is made.

IMPRINT CONTINUED

RIGHTS AND PERMISSIONS

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior written permission of Prime School, with these exceptions: a school that has bought copies of this book may photocopy the pages marked as making space for use with its own pupils, and any person may quote short passages for the purposes of review, criticism or teaching, with acknowledgement.

This book is meant to be written in. The making spaces, ruled lines and field notes pages belong to the pupil whose name is on the field licence, and writing in them is the point of them.

SOURCES, LINKS AND QR CODES

Every factual statement in this book is traced to a published source, and those sources are listed in **Where we found out** at the back. Every QR code in this book was scanned, followed and checked on 3 August 2026, and each destination is printed in full in **Every QR code in this book** so the book still works with no device at all. Prime School does not control those websites and is not responsible for their content, which may change. **An adult should scan and open every code before a child follows it.**

ABOUT THE ILLUSTRATION

The cover painting and the interior watercolour illustrations were made for this book. Diagrams, maps and charts were drawn as vector artwork by the Prime School curriculum team, so every label in them is real type rather than part of a picture. Photographic plates, where used, are reproduced from Wikimedia Commons under the licence stated beside each plate.

TYPESET IN

Plus Jakarta Sans (Tokotype) for display, Andika (SIL International) for reading text, Kalam (Indian Type Foundry) for handwriting. Andika is used because it is a literacy typeface: its letterforms cannot be confused with one another, which matters more at seven years old than fashion does.

Nobody else in the whole world has
this pattern.

Meet the Field Club

Five naturalists travel with you through this book. They do not always agree with each other. That is the whole point of them.

Bram the badger · Keeper of the Map

Bram measures things and checks them twice. When everybody else is sure, Bram says, let us look again.

Rufus the fox · Chief Question Asker

Rufus asks the question nobody else thought of. Sometimes it is an awkward one. That is usually when it is a good one.

Meet the Field Club, continued

Nella the rabbit · Listener

Nella has the longest ears in the club, and she uses them. She always asks how the other person felt about it.

Pip the hedgehog · Collector

Pip is small and slow and misses nothing. Pip comes back with the one tiny thing that everybody walked straight past.

Tam the mouse · Flag Planter

Tam is the smallest and the bravest. Tam gets to the top of the hill first and shouts down what can be seen from up there.

Rufus and Nella look at the same thing on every expedition and see something different. Neither of them is wrong. Learning to hold both pictures in your head at once is what Global Perspectives is.

How to use this notebook

This is not a book you only read. It is a book you **fill in**. Every expedition has the same parts, and once you know them you will always know where you are.

- **Boots on!**

A short game to wake your brain up. One minute, no writing.

- **Your turn**

Your work. Sometimes you circle, sometimes you draw, sometimes you write.

- **From another chair**

Rufus and Nella look at the same thing and see something different. Who is right? Both of them.

- **Field notes**

Squared paper for what YOU saw. Nobody can mark this wrong.

- **New words**

The words from this expedition, each with its own picture.

- **Let us find out**

The part where you learn something new. Look at the picture first, then read.

- **Did you know?**

A true fact that surprised us when we found it out.

- **The big question**

One huge question with no answer printed anywhere. Argue about it.

- **Look closer**

A little square to scan with a grown-up. It takes you somewhere the paper cannot go.

- **Now I can**

Tick the box when you really can do it.

*One more thing. In this book, questions that begin **Do you think** have no right answer. Do not look for one. Say what you think, listen to somebody who thinks the opposite, and then say what you think again.*

Your field kit

You do not need much. Real naturalists never did.

A pencil

Not a pen. Field naturalists change their minds.

A rubber

Because of the above.

Coloured pencils

For sorting, colouring and marking your map.

This notebook

The one in your hands, with your name in it.

Your eyes

The most important instrument you own.

Your ears

The second most important. Most people forget these.

A grown-up

For the little squares, and for the big questions.

FIELD NOTES

Tick your kit. Then draw one more thing you would take on an expedition, and write why.

Getting set up: the six Field Club rules

Read these with your class on the first day. Then put them on the wall, because everybody forgets rule two.

1

Look before you speak

Spend a whole minute looking at a picture before anybody says anything. You will see three more things in the second half of that minute.

2

Say I think, not it is

In this subject, most sentences begin with I think, I noticed, or I wonder. That is not being unsure. That is being honest.

3

Listen right to the end

Nella's rule. Let the other person finish their whole sentence, even the part you already disagree with.

4

Ask one more question

Rufus's rule. When you think you understand, ask one more question. That is usually where the interesting bit is hiding.

The world you are going to look at.

The Field Club rules, continued

5

Nobody is a stranger's story

When we look at how somebody else lives, we look at what they can do, not at what they do not have.

6

Write it down while you can still see it

Bram's rule. A field note written tomorrow is not a field note.

FIELD NOTES

Which rule will be hardest for you? Write its number and why.

LOOK CLOSER

Every child in the world has rights, and somebody wrote them all down. Read the list made for children.

● [unicef.org](https://www.unicef.org)

How the little squares work

All through this book you will find little black and white squares. Each one is a door. Behind it is something the paper simply cannot do: a sound, a film, a place you can spin round and look at from every side.

Every single square in this book was opened and checked by a real person before the book was printed. Every one is free. None of them asks for your name.

**1****Find a grown-up**

Never scan a code on your own. That is the rule, and it is not because we do not trust you.

The little squares, continued

2

Point the camera

Hold a phone or a tablet camera over the little square. You do not need to press anything.

3

Read the promise first

Every square in this book says what it will show you. If it does not sound interesting, do not go.

4

Come back to the page

The square takes you somewhere the paper cannot go. Then you come back and write what you found.

LOOK CLOSER

Try one now. This square tells you who invented the little square, and what the two letters Q and R actually stand for.

● [wikipedia.org](https://www.wikipedia.org)

*If you have no phone or tablet, nothing is lost. Every address in this book is printed in full at the back, under **Every QR code in this book**. A library computer will do just as well.*

The world you are going to look at

Every place this notebook visits has a flag on this map. Find the one you live in first. Put your finger on it.

The Field Club map. It is drawn simply on purpose: it is for finding places, not for measuring them.

- 1 Put your finger on the country you live in. Say its name out loud.
- 2 Find the dotted line across the middle. That is the **equator**. It is the hottest part.

FIELD NOTES

Which flag do you most want to visit? Write the country.

LOOK CLOSER

Spin a real world map, zoom right in, and find your own street.

EXPEDITION 1

The Playing Fields

Where the Field Club runs, jumps and argues about the rules

1

Games

Bodies

Fair play

Weather

EXPEDITION 1 · THE PLAYING FIELDS

Sports and recreation

Field Club is here!

Bram has drawn a map of the playing field. Rufus has already run across it twice. Nella wants to know who was left standing at the edge. Pip has found a lost glove, and Tam is on top of the goalpost shouting that from up here you can see three games at once.

Bram

Rufus

Nella

Pip

Tam

EXPEDITION 1 · THE PLAYING FIELDS

On this expedition you will

- 🚩 Ask your class which game they love best, and count the answers up
- 🚩 Sort games into the ones that need a room and the ones that need a field
- 🚩 Learn to play a real game from Ghana, from India and from Portugal
- 🚩 Find out what happens inside you when you run
- 🚩 Work out why some rules are there to keep you safe
- 🚩 Meet players who are blind, and find out how they play

THE BIG QUESTION

Is a game still a game if nobody wins?

Rufus says a game with no winner is just running about. Nella says the best afternoon she ever had was a game nobody won. Ask five people. Write down who said what. Do not try to settle it.

**Rufus says***And my question is: who says so?*

TOPIC 1.1

My favourite sport and game

- *Everybody in this class chose a different game, and every single one of them thought theirs was best.*

Do you remember?

*In Year 1 you learned the word **favourite**. What is your favourite colour? Now say your favourite game.*

TOPIC 1.1 CONTINUED

My favourite sport and game

Let us find out

Your favourite game is not everybody's favourite game. That sounds obvious. It is one of the most useful things you will learn all year.

When a whole class counts up its answers, that is called a **survey**. You write one mark for every person. Five marks get a line through them, so they are easy to count.

BOOTS
ON!

Stand up. Show your favourite game with your body, but no words and no sounds. Can the class guess it?

Everybody in this class chose a different game, and every single one of them thought theirs was best.

Your turn

- 1 Ask six people in your class which game they love best. Put one mark for each answer.

- 2 Which game got the most marks? Write it here.

The game with the most marks was

- 3 Was your own favourite the winner? Circle one.

yes

no

Everybody in this class chose a different game, and every single one of them thought theirs was best.

TOPIC 1.1 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

There is one winner, so there is one best game. Count the marks and you can see it.

**Nella says**

The game with the fewest marks was somebody's favourite too. That person is sitting right next to you.

Bram's question: does the game with the most marks become the best game, or just the most popular one? They are not the same word.

**DID YOU KNOW?**

More countries play football than there are countries in the United Nations. There are 211 football teams and only 193 countries. Some places have a team but are not a country of their own.

TOPIC 1.1 CONTINUED

football

skipping

tag

swimming

A real survey from a real Year 2 class. Twelve marks means twelve people.

FIELD NOTES

Draw yourself playing your favourite game. Write one sentence saying why you love it.

TOPIC 1.2

Indoor and outdoor games

Some games need four walls. Some games need a whole field. And a few clever ones do not mind either way.

Two rings that overlap. Where they cross is the interesting part.

TOPIC 1.2 CONTINUED

Indoor and outdoor games**Let us find out**

An indoor game usually needs a smooth floor, a small space and a quiet voice. An outdoor game usually needs room to run and does not mind noise or mud.

But look at the middle of the rings. Skipping works in a hall and in a yard. So does catch. Sorting things nearly always leaves something in the middle, and that is not a mistake.

**BOOTS
ON!**

Name an indoor game and an outdoor game. Now name one that is both. Thirty seconds.

Rain outside, so the hall becomes the field.

Your turn

- 1 Write each game in the right ring: **chess, football, skipping, hide and seek, cards, tag.**

Write them into the rings above

- 2 Which one was hardest to place? Why?

The hardest one was

DID YOU KNOW?

Sorting into two rings that overlap is a real tool that scientists use every day, and you have just used it.

LOOK CLOSER

Watch sepak takraw. It is like volleyball, but nobody is allowed to use their hands, and the players kick above their own heads.

[wikipedia.org](https://www.wikipedia.org)

FIELD NOTES

Invent a game that only works indoors. Give it a name and one rule.

TOPIC 1.3

Traditional games around the world

- *Four games, four countries, and not one of them needs a screen.*

Do you remember?

Do you remember a game your grandparents played when they were small? Ask them tonight.

TOPIC 1.3 CONTINUED

Traditional games around the world

Let us find out

In Ghana, children play **oware** on a wooden board with two rows of six holes and forty eight seeds. You scoop up the seeds and drop them one by one into the holes going round.

In India, **kabaddi** is played with no ball at all. One player runs into the other team's half and has to chant kabaddi, kabaddi all the way there and all the way back, so everybody can hear that they have not taken a breath.

Here in Portugal, people play **jogo da malha** by throwing a flat metal disc at a small wooden peg in the ground. In France they roll heavy metal balls at one tiny wooden ball instead.

A circular orange icon with the text "BOOTS ON!" in white capital letters.

Try the kabaddi chant. Say kabaddi, kabaddi over and over without stopping. How far can you walk before you have to breathe?

Nella says

And how do you think the person in the picture feels about it?

Put your finger on Portugal. Now trace to Ghana. Games travel too.

TOPIC 1.3 CONTINUED

Your turn

1 Draw a line from each game to its country.

oware

India

kabaddi

Portugal

jogo da malha

France

petanque

Ghana

2 Which one would you most like to try? Write its name.

I would like to try

LOOK CLOSER

Look at real oware boards carved from wood, photographed in museums all over the world.

commons.wikimedia.org

FIELD NOTES

*Which game in this lesson is most like a game you already play?
Write both names and what is the same about them.*

TOPIC 1.4

Why do we exercise?

Do you remember?

What happens to your breathing when you run up a hill?

- *Hand on your chest. Can you feel it? That is your heart doing its job.*

Let us find out

Put your hand flat on your chest and sit still. Now run on the spot for twenty seconds and put your hand back. Your heart is beating faster, because your legs asked for more blood and your heart is delivering it.

Doctors all over the world worked together and agreed on one number: children should move their bodies for at least **sixty minutes** every single day. That is one hour. Running counts. Dancing counts. Climbing counts.

BOOTS ON!

Twenty seconds of running on the spot. Then hand on chest. Say what you notice.

Your turn

- 1 Count how many minutes you moved yesterday. Colour one box for every ten minutes.

--	--	--	--	--	--

Six boxes is sixty minutes.

- 2 Did you fill all six boxes? What could you do today to fill one more?

Today I could

DID YOU KNOW?

Your heart is a muscle about the size of your own fist, and it never once takes a day off.

LOOK CLOSER

This is the real page where the world's doctors wrote down that sixty minute rule. A grown-up can read it with you.

[who.int](https://www.who.int)

FIELD NOTES

Draw the thing you do that makes your heart beat fastest.

TOPIC 1.5

Playing safely

Let us find out

Nobody makes rules just to spoil your fun. Almost every rule in a game is there because somebody once got hurt.

A **helmet** must sit level on your head, two finger widths above your eyebrows, with the straps making a V under your ears. If it is tipped back it protects nothing at all.

And you **warm up** first. Gentle running, then stretching, then the game. Cold muscles tear. Warm muscles bend.

A helmet sits level, two fingers above your eyebrows. Not tipped back.

TOPIC 1.5 CONTINUED

Playing safely

- *A helmet sits level, two fingers above your eyebrows. Not tipped back.*

Do you remember?

Why do we walk, and not run, when the floor is wet?

**BOOTS
ON!**

Look at the helmet in the picture. Show with your fingers where it should sit on your own head.

BIG THINKING

Rufus wants to take the goalposts away so nobody can crash into them. Bram says then it is not football any more. Is a safer game always a better game?

Your turn

1 Tick the ones that keep you safe.

a helmet that fits

running on wet tiles

warming up first

playing until you feel dizzy

drinking water

a helmet tipped back

2 Think of a rule in a game you play. Write what it stops happening.

The rule is

FIELD NOTES

Draw a place where you play. Mark one spot with an X where somebody could get hurt.

TOPIC 1.6

Teamwork in sports

BOOTS ON!

Stand in a line of five. Everybody clap at the same moment. Not nearly the same moment. The same one.

Let us find out

A **team** is not just several people. It is several people who need each other.

In volleyball there are six players, and every time the team wins the serve back, everybody moves round one place. That means nobody can hog the serving, ever. The rule builds turn taking right into the game.

In **tug of war**, one very strong person cannot win on their own. The team has to pull at exactly the same moment. It was even an Olympic sport once.

FIELD NOTES

Draw your team. Put a small arrow on the person who helps everybody else the most.

Your turn

- 1 Circle the ones a team needs.

listening

shouting louder

taking turns

one boss

trusting

- 2 Write about a time your team did better than you could alone.

Once, my team

Six players. Every one of them gets a turn to serve, because the rules say so.

TOPIC 1.6 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

*The strongest team wins.
That is what strong means.*

**Nella says**

*The team that pulls
together wins. I have seen
five small people beat three
big ones.*

Try it in the yard with a rope and a grown-up watching. Then write down who turned out to be right.

**DID YOU KNOW?**

Tug of war was in the real Olympic Games from 1900 until 1920, and then they stopped it.

TOPIC 1.7

Sports in our community

- *A club is not a building. It is the people who look after the building.*

Do you remember?

Where is the nearest place to your home where people play sport?

Let us find out

A **club** is a group of people who share a place to play and take turns looking after it. Somebody cuts the grass. Somebody unlocks the door. Usually nobody is paid.

Sport is so important to people that there is a whole museum about the Olympic Games, in Lausanne in Switzerland, full of torches and medals and old running shoes.

BOOTS
ON!

Name every place near your school where somebody could play something. Count them on your fingers.

Your turn

- 1 Draw a map of one place near you where people play. Mark where you would stand to watch.

- 2 Who looks after that place? Write who you think it is.
I think it is looked after by

LOOK CLOSER

Look inside the Olympic Museum in Switzerland, without leaving your chair.

● [wikipedia.org](https://www.wikipedia.org)

FIELD NOTES

Write one thing your class could do to make a playing place near you better.

TOPIC 1.8

Different people, different sports

- *Every player is wearing a blindfold. The ball has bells inside it. This is goalball, and it is played by listening.*

Do you remember?

Shut your eyes and stay still. What can you hear that you did not notice before?

TOPIC 1.8 CONTINUED

Different people, different sports**Let us find out**

In **goalball**, every single player wears a blindfold, and the ball has bells inside it. So the whole game is played by listening. The crowd has to stay completely silent while the ball is moving.

It was invented in 1946 to help soldiers who had lost their sight in the war. Because everybody is blindfolded, a player who can see and a player who cannot are exactly equal.

Boccia is played sitting down, rolling leather balls towards one small white ball. Some players use a ramp to send the ball exactly where they want it.

**BOOTS ON!**

Sit very still with your eyes closed for twenty seconds while a grown-up moves quietly around the room. Point at where they are.

**Nella says**

And how do you think the person in the picture feels about it?

Your turn

- 1 Why does the goalball crowd have to be silent? Write your answer.

The crowd is silent because

- 2 Design a ball for a game played by listening. Draw it, and show where the bells go.

Every player is wearing a blindfold. The ball has bells inside it. This is goalball, and it is played by listening.

TOPIC 1.8 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

Goalball is a game for people who cannot see.

**Nella says**

Goalball is a game where seeing is no use to anybody, so it is a game for everybody equally.

Which of those two sentences would you rather have said about a game you play? Say why.

**DID YOU KNOW?**

A goalball weighs 1.25 kilograms, has eight holes in it, and the bells inside are the only way anybody knows where it is.

**LOOK CLOSER**

Watch a real goalball match. Listen for the bells in the ball, and notice how quiet the crowd goes.

paralympic.org

FIELD NOTES

Write one word for how you think a goalball player feels when they score.

TOPIC 1.9

Recreation and free time

A day has twenty four hours in it. Where do yours actually go?

One real Year 2 day, cut into slices. Yours will look different.

TOPIC 1.9 CONTINUED

Recreation and free time

Let us find out

Recreation is a long word for the time that is yours. Not sleeping, not school, not jobs. Yours.

And here is something surprising. Playing is not just allowed. It is written down as one of your **rights**, in an agreement that almost every country in the world has signed. It is article 31, and it says every child has the right to rest, to relax and to play.

BOOTS
ON!

Say one thing you do in your free time that costs nothing at all.

Free time is not empty time.

Your turn

- 1 Colour your own day clock. Use a different colour for sleeping, school, playing and eating.

- 2 Which slice would you like to make bigger?

I would make bigger the slice for

DID YOU KNOW?

Playing is your right, and grown-ups in nearly every country in the world have signed a piece of paper promising it.

FIELD NOTES

Draw the very best thing you did in your free time last week.

TOPIC 1.10

Weather and sports

Do you remember?

*What do you put on
before you go outside
when it is raining?*

- *Same field, same friends,
different coat.*

Let us find out

The weather does not stop you playing. It changes what you play, and what you wear while you play it.

People who work out what the weather will do next are called forecasters. Checking a **forecast** before you go out means you take the right coat, and choose the right game.

In very hot weather you need shade and water. In wind, a light ball is useless. In ice, everything is slower and you plan for that.

**BOOTS
ON!**

Look out of the window. Say what you could play right now, and what you could not.

Your turn

1 Match the weather to a good game for it.

hot and sunny

board games indoors

pouring rain

paddling and shade

very windy

flying a kite

cold and icy

running to keep warm

2 What is the best weather for your favourite game?

My game is best when the weather is

LOOK CLOSER

Find out what the weather will do near you before you plan tomorrow's game.

● [metoffice.gov.uk](https://www.metoffice.gov.uk)

FIELD NOTES

Draw two children playing the same game, one in summer and one in winter. Show what is different.

TOPIC 1.11

Healthy habits through sports

- *Move, drink, eat, sleep. Four habits, one body.*

Do you remember?

How do you feel the morning after a night when you did not sleep enough?

TOPIC 1.11 CONTINUED

Healthy habits through sports

Let us find out

A **habit** is something you do so often that you stop having to decide about it.

When you play hard you **sweat**, and sweating means your body is using up water. So you drink. Children lose water faster than grown-ups do, which is why the water bottle matters.

And then you sleep. Children of seven need about ten or eleven hours every night, because that is when the body actually does the growing and the mending.

BOOTS
ON!

Name the four healthy habits from the picture. Then say which one you are best at.

Move, drink, eat, sleep. Four habits, one body.

 = 10 minutes of moving

One child's week of moving. Six circles is a whole hour.

Your turn

1 Tick every habit you did yesterday.

moved for an hour

drank water

ate something green

slept ten hours

2 Choose one habit to work on this week. Write it, and write when you will do it.

This week I will

TOPIC 1.11 CONTINUED

One step further

Keep a habit chart for one whole week. Put a tick in a box every day you manage your habit. Do not rub any out. The gaps are useful too.

**LOOK CLOSER**

A grown-up can read the official advice on children, moving about and sleep.

● [nhs.uk](https://www.nhs.uk)

FIELD NOTES

Write the one habit you are proudest of, and why it is hard.

EXPEDITION 1 · OUR CLASS EXPEDITION

The Field Club Games

Your class is going to invent one brand new game, teach it to another class, and then watch what happens to your own rules when other people get hold of them.

1**Choose your ingredients**

Pick one thing to move (a ball, a beanbag, a hoop) and one thing to reach (a line, a hoop, a wall). Nothing else.

2**Write three rules only**

Three. Not four. Write them big enough for a stranger to read from across the hall, and make one of them a safety rule.

The whole Field Club is coming with you on this one.

OUR CLASS EXPEDITION CONTINUED

1

Teach it to somebody else

Teach your game to another class without demonstrating it. Words only. This is much harder than it sounds, and that is the point.

2

Watch, then change one rule

Play it. Find the one rule that did not work. Change it, and write down why you changed it.

OUR PLAN

Write your three rules here. Then draw a line through the one you had to change, and write the new one underneath.

Your field kit. You will need the pencil and the rubber most of all.

The Long Road Home

Where the Field Club asks what a person really needs

2

Needs

Homes

Work

Sharing

EXPEDITION 2 · THE LONG ROAD HOME

Rich and poor

Field Club is here!

Bram has folded the map into his pocket, because today the Field Club is walking, not measuring. Rufus wants to know who owns the field they are crossing. Nella has noticed that the house at the end of the track has a light on and one at the top of the hill does not. Pip is carrying a jug of water very carefully. Tam is asleep in the knapsack.

Bram

Rufus

Nella

Pip

Tam

EXPEDITION 2 · THE LONG ROAD HOME

On this expedition you will

- 🚩 Work out what a person truly cannot live without
- 🚩 Sort things into needs and wants, and argue about the tricky ones
- 🚩 Visit four real homes in four countries and see why each one is built that way
- 🚩 Find out what jobs are for
- 🚩 Discover what a food bank does, and who runs the fire engine in Portugal
- 🚩 Learn what saving actually means, with real euro coins

THE BIG QUESTION

Who decides what counts as enough?

Rufus says enough is when you have what you need. Nella says her grandmother had less than anybody and always said she had plenty. Bram says somebody, somewhere, decided what enough means, and we should find out who.

**Rufus says***And my question is: who says so?*

TOPIC 2.1

What do we need to live?

- *Water, food, a safe place to sleep, somebody who cares about you. Start there.*

Do you remember?

In Year 1 you learned about your body. What does your body ask for every single day?

TOPIC 2.1 CONTINUED

What do we need to live?

Let us find out

There are only a few things a person truly cannot live without: **clean water**, food, warmth, a safe place to sleep, and somebody who cares about them.

Most people in the world can turn on a tap at home. But two thousand two hundred million people still cannot, and they have to fetch their water and carry it.

So people invent things. A man called Grant Gibbs designed a barrel that rolls along the ground on its side, so one person can move ninety litres of water at once instead of carrying a heavy bucket on their head.

BOOTS
ON!

Name five things you have used already today that came out of a tap.

Water, food, a safe place to sleep, somebody who cares about you. Start there.

Your turn

1 Circle the four things nobody can live without.

clean water

a television

food

sweets

somewhere safe to sleep

a scooter

somebody who cares

2 Draw the rolling water barrel. Show how somebody pushes it.

Water, food, a safe place to sleep, somebody who cares about you. Start there.

TOPIC 2.1 CONTINUED

DID YOU KNOW?

Clean water and good food are not luck. They are written down as things every child in the world has a right to.

LOOK CLOSER

Find out how many people in the world can turn on a tap, and how many still cannot. A grown-up can read it with you.

[who.int](#)

FIELD NOTES

Write down every tap in your home. Then write how far you would walk if there were none.

TOPIC 2.2

Needs and wants

A need is something you cannot live without. A want is something lovely to have. Almost every argument about money is really about which is which.

NEEDS	or	WANTS																		
I cannot live without it <table border="1" data-bbox="188 1365 683 1698"><tbody><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr></tbody></table>											It is lovely to have <table border="1" data-bbox="850 1365 1345 1698"><tbody><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr></tbody></table>									

Two trays. Some things are easy to place. The interesting ones are not.

TOPIC 2.2 CONTINUED

Needs and wants**Let us find out**

You **need** water. You **want** lemonade. Both are nice. Only one of them keeps you alive.

But watch out, because it is not always simple. Is a coat a need or a want? In January in Portugal, a warm coat is a need. A second coat in a different colour is a want. The same object can be both, depending on how many you already have.

**BOOTS
ON!**

Say one need and one want, out loud, in five seconds.

Write the easy ones first. Argue about the rest.

FROM ANOTHER CHAIR

**Rufus says**

A bicycle is a want. You can walk.

**Nella says**

If school is five kilometres away and there is no bus, that bicycle is how you get an education. Then it is a need.

So can the same thing be a need for one person and a want for another? Say what you think, and give your reason.

TOPIC 2.2 CONTINUED

Your turn

- 1 Write each of these into the right tray above: **a bed, sweets, clean water, a bicycle, a warm coat, a games console, food, clean air.**
- 2 Which one caused an argument in your class? Write it and write both sides.

We could not agree about

FIELD NOTES

Write one thing you used to think was a need and now think is a want.

Write the easy ones first. Argue about the rest.

TOPIC 2.3

Different homes around the world

- *Four homes, four countries, and every single one built exactly right for where it stands.*

Do you remember?

What is your home made of? Look at the walls and guess.

TOPIC 2.3 CONTINUED

Different homes around the world

Let us find out

In **Mongolia**, families live in a round tent called a **ger**. It has a wooden frame covered in thick felt and a stove in the middle, and the door always faces south to catch the most daylight. It can be taken down and moved.

In **Alberobello** in Italy, there are houses with pointed stone roofs built with no cement at all, just stones balanced perfectly. Some are over six hundred years old.

In **Amsterdam**, some families live on houseboats on the canals, with post and water and electricity, just like any other home.

And on **Madeira**, in Portugal, at Santana, there are little houses with steep straw roofs painted red, white and blue.

**BOOTS ON!**

Point at the picture. Which home would be warmest in snow? Which would be coolest in heat?

**Nella says**

And how do you think the person in the picture feels about it?

Four homes, four pins. All four are ordinary places where ordinary people live.

Your turn

1 Match each home to its country.

a ger

Italy

a trullo

the Netherlands

a houseboat

Portugal

a palheiro

Mongolia

2 Why does the ger door face south? Write your answer.

The door faces south so that

TOPIC 2.3 CONTINUED

DID YOU KNOW?

The stone houses of Alberobello are built without a drop of cement. Every stone is simply balanced on the ones below it.

LOOK CLOSER

See the round stone houses of Alberobello, and read why they are protected.

unesco.org

FIELD NOTES

Draw your own home from the outside. Label one thing that suits the weather where you live.

TOPIC 2.4

Jobs and helping families

Do you remember?

*What does a grown-up
in your family do all
day?*

- *Every job on this page finishes with somebody else getting what they need.*

Let us find out

A **job** is work somebody does so that other people get what they need. The farmer grows it. The driver moves it. The shopkeeper sells it. The nurse mends you. The teacher teaches you.

Grown-ups go to work, and children go to school. That is not just a habit, it is a rule that nearly every country has agreed to, so that no child has to do work that would harm them or stop them learning.

**BOOTS
ON!**

Name three jobs that helped you get to school this morning.

Your turn

- 1 Draw a line from each job to the need it meets.

farmer

being well

nurse

food

builder

knowing things

teacher

shelter

- 2 Write a job that helps you, and say how.

A job that helps me is

One step further

Children help at home too: laying a table, feeding an animal, minding a smaller child. Make a list of every way you help. It will be longer than you expect.

FIELD NOTES

Write the job you would like to do, and the need it would meet.

Rufus says

Before you turn over: what is the one question nobody in the room has asked yet?

TOPIC 2.5

Communities helping together

Let us find out

A **food bank** collects food that people give and passes it on to families who need it that week. In Portugal the Banco Alimentar runs collections all over the country with thousands of volunteers.

And here is something remarkable about Portugal. Most firefighters here are **volunteers**. They have other jobs, and they leave those jobs and come when the siren goes. Out of about four hundred and eighty fire stations, nearly all of them are volunteer stations.

Nobody here is paid. They came because the siren went.

TOPIC 2.5 CONTINUED

Communities helping together

- *Nobody here is paid. They came because the siren went.*

Do you remember?

Who came to help the last time something went wrong near you?

**BOOTS
ON!**

Say the word volunteer. Now say what it means in your own words.

BIG THINKING

If the bombeiros are volunteers and they save your house, what do you owe them? Nothing, because they chose to come? Or something, because they came?

Your turn

- 1 Circle the people who are usually volunteers.

bombeiros

a bus driver

a food bank helper

a shopkeeper

somebody minding a neighbour

- 2 Why would somebody do a hard job for no money at all?

I think they do it because

LOOK CLOSER

See what the Portuguese food bank actually does, with a grown-up.

● bancoalimentar.pt

FIELD NOTES

Write the name of one person or group near you who helps everybody.

TOPIC 2.6

Saving and spending wisely

**BOOTS
ON!**

If you had one euro today, would you spend it or keep it?
Say why in one sentence.

Let us find out

Saving means not spending today, so that you can buy something bigger later. That is all it is. It is simple, and it is very hard.

Portugal uses the **euro**. Every euro coin has one side that is the same all over Europe, and one side that belongs to its own country.

Portuguese coins have the old royal seals and castles on them. So a coin from Portugal spends perfectly well in Italy, and you can see where it came from.

FIELD NOTES

Draw something you are saving for. Write how much it costs.

Your turn

- 1 You want something that costs eight euros. You get one euro a week. Colour one coin for each week until you have enough.

How many coins did you colour?

- 2 Write how many weeks it took.

It took me

One side of every euro coin is the same everywhere. The other side is different in every country.

TOPIC 2.6 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

Spend it now. A euro today is a real euro. Next week is not real yet.

**Nella says**

Keep it. In eight weeks you get the thing you actually wanted, instead of eight small things you have already forgotten.

Who is right? Try both for a month and write down which one made you happier.

**LOOK CLOSER**

Look closely at every euro coin from every country, and find the Portuguese one.

● ecb.europa.eu

EXPEDITION 2 · OUR CLASS EXPEDITION

The Field Club shop

Your class is going to run a shop for one afternoon, with real prices and pretend coins, and find out how quickly a want turns into a need when you have only eight euros in your hand.

1**Make the stock**

Every child makes or draws three things to sell, and writes a price on each in euros. Nothing may cost more than five euros.

2**Sort the shelves**

Put everything on two tables: NEEDS on one, WANTS on the other. You will argue about at least four items. Write those four down, because the argument is the lesson.

The whole Field Club is coming with you on this one.

OUR CLASS EXPEDITION CONTINUED

1

Everybody gets eight euros

Exactly eight, in paper coins. Now shop. You cannot have everything, and that is the entire point of the afternoon.

2

Count up, then talk

Which table sold more? Did anybody save their coins and buy nothing? Ask that person why, and listen properly to the answer.

OUR PLAN

Write the four things your class could not agree about. Leave them unagreed.

Your field kit. You will need the pencil and the rubber most of all.

EXPEDITION 2 · LOOKING BACK

How did it go?

What I did	Easy	Getting there	I need help
I named the things nobody can live without	☐	☐	☐
I sorted needs from wants and argued my case	☐	☐	☐
I described a home from another country	☐	☐	☐
I explained what a job is for	☐	☐	☐
I said what a volunteer is	☐	☐	☐
I worked out how long saving would take	☐	☐	☐

Bram

Rufus

Nella

Pip

Tam

Every one of us got something wrong on this expedition. That is how we found out anything at all.

LOOKING BACK CONTINUED

Now I can

- ☐ name four things every person needs to live
- ☐ tell the difference between a need and a want, and explain a tricky one
- ☐ describe a ger, a trullo, a houseboat and a palheiro, and say where each one is
- ☐ explain what jobs are for
- ☐ say what a food bank does
- ☐ say what is unusual about Portugal's firefighters
- ☐ explain what saving means and why it is hard

Portugal

**community**

the people who
share a place

TERM 1 · AUTUMN

The autumn revision expedition

Tick everything you can do already. Leave the rest blank and come back to them: a blank box is a plan, not a failure.

**EXPEDITION 1****Sports and recreation**

- ☐ Count up a class survey and say what it shows
- ☐ Sort games into indoors, outdoors and both
- ☐ Name a traditional game from Ghana, India or Portugal
- ☐ Say how many minutes a day a child should move
- ☐ Explain how goalball is played

TERM 1 REVISION CONTINUED

🚩 🚩 🚩 Six expeditions. One world. Your own two eyes.

EXPEDITION 2**Rich and poor**

- ☐ Tell the difference between a need and a want
- ☐ Name three different kinds of home from three countries
- ☐ Say what a food bank does
- ☐ Explain what saving means

MY TARGET

Which one box do you most want to be able to tick by the end of next week?

TERM 1 · ASSESSMENT

Show what you know

This is not a test with marks. It is a chance to find out what has stuck. Work on your own, in pencil, and be honest. Nobody is counting.

- 1 **Sort it** Write each word under NEEDS or WANTS: water, sweets, a bed, a bicycle, food, a warm coat, a games console, clean air.

- 2 **Name it** Name one traditional game and the country it comes from.

SHOW WHAT YOU KNOW, CONTINUED

🚩 🚩 🚩 A blank box is a plan, not a failure.

- 3 Explain it** A friend says a helmet is fine tipped back. What do you say?

- 4 Draw it** Draw a home that is not like yours, and label one thing about it.

- 5 Argue it** Somebody says the game with the most votes is the best game. Do you agree? Write one sentence either way.

TERM 1 · SCHOOL ACTIVITIES

Out of the classroom

Four things a whole class or a whole school can do this term. They all need somebody to organise them, and that somebody could be you.

1

The Field Club Games afternoon

Teach the game your class invented to another year group. Set up three stations in the hall and rotate every ten minutes.

2

A traditional games morning

Ask families to come in and teach one game from their own childhood. Make a wall map and put a pin in every country a game comes from.

OUT OF THE CLASSROOM, CONTINUED

 An activity with no date never happens.

3**The harvest share**

Collect for a local food bank. Count and weigh what the class brings in, then graph it. Talk about why the counting matters to the people receiving it.

4**A walk to somewhere useful**

Visit a nearby place where people help each other: a fire station, a garden, a library. Take the notebooks.

Choose one. Put a date next to it. An activity with no date never happens.

EXPEDITION 3

The Glowing Window

Where the Field Club looks into a screen and asks who is looking back

3

Screens

Safety

Kindness

Inventing

EXPEDITION 3 · THE GLOWING WINDOW

Digital world

Field Club is here!

It is dark outside the hut and there is one screen on the table, and all five of them are leaning into its glow. Bram wants to know who put the picture there. Rufus wants to press everything. Nella has asked whether the person who made this knows we are watching. Pip has found the wire and is following it. Tam is sitting on the keyboard.

Bram

Rufus

Nella

Pip

Tam

EXPEDITION 3 · THE GLOWING WINDOW

On this expedition you will

- 🚩 Work out what the digital world actually is
- 🚩 Hunt for the computers hidden inside ordinary things in your house
- 🚩 See how a phone helps somebody in Kenya do something a bank used to do
- 🚩 Learn the three online safety rules by heart
- 🚩 Find out why words on a screen can hurt as much as words out loud
- 🚩 Design a machine that does not exist yet

THE BIG QUESTION

Should a screen ever be allowed to decide for you?

Rufus says a screen that chooses for you saves you the bother. Nella says then it is not your choice any more. Bram wants to know who wrote the instructions the screen is following.

**Rufus says***And my question is: who says so?*

TOPIC 3.1

What is the digital world?

• *A screen, a wire, a mast, and a person at each end. That is the whole thing.*

*Do you remember?
How many screens are
switched on in your home
right now?*

Let us find out

The **digital world** is everything that happens inside screens, plus all the wires and signals that join them up, plus the people at both ends. That last part is the part everybody forgets.

And that little square you have been scanning? It was invented in 1994 by **Masahiro Hara** in Japan, to label car parts faster. The letters Q and R stand for **quick response**. It reads in two directions instead of one, which is why it can hold so much more than a shop barcode.

**BOOTS
ON!**

Count the screens you can see from where you are sitting. Then count the people.

Your turn

- 1 What do the letters Q and R stand for? Write them.

Q and R stand for

- 2 Draw the little square. Give it four corners like the real ones, and make your own pattern inside.

DID YOU KNOW?

Masahiro Hara got the idea for the QR code while playing the board game Go, looking at the pattern of black and white stones.

FIELD NOTES

Write one thing a screen lets you do that paper never could.

LOOK CLOSER

Meet the man who invented the little square, and find out what he was trying to solve.

[wikipedia.org](https://en.wikipedia.org/wiki/Little_square)

TOPIC 3.2

Digital devices around us

**BOOTS
ON!**

Look around the room. Point at three things you think have a computer hidden in them.

Let us find out

Here is a surprise. Most of the computers you meet in a day are not shaped like computers at all.

A washing machine has one inside it, deciding how long to spin. A traffic light has one, counting. A microwave, a car, a lift, a digital watch, the till at the shop. Once you start counting them you will find far more than you expected.

FIELD NOTES

Draw the most surprising hidden computer you found at home.

Your turn

- 1 Tick every one that has a computer hidden inside.

a washing machine

a wooden spoon

a traffic light

a bicycle bell

a microwave

a paper book

- 2 Go home and count. Write your total.

In my home I counted

One step further

Ask a grown-up what the oldest machine in your home is, and whether it has a computer in it. Then ask what it had instead.

Six things. Every one of them has a computer inside it. Only one looks like one.

TOPIC 3.3

Technology around the world

- *Three inventions, three countries, and each one solved a problem right where it was.*

Do you remember?

What do you use a phone for?

TOPIC 3.3 CONTINUED

Technology around the world

Let us find out

In **Kenya**, people send money to each other using nothing but a simple mobile phone, through a service called **M-Pesa**. It started in 2007 and now more than forty million people in Kenya use it every month. It works by text message, so you do not need a smart phone and you do not need a bank.

A small **solar lamp** charges in the sun all day and lets a child do their homework after dark, with no wires and no fuel to buy.

And in Switzerland in 1989, **Tim Berners-Lee** invented the World Wide Web at a laboratory called CERN. The very first web page he made is still online today, and you can go and look at it.

A circular icon with a dark blue background and the text "BOOTS ON!" in white, bold, uppercase letters.

Say one thing you could not do at all if there were no electricity today.

Nella says

And how do you think the person in the picture feels about it?

A good idea does not care which country it started in.

TOPIC 3.3 CONTINUED

Your turn

- 1 Match the invention to what problem it solved.

M-Pesa

sharing what scientists knew

a solar lamp

sending money with no bank

the World Wide Web

reading after dark

- 2 Write one problem where you live that a new invention could solve.

Near me, it would help if somebody invented

**LOOK CLOSER**

Look at the very first web page ever made. It is still there, exactly as it was.

● info.cern.ch

FIELD NOTES

Write the invention from this page you think is cleverest, and why.

TOPIC 3.4

Learning with technology

Do you remember?
*What is the best thing
you have ever learned
from a screen?*

- *A screen is at its best when it shows you something the room cannot.*

TOPIC 3.4 CONTINUED

Learning with technology**Let us find out**

A screen can take you inside a volcano, show you a blue whale next to a bus, and let you hear a language spoken on the other side of the world. Paper cannot do any of that.

But paper is better at some things. You can write on it. You can spread six pages out at once. It does not run out of battery. It does not interrupt you.

That is exactly why the little squares in this book only ever take you to things the paper cannot do. Not one of them replaces something the page already does well.

**BOOTS
ON!**

Name one thing a book does better than a screen. Then one thing a screen does better than a book.

A screen is at its best when it shows you something the room cannot.

Your turn

- 1 Write each one under SCREEN or PAPER.

SCREEN is better for

PAPER is better for

hearing a sound · writing your answer · seeing something move · spreading it all out ·
taking it outside · zooming right in

- 2 Which do you prefer for learning? There is no right answer.

I learn best from

A screen is at its best when it shows you something the room cannot.

TOPIC 3.4 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

A screen is better. It can show you anything in the world.

**Nella says**

A book is better. You can write in it, and it is still there when the electricity goes off.

Both of them are right about something. Write down what each of them is right about.

FIELD NOTES

Write one thing you would like to see on a screen that you can never see in real life.

TOPIC 3.5

Staying safe online

Three rules. Learn them so well that you never have to stop and think.

Stop, think, go. In that order, every single time.

TOPIC 3.5 CONTINUED

Staying safe online**Let us find out**

Rule one. **Never tell anybody online** your name, your school or where you live. Not even if they seem friendly. Especially not if they seem friendly.

Rule two. If something on a screen makes you feel **funny inside**, tell a grown-up straight away. You will never, ever be in trouble for telling.

Rule three. A **password** is like a toothbrush. You do not share it, not even with your best friend. That is not being unkind. That is how passwords work.

**BOOTS
ON!**

Say the three rules out loud without looking. Then check.

Three rules, one traffic light.

Your turn

- 1 Write the three rules in your own words.

1.

- 2 Somebody you have never met asks which school you go to. What do you do? Circle one.

tell them

do not answer and tell a grown-up

ask them first

LOOK CLOSER

Hear the story of Smartie the Penguin, who learns exactly these rules the hard way.

● childnet.com

FIELD NOTES

Write the name of the grown-up you would tell. Then go and tell them you wrote it.

TOPIC 3.6

Being kind online

- *There is always somebody at the other end. Always.*

Do you remember?

How did it feel the last time somebody said something unkind to you?

TOPIC 3.6 CONTINUED

Being kind online**Let us find out**

Here is the thing that is easy to forget when you are typing. There is a real person at the other end, holding a real screen, with a real face.

Words on a screen can hurt just as much as words said out loud. Sometimes more, because they do not disappear. Somebody can read them again tomorrow.

The test is simple. Before you send it, ask yourself: would I say this to their face, with their mum standing next to them? If not, do not send it.

For the teacher: this topic is what the curriculum calls digital citizenship.

**BOOTS
ON!**

Think of one kind thing you could type to somebody today. Do not say it out loud. Just decide.

There is always somebody at the other end. Always.

Your turn

1 Which of these would you be happy to receive? Tick them.

well done on your picture

that was rubbish

do you want to play

nobody likes you

2 Somebody is being unkind to your friend online. Write what you would do first.

First I would

BIG THINKING

If you say something unkind out loud, it is gone in a second. If you type it, it can still be there next year. Does that make typing it worse?

LOOK CLOSER

A grown-up can find out exactly how to help if somebody is being unkind online.

● internetmatters.org

FIELD NOTES

Write one rule your class could agree on for being kind on a screen.

TOPIC 3.7

Screen time control

Let us find out

People will tell you a number of hours. We are not going to, because the world's doctors have not agreed on one for children of your age, and we are not going to invent one.

What they do say is this, and it is more useful anyway: the best thing to do with screen time is to **swap** some of it for moving about. Not delete it. Swap it.

Remember that sixty minutes of moving from Expedition 1? That is where the swap goes.

Not a rule about hours. A rule about swapping.

TOPIC 3.7 CONTINUED

Screen time control

- *Not a rule about hours. A rule about swapping.*

Do you remember?

What do you do straight after you put a screen down?

**BOOTS
ON!**

Guess how long you were on a screen yesterday. Now ask a grown-up what they think. Compare.

**DID YOU KNOW?**

Nobody has ever invented a screen that makes your legs stronger. That is still the only job legs have.

Your turn

- 1 Draw your own day clock. Colour the screen slice one colour and the moving slice another.

- 2 What could you swap this week? Write the swap.

I could swap

TOPIC 3.7 CONTINUED

One day, cut into slices. Move the pink slice and the orange one about, and see what happens.

FIELD NOTES

Write one thing you would rather do than look at a screen, if somebody reminded you.

TOPIC 3.8

Designing the technology of the future

Every machine that exists was once just somebody's drawing.

Do you remember?
What is the cleverest machine you have ever seen?

Let us find out

Here is a thought worth keeping. Every single machine in the world was once nothing but somebody's drawing on a piece of paper.

And every one of them started with a **problem**, not with an idea. Masahiro Hara had a problem: car parts took too long to scan. Grant Gibbs had a problem: water is heavy. Tim Berners-Lee had a problem: scientists could not find each other's work.

So an inventor does not begin by being clever. An inventor begins by noticing something annoying.

BOOTS
ON!

Name one thing that annoys you every single day. That is your problem. Keep it.

Your turn

- 1 Write the problem your invention will solve.

My invention solves this problem:

- 2 Draw your invention. Label two parts and say what each part does.

- 3 Who does it help most?

It helps

Every machine that exists was once just somebody's drawing.

TOPIC 3.8 CONTINUED

One step further

Show your drawing to somebody who is not in your class. Ask them one question: what would go wrong with this? Then write their answer down. That is what real inventors do next.

FIELD NOTES

Write down one thing that would go wrong with your invention. Do not fix it yet.

**Rufus says**

Before you turn over: what is the one question nobody in the room has asked yet?

EXPEDITION 3 · OUR CLASS EXPEDITION

The Field Club invention fair

Your class is going to hold an invention fair, and the rule is unusual: you are marked on the problem, not on the machine.

1**Find a real problem**

Spend one whole day carrying your notebook and writing down every annoying thing you notice. Do not think about solutions yet. Collect at least five problems.

2**Pick the one that matters most**

Choose the problem that affects the most people, not the one with the best idea attached. Write down who it affects.

The whole Field Club is coming with you on this one.

OUR CLASS EXPEDITION CONTINUED

1

Draw the machine

Draw it big, on one sheet. Label every part. Do not worry about whether it could really be built.

2

Hold the fair, and ask the hard question

Set the drawings out. Every visitor must ask each inventor the same question: what would go wrong with this?
Inventors write the answers on the back.

OUR PLAN

Write the five problems you collected. Circle the one you chose.

Your field kit. You will need the pencil and the rubber most of all.

EXPEDITION 3 · LOOKING BACK

How did it go?

What I did	Easy	Getting there	I need help
I explained what the digital world is	☐	☐	☐
I found hidden computers in ordinary things	☐	☐	☐

not exist until
somebody made it

**problem**

the annoying thing
an invention fixes

**screen time**

the time you spend
looking at a screen

**kind**

treating somebody
as a real person

EXPEDITION 4

The Talking Wood

Where the Field Club learns that talking and being understood are two different things

4

Words

Listening

Feelings

Signals

EXPEDITION 4 · THE TALKING WOOD

Improving communication

Field Club is here!

They are in a clearing in a birch wood and all five are talking at once, which is the problem. Rufus has both paws up explaining. Nella has one ear turned right forward and has not said a word. Tam is cupping his paws and shouting to somebody a long way off. Pip has raised one small paw and is waiting. Bram is nodding, which could mean anything.

Bram

Rufus

Nella

Pip

Tam

EXPEDITION 4 · THE TALKING WOOD

On this expedition you will

- 🚩 Work out how many ways there are to send a message
- 🚩 Discover that listening and waiting for your turn are not the same thing
- 🚩 Say hello with your hands, and spell your own name
- 🚩 Find better words for big feelings
- 🚩 Meet a fifteen year old who invented reading with your fingertips
- 🚩 Trace a message from your mouth to your friend's ear, across the world

THE BIG QUESTION

Can you understand somebody whose language you do not speak?

Rufus says of course not, you would not understand a word. Nella says she once spent a whole afternoon playing with a girl in Spain and neither of them spoke the other's language, and it was one of her best afternoons. Bram wants to know what they actually did.

Rufus: One more question, then I promise I will stop.

TOPIC 4.1

What is communication?

- *Every one of these is a message. Only two of them use words.*

Do you remember?

How do you tell somebody you are hungry without saying it?

TOPIC 4.1 CONTINUED

What is communication?

Let us find out

Communication is getting something out of your head and into somebody else's. That is all it is, and it is the hardest thing people do.

You can do it with words, with your face, with your hands, with a picture, with a drum, with a light, with a flag, with a smell of dinner cooking.

And there is a great deal of it going on. There are more than **seven thousand** languages being spoken in the world right now.

**BOOTS
ON!**

Send a message to somebody across the room without any words or sounds. Did it arrive?

Every one of these is a message. Only two of them use words.

Your turn

- 1 Count the ways of sending a message in the picture. Write your total.

I counted

- 2 Write the way you use most often.

I mostly communicate by

DID YOU KNOW?

There are more than seven thousand languages alive in the world today, and every single year a few of them fall silent for ever.

FIELD NOTES

Write one thing you find hard to put into words.

TOPIC 4.2

Speaking and listening

Do you remember?

Has anybody ever said something to you and you did not hear a word of it?

- *One of these children is listening. The other is waiting for a gap.*

TOPIC 4.2 CONTINUED

Speaking and listening**Let us find out**

Here is the difference, and it matters more than almost anything else in this book. **Listening** is not the same as waiting for your turn to talk.

You know you were listening if you can say the other person's idea back to them, in your own words, and they say yes, that is what I meant.

That is Nella's job in the Field Club, and it is the hardest job of the five.

**BOOTS
ON!**

Turn to the person next to you. They talk for thirty seconds. Then you say their idea back. No adding your own.

One of these children is listening. The other is waiting for a gap.

Your turn

- 1 Play say it back. Your partner tells you their favourite meal. Now write it here, in their words, not yours.

My partner said

- 2 Did you get it right? Ask them. Circle one.

yes, exactly

nearly

not really

One of these children is listening. The other is waiting for a gap.

TOPIC 4.2 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

If I heard the words, I listened. What else is there?

**Nella says**

You heard them. You were already thinking about what you wanted to say next. That is different.

Try it. Ask a friend to tell you something, then say it back. Write down whether you managed it.

One step further

Try this at home. When somebody tells you something, say it back before you reply. Notice their face when you do.

FIELD NOTES

Write one thing somebody told you today that you actually remember.

TOPIC 4.3

Verbal and non-verbal communication

Half of what you say every day, you say without opening your mouth.

With words

I say hello.

I ask a question.

I say thank you.

Without words

I wave.

I smile.

I nod my head.

Two columns. Both of them are communication.

TOPIC 4.3 CONTINUED

Verbal and non-verbal communication**Let us find out**

With words is called **verbal**. Without words is called **non-verbal**. You do both all day long.

A wave, a smile, a nod, folded arms, a shrug, turning your back. Every one of them is a message, and most of them arrive faster than words do.

And here is something important. **Portuguese Sign Language** is a full language, with its own grammar, used by deaf people all over Portugal. It is not Portuguese done with hands. Portugal thought it mattered enough to write it into the constitution in 1997.

**BOOTS
ON!**

Show these with no words at all: I am pleased. I am not sure. Stop.

Same message, two routes.

Your turn

- 1 Draw three faces: proud, nervous, left out. No words allowed.

- 2 Learn to spell your own name with your hands. Then write how many letters you had to learn.

My name has

LOOK CLOSER

Learn to spell your own name with your hands, using a real fingerspelling chart.

● british-sign.co.uk

FIELD NOTES

Write one thing your face does that gives you away.

TOPIC 4.4

Feelings and communication

- *Cross is not the only word. There are about forty better ones.*

Do you remember?

What word do you use when you do not know which word to use?

TOPIC 4.4 CONTINUED

Feelings and communication

Let us find out

When a feeling is very big, it is hard to find a word for it, and so people reach for the nearest one. Usually that is cross, or sad, or fine.

But putting a big feeling into **exactly** the right word makes it easier to carry. That is not a saying. It genuinely works.

Try these instead of cross: **disappointed, left out, embarrassed, worried, jealous, frustrated**. Each one is a different feeling, and knowing which is which is a real skill.

BOOTS
ON!

Say a feelings word that is not happy, sad or cross. Go round the whole class without repeating one.

Cross is not the only word. There are about forty better ones.

Your turn

- 1 Match the feeling to when you might have it.

disappointed

everybody was picked but me

left out

the trip was cancelled

frustrated

I have tried it nine times

nervous

it is my turn next

- 2 Write about a time you felt something and could not name it.

Once I felt

LOOK CLOSER

Watch somebody putting a big feeling into words, and see how much it helps.

[bbc.co.uk](https://www.bbc.co.uk)

FIELD NOTES

Write the feeling you have most often. Then write a better word for it.

TOPIC 4.5

Communication around the world

Let us find out

Louis Braille was born in France in 1809 and lost his sight as a very small child. He was about fifteen years old when he worked out a way of reading with your fingertips, using patterns of raised dots. It is used all over the world today and it has hardly changed.

In West Africa there is a drum called a **dundun**, shaped like an hourglass, with cords down its sides. Squeeze the cords and the note changes. A skilled player can make it copy the rise and fall of a person speaking, so the drum really does talk.

And before telephones, people sent messages as long and short beeps called **Morse code**. Three short, three long, three short means help me.

A drum, a set of raised dots, and a pattern of beeps. All three are reading.

TOPIC 4.5 CONTINUED

Communication around the world

- A drum, a set of raised dots, and a pattern of beeps. All three are reading.

Do you remember?

How would you send a message to somebody a whole valley away?

**BOOTS
ON!**

Tap out three short, three long, three short on the table.
That is SOS.

**DID YOU KNOW?**

Louis Braille was about fifteen when he invented his alphabet. Almost nothing about it has needed changing in two hundred years.

Your turn

- 1 Write your own initials in dots, three dots high and two wide, like braille.

- 2 How old was Louis Braille when he invented it?

He was about

TOPIC 4.5 CONTINUED

Braille came from France. The talking drum came from West Africa. Both travelled everywhere.

LOOK CLOSER

Hear a talking drum from West Africa actually copying the sound of a voice.

[wikipedia.org](https://www.wikipedia.org)

FIELD NOTES

Invent a code for your class with three signals. Write what each one means.

TOPIC 4.6

Solving problems through communication

BOOTS ON!

Turn one complaint into a want. Somebody took my pencil becomes what?

Let us find out

Most arguments end faster if somebody says what they **want**, instead of what is wrong with the other person.

Compare these two.

You always grab it and you never share and you are selfish.

I felt left out when the hoop went past me. I would like a turn next.

The second one is harder to say and much harder to argue with. Name the feeling, name the want, ask for the change.

FIELD NOTES

Write a sentence you could have used to end your last argument sooner.

Your turn

- 1 Turn each complaint into a want.

You never let me go first.

You are being annoying.

- 2 Write the three steps in order.

1. Name the

Two children, one hoop, and a sentence that ended it.

TOPIC 4.6 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

*Just say who started it.
Then everybody knows
whose fault it was.*

**Nella says**

*Knowing whose fault it was
does not get the hoop
shared. Saying what you
want does.*

Which one would end your last argument faster? Write your answer.

**LOOK CLOSER**

Watch what a good friend actually does when there is a disagreement.

● bbc.co.uk

TOPIC 4.7

Digital communication

It weighed as much as a big bag of sugar, and it changed everything.

Do you remember?

How does a message get from your phone to your friend's?

Let us find out

On a New York street in 1973, an engineer called **Martin Cooper** made the first ever mobile phone call. The phone weighed about two kilograms, which is as much as a big bag of sugar.

And your message does not fly straight to your friend. It goes up to a **mast**, along a wire, sometimes a wire that lies on the bottom of the sea, then up to another mast near your friend, and only then to their phone. All of that in less than a second.

BOOTS
ON!

Hold up something that weighs two kilograms. Now imagine ringing somebody with it.

Your turn

- 1 Number these in the right order: **a mast near my friend, my phone, a wire, my friend's phone, a mast near me.**

- 2 What did the first mobile phone weigh?
It weighed about

LOOK CLOSER

Meet the man who made the very first mobile phone call, and see the phone he used.

[wikipedia.org](https://www.wikipedia.org)

Five steps, less than one second. The distance is not what makes it slow.

FIELD NOTES

Write one message you would send right now if you could send it anywhere.

EXPEDITION 4 · OUR CLASS EXPEDITION

The Field Club silent morning

For one whole morning, nobody in your class says a single word. Not one. You will find out things about communication that no lesson could tell you.

1

Agree the signals first

Before the silence starts, invent and write up signals for: yes, no, I do not understand, help, I have finished, and I need the toilet. Everybody must agree.

2

Go silent

Twenty minutes at first. Carry on with normal work. When you want to say something, you must find another way, and you must not give up and speak.

The whole Field Club is coming with you on this one.

OUR CLASS EXPEDITION CONTINUED

1

Write it down while you can still feel it

The moment it ends, write three things: what was easy, what was impossible, and one moment when you were completely misunderstood.

2

Then talk about who found it hardest

Some people will have found it awful and some will have found it restful. Ask both kinds why. Do not decide which kind is right.

OUR PLAN

Write your class signals here, before you start.

Your field kit. You will need the pencil and the rubber most of all.

EXPEDITION 4 · LOOKING BACK

How did it go?

What I did	Easy	Getting there	I need help
I named many ways of sending a message	☐	☐	☐
I said somebody's idea back to them correctly	☐	☐	☐
I showed a feeling with no words at all	☐	☐	☐
I used a better word than cross	☐	☐	☐
I spelled my name with my hands	☐	☐	☐
I turned a complaint into a want	☐	☐	☐

**frustrated**

you have tried and
tried and it will not
work

TERM 2 · SPRING

The spring revision expedition

Tick everything you can do already. Leave the rest blank and come back to them: a blank box is a plan, not a failure.

**EXPEDITION 3****Digital world**

- ☐ Say what the digital world is
- ☐ Name three devices with a computer hidden inside
- ☐ Say the three online safety rules from memory
- ☐ Explain why words on a screen can hurt
- ☐ Say who invented the QR code

TERM 2 REVISION CONTINUED

🚩 🚩 🚩 Six expeditions. One world. Your own two eyes.

EXPEDITION 4**Improving communication**

- ☐ Give three ways of communicating without any words
- ☐ Spell your own name in a manual alphabet
- ☐ Say who Louis Braille was and how old he was
- ☐ Explain how a message gets to a friend far away

MY TARGET

Which one box do you most want to be able to tick by the end of next week?

TERM 2 · ASSESSMENT

Show what you know

Pencil only. Work alone. If you get stuck, write down what you are stuck on: that is useful information and it is not a wrong answer.

- 1 Remember it** Write the three online safety rules. No looking back.

- 2 Show it** Draw a face for each feeling: proud, nervous, left out.

SHOW WHAT YOU KNOW, CONTINUED

🚩 🚩 🚩 A blank box is a plan, not a failure.

- 3 Explain it** Somebody online you do not know asks for your school's name. Write exactly what you do.

- 4 Trace it** Number these in order: my friend's phone, a mast, my phone, a wire.

- 5 Argue it** Is a message typed with your thumbs as kind as a message said out loud? Write one sentence.

TERM 2 · SCHOOL ACTIVITIES

Out of the classroom

Four things a whole class or a whole school can do this term. They all need somebody to organise them, and that somebody could be you.

1

Silent morning

For twenty minutes the whole class communicates without speaking. Then talk about what was easy, what was impossible, and who found it hardest.

2

Invent a signal

Groups design a signal that works across a whole playground with no sound. Test them at distance, then vote for the clearest.

OUT OF THE CLASSROOM, CONTINUED

🚩 🚩 🚩 An activity with no date never happens.

3**A sign language visit**

Invite a signer to teach the class to fingerspell their own names and say hello, please and thank you.

4**The screen swap**

For one week, every child swaps twenty minutes of screen time for twenty minutes of moving. Chart it. Discuss honestly what was hard.

Choose one. Put a date next to it. An activity with no date never happens.

EXPEDITION 5

The Long Haul

Where the Field Club follows a banana all the way home

5

Journeys

Cargo

Safety

Air

EXPEDITION 5 · THE LONG HAUL

Moving goods and people

Field Club is here!

They have a handcart now, piled with parcels tied up with string, and they are pushing it along a country road. Bram is checking the wheel. Rufus wants to know who packed the parcels and what is inside them. Nella is watching a train cross a viaduct far away and wondering who is on it. Pip has found a label that fell off. Tam is riding on top.

Bram

Rufus

Nella

Pip

Tam

EXPEDITION 5 · THE LONG HAUL

On this expedition you will

- 🚩 Count every way you have travelled this week, and be surprised
- 🚩 Follow a banana all the way from a farm to your fruit bowl
- 🚩 Sort everything that moves into land, water and air
- 🚩 Learn the crossing drill so well you never have to think about it
- 🚩 Ride a Lisbon tram, a bullet train, a floating train and a cable car
- 🚩 Work out which way of travelling is kindest to the air

THE BIG QUESTION

Should we move things across the world just because we can?

Rufus says of course we should, it means you can eat a banana in January. Nella says somebody grew that banana and she wants to know what they got for it. Bram says the ship burned fuel all the way, and asks who pays for that.

**Rufus says***And my question is: who says so?*

TOPIC 5.1

Ways we travel

● *Every one of these counts. Even the stairs.*

Do you remember?

How did you get to school today? And the day before?

TOPIC 5.1 CONTINUED

Ways we travel**Let us find out**

You have already travelled in at least three different ways this week, and probably more than you think.

Walking counts. So does a bicycle, a car, a bus, a tram, a train, a boat, an aeroplane, a lift and an escalator. Most people forget the last three, and forget walking altogether, which is the strangest thing of all: it is the one everybody does every day.

**BOOTS
ON!**

Count on your fingers every way you have travelled since Monday. Say the total.

Every one of these counts. Even the stairs.

Your turn

1 Tick every way you have travelled this week.

walking

bicycle

car

bus

tram

train

boat

aeroplane

lift

2 Which way do you use most? Write it.

I mostly travel by

One step further

Ask three grown-ups how they got to school when they were seven. Write down all three answers. At least one will surprise you.

FIELD NOTES

Draw your own journey to school. Mark the part you like best with a star.

Rufus says

Before you turn over: what is the one question nobody in the room has asked yet?

TOPIC 5.2

Moving goods

A banana in a Portuguese shop has probably travelled further than anybody in your class.

Five steps, about eight thousand kilometres, and roughly two weeks.

TOPIC 5.2 CONTINUED

Moving goods

Let us find out

In 1956 a lorry driver called **Malcom McLean** had an idea that sounds boring and changed the world. He put fifty eight big metal boxes on a ship, all the same size.

Because every box was the same, a crane could lift them straight off the ship and onto a lorry without anybody unpacking anything. Loading a ship went from taking weeks to taking hours.

That is why more than **eight out of every ten** things bought and sold between countries now travel by ship.

BOOTS
ON!

Look at the label on something in your bag. Which country does it name?

Same size, every time. That was the whole invention.

Your turn

- 1 Choose something in your classroom and find out where it came from. Write the country.

My object came from

- 2 Draw its journey in four steps, like the strip above.

DID YOU KNOW?

Before Malcom McLean's boxes, loading one ship could take weeks. Afterwards it took hours. He was not an engineer. He drove a lorry.

LOOK CLOSER

See how one plain steel box changed the way the whole world buys and sells.

[wikipedia.org](https://www.wikipedia.org)

FIELD NOTES

Write the furthest-travelled thing you can find in your own home.

TOPIC 5.3

Land, water and air transport

- *Land, water, air. And a few awkward ones that refuse to choose.*

Do you remember?

Name something that travels on water. Now something that travels in the air.

TOPIC 5.3 CONTINUED

Land, water and air transport

Let us find out

Everything that moves goes by **land**, by **water** or by **air**. That is the whole list.

But some things will not sort neatly, and those are the interesting ones. A seaplane belongs to water and air. A hovercraft floats on a cushion of air above water. In Venice the ambulance is a boat. In La Paz people go to work through the air on a wire.

When something will not fit your boxes, do not force it. Make a new box and write why.

BOOTS
ON!

Say one thing that goes by land, one by water and one by air. Then one that goes by two of them.

Land, water, air. And a few awkward ones that refuse to choose.

LAND	WATER	AIR

Three columns. Write your answers into the dashed boxes.

Your turn

- Write each one into the right column above: **tram, ferry, aeroplane, bicycle, gondola, cable car, lorry, hot air balloon.**
- Which one was hardest to place? Write it and say why.
The hardest was

FIELD NOTES

Invent something that travels on all three. Draw it.

TOPIC 5.4

Safe travel

Do you remember?

Where is the safest place near your school to cross a road?

- *Stop. Look. Listen. Think. And keep looking while you walk.*

Let us find out

The drill is **stop, look, listen, think**. Then you cross, and here is the part almost everybody forgets: you **keep looking while you walk**. The road does not stop changing just because you have stepped onto it.

In a car, a seatbelt only works if it lies flat across your hips and your shoulder. Never under your arm, and never behind your back. And you use a child seat until you are big enough for the belt to sit properly without one.

BOOTS ON!

Say the four words of the drill. Now say the fifth thing everybody forgets.

Your turn

- 1 Write the drill in order.

Stop,

- 2 Circle the ones that are safe.

belt across your hips

belt under your arm

crossing at a crossing

running out between parked cars

BIG THINKING

Grown-ups made all these rules for children. Rufus wants to know who checks that the grown-ups follow them too. Watch for one week and find out.

LOOK CLOSER

A grown-up can print free road safety games and posters to use with you.

● [think.gov.uk](https://www.think.gov.uk)

FIELD NOTES

Draw the road nearest your school. Mark the safest crossing place with a star and the most dangerous with an X.

TOPIC 5.5

Transport around the world

Let us find out

In **Lisbon**, little yellow trams built in the 1930s still climb streets far too steep and too narrow for a bus. They were given new brakes and motors in the 1990s but they kept their wooden bodies, because nothing modern is small enough to fit.

In **Shanghai** there is a train that floats above its track on magnets and has run at four hundred and thirty one kilometres an hour. **Japan**'s bullet train started running back in 1964.

And in **La Paz** in Bolivia, the city is so steep that people go to work in cable cars hanging above the rooftops. There are ten lines and thirty two stations.

A tram from the 1930s, a train that floats, and a cable car full of people going to work.

TOPIC 5.5 CONTINUED

Transport around the world

- *A tram from the 1930s, a train that floats, and a cable car full of people going to work.*

Do you remember?

What is the most unusual way you have ever travelled?

**BOOTS
ON!**

Which of these three would you most like to ride? Say why in one sentence.

**DID YOU KNOW?**

In the Netherlands there are more bicycles than there are people: about twenty two million bicycles for seventeen million people.

Your turn

1 Match each one to its city.

a yellow tram

Shanghai

a floating train

La Paz

cable cars to work

Lisbon

2 Why does Lisbon still use trams from the 1930s?

Lisbon still uses them because

TOPIC 5.5 CONTINUED

Five places, five answers to the same question: how do we get about here?

**LOOK CLOSER**

See the cable cars that people in La Paz ride to work, high above the city.

● [wikipedia.org](https://www.wikipedia.org)

FIELD NOTES

Write which one you would ride first, and what you would look at out of the window.

TOPIC 5.6

Helping the environment

**BOOTS
ON!**

Look at the bar chart. Which bar is longest? Which is shortest?

Let us find out

Walking and **cycling** put almost nothing into the air. A car with only one person in it puts out the most of any way of travelling, for each person carried. A bus or a train shares its fuel between everybody on board, so each person's share is much smaller.

In some towns, children now cycle to school all together in a long supervised line called a **bike bus**. It has a route and a timetable and stops along the way, exactly like a real bus, except that it is made of bicycles.

FIELD NOTES

Write one journey your family makes by car that could be walked instead.

Your turn

- 1 Put these in order, kindest to the air first: **car with one person, walking, bus, bicycle.**

1.

- 2 Could your class start a bike bus or a walking bus? Write who you would have to ask.

We would have to ask

A bike bus. Same children, same school, one car fewer each.

TOPIC 5.6 CONTINUED

Grams of pollution for each person, for each kilometre travelled. Walking and cycling are so low that the bar barely shows.

**LOOK CLOSER**

See real children cycling to school together in a bike bus.

● [wikipedia.org](https://www.wikipedia.org)

TOPIC 5.7

Community helpers and transport

Three vehicles. Not one of them is going anywhere for itself.

Do you remember?

Which special vehicles have you heard the siren of this month?

Let us find out

An ambulance, a fire engine and a refuse lorry are all doing a job for everybody at once. Nobody owns them. Everybody needs them.

And remember what you found out in Expedition 2: here in Portugal, the fire engine is very often crewed by **volunteers** who have left another job to come.

When you hear a siren, the rule is simple and it is the law: everybody moves out of the way. That is the whole of society agreeing about something for two seconds.

BOOTS
ON!

Make the sound of a siren, then say who might be inside that vehicle.

Your turn

1 Match each vehicle to its job.

ambulance

keeps the street clean

fire engine

takes you to hospital

refuse lorry

puts out fires

school bus

gets everybody to school

2 Why must everybody move out of the way for a siren?

Everybody moves because

One step further

Find out where your nearest bombeiros station is. Write down how far it is from your school.

FIELD NOTES

Draw a vehicle that helps everybody. Write one thing it could not do without.

Rufus says

Before you turn over: what is the one question nobody in the room has asked yet?

TOPIC 5.8

Design future transport

- *Before somebody built the first cable car, everybody in that city walked up the hill.*

Do you remember?

What would you change about the way you get to school?

TOPIC 5.8 CONTINUED

Design future transport**Let us find out**

Every way of travelling was invented to solve one particular problem in one particular place.

La Paz is enormously steep and very high up, so somebody built cable cars. Venice is made of water, so the ambulance is a boat. Lisbon's streets are narrow and steep, so the trams stayed small.

So an inventor of transport starts by looking very hard at one place, not by thinking of a clever machine.

**BOOTS
ON!**

Look out of the window. What makes getting about difficult right here?

Before somebody built the first cable car, everybody in that city walked up the hill.

Your turn

- 1 Write the transport problem where you live.

Near me, the problem is

- 2 Design your transport. Draw it, and label how many people it carries and what makes it go.

- 3 Does it go by land, water or air? Circle one.

land

water

air

more than one

Before somebody built the first cable car, everybody in that city walked up the hill.

TOPIC 5.8 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

Build the fastest one. Fast is what transport is for.

**Nella says**

Build the one that carries the most people, and the ones who cannot walk far. Fast is no use if it leaves people behind.

Your machine cannot be both. Choose one, and write down what you gave up.

FIELD NOTES

Write who your transport helps most, and who it does not help at all.

EXPEDITION 5 · OUR CLASS EXPEDITION

The whole school journey survey

Your class is going to find out how every single person in your school gets there, put it on one enormous graph, and then do something about what you find.

1

Decide what counts

Agree your categories before you start: walk, cycle, scooter, bus, car, tram, train, more than one way. Write them big. Changing them halfway ruins the data.

2

Collect it properly

Send two children to every class with a tally sheet. Everybody makes their own mark. Nobody guesses on anybody else's behalf.

Your field kit. You will need the pencil and the rubber most of all.

OUR CLASS EXPEDITION CONTINUED

1

Build the graph in the hall

One enormous graph, one square per person, coloured in by that person. It should cover a whole wall by the end.

2

Find the one thing you can change

Look at the graph and find one journey that many people make by car and could make another way. Write a real letter to whoever could help, and post it.

OUR PLAN

Write your categories here, before you start collecting.

The whole Field Club is coming with you on this one.

EXPEDITION 5 · LOOKING BACK

How did it go?

What I did	Easy	Getting there	I need help
I counted the ways I travel	☐	☐	☐
I traced a banana from a farm to a fruit bowl	☐	☐	☐
I sorted transport into land, water and air	☐	☐	☐
I said the crossing drill from memory	☐	☐	☐
I described transport in three other countries	☐	☐	☐
I said which way of travelling is kindest to the air	☐	☐	☐

Bram

Festivals

6

EXPEDITION 6 · THE HOME FIRE

Family, friends, community and culture

Field Club is here!

The expedition is over and they are home. There is a fire, and a lantern hanging from a branch, and a long table with bowls on it and paper bunting strung above. Bram has put the map away at last. Rufus is asking who made the food. Nella is listening to somebody's story. Pip has laid out everything he collected all year in a neat row. Tam is asleep, finally.

Bram

Rufus

Nella

Pip

Tam

EXPEDITION 6 · THE HOME FIRE

On this expedition you will

- 🚩 Draw your own family, whatever shape it is
- 🚩 See that families all over the world look different and are all real families
- 🚩 Work out what actually makes somebody a good friend
- 🚩 Find out who keeps your own neighbourhood working
- 🚩 Learn about four celebrations from four countries
- 🚩 Practise asking why instead of why not

THE BIG QUESTION

What makes a group of people into a community?

Rufus says a community is just people who live near each other. Nella says she knows neighbours who have never spoken and a friend three countries away who would come tomorrow. Pip thinks it is about who turns up when something goes wrong.

**Rufus says***And my question is: who says so?*

TOPIC 6.1

My family

Every family tree looks different. That is not a problem to be explained. It is just true.

One family tree. Yours will have different branches, and that is the point.

TOPIC 6.1 CONTINUED

My family**Let us find out**

A **family** is the people who look after you and belong to you. Some are big, some are small. Some live in one house and some live in three countries.

You have a right to your own **name**, and to know which family you belong to. It is written down in the same agreement that gave you the right to play.

So when you draw your family tree, draw yours. Not the one in the picture. Add branches, take them away, put somebody in twice if that is how it works.

**BOOTS
ON!**

Say the name of one person in your family who does not live with you.

Add your own branches.

Your turn

1 Draw your own family tree in the dashed box on the diagram.
Put yourself at the bottom.

2 Write who taught you something important.

I was taught something important by

LOOK CLOSER

Find the rule that says every child has a right to a name and a family.

● [unicef.org](https://www.unicef.org)

FIELD NOTES

Write one thing your family does that no other family does in quite the same way.

TOPIC 6.2

Different families around the world

- *Six families. Six shapes. Six real families.*

Do you remember?

Is your family the same shape as your best friend's family?

TOPIC 6.2 CONTINUED

Different families around the world**Let us find out**

Families come in every shape there is, and every one of them is a real family.

Some children live with a grandmother. Some live with one parent. Some have two mothers or two fathers. Some are adopted, or fostered, and some live with an aunt while a parent works in another country. Some have eleven cousins in the same street and some have none anywhere.

There is a rule about this too. Wherever it is possible, a child has the right to live with their family.

BOOTS ON!

Look at the picture. Point at the family that is most like yours. Now point at the one that is least like yours.

Six families. Six shapes. Six real families.

Your turn

1 Tick every one that is a real family.

a child and a grandmother

one parent and two children

two mothers and a baby

an adopted brother

a huge family in one house

a family in two countries

If you ticked all six, you have understood this page.

2 What do all families have in common? Write one thing.

Every family has

Six families. Six shapes. Six real families.

TOPIC 6.2 CONTINUED

FIELD NOTES

Draw your family doing something ordinary together.

FROM ANOTHER CHAIR

Rufus says

A family is a mother, a father and children. That is what the word means.

Nella says

My friend lives with her grandmother and they are a family. Words have to fit the people, not the other way round.

Nella is right about the people. Rufus is right that words matter. So write your own definition of family, one that fits everybody in your class.

TOPIC 6.3

Being a good friend

Do you remember?

*What did a friend do for
you this week?*

- *Nobody is watching these two.
That is when it counts.*

TOPIC 6.3 CONTINUED

Being a good friend**Let us find out**

A good friend is somebody who is still kind to you **when nobody else is watching**. That is the whole test, and it is a hard one.

Real friends share, take turns, tell you the truth kindly, say sorry and mean it, and sometimes let you choose the game even when they do not want to play it.

And here is the part people find hardest: a good friend can disagree with you and still be your friend. Rufus and Nella disagree in every single expedition in this book, and they have never once stopped being friends.

**BOOTS
ON!**

Say one thing a good friend does. Go round the class without repeating.

Nobody is watching these two. That is when it counts.

Your turn

1 Circle what a good friend does.

shares

only plays their game

says sorry

tells your secrets

can disagree with you

2 Write one thing you will do to be a better friend this week.

This week I will

DID YOU KNOW?

Rufus and Nella disagree in every single expedition in this book, and they are still in the same club.

LOOK CLOSER

Watch what makes somebody a good friend, and see if you agree with all of it.

[bbc.co.uk](https://www.bbc.co.uk)

FIELD NOTES

Write the name of somebody who was kind to you when nobody was watching.

TOPIC 6.4

Our school and local community

• *A junta de freguesia looks after the smallest patch of all: yours.*

Do you remember?

Who cuts the grass in the park near you? Do you actually know?

Let us find out

Here in Portugal, the smallest local council is called a **junta de freguesia**. It looks after your own neighbourhood: the paths, the little gardens, the community hall, and helping families who need it.

And Portugal has something remarkable. There are about four hundred and eighty fire stations in the country, and nearly all of them are run by **volunteers** who leave other jobs and come when the siren goes.

BOOTS
ON!

Name three people who keep your neighbourhood working. You may not know their names, so describe their jobs.

Your turn

- 1 Write three people who look after where you live.

I,

- 2 Find out the name of your own freguesia. Write it here.

My freguesia is called

LOOK CLOSER

Find out about volunteer fire brigades, like Portugal's bombeiros voluntarios.

● [wikipedia.org](https://www.wikipedia.org)

FIELD NOTES

Write one thing you would ask your junta de freguesia to do.

TOPIC 6.5

Working together to build a caring community

**BOOTS
ON!**

Name something at your school that everybody uses.
Now name who tidies it.

Nobody owns this garden. Everybody who digs in it does.

TOPIC 6.5 CONTINUED

Working together to build a caring community

Let us find out

A **community garden** belongs to everybody who digs in it. So does a shared bookshelf, a village hall, a football pitch, a beach.

And here is the difficulty with shared things, which is worth knowing at seven: if everybody uses them and nobody looks after them, they stop working. So shared things need shared **rules**, and somebody has to be willing to do the unglamorous part.

That is what the bombeiros do.
That is what the food bank volunteers do. That is what whoever puts the chairs away at your school does.

FIELD NOTES

Write one shared thing near you that needs looking after.

Your turn

- 1 Write three rules for a shared garden.

1.

- 2 What is one job at your school that everybody benefits from and nobody notices?

Nobody notices that somebody

Nobody owns this garden. Everybody who digs in it does.

TOPIC 6.5 CONTINUED**One step further**

Choose one shared place in your school. Look after it for a whole week without telling anybody you are doing it. Then write down whether anybody noticed.

BIG THINKING

If a shared thing needs looking after and nobody is paid to do it, who should? The person who uses it most? Everybody in turn? Or whoever notices first?

TOPIC 6.6

Celebrations and traditions

Let us find out

In **Mexico**, at Dia de Muertos, families build a table covered in marigolds, candles, photographs and the favourite food of people they loved. It is a happy festival, not a sad one.

Here in Portugal, at the **Festa dos Tabuleiros** in Tomar, women carry towers of bread and paper flowers on their heads, built as tall as the woman carrying them and weighing about fifteen kilograms.

At **Nowruz**, in Iran and many other countries, the new year begins on the first day of spring instead of in the middle of winter. And at **Diwali** families light rows of little clay lamps and fill the whole house with light.

Four celebrations, four countries, and the same idea underneath all of them.

TOPIC 6.6 CONTINUED

Celebrations and traditions

- *Four celebrations, four countries, and the same idea underneath all of them.*

Do you remember?

What is the best celebration in your family's year?

**BOOTS
ON!**

Look at the four celebrations. What do all four of them have in common?

**DID YOU KNOW?**

A tabuleiro in Tomar is built as tall as the woman who carries it, holds about thirty loaves of bread, and weighs about fifteen kilograms.

Your turn

- 1 Match each celebration to its country.

Dia de Muertos

Portugal

Festa dos Tabuleiros

India

Nowruz

Mexico

Diwali

Iran

- 2 What do all four have in common? Write one thing.

All four of them

TOPIC 6.6 CONTINUED

Four festivals, four pins. Every one of them is somebody's ordinary year.

**LOOK CLOSER**

Watch the Festa dos Tabuleiros in Tomar, right here in Portugal.

• unesco.org

FIELD NOTES

Draw one thing from your family's own celebration. Write what it is for.

TOPIC 6.7

Respecting different cultures

- *Two children, two lunches, one perfectly good question.*

Do you remember?

Have you ever eaten something at a friend's house that you had never seen before?

TOPIC 6.7 CONTINUED

Respecting different cultures

Let us find out

Here is the most useful thing in this whole book, and it is only one word different from the unhelpful version.

When somebody does something differently from you, the first question is **why**, not **why not**.

Why not means you have already decided they are wrong. *Why* means you want to know. They sound almost the same and they are completely different.

You have a right to your own culture, your own language and your own religion, and so has everybody else.

BOOTS
ON!

Say why do you do it that way, then say why don't you do it my way. Notice how different your voice sounds.

Two children, two lunches, one perfectly good question.

Your turn

- 1 Turn each why not into a why.

Why don't you eat this?

Why don't you celebrate Christmas?

- 2 Ask somebody in your class a real why question about their family. Write what you learned.

I found out that

Two children, two lunches, one perfectly good question.

TOPIC 6.7 CONTINUED

FROM ANOTHER CHAIR

**Rufus says**

Everybody should just do things the normal way. It is simpler.

**Nella says**

Whose normal? Mine is not the same as yours, and we live in the same street.

This is the last argument in the book, and it is the one the whole subject is about. Write down what you think, and then go and ask somebody who might disagree.

**LOOK CLOSER**

Read the whole list of things every child in the world has a right to, including their own culture.

● [unicef.org](https://www.unicef.org)

FIELD NOTES

Write one thing you learned this year from somebody who is not like you.

EXPEDITION 6 · OUR CLASS EXPEDITION

The Field Club table

The last expedition ends the way the picture at the front of this book does: with one long table, and everybody around it.

1

Everybody brings one thing

One object, one food, one photograph or one piece of music from a celebration your own family keeps. One. Not a display, just one real thing.

2

Label it yourself

Every child writes their own label. Nobody explains anybody else's object. This rule is the whole project and it is not negotiable.

The whole Field Club is coming with you on this one.

OUR CLASS EXPEDITION CONTINUED

1

Ask one why question each

Go round the table. Everybody must ask one person a real why question about their object, and listen to the whole answer before speaking.

2

Write the field note

At the end, everybody writes one sentence about somebody else's object. Then read them all out. Some of them will surprise the owner.

OUR PLAN

Write what you will bring, and one sentence about why it matters to your family.

Your field kit. You will need the pencil and the rubber most of all.

EXPEDITION 6 · LOOKING BACK

How did it go?

What I did	Easy	Getting there	I need help
I drew my own family tree	☐	☐	☐
I said why all families are real families	☐	☐	☐
I explained what makes a good friend	☐	☐	☐
I found out who looks after my neighbourhood	☐	☐	☐

Pip

Tam

Every one of us got something wrong on this expedition. That is how we found out anything at all.

LOOKING BACK CONTINUED

Now I can

- ☐ draw my own family tree, whatever shape it is
- ☐ explain that families come in many shapes and all of them are real
- ☐ say what makes somebody a good friend, including disagreeing kindly
- ☐ say what a junta de freguesia does
- ☐ explain what is remarkable about Portugal's bombeiros
- ☐ describe Dia de Muertos, the Festa dos Tabuleiros, Nowruz and Diwali
- ☐ ask why instead of why not, and hear the difference

Your notebook, at the end of an expedition.

LOOKING BACK CONTINUED

New words

**family**

the people who
belong to you

**friend**

somebody kind when
nobody is watching

**community**

the people who
share a place

**freguesia**

the smallest local
area in Portugal

**tradition**

something a family
or country keeps
doing

**celebration**

a day people make
special on purpose

**culture**

the way a group of
people do things

**respect**

asking why instead
of why not

TERM 3 · SUMMER

The summer revision expedition

Tick everything you can do already. Leave the rest blank and come back to them: a blank box is a plan, not a failure.

**EXPEDITION 5****Moving goods and people**

- ☐ Sort transport into land, water and air
- ☐ Say who Malcom McLean was and what he changed
- ☐ Trace a banana from the farm to your fruit bowl
- ☐ Say the pedestrian drill from memory
- ☐ Say which way of travelling pollutes least

TERM 3 REVISION CONTINUED

🚩 🚩 🚩 Six expeditions. One world. Your own two eyes.

EXPEDITION 6**Family, friends, community and culture**

- ☐ Say what makes somebody a good friend
- ☐ Explain what a junta de freguesia does
- ☐ Describe two festivals from two countries
- ☐ Say why families all look different

MY TARGET

Which one box do you most want to be able to tick by the end of next week?

TERM 3 · ASSESSMENT

Show what you know

The last one of the year. You know how this works by now: pencil, on your own, and honest. Then look back at the autumn pages and see how far you have come.

- 1 Sort it** Write each one under LAND, WATER or AIR: tram, ferry, aeroplane, bicycle, gondola, cable car.

- 2 Trace it** Draw the journey of a banana in four steps.

SHOW WHAT YOU KNOW, CONTINUED

🚩 🚩 🚩 A blank box is a plan, not a failure.

3 Explain it Why is walking better for the air than going by car?

4 Name it Name one festival, the country it happens in, and one thing people do at it.

5 Argue it Should things be moved right across the world just because we can? Write one sentence.

TERM 3 · SCHOOL ACTIVITIES

Out of the classroom

Four things a whole class or a whole school can do this term. They all need somebody to organise them, and that somebody could be you.

1

The whole school journey survey

Count how everybody in the school gets there. Make one enormous graph in the hall and let every child add their own mark.

2

A bike bus morning

Organise one supervised group cycle or walk to school, with stops along the way. Count how many cars did not come.

OUT OF THE CLASSROOM, CONTINUED

🚩 🚩 🚩 An activity with no date never happens.

3**The festival table**

Every family brings one object, one food or one photograph from a celebration they keep. Label them all. Nobody explains anybody else's.

4**The community thank you**

Find out who keeps your neighbourhood working: the bombeiros, the refuse crew, the crossing helper. Write real letters and deliver them by hand.

Choose one. Put a date next to it. An activity with no date never happens.

<https://en.wikipedia.org/wiki/M-Pesa>

**TOPIC 3.3**

See the very first web page ever made, still online at CERN.

<http://info.cern.ch/>

**TOPIC 3.5**

A grown-up can read the official online safety advice for young children.

<https://www.childnet.com/parents-and-carers/hot-topics/keeping-young-children-safe-online/>

**TOPIC 3.5**

Hear the Smartie the Penguin story about staying safe online.

<https://www.childnet.com/resources/smartie-the-penguin/>

**TOPIC 3.6**

A grown-up can find out how to help if somebody is unkind online.

<https://www.internetmatters.org/issues/cyberbullying/resources/>

**TOPIC 3.7**

A grown-up can read the World Health Organization screen time guidance.

<https://www.who.int/publications/i/item/9789241550536>

**TOPIC 4.3**

Learn to spell your own name with your hands.

<https://www.british-sign.co.uk/fingerspelling-alphabet-charts/>

EVERY QR CODE IN THIS BOOK

continued

**TOPIC 4.4**

Watch how to put a big feeling into words.

<https://www.bbc.co.uk/bitesize/articles/zwdng2p>

**TOPIC 4.5**

Feel how reading with your fingers works, and meet Louis Braille.

<https://en.wikipedia.org/wiki/Braille>

**TOPIC 4.5**

Listen to dots and dashes spelling out a word.

https://en.wikipedia.org/wiki/Morse_code

**TOPIC 4.5**

Hear a talking drum from West Africa send a message.

https://en.wikipedia.org/wiki/Talking_drum

**TOPIC 4.7**

Meet the man who made the first mobile phone call in 1973.

[https://en.wikipedia.org/wiki/Martin_Cooper_\(inventor\)](https://en.wikipedia.org/wiki/Martin_Cooper_(inventor))

**TOPIC 5.2**

See how one steel box changed the way the whole world shops.

<https://en.wikipedia.org/wiki/Containerization>

**TOPIC 5.4**

A grown-up can print free road safety games to play with you.

<https://www.think.gov.uk/education-resources/>

**TOPIC 5.5**

Watch Japan's bullet train and find out how fast it goes.

<https://en.wikipedia.org/wiki/Shinkansen>

EVERY QR CODE IN THIS BOOK

continued

**TOPIC 5.5**

See the cable cars people ride to work above La Paz in Bolivia.

https://en.wikipedia.org/wiki/Mi_Telef%C3%A9rico

**TOPIC 5.5**

Ride along with Lisbon's yellow Tram 28 in photographs.

https://commons.wikimedia.org/wiki/Category:Trams_in_Lisbon

**TOPIC 5.6**

See children cycling to school together in a bike bus.

https://en.wikipedia.org/wiki/Bicycle_bus

**TOPIC 5.6**

A grown-up can compare how much each way of travelling pollutes.

<https://ourworldindata.org/travel-carbon-footprint>

**TOPIC 6.1**

Find the rule that says every child belongs to a family.

<https://www.unicef.org/child-rights-convention/convention-text-childrens-version>

**TOPIC 6.3**

Watch what makes somebody a good friend.

<https://www.bbc.co.uk/bitesize/articles/znhf7nb>

**TOPIC 6.4**

Find out about volunteer fire brigades, like Portugal's bombeiros.

https://en.wikipedia.org/wiki/Volunteer_fire_department

**TOPIC 6.6**

Watch a family getting ready for Diwali.

<https://www.bbc.co.uk/bitesize/articles/zpvn3qt>

EVERY QR CODE IN THIS BOOK

continued

**TOPIC 6.6**

See the Day of the Dead in Mexico, listed by UNESCO.

<https://ich.unesco.org/en/RL/indigenous-festivity-dedicated-to-the-dead-00054>

**TOPIC 6.6**

See Nowruz, a new year that begins in spring.

<https://ich.unesco.org/en/RL/nawrouz-novruz-nowrouz-nowrouz-nawrouz-nauryz-nooruz-nowruz-navruz-nauryz-nevruz-01161>

**TOPIC 6.6**

Watch the Festa dos Tabuleiros in Tomar, Portugal.

<https://ich.unesco.org/en/RL/festa-dos-tabuleiros-festival-of-the-trays-01573>

AT THE BACK OF THE NOTEBOOK

Things we did not print

While we were making this book we found interesting things we could not prove, so we left them out. Here they are anyway, because knowing why somebody did not tell you something is worth learning too.

“Exactly 90 per cent of world trade travels by sea.”

Very widely repeated but poorly evidenced. The World Bank's own figure is 'more than 80 per cent', so the book prints the conservative sourced number instead.

“Children aged 6 to 7 should have no more than N hours of screen time per day.”

No official body publishes a specific hourly limit for this age band. WHO gives limits for under-5s only. The book prints the actual guidance (swap sedentary screen time for active play) and no invented number.

Knowing why somebody did not tell you something is worth learning too.

THINGS WE DID NOT PRINT

“Facial expressions for basic emotions are recognised identically in every culture.”

Ekman's universality thesis is genuinely contested in the literature. Too unsettled to state as fact to a six year old, so it is omitted rather than simplified into something false.

“An igloo is a permanent home.”

False. Igloos were temporary hunting shelters, not year-round dwellings. Printing it would teach a stereotype, so it is excluded from unit 2 entirely.

“Pocket money amounts by country.”

Could not find an authoritative comparable international dataset. Omitted.

If a book tells you something, it is fair to ask where it got it from. Ask that about this book. Ask it about every book you ever read.

Rufus says

Asking where a book got its facts is not rude. It is the whole job.

The Field Notebook

Global Perspectives is not a subject about facts. It is a subject about standing somewhere else and looking back at yourself.

So this is not a book about the world. It is a field notebook, issued to you by the Prime School Field Club, and its five members travel with you: Bram who measures, Rufus who asks the awkward question, Nella who listens, Pip who misses nothing, and Tam who gets to the top of the hill first.

Six expeditions. Forty seven topics. A real game from Ghana, a train that floats on magnets, a fifteen year old who invented reading with your fingertips, and forty four little squares that take you where paper cannot go.

Every fact in it is traced to a published source, and every source is printed at the back. Every big question in it is left unanswered on purpose.

1. The Playing Fields

2. The Long Road Home

3. The Glowing Window

4. The Talking Wood

5. The Long Haul

6. The Home Fire
