First edition 2026–2027. Independent school publication.

Product title: Physical Education Year 7 Student Book. Interior art prepared for this edition. Source material for scope and sequence: department Year 7 Physical Education course file.

Editorial Board

The Prime Books Physical Education series has been developed under the guidance of the Pedagogical Academic Group for Physical Education and coordinated by the Pedagogical Team of Prime School.

This publication reflects a shared commitment to academic quality, professional integrity and the continuous advancement of teaching and learning. We thank the Pedagogical Department and the Content Creation Team of Prime School for their work on this book.

YEAR 7 • 2026–2027

Welcome

This book is your Year 7 Physical Education course. It is written for Lower Secondary students who are ready to move from basic skills toward tactics, training sense and honest reflection.

Across three terms you will study six sports. Each unit starts with rules and safety, then builds techniques, then asks you to use those techniques in games. Fitness, cooperation and fair play run through every page. The aim is not only to win the lesson. It is to leave Year 7 able to join a game, look after yourself and help a teammate.

Invasion games such as futsal ask you to decide quickly while you still have the ball.

Term 1 • Futsal

Term 1 • Cross Country

Term 2 • Basketball

Term 2 • Badminton

Term 3 • Volleyball

Term 3 • Sports Aerobics

What this year is for

By the end of the course you should be able to:

- ✓ Perform sport-specific movement skills with control.
- ✓ Improve fitness: strength, endurance, flexibility, speed, agility, balance and coordination.
- ✓ Apply tactics in individual and team sports.
- ✓ Communicate, lead and cooperate under the pressure of a game.
- ✓ Show respect, discipline and fair play.
- ✓ Reflect on performance and name a precise next step.
- ✓ Build habits that support a lifetime of physical activity.

How each unit is built

1 INTRODUCTION

History, rules, equipment, safety and the point of the sport.

2 SKILL

Techniques taught in order, with a clear picture of what good looks like.

3 PRACTICE

Individual, pair and team drills that raise the number of good repetitions.

4 GAME

Scenarios with one constraint, then more open match play.

5 ASSESSMENT

Skills shown in authentic play, plus fitness or written evidence when needed.

6 REFLECTION

Cool-down, then one keep and one change.

How to use this book

Start every unit by reading the introduction. Understand the rules and the first techniques before you chase speed. Each topic page follows the same furniture so you can find your way in a busy gym.

Feature	What it is for
Introduction	Rules, equipment and the point of the sport.
Skill focus	The technique, written so you can rehearse it.
Coach's tip	One piece of advice that usually changes the next attempt.
Watch out	The common mistake, named before you make it.
Try this	Drills and tasks. Do them. Do not only read them.
Game scenarios	The skill inside a real decision.
Check	Short questions to talk through in class.

COACH'S TIP

Begin each unit with the introduction. Understanding the rules, objectives and first techniques will help you learn the sport with confidence.

HOW TO STUDY A UNIT

1. Read the introduction and walk the court or course.
2. Watch the demonstration, then try the skill slowly.
3. Complete the drills with a partner who tells you the truth.
4. Use the skill in the game scenario.
5. Write one precise reflection.

Three terms

Term	Sports	What develops
1	Futsal and Cross Country	Ball control, passing, shooting, endurance, pacing and outdoor judgement.
2	Basketball and Badminton	Invasion spacing, racket skills, footwork and decision-making.
3	Volleyball and Sports Aerobics	Net systems, communication, rhythm, strength, flexibility and performance.

Learner habits

CONFIDENT

Try the weaker side and the new role.

RESPONSIBLE

Look after people, kit and the rules.

REFLECTIVE

Name what changed after feedback.

INNOVATIVE

Solve the next picture of the game, not the last one.

ENGAGED

Arrive ready, stay in the task, help the group finish well.

FAIR

Tell the truth about the line, the foul and the effort.

Fitness work in this book is a way to measure your own change, not a way to rank your friends.

How you are assessed

Assessment gives you more than one way to show what you can do: practical performance, fitness, and written knowledge if practical evidence is missing. It follows the aims of a Lower Secondary Physical Education course: skill, teamwork, responsibility, reflection and a habit of staying active.

Type	What it looks at	When
Collective sports	Skills, tactics, talk, fair play in a team game.	End of a half-term or term
Physical fitness	Strength, endurance and change over time.	Across the year
Written knowledge	Rules, techniques, tactics, safety and terms.	When practical evidence is incomplete

Collective sports assessment

At the end of a team unit you will play. Isolated drills may support the picture, but the game is the main evidence. Teachers watch whether you can:

- Show the techniques of the sport under pressure.
- Make useful decisions.
- Communicate and cooperate.
- Respect rules, officials, teammates and opponents.

Fitness tests

Fitness scores are personal. The question is whether you improved, not whether you beat the person next to you.

Test	Component
Press-up test	Upper-body strength and endurance
Sit-up test	Core strength and endurance
20 m shuttle run (beep test)	Aerobic endurance

If you miss practical lessons

Regular attendance is part of the subject. If there is not enough practical evidence, you will sit a written paper on the sports of that term: rules, techniques, tactics, safety, equipment and terms. It is marked out of 100 per cent and contributes to the year.

What teachers record

- Observations in lessons and matches.
- Fitness tests.
- Your own reflections.
- Written work when it is needed.

ASSESSMENT PHILOSOPHY

Assessment is designed to measure performance and to encourage growth, resilience, teamwork and a lifelong habit of physical activity. Every student is given more than one way to show what they know and what they can do.

UNIT 1 • TERM 1

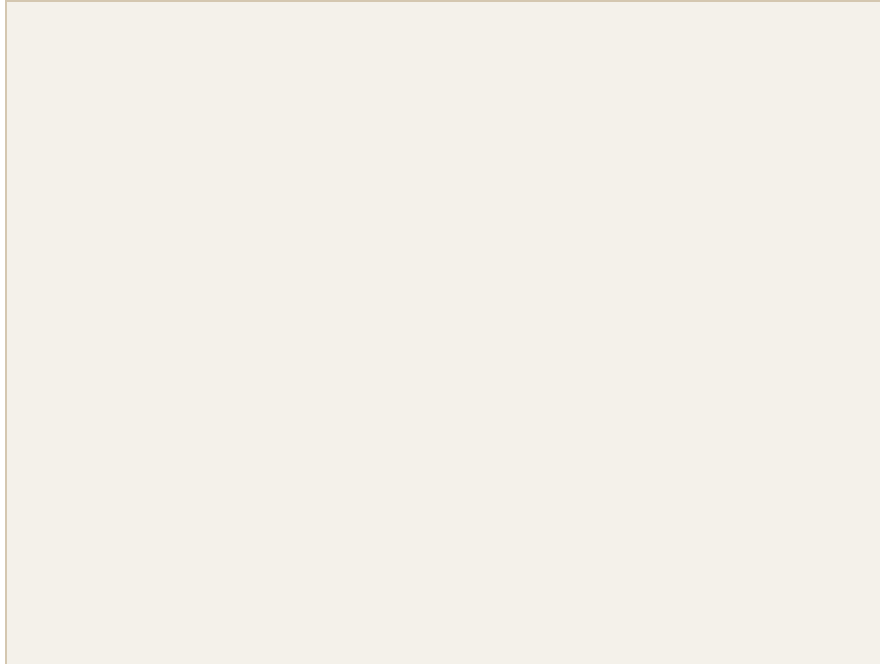

Futsal

A fast indoor invasion game that builds close control, quick passing and team decisions.

UNIT 1

In this unit you will

- ✓ Explain the purpose, history and main rules of futsal.
- ✓ Identify the court, equipment and player roles.
- ✓ Perform ball control, dribbling, passing, shooting and basic goalkeeping.
- ✓ Apply attacking and defensive ideas in small-sided play.
- ✓ Show teamwork, communication, fair play and safe participation.
- ✓ Reflect on performance and set a clear next step.

A futsal court is smaller than a football pitch. The ball stays low, so first touch and passing speed decide the game.

Topics in this unit

1.1 Introduction

1.2 Warm-ups

1.3 Ball control

1.4 Passing

1.5 Shooting and finishing

1.6 Goalkeeping

1.7 Attacking strategies

1.8 Defensive strategies

1.9 Game scenarios

1.10 Cool-down and reflection

1.11 Collective assessment

Fitness this unit develops

- Agility
- Speed
- Coordination
- Balance
- Endurance
- Reaction time

Sporting values

- Respect teammates, opponents, officials and equipment.
- Talk clearly and encourage others.
- Take responsibility for your own effort.
- Play fairly when the score is close.

*Shake hands, help a teammate up, and respect the other team.
That is what sporting values look like on a futsal court.*

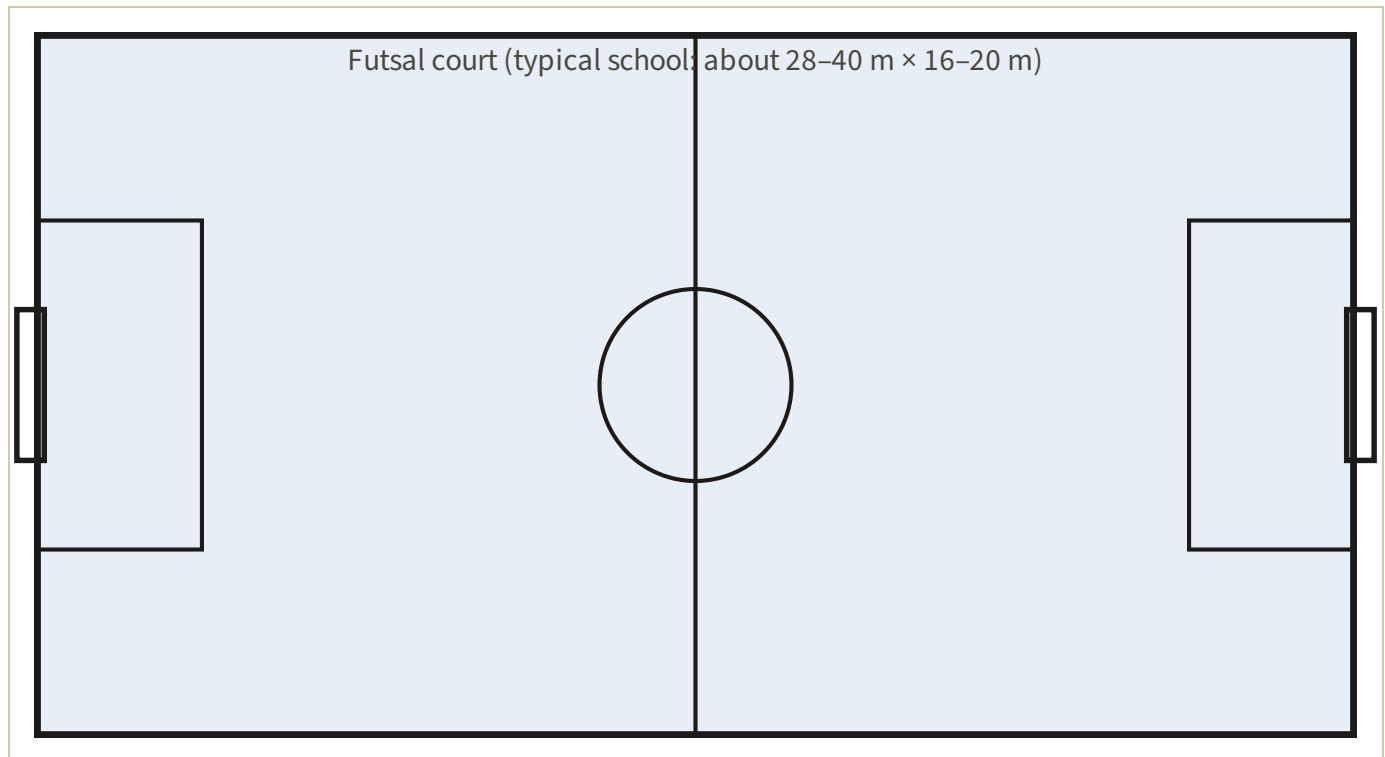

UNIT 1 - TOPIC 1.1

1.1 Introduction

Futsal grew in Uruguay and Brazil in the 1930s as a way to play football in small indoor spaces. FIFA now governs the international game. The smaller court and the low-bounce size 4 ball force you to control the ball close to your feet.

A standard school match is five players including a goalkeeper. There is no offside. Restarts are usually kick-ins, not throw-ins. That one rule changes the whole rhythm of the game: the ball stays on the floor and the next pass has to be ready.

Year 7 futsal is not a smaller copy of outdoor football. It is its own sport. The best players here are the ones who lift their head, keep the ball, and help a teammate who has just lost it.

**KEY POINTS**

- Five outfield roles plus a goalkeeper, rotating often.
- Low-bounce ball: first touch must kill the bounce.
- Kick-in, not throw-in. Four seconds to restart in the full game.
- Fair play and safe footwear on a hard court.

UNIT 1 - TOPIC 1.1

Court, ball and goal: the three pieces of equipment you must be able to name and set up safely.

Try this

1. In pairs, list three ways futsal is different from outdoor football.
2. Walk the court and name the goal line, touch line, penalty mark and corner arc.
3. Write one personal target for this unit: a skill, not a score.

WATCH OUT

Do not treat the hard court like grass. Slide tackles and studs do not belong here.

COACH'S TIP

Master the first touch before you chase speed. A calm first touch gives you the next pass for free.

CHECK YOUR UNDERSTANDING

1. Why does a low-bounce ball change the skills you need?
2. Name two restart rules that are different from outdoor football.
3. What will you measure as success in this unit besides winning?

UNIT 1 - TOPIC 1.2

1.2 Warm-ups

A futsal warm-up does two jobs. It raises heart rate and it rehearses the shapes you will use in the lesson: short passing, changes of direction, and stopping under control.

Start with easy jogging and dynamic mobility for ankles, hips and shoulders. Then add ball work while you are still talking. If the first touch of the lesson is a full-speed shot, the session has started too late.

Warm-up movement should look like the game: short steps, head up, body ready to change direction.

KEY POINTS

- Pulse raiser: 3 to 4 minutes of easy movement.
- Dynamic stretches: open the hips and wake the calves.
- Ball activation: pairs passing on the move.
- A short reaction game before the main drill.

UNIT 1 - TOPIC 1.2

Try this

1. Lead a 60-second pulse raiser for your group.
2. In a square of four cones, complete 8 changes of direction without the ball, then with it.
3. Name one muscle group you felt working and why it matters in futsal.

WATCH OUT

Static long holds at the start of the lesson cool you down. Save them for the end.

COACH'S TIP

If you can still talk in full sentences, the pulse raiser is about right for the first two minutes.

CHECK YOUR UNDERSTANDING

1. What are the two jobs of a futsal warm-up?
2. Give one example of a dynamic stretch for this sport.
3. When should you first touch the ball in the lesson?

UNIT 1 - TOPIC 1.3

1.3 Ball control

First touch is the skill that buys you time. Receive the ball with a soft surface, usually the inside of the foot, and send it into the space you already chose. A heavy first touch turns you into a defender.

Dribbling in futsal is done in a tight box. Use the sole to stop and roll, the inside and outside to change direction, and the sole again to hide the ball from a close marker. Keep the ball within a step.

A good first touch puts the ball where your next step already wants to go.

KEY POINTS

- Cushion the ball. Do not stab at it.
- Take the first touch away from the incoming press.
- Sole, inside, outside: three tools, one close ball.
- Head up between touches.

UNIT 1 - TOPIC 1.3

Try this

1. Wall work: 20 first touches with the right foot, 20 with the left.
2. 1 v 1 in a 6 m square: keep the ball for 8 seconds.
3. Sole-roll slalom through 5 cones. Repeat weaker foot only.

WATCH OUT

Watching the ball at your feet for the whole dribble means you will run into a player you never saw.

COACH'S TIP

The first touch is a pass to yourself. Aim it where the next picture of the game already is.

CHECK YOUR UNDERSTANDING

1. Which part of the foot is the safest first-touch surface for a firm pass?
2. Why is a sole roll useful on a hard court?
3. What should your first touch do when a marker is arriving from your right?

UNIT 1 - TOPIC 1.4

1.4 Passing

Passing in futsal is short, early and often. The inside-foot pass is the base. Add the sole pass when the ball is under you and a driven pass along the floor when you must beat a line of pressure.

The receiver is part of the pass. Show a clear target, call for the ball, and move again as soon as it leaves your teammate. Standing still after a pass is how attacks die.

Passing lanes appear and disappear quickly. The player without the ball creates the next one.

KEY POINTS

- Inside foot for accuracy, ankle locked.
- Pass to the safe foot, away from the marker.
- Move after you pass: give an angle.
- Use both feet. The court is too small for a favourite side only.

UNIT 1 - TOPIC 1.4

Try this

1. Triangle passing: 30 completed passes, then switch direction.
2. Keep-ball 3 v 1 in a 8 m square. Count consecutive passes.
3. One-touch around a square. Reset if the ball stops.

WATCH OUT

A pass that is easy for a teammate is better than a clever pass that they cannot control.

COACH'S TIP

Look at the receiver's feet, not only the space. The pass is successful when they can play the next ball.

CHECK YOUR UNDERSTANDING

1. Name two types of futsal pass and when you would use each.
2. What should you do in the second after you pass?
3. Why is a pass to the safe foot more useful than a pass to the nearest foot?

UNIT 1 - TOPIC 1.5

1.5 Shooting and finishing

Finishing in futsal is often from a crowded area. Accuracy beats wild power. The laces drive is for a clear sight of goal. The inside-foot placement is for the far corner when the goalkeeper has stepped out.

Set your standing foot beside the ball, keep your head still, and follow through toward the target. Practise with both feet. A Year 7 player who can finish on the weaker side is already hard to defend.

A composed finish starts with the standing foot and a still head, not with a longer backswing.

KEY POINTS

- Pick a target before you swing.
- Low shots are harder for the goalkeeper on a hard court.
- Follow in. Rebounds are part of the shot.
- Do not shoot when a simple pass creates a better chance.

UNIT 1 - TOPIC 1.5

Try this

1. 10 placed finishes to the far corner from 8 m, each foot.
2. Receive, set, shoot in two touches from a wall pass.
3. 3 v 2 toward one goal. First-time finish if it is on.

WATCH OUT

Leaning back sends the ball over the bar. Chest over the ball for a low finish.

COACH'S TIP

The best shot is the one the goalkeeper has to move for. Pick a corner and commit.

CHECK YOUR UNDERSTANDING

1. When is a placed inside-foot finish better than a driven shot?
2. What does the standing foot do in a controlled strike?
3. Why should the shooter follow the shot?

UNIT 1 - TOPIC 1.6

1.6 Goalkeeping

The futsal goalkeeper is a field player with hands in a small area. Stance is low, hands ready, feet ready to close the angle. Distribution matters as much as the save: a calm roll to a free teammate starts the next attack.

Every outfield player should spend time in goal during this unit. Understanding the goalkeeper's picture makes you a more honest attacker.

The goal is small, so positioning beats spectacular diving.

KEY POINTS

- Ready stance: knees bent, weight on the front of the feet.
- Get big. Do not dive early.
- Distribute with the hands or a short roll when you can.
- Communicate: left, right, time, keeper.

UNIT 1 - TOPIC 1.6

Try this

1. Angle work: start on the line, close down three cones as shots arrive.
2. Distribution: roll to a moving target 10 times each side.
3. Rotate the goalkeeper every two minutes in a 3 v 3 game.

WATCH OUT

Rushing off the line with your hands down leaves the near post empty.

COACH'S TIP

Your first job is to see the ball. Your second job is to tell the defence what you see.

CHECK YOUR UNDERSTANDING

1. What is the goalkeeper's ready stance?
2. Give two ways a goalkeeper can start an attack.
3. Why should outfield players train as goalkeepers in Year 7?

UNIT 1 - TOPIC 1.7

1.7 Attacking strategies

Attacks in futsal are built on width, depth and a spare player. One player holds, one supports underneath, one stretches the far side. The fourth outfield player reads whether to join or to balance.

A common Year 7 pattern is pass and move into the space behind the first defender. Do not all run toward the ball. The court is already small.

Attacks breathe when players occupy different lines, not the same square metre.

KEY POINTS

- Create a diamond, not a crowd.
- Use the pivot as a back-to-goal link.
- Switch play when one side is blocked.
- Shoot when the extra player is free, not two passes later.

UNIT 1 - TOPIC 1.7

Try this

1. 4 v 2 keep-ball, then attack a goal when the coach calls.
2. Practise a pivot combination: bounce pass, lay off, third player runs.
3. Freeze a 4 v 4 and point to the spare player.

WATCH OUT

Dribbling into a teammate's space is not bravery. It is a lost passing lane.

COACH'S TIP

The extra player is the attack. Find them with the pass you have, not the pass you wish you had.

CHECK YOUR UNDERSTANDING

1. What three shapes should an attack try to keep?
2. What is the pivot's job?
3. When should you shoot rather than pass again?

UNIT 1 - TOPIC 1.8

1.8 Defensive strategies

Defence starts the moment you lose the ball. The nearest player presses. The next player covers the passing line. The rest of the team drops into a compact shape between the ball and the goal.

Marking can be player-to-player or zonal in a simple 2-2. In Year 7, the rule is this: if your player receives the ball facing your goal, you arrived too late.

A compact defensive shape leaves no easy split pass through the middle.

KEY POINTS

- Press, cover, balance.
- Show the attacker onto their weaker foot.
- Do not dive in. Force them sideways.
- Talk: I have the ball, you have the next pass.

UNIT 1 - TOPIC 1.8

Try this

1. 1 v 1 defending: stay between ball and goal for 8 seconds.
2. 2 v 2: the covering defender must stay connected.
3. After every turnover, the nearest player sprints to the ball.

WATCH OUT

Ball-watching lets the free attacker walk into the penalty area.

COACH'S TIP

Good defenders defend the next pass, not only the player who already has the ball.

CHECK YOUR UNDERSTANDING

1. What should the nearest player do on turnover?
2. What does the covering defender protect?
3. Why is a sideways force better than a dive-in?

UNIT 1 - TOPIC 1.9

1.9 Game scenarios

Match play is where skills become decisions. Play 3 v 3 and 4 v 4 before a full 5 v 5. Give each game a constraint so the lesson has a focus: two-touch, weaker-foot finish, or a pass before a shot.

Rotate roles. The quiet player on the wing this game is the pivot next game. Futsal teaching fails if the same three students take every touch.

A small-sided futsal game: one ball, one goal, everyone involved, no extra instructions in the air.

KEY POINTS

- Small-sided first, then 5 v 5.
- One constraint per game, not five.
- Everyone plays. Everyone keeps.
- Stop the game to coach one picture, then play on.

UNIT 1 - TOPIC 1.9

Try this

1. 4 v 4, two-touch. First to five scores.
2. Power-play: the trailing team adds a fifth player for two minutes.
3. After each game, one sentence from each team: what worked.

WATCH OUT

Turning a teaching game into an argument about the score wastes the only court time you have.

COACH'S TIP

Play the next ball. The last mistake is only useful if it changes the next choice.

CHECK YOUR UNDERSTANDING

1. Why start with 3 v 3 before 5 v 5?
2. Give one useful constraint for a finishing game.
3. How should roles rotate across a lesson?

UNIT 1 - TOPIC 1.10

1.10 Cool-down and reflection

Cool-down is not an optional extra. Easy movement, then slower stretches for calves, hip flexors and groin, the tissues that work hardest on a hard court.

Reflection is part of the lesson. Write one thing that improved and one thing to practise before the next session. Be specific: 'weaker-foot pass' is useful. 'Play better' is not.

The last five minutes protect the next lesson as much as they close this one.

KEY POINTS

- Lower the pulse before you sit.
- Hold stretches after the work, not before.
- Hydrate. Hard courts dry you out.
- One precise target for next time.

UNIT 1 - TOPIC 1.10

Try this

1. Lead a 90-second stretch circuit for your group.
2. Complete the reflection box: keep / change / ask.
3. Thank the people you played with. It is a skill, not a decoration.

WATCH OUT

Leaving the court at a sprint after the last goal teaches the body the wrong ending.

COACH'S TIP

The session is not over until the pulse is down and the next target is written.

CHECK YOUR UNDERSTANDING

1. Which muscle groups need extra care after futsal?
2. What makes a useful reflection sentence?
3. Why cool down before you stretch?

UNIT 1 - TOPIC 1.11

1.11 Collective assessment

The collective assessment looks at you in a real game, not in an isolated drill. Teachers watch technical control, tactical choices, communication, fair play and how you respond when the other team has the ball.

You will play in a short match or a series of small-sided games. Isolated skills still matter, but they count most when they appear under pressure.

Assessment evidence comes from authentic play: skills used while the game is moving.

KEY POINTS

- Technical: first touch, pass, shot, safe tackle-free defending.
- Tactical: position, extra player, recovery.
- Social: talk, encourage, respect officials.
- Personal: effort, honesty, improvement.

UNIT 1 - TOPIC 1.11

Try this

1. Self-score each assessment area from 1 to 4 before the game.
2. Ask a partner to name one strength they saw.
3. Set one in-game focus word: head-up, weak-foot, or recover.

WATCH OUT

Hiding from the ball is visible. So is fouling because you arrived late.

COACH'S TIP

Play the game you practised. Assessment is not a different sport.

CHECK YOUR UNDERSTANDING

1. What four areas are assessed in the collective game?
2. Why is a drill score not enough on its own?
3. Name your focus word and why you chose it.

UNIT 2 • TERM 1

Cross Country

Endurance running over natural ground. Pace, posture and determination matter more than a fast first minute.

UNIT 2

In this unit you will

- ✓ Explain the purpose and basic rules of cross-country running.
- ✓ Identify types of terrain and apply safety procedures.
- ✓ Use efficient posture, arm drive, pacing and breathing.
- ✓ Build cardiovascular endurance through structured training.
- ✓ Apply race strategies in individual and team events.
- ✓ Reflect on effort and set a realistic endurance goal.

Cross-country courses use grass, trails and hills. The ground changes, so your stride and breathing must change with it.

Topics in this unit

2.1 Introduction and rules

2.2 Warm-ups

2.3 Running techniques

2.4 Endurance development

2.5 Race strategies

2.6 Game scenarios

2.7 Cool-down and reflection

2.8 Individual assessment

Fitness this unit develops

- Cardiovascular endurance
- Muscular endurance
- Speed
- Agility
- Stamina
- Mental resilience

Sporting values

- Respect other runners and the outdoor space.
- Encourage classmates who are still on the course.
- Show perseverance when the hill feels long.
- Leave the trail as you found it.

A runner at the back still gets a clap. Cross country is personal effort with public support.

UNIT 2 - TOPIC 2.1

2.1 Introduction and rules

Cross-country running is racing over natural ground: grass, trails, hills and sometimes mud. It has been part of the modern Olympic programme and remains a World Athletics discipline. In school it is also a training method for endurance and resilience.

The rules are simple and strict. You follow the marked course. You do not cut corners. You give other runners space at the start. You help a fallen runner if they are hurt, then report it.

The course, not the stopwatch, is the first thing to read. Where is the climb? Where can you recover? Where is the ground uneven?

The trail is the classroom. Read the ground before you race it.

KEY POINTS

- Stay on the marked route.
- Mass start: controlled, not a sprint into a bottleneck.
- Team events often score by adding finishing places.
- Kit: suitable shoes, no headphones, water before and after.

UNIT 2 - TOPIC 2.1

Try this

1. Walk 200 m of the course and name three surface changes.
2. Write the start routine: jog, strides, line-up, first 30 seconds.
3. Explain why cutting a corner is both unsafe and unfair.

WATCH OUT

A fast first 100 m on a narrow path causes falls. Win the race later.

COACH'S TIP

Cross-country is not about who starts fastest. It is about who manages pace, stays focused and finishes strong.

CHECK YOUR UNDERSTANDING

1. What is the main rule of a marked course?
2. How do many team races decide the winning team?
3. What should you do in the first 30 seconds of a mass start?

UNIT 2 - TOPIC 2.2

2.2 Warm-ups

Outdoor warm-ups must match the weather. In the cold, take longer. In the heat, start easier and drink. Always include ankle mobility and a few strides that wake the hamstrings.

Finish the warm-up with two or three build-ups over 60 m at the pace you plan to start, not at a sprint.

Strides at start pace teach the body the rhythm you want in the first minute.

KEY POINTS

- Longer pulse raiser outdoors than indoors.
- Dynamic mobility for hips, calves and ankles.
- Strides: tall posture, quick but relaxed.
- Check laces, numbers and the first turn of the course.

UNIT 2 - TOPIC 2.2

Try this

1. Design a 5-minute outdoor warm-up for a cold day.
2. Complete 3 strides. After each, say whether the pace felt sustainable.
3. Spot one hazard on the warm-up loop and tell the group.

WATCH OUT

Stretching on cold ground without moving first is a good way to pull a muscle.

COACH'S TIP

Your warm-up is part of the race. Arrive at the line already organised.

CHECK YOUR UNDERSTANDING

1. How should a warm-up change in cold weather?
2. What is a stride for?
3. Name one pre-start equipment check.

UNIT 2 - TOPIC 2.3

2.3 Running techniques

Efficient running is quiet. Head stacked over shoulders, shoulders over hips. Arms swing from the shoulder, not the elbow. Cadence is quick enough that you are not overstriding and braking with every heel.

Uphill: shorter steps, slight lean from the ankles, eyes on a point ahead. Downhill: let the slope help, do not throw the brakes on, keep the feet under you.

Side-on, a balanced runner looks stacked: head, shoulders, hips and a compact arm swing.

KEY POINTS

- Tall posture, relaxed face and hands.
- Arms drive the rhythm.
- Shorten the stride uphill.
- Keep the feet under the body on descents.

UNIT 2 - TOPIC 2.3

Try this

1. Film or watch a partner from the side for 20 m. Name one posture cue.
2. Hill reps: 4 x 30 seconds up, easy jog down.
3. Count steps for 20 seconds. Repeat and try to stay smooth, not just faster.

WATCH OUT

Looking at your feet on a rooty path is how you miss the next root.

COACH'S TIP

Think quiet feet and a still head. Noise usually means wasted energy.

CHECK YOUR UNDERSTANDING

1. What should change in your stride on a climb?
2. Why is overstriding inefficient?
3. Give one downhill cue.

UNIT 2 - TOPIC 2.4

2.4 Endurance development

Endurance is built by time on your feet, not by one heroic session. Year 7 training uses easy continuous runs, a few slightly faster efforts, and one longer effort in the week if recovery allows.

Talk test: on an easy run you can speak a sentence. If you cannot, you are training a different system and you will not last the term.

Easy running in a group still needs individual honesty about pace.

KEY POINTS

- Most running should feel controlled.
- Progress time before you progress speed.
- Rest is part of the plan.
- Record how you felt, not only the time.

UNIT 2 - TOPIC 2.4

Try this

1. Complete a 12-minute continuous run at talk-test pace.
2. Fartlek: 6 x 40 seconds quicker, 80 seconds easy.
3. Write this week's load: sessions, sleep, how the legs felt.

WATCH OUT

Copying the fastest runner on every easy day is how injuries start.

COACH'S TIP

Consistency beats intensity at the beginning of an endurance block.

CHECK YOUR UNDERSTANDING

1. What is the talk test?
2. Why progress duration before speed?
3. What should a training log include besides time?

UNIT 2 - TOPIC 2.5

2.5 Race strategies

A race has three parts: a controlled start, a patient middle, and an honest finish. The middle is where most Year 7 races are won, because that is where people who started too fast come back to you.

In a team race, know whether you are a front runner or a pack runner. Helping a teammate hold a rhythm can beat chasing a rival alone.

Landmarks on the course are better pacers than the runners immediately in front of you.

KEY POINTS

- First minute: find space and settle.
- Middle: even effort, not even speed. Hills cost more.
- Last 300 m: lift the arms, keep the form.
- After the line: keep moving, then check on teammates.

UNIT 2 - TOPIC 2.5

Try this

1. Practise a start: 30 seconds controlled, then settle.
2. On a loop, change 'gears' on a named landmark.
3. Write a three-line race plan for your next course.

WATCH OUT

Sprinting a hill in the first kilometre is a loan you repay later, with interest.

COACH'S TIP

Even effort feels slow at the start and brave at the end. Trust that feeling.

CHECK YOUR UNDERSTANDING

1. What are the three parts of a race plan?
2. Why is even effort different from even speed?
3. What is one team tactic besides running as fast as you can?

UNIT 2 - TOPIC 2.6

2.6 Game scenarios

Game scenarios in this unit are races and relays with a purpose. A handicap start, a paired run, or a team place-score event all teach different decisions.

Treat every scenario as practice for the real event: the same warm-up, the same course etiquette, the same finish-line routine.

A paired run teaches honesty: the pair only succeeds at the slower runner's best sustainable pace.

KEY POINTS

- Paired run: stay together, share the pace.
- Relay: safe handover zone, no throwing the sash.
- Handicap: run your own race, not the person who started later.
- Place-score: the fifth finisher can decide the team.

UNIT 2 - TOPIC 2.6

Try this

1. Paired 6-minute run. The pair finishes together.
2. 4 x 300 m relay with a clear handover box.
3. After a handicap race, discuss who paced best, not who finished first.

WATCH OUT

Celebrating before the line while a teammate is still climbing is not team racing.

COACH'S TIP

The scenario is the teacher. Notice what the constraint forced you to do.

CHECK YOUR UNDERSTANDING

1. What decision does a paired run force?
2. Why might a fifth place matter in a team score?
3. What should a relay handover look like?

UNIT 2 - TOPIC 2.7

2.7 Cool-down and reflection

Cool down with an easy walk or jog until breathing settles. Then stretch calves, quads, hip flexors and hip rotators. Change wet kit. Endurance work plus a cold wind is a fast route to feeling ill the next day.

Reflection: what part of the course cost you most, and what cue will you use there next time?

After the line, the work is recovery and an honest note about the course.

KEY POINTS

- Keep moving until you can talk easily.
- Change damp clothes.
- Note the hardest section of the course.
- One cue for next time, written down.

UNIT 2 - TOPIC 2.7

Try this

1. Lead a 4-exercise mobility finish.
2. Map the course in four boxes: start, climb, descent, finish. Score each.
3. Write a thank-you to the person who ran with you.

WATCH OUT

Sitting down immediately after a hard effort can make you dizzy. Walk first.

COACH'S TIP

The cool-down is where you collect the lesson. Do not throw it away on the bus.

CHECK YOUR UNDERSTANDING

1. Why walk before you sit?
2. Which stretches matter most after hills?
3. What belongs in a course map reflection?

UNIT 2 - TOPIC 2.8

2.8 Individual assessment

The individual assessment in this unit is your running: technique under fatigue, pacing, and how you handle the course. Fitness tests such as a timed run may support the picture, but they do not replace it.

You will also be assessed on safety, etiquette and the way you support others. Cross-country is a personal sport with a public standard of behaviour.

Form in the last minute tells the teacher more than form in the first.

KEY POINTS

- Pacing and finishing form.
- Technique on more than one surface.
- Safety and course discipline.
- Effort and encouragement of others.

UNIT 2 - TOPIC 2.8

Try this

1. Set a process goal for the assessed run.
2. Ask a partner to watch one cue: arms, or stride on the hill.
3. Complete a short written reflection immediately after.

WATCH OUT

Looking at other people's times before you have your own plan is a distraction.

COACH'S TIP

Assessment day is an ordinary good run with extra attention, not a different body.

CHECK YOUR UNDERSTANDING

1. What will the teacher watch besides your time?
2. What is a process goal?
3. Why does etiquette count in an individual assessment?

UNIT 3 • TERM 2

Basketball

A five-a-side invasion game of spacing, passing and shooting. Good teams share the ball and talk on defence.

UNIT 3

In this unit you will

- ✓ Explain basketball rules, fouls and scoring.
- ✓ Identify court markings, equipment and positions.
- ✓ Dribble, pass, shoot and defend with control.
- ✓ Use spacing, screens and help defence in games.
- ✓ Communicate and play fairly.
- ✓ Reflect on decision-making in match play.

Basketball rewards players who can dribble with both hands, pass under pressure and finish at the ring.

Topics in this unit

[3.1 Introduction and rules](#)[3.2 Warm-ups](#)[3.3 Ball handling](#)[3.4 Passing](#)[3.5 Shooting](#)[3.6 Defence](#)[3.7 Game strategies](#)[3.8 Game scenarios](#)[3.9 Cool-down and reflection](#)[3.10 Individual assessment](#)

Fitness this unit develops

- Agility
- Speed
- Coordination
- Balance
- Power
- Reaction time

Sporting values

- Respect referees even when you disagree.
- Pass to the open teammate, not only the closest friend.
- Help a player who has just missed a shot.
- Stop play at once if someone is hurt.

Help the shooter who missed. Talk on defence. Stop at once if someone is hurt.

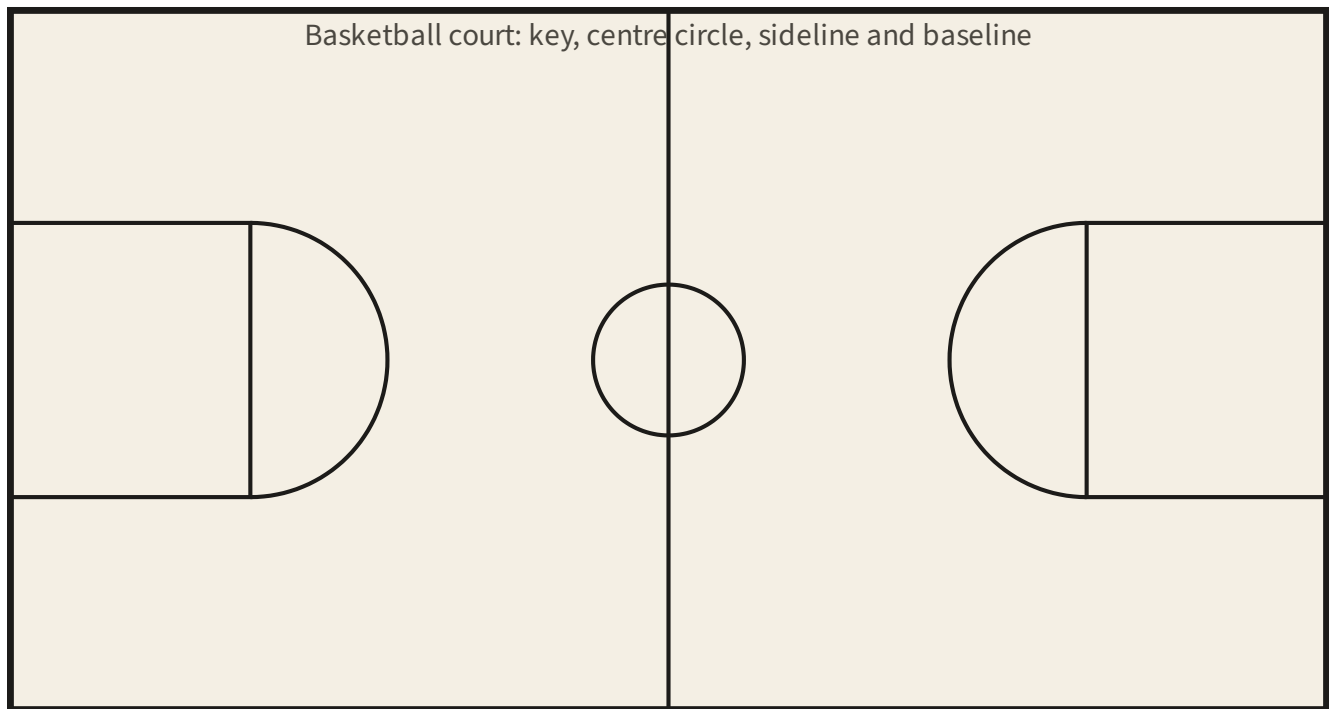

UNIT 3 - TOPIC 3.1

3.1 Introduction and rules

Basketball was designed in 1891 by James Naismith in Springfield, Massachusetts, as an indoor winter game. Five players on each side score by shooting the ball through a horizontal ring. FIBA and school rules share the same spine: travelling, double dribble, fouls and out of bounds.

Scoring is usually two points from the field, three from beyond the arc, and one from the free-throw line. The game restarts with a throw-in or a free throw after a foul.

Positions have names (guard, forward, centre) but Year 7 players should learn to play more than one. The court is a shared problem, not five private jobs.

**KEY POINTS**

- Five v five. Dribble, pass or shoot. No run with the ball.
- A foul is illegal contact that disadvantages an opponent.
- Know the key, the three-point line, the sideline and the baseline.
- Stop on the whistle. The ball is dead.

UNIT 3 - TOPIC 3.1

The ring, the key and the three-point line are the map of every decision.

Try this

1. Walk the court and stand on each marking as it is named.
2. In pairs, demonstrate travelling and a legal jump stop.
3. Write the difference between a personal foul and unsporting behaviour.

WATCH OUT

Arguing the whistle wastes possessions. Play the next defence.

COACH'S TIP

Learn the lines. A player who knows where they are standing already has an advantage.

CHECK YOUR UNDERSTANDING

1. What are the three legal things you may do while holding the ball?
2. How do two-point and three-point shots differ?
3. Why should Year 7 players learn more than one position?

UNIT 3 - TOPIC 3.2

3.2 Warm-ups

Basketball warm-ups raise the pulse and then put a ball in your hands. Ankles, knees and hips need extra care because the game is full of jumps, cuts and landings.

Finish with close-out steps, a few jump stops, and easy layups so the first drill is not the first time you leave the floor.

Knees bent, ball in two hands: the warm-up already looks like a jump stop.

KEY POINTS

- Pulse raiser plus dynamic hips and ankles.
- Ball handling while moving.
- Landing practice: quiet feet, bent knees.
- Layup lines at controlled speed.

UNIT 3 - TOPIC 3.2

Try this

1. 20 jumping jacks, 10 bodyweight squats, 10 lunges each side.
2. Partner passing on the move for 90 seconds.
3. Six controlled jump stops into a short shot.

WATCH OUT

Warm-up dunking or half-court shooting is theatre, not preparation.

COACH'S TIP

Land as if the floor is a conversation, not an argument.

CHECK YOUR UNDERSTANDING

1. Which joints need extra attention before basketball?
2. What is a jump stop?
3. Why include landing practice in the warm-up?

UNIT 3 - TOPIC 3.3

3.3 Ball handling

Ball handling is two hands and two eyes. The dribble lives at hip height on the move and lower when a defender is close. Fingertips, not the palm. Eyes up as often as you can afford.

Crossovers, retreat dribbles and a simple spin are enough for Year 7. The aim is to keep the ball when the defence arrives, not to collect moves.

Eyes up and a protected dribble turn a 1 v 1 into a passing chance.

KEY POINTS

- Fingertips. Waist or lower.
- Protect with the body and the off arm, without pushing.
- Change of pace beats empty change of direction.
- If you pick the ball up, you must pass or shoot.

UNIT 3 - TOPIC 3.3

Try this

1. 60 seconds right-hand dribble, 60 left, eyes on a partner.
2. Figure-of-eight through the legs, stationary, then walking.
3. 1 v 1 from the wing: keep the dribble alive for 6 seconds.

WATCH OUT

A high, bouncing dribble is an invitation. Keep it short.

COACH'S TIP

The dribble is a tool for improving the pass or the shot. It is not the point of the game.

CHECK YOUR UNDERSTANDING

1. When should the dribble be lower?
2. What must you do once you pick the ball up?
3. Why is change of pace useful?

UNIT 3 - TOPIC 3.4

3.4 Passing

The chest pass, bounce pass and overhead pass cover almost every Year 7 situation. Step toward the target, finish the hands toward the target, and hit the receiver where they can catch without travelling. A bounce pass is for traffic. An overhead pass is for a longer skip. A chest pass is the default when the lane is clear.

A clean passing lane is usually created by the player without the ball.

KEY POINTS

- Two hands, step, snap.
- Pass away from the defender.
- Meet the ball. Do not wait with stiff arms.
- Call the receiver's name.

UNIT 3 - TOPIC 3.4

Try this

1. 20 chest, 20 bounce, 20 overhead in pairs.
2. 3 v 1 keep-ball. Only bounce passes.
3. Skip pass across a square after one fake.

WATCH OUT

A pass to a player's feet is a turnover wearing a disguise.

COACH'S TIP

The best pass is the one the receiver does not have to break stride to catch.

CHECK YOUR UNDERSTANDING

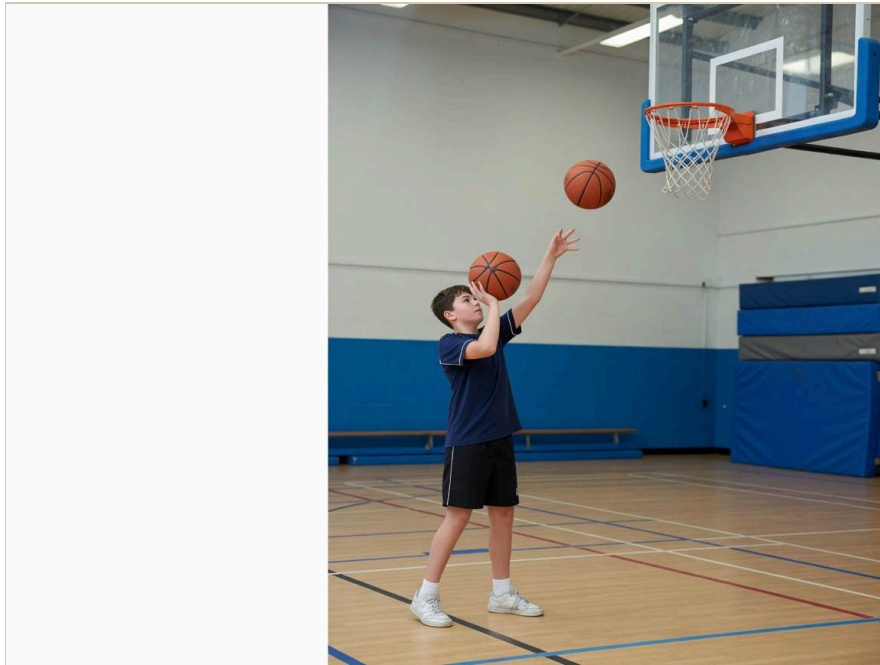

1. When would you choose a bounce pass?
2. What does the step do in a chest pass?
3. How should a receiver meet the ball?

UNIT 3 - TOPIC 3.5

3.5 Shooting

Shooting is balance plus a repeatable path. Feet shoulder-width, shooting elbow under the ball, follow through as if reaching into the ring. The layup is a running shot: right hand on the right side, left on the left, off the correct foot.

Free throws are a routine. Same breaths, same starting spot, every time. Pressure is just a familiar action in a quieter gym.

Balance, elbow under the ball, follow-through to the ring. That is the set-shot path.

KEY POINTS

- Balance before lift.
- Elbow in, finish high.
- Layups: correct foot, protect the ball.
- Free throw: a routine you can repeat when tired.

UNIT 3 - TOPIC 3.5

Try this

1. Form shooting: 10 close shots focusing on follow-through.
2. Layup lines both sides, then off a pass.
3. Two free throws after every drill, as in a real game.

WATCH OUT

Flinging the ball from the hip is not a jump shot. Reset the base.

COACH'S TIP

Make the easy shot look bored. That is what good shooters sound like in their heads.

CHECK YOUR UNDERSTANDING

1. What is the correct take-off foot for a right-hand layup?
2. Name two parts of a free-throw routine.
3. Why does balance matter more than arm speed?

UNIT 3 - TOPIC 3.6

3.6 Defence

Defence is stance, position and talk. Sit in a wide base, mirror the ball, and stay between your player and the ring. Help defence means you step toward a teammate who has been beaten, then recover. Fouling is usually a late body. Arrive on time and you will not need your hands.

Fouling is usually a late body. Arrive on time and you will not need your hands.

Wide base, hands ready, body between the attacker and the ring.

KEY POINTS

- Stance first. Then the feet. Then the hands.
- Force the attacker toward the sideline or their weaker hand.
- Help and recover.
- Box out after every shot.

UNIT 3 - TOPIC 3.6

Try this

1. Mirror drill: 20 seconds, stay in stance, no reaching.
2. Close-out from the help position to a shooter.
3. 2 v 2: the helper must speak before they move.

WATCH OUT

Reaching from behind is a foul and a bad habit. Get in front.

COACH'S TIP

Your feet write the defensive story. Hands only edit it.

CHECK YOUR UNDERSTANDING

1. What does 'between player and ring' mean?
2. What is help and recover?
3. Why box out?

UNIT 3 - TOPIC 3.7

3.7 Game strategies

Simple offence: pass, cut, fill. If you pass and stand, the defence rests. If you pass and cut, the defence has to move. Spacing means not standing in a teammate's driving lane.

A screen is legal if you are still and outside the defender's personal space when contact happens. Year 7 screens should be obvious and safe.

Pass, then cut. The empty lane is the next attack.

KEY POINTS

- Pass and move.
- Keep a driving lane open.
- Use the extra pass when the help comes.
- Screens: still, visible, legal.

UNIT 3 - TOPIC 3.7

Try this

1. 3 v 0: pass, cut, fill, shoot.
2. 4 v 4: no dribble until two passes.
3. Draw a 5-out shape and mark the driving lanes.

WATCH OUT

Five players standing on the three-point line is not spacing. Someone must occupy the corner and someone must occupy the key at the right time.

COACH'S TIP

The extra pass is often the assist. Do not fall in love with the first good look if a better one is one ball away.

CHECK YOUR UNDERSTANDING

1. What should you do after you pass?
2. What makes a screen legal?
3. Why can 'no dribble until two passes' improve a team?

UNIT 3 - TOPIC 3.8

3.8 Game scenarios

Scenarios: last 30 seconds, inbound under your own basket, defending a two-point lead, playing with four fouls. Each one has a simple plan. Practise the plan at walking pace, then at game pace.

Small-sided 3 v 3 on one hoop teaches more decisions per minute than a wandering 5 v 5.

A baseline inbound is a planned problem, not a hopeful throw.

KEY POINTS

- 3 v 3 for teaching, 5 v 5 for transfer.
- Inbound plays: two options, not seven.
- Foul to give if the rules and the score say so, never in anger.
- Use a time-out as a reset, not a complaint.

UNIT 3 - TOPIC 3.8

Try this

1. 3 v 3 to 7 points, make-it-take-it.
2. Inbound from the baseline against a set defence.
3. Play 60 seconds with a two-point lead. What changes?

WATCH OUT

Celebrating a basket while the other team inbounds is how leads disappear.

COACH'S TIP

Every scenario has a job. Name the job before you inbound the ball.

CHECK YOUR UNDERSTANDING

1. Why is 3 v 3 useful?
2. What should change when you defend a narrow lead?
3. Give one inbound principle.

UNIT 3 - TOPIC 3.9

3.9 Cool-down and reflection

Cool down with an easy lap and mobility for calves, hips and shoulders. Ice is not a personality. If a knee or ankle is sore, tell the teacher rather than 'running it off'.

Reflection: which decision, not which highlight, would you repeat?

Recovery starts while you are still in the gym.

KEY POINTS

- Easy movement, then mobility.
- Report pain early.
- One decision to keep, one to change.
- Leave the court better than you found it.

UNIT 3 - TOPIC 3.9

Try this

1. Shoulder and hip mobility circuit, 4 exercises.
2. Write a two-line game diary.
3. Collect balls and return bibs as part of the cool-down, not after it.

WATCH OUT

Sitting in a draught in a wet shirt is a poor recovery plan.

COACH'S TIP

The best players remember the extra pass they did not make.

CHECK YOUR UNDERSTANDING

1. What should you do with lingering ankle pain?
2. What belongs in a two-line game diary?
3. Why is packing away part of the lesson?

UNIT 3 - TOPIC 3.10

3.10 Individual assessment

Individual assessment looks at your skills in a game: dribble under control, pass to the right person, shoot a responsible shot, defend without fouling, and talk.

A short skills station may support the grade. The game is still the main evidence.

Assessment watches the choice as much as the outcome.

KEY POINTS

- Control with both hands.
- Useful passing.
- Responsible shooting.
- Stance, talk and fair contact.

UNIT 3 - TOPIC 3.10**Try this**

1. Self-assess the four keys after a 4 v 4.
2. Choose one station to show your weaker hand.
3. Ask for one piece of feedback and repeat the action.

WATCH OUT

Taking a contested hero shot in the first minute of an assessment game is a choice. It tells a story.

COACH'S TIP

Show the teacher the simple thing done well. That is the Year 7 standard.

CHECK YOUR UNDERSTANDING

1. What is the main evidence in this assessment?
2. What is a responsible shot?
3. Why might a weaker-hand station help you?

UNIT 4 • TERM 2

Badminton

A net game of timing, footwork and shot choice. Fast feet create the space for a good racket.

UNIT 4

In this unit you will

- ✓ Explain badminton scoring, court lines and service rules.
- ✓ Use forehand and backhand grips with efficient footwork.
- ✓ Perform serves, clears, drops, drives and smashes.
- ✓ Apply singles and doubles tactics.
- ✓ Show honesty in line calls and fair play.
- ✓ Set a personal target after match play.

The shuttle slows quickly in the air. Early movement and a still head give you time to choose the next shot.

Topics in this unit

4.1 Introduction and rules

4.2 Warm-ups

4.3 Grips and footwork

4.4 Basic strokes

4.5 Attacking strokes

4.6 Game strategies

4.7 Game scenarios

4.8 Cool-down and reflection

4.9 Individual assessment

Fitness this unit develops

- Agility
- Coordination
- Speed
- Balance
- Flexibility
- Reaction time

Sporting values

- Call the shuttle fairly, even against yourself.
- Return the shuttle to the server, not at them.
- Shake hands after the last point.
- Look after rackets and shuttles.

Walk to the side of the net and shake hands in the open court after the last point.

UNIT 4 - TOPIC 4.1

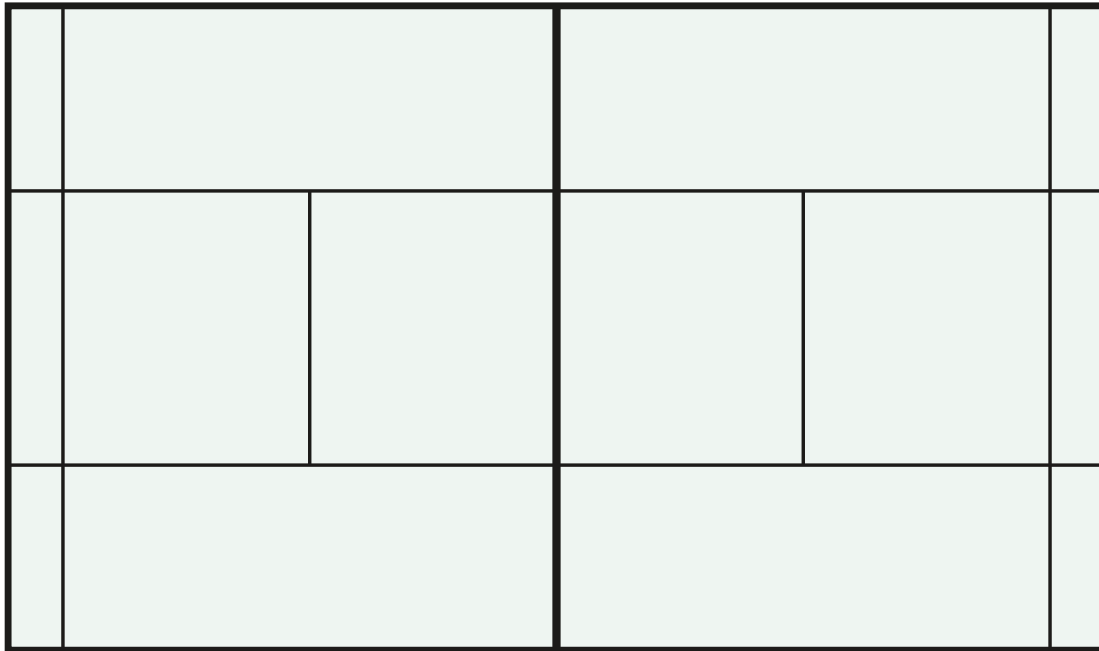

4.1 Introduction and rules

Badminton is a racket sport governed internationally by the BWF. Rally scoring means every rally wins a point. Games are usually to 21, and you must win by two points. A match is the best of three games.

Singles uses the long, narrow court. Doubles uses the wide court, and the service box changes. The server starts from the right when their score is even.

The shuttle must be hit before it touches the floor. A serve is underarm and below the ribcage in school play. Honesty about line calls is part of the sport.

Badminton: singles is the inner side lines; doubles uses the outer

KEY POINTS

- Rally point to 21, win by two.
- Singles and doubles use different lines.
- Serve underarm, diagonally.
- Call fairly. Replay if you honestly cannot see.

UNIT 4 - TOPIC 4.1

Net, racket and shuttle: a small set of equipment with a large set of decisions.

Try this

1. Walk the singles lines, then the doubles lines.
2. Practise five legal serves from each side.
3. Explain to a partner when the server changes ends of the service box.

WATCH OUT

A casual overarm 'serve' is not a serve. Reset and do it legally.

COACH'S TIP

Learn the lines once, properly. Half of beginner arguments are geography.

CHECK YOUR UNDERSTANDING

1. What does win by two mean?
2. When does the server start from the right?
3. Which court is narrower, singles or doubles?

UNIT 4 - TOPIC 4.2

4.2 Warm-ups

Badminton warm-ups must wake the rotator cuff, calves and the small stabilizing muscles around the ankle. Then add short, sharp footwork without a shuttle, then with one.

Shadow the split step: a small hop as the opponent hits, so you can push off in any direction.

The split step is a small hop that makes the next lunge possible.

KEY POINTS

- Pulse raiser, then shoulders and ankles.
- Shadow footwork: split step, lunge, recover.
- Easy rallies along the line.
- A few serves to finish the warm-up.

UNIT 4 - TOPIC 4.2

Try this

1. 20 split steps in time with a partner's clap.
2. Ladder or line footwork: in, in, out, out.
3. Cooperative rally of 12 without winning the point.

WATCH OUT

Jumping smash attempts in minute one of the lesson belong in a different book.

COACH'S TIP

Fast feet are as important as fast hands. The racket only meets what the feet allow.

CHECK YOUR UNDERSTANDING

1. What is a split step?
2. Which joints need extra care?
3. Why start with a cooperative rally?

UNIT 4 - TOPIC 4.3

4.3 Grips and footwork

The basic forehand grip is like shaking hands with the racket. The backhand grip rotates so the thumb can support the back of the handle. Changing grip happens in the fingers, quietly, between shots.

Footwork is a lunge and a recovery to base, usually the centre of your singles court. If you admire your shot, you will be late for the next one.

Lunge, hit, recover. The grip stays relaxed in the fingers.

KEY POINTS

- Handshake forehand, thumb-supported backhand.
- Relax the grip between shots.
- Lunge, hit, recover to base.
- The base is a place, not a rest.

UNIT 4 - TOPIC 4.3

Try this

1. Switch grip 10 times without looking down.
2. Shadow a four-corner routine, recovering to base each time.
3. Partner feeds to forehand then backhand. Recover between.

WATCH OUT

A tight death-grip makes every shot late and every wrist tired.

COACH'S TIP

Think fingers, not fist. The racket is a tool, not a hammer.

CHECK YOUR UNDERSTANDING

1. How does the backhand grip differ from the forehand?
2. Where is base in singles?
3. What happens if you stay in the corner after a good clear?

UNIT 4 - TOPIC 4.4

4.4 Basic strokes

The clear sends the shuttle high and deep. The drop lands softly just over the net. The drive is flat and fast. Together they are the grammar of the rally.

Serve long or short to start that grammar. A high serve in singles pushes the receiver back. A low serve in doubles takes time away.

An overhead clear is a long throw with a racket: long lever, high contact, deep target.

KEY POINTS

- Clear: high, to the back line.
- Drop: just over, little pace.
- Drive: flat, through the mid-court.
- Serve: legal, then immediately ready.

UNIT 4 - TOPIC 4.4

Try this

1. 10 clears each, aiming past the service line.
2. 10 drops from the mid-court, landing in the front tramlines.
3. Alternate clear and drop so the partner must move.

WATCH OUT

A clear that lands mid-court is a gift. Commit to height and depth.

COACH'S TIP

Move the opponent first. The winning shot is usually the second one after they are out of position.

CHECK YOUR UNDERSTANDING

1. What is the job of a clear?
2. When is a low serve useful?
3. How do a drop and a drive differ?

UNIT 4 - TOPIC 4.5

4.5 Attacking strokes

The smash is a steep, fast overhead. It only works if the shuttle is in front of you and high enough. A half-smash with a good angle beats a wild full smash into the net.

Net kills and attacking blocks finish rallies that the smash began. Year 7 players should attack with control, not with noise.

An attacking overhead is steep and balanced. The landing is part of the shot.

KEY POINTS

- Contact in front, not behind the head.
- Angle matters more than maximum speed.
- Recover. Smashes come back.
- Do not smash from a weak position.

UNIT 4 - TOPIC 4.5

Try this

1. Partner lifts, you smash to a target zone.
2. Half-smash cross-court, then recover.
3. Net practice: 8 controlled net kills from a friendly feed.

WATCH OUT

Jumping on every smash is a fitness test, not a tactic.

COACH'S TIP

If the shuttle is behind you, clear it. Pride is not a stroke.

CHECK YOUR UNDERSTANDING

1. What two conditions make a smash a good idea?
2. Why might a half-smash be better?
3. What should you do after you smash?

UNIT 4 - TOPIC 4.6

4.6 Game strategies

Singles tactics: move the opponent from back to front and side to side. Doubles tactics: one player covers the net, one covers the back, and they swap as the rally changes.

Serve and third shot are a plan. Decide before you serve whether you want the next shot to be a net shot or a lift.

Court geography is the tactic: make the other person visit more of it than you do.

KEY POINTS

- Singles: use the whole long court.
- Doubles: attack in a front-and-back shape.
- Defend doubles side-by-side.
- Plan the third shot.

UNIT 4 - TOPIC 4.6

Try this

1. Singles: only clears and drops for four points, then open the strokes.
2. Doubles: freeze after each shot and check who is front.
3. Serve plus planned third shot, 10 times.

WATCH OUT

Both doubles partners standing on the same spot is how easy smashes arrive.

COACH'S TIP

Tactics are just decisions you make before you are tired.

CHECK YOUR UNDERSTANDING

1. What is the basic attacking shape in doubles?
2. How do you move a singles opponent?
3. What is the third shot?

UNIT 4 - TOPIC 4.7

4.7 Game scenarios

Scenarios: 19-19, serving at 20-19, receiving a high serve, defending a smash in doubles. Play them as short, intense points with a debrief.

Conditioned games (no smash, or only backhand returns) isolate the skill you just taught.

Close scores are a test of routine, not of a sudden new technique.

KEY POINTS

- Play the score you will actually meet.
- Condition one thing at a time.
- Rotate partners so styles change.
- Keep score honestly.

UNIT 4 - TOPIC 4.7

Try this

1. Start every rally at 19-19.
2. Doubles: defending pair may only block, not lift, for four points.
3. Singles: winner stays, but must use a different serve.

WATCH OUT

Skipping the debrief makes the scenario just another point.

COACH'S TIP

At 19-19 the routine you practised is more valuable than a new idea.

CHECK YOUR UNDERSTANDING

1. Why practise 19-19?
2. Give one useful conditioned game.
3. What should a 20-second debrief contain?

UNIT 4 - TOPIC 4.8

4.8 Cool-down and reflection

Cool down the calves, hips and hitting shoulder. Badminton looks light and then surprises you the next morning.

Reflection: which shot moved your opponent most, and which shot you still rush?

Light kit still asks a lot of the hitting shoulder and the lunging ankle.

KEY POINTS

- Shoulder and calf care.
- Count how many times you recovered to base.
- One shot to keep, one to slow down.
- Rackets away safely.

UNIT 4 - TOPIC 4.8

Try this

1. Shoulder mobility: 6 slow arm circles each way, then a doorway stretch.
2. Write a rally diary for your best point.
3. String check and grip check before you leave.

WATCH OUT

Throwing a racket is the end of your participation, not a colourful opinion.

COACH'S TIP

If your shoulder is tired, the session did its job. Treat it kindly afterwards.

CHECK YOUR UNDERSTANDING

1. Which body parts need extra cool-down in badminton?
2. What is a rally diary?
3. Why inspect the grip?

UNIT 4 - TOPIC 4.9

4.9 Individual assessment

Individual assessment: legal serve, a clear, a drop, movement to base, and a short competitive game. Honesty on line calls is part of the grade because it is part of the sport.

You may also complete a short rules quiz if practical evidence is incomplete.

A legal serve under watch is a better test than an illegal winner.

KEY POINTS

- Legal serve under pressure.
- Clear and drop with intent.
- Recovery to base.
- Fair play and scoring.

UNIT 4 - TOPIC 4.9

Try this

1. Perform three serves, three clears, three drops as a station.
2. Play to 7. Teacher watches movement, not only winners.
3. Mark your own line-call honesty from 1 to 4.

WATCH OUT

Winning a station with illegal serves is not winning.

COACH'S TIP

Show control first. Power without a legal serve is just noise.

CHECK YOUR UNDERSTANDING

1. What skills sit in the station assessment?
2. Why do line calls count?
3. What written assessment might replace a missed practical?

UNIT 5 • TERM 3

Volleyball

A net game built on three contacts and constant talk. One quiet player makes the whole court smaller.

UNIT 5

In this unit you will

- ✓ Explain volleyball rules, rotations and scoring.
- ✓ Perform forearm pass, set, serve, spike and block.
- ✓ Use simple offensive and defensive systems.
- ✓ Communicate every ball.
- ✓ Show leadership and support for teammates.
- ✓ Reflect after a match and name one team improvement.

Volleyball is a series of short problems. Pass, set, attack. Then recover your base before the next ball.

Topics in this unit

5.1 Introduction and rules

5.2 Warm-ups

5.3 Ball control

5.4 Attacking skills

5.5 Defensive skills

5.6 Game strategies

5.7 Game scenarios

5.8 Cool-down and reflection

5.9 Collective assessment

Fitness this unit develops

- Agility
- Coordination
- Balance
- Jumping
- Strength
- Reaction time

Sporting values

- Call the ball early: mine, yours, help.
- Celebrate a good pass, not only a winning spike.
- Rotate without argument.
- Help retrieve balls so the next rally can start.

Call every ball. Celebrate the pass, not only the spike.

UNIT 5 - TOPIC 5.1

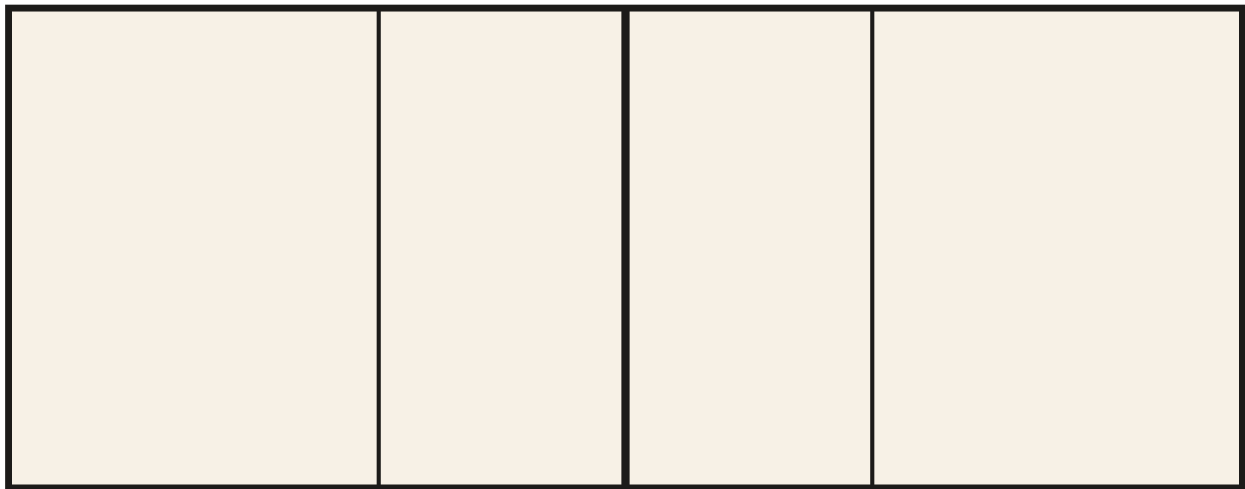

5.1 Introduction and rules

Volleyball is a six-a-side net game. FIVB rules use rally scoring: a set is usually to 25 points, win by two. You may touch the ball three times on your side. A block does not count as one of those three in the full game.

Players rotate clockwise when they win the right to serve. Positions have numbers. Year 7 teams should know at least 'I serve next' and 'I am front left'.

The ball may be played with any part of the body, but the clean skills are the forearm pass, the overhead set and a controlled attack.

Volleyball: centre line and attack lines (3 m from the net)

KEY POINTS

- Six players. Three contacts. Then over.
- Rotate when you win the serve.
- The ball may not rest or be caught.
- Net and antennae are part of the court.

UNIT 5 - TOPIC 5.1

A volleyball team on court: net, antennae and the space you defend.

Try this

1. Stand in rotation 1 to 6 and rotate on a clap.
2. Explain rally scoring to a partner in two sentences.
3. Name the attack line and why back-row players care.

WATCH OUT

Two players calling 'mine' and then watching the ball drop is a communication fault, not bad luck.

COACH'S TIP

Volleyball is built on talk. Call every ball, even the easy ones.

CHECK YOUR UNDERSTANDING

1. How many contacts may a team use?
2. When do you rotate?
3. What is rally scoring?

UNIT 5 - TOPIC 5.2

5.2 Warm-ups

Warm-up for volleyball includes shoulders, wrists and the landing from small jumps. Then cooperative passing along the net so the first contact of the lesson is friendly.

Pepper (pass-set-attack in a pair) is a warm-up only when both players can control the ball. Otherwise it is a chaos drill.

Cooperative passing builds the platform you will need when the serve gets harder.

KEY POINTS

- Shoulders and wrists first.
- Small jumps with quiet landings.
- Cooperative passing.
- Pepper only when control is there.

UNIT 5 - TOPIC 5.2

Try this

1. Wall passing: 20 forearm, 20 overhead.
2. Partner passing along a line, no attack.
3. Three block jumps, focus on landing.

WATCH OUT

Serving at full power in the first minute is not a warm-up.

COACH'S TIP

If the ball is slapping your wrists, your platform is not together yet.

CHECK YOUR UNDERSTANDING

1. Why warm up the shoulders for volleyball?
2. When is pepper a bad idea?
3. What should a landing sound like?

UNIT 5 - TOPIC 5.3

5.3 Ball control

The forearm pass (bump) uses a flat platform: elbows straight, thumbs together, angle the platform toward the target. Move the feet first. The arms are a surface, not a swing.

The overhead set uses both hands above the forehead, a quick soft contact, and an even push. The setter faces the attacker they want to use.

A forearm platform is flat, still and aimed. The legs do the work.

KEY POINTS

- Feet to the ball.
- Platform toward the target.
- Set from the forehead, not the chest.
- Call early.

UNIT 5 - TOPIC 5.3

Try this

1. Partner toss, pass back 15 times.
2. Triangle: toss, pass, set, catch.
3. Move a partner with the direction of your platform, not with power.

WATCH OUT

Swinging the arms from the shoulders turns a pass into a wild rebound.

COACH'S TIP

The platform is a table you carry to the ball. Do not punch the table.

CHECK YOUR UNDERSTANDING

1. What do the thumbs do in a forearm pass?
2. Where is the contact for a set?
3. Why move the feet before the arms?

UNIT 5 - TOPIC 5.4

5.4 Attacking skills

Attacking is approach, jump, contact, land. A three-step approach is enough in Year 7. Contact the ball in front of the hitting shoulder. Aim for space, not for the defender's chest every time.

A tip or roll shot is still an attack. So is a well-placed down-ball when the set is low.

An attack is timed to the set. The last step plants, the arm is already up.

KEY POINTS

- Approach in rhythm.
- High contact, open hand.
- Aim for space.
- Land on two feet when you can.

UNIT 5 - TOPIC 5.4

Try this

1. Shadow approaches without a ball.
2. Attack from a friendly set into a target zone.
3. Tip versus hit: choose after you see the block.

WATCH OUT

Running under the ball and then reaching back is how wrists get hurt.

COACH'S TIP

The set decides the attack. A hitter who complains about every set will run out of teammates.

CHECK YOUR UNDERSTANDING

1. What are the four parts of an attack?
2. When is a tip a better choice than a hard hit?
3. Why land on two feet?

UNIT 5 - TOPIC 5.5

5.5 Defensive skills

Defence is reading and a low ready position. On serve receive, angle the platform to the setter. On a hard attack, get the last contact up, not pretty.

Blocking is timing plus a straight reach over the net without touching it. Year 7 blocks are often about taking away one angle rather than stuffing every hit.

A low ready position turns a hard serve into a pass instead of a rebound off the chest.

KEY POINTS

- Ready position before the hitter jumps.
- Serve receive to the setter, not just 'up'.
- Block the most likely angle.
- Cover the hitter on your own team.

UNIT 5 - TOPIC 5.5

Try this

1. Serve receive in threes, target a hoop where the setter stands.
2. Shadow block: jump, reach, land, without net contact.
3. Dig a tossed ball and keep it on your side.

WATCH OUT

Standing upright to 'see better' is how balls hit the floor between your feet.

COACH'S TIP

A dig that stays on your side is a success. Olympic form can wait.

CHECK YOUR UNDERSTANDING

1. Where should a serve receive go?
2. What is the main Year 7 job of a block?
3. What does covering your hitter mean?

UNIT 5 - TOPIC 5.6

5.6 Game strategies

A simple offence is pass-set-hit. A simple defence is three at the net or a 4-2 with two setters. Year 7 teams should pick one system and keep it for a block of lessons.

The free ball (a gentle return) is the moment to run the proper offence. Talk: 'free' so everyone knows.

A designated setter turns three random contacts into an offence.

KEY POINTS

- One system, repeated.
- Setter calls the attacker.
- Free ball: run the real offence.
- Serve to a seam, not always to the same person.

UNIT 5 - TOPIC 5.6

Try this

1. Play 4 v 4 with a designated setter.
2. Every free ball must be set before it goes over.
3. Serve to the seam between two receivers.

WATCH OUT

Changing the system every point is not tactics. It is confusion.

COACH'S TIP

Tactics are just an agreement you remember when you are tired.

CHECK YOUR UNDERSTANDING

1. What is a free ball?
2. Why designate a setter?
3. What is a seam?

UNIT 5 - TOPIC 5.7

5.7 Game scenarios

Scenarios: side-out at 24-24, receiving serve after a rotation error, playing with a substitute who has just come on. Keep them short and spoken aloud.

Conditioned games: three contacts required, or no jump attack, isolate the skill.

Close sets reward the team that still passes to the setter.

KEY POINTS

- Speak the scenario before the serve.
- Three-contact games build the habit.
- Rotate substitutes with a job, not a shrug.
- Reset the serving order after every stoppage.

UNIT 5 - TOPIC 5.7

Try this

1. Start every set at 23-23.
2. Required three contacts, otherwise replay.
3. A substitute must make the first call of their next rally.

WATCH OUT

Blaming the new substitute is a leadership fail.

COACH'S TIP

24-24 is just another rally with better posture.

CHECK YOUR UNDERSTANDING

1. Why require three contacts in a teaching game?
2. What should a substitute be told as they enter?
3. What happens at 24-24 in rally scoring?

UNIT 5 - TOPIC 5.8

5.8 Cool-down and reflection

Cool down shoulders, calves and the lower back. Volleyball is jumps plus sudden stops.

Reflection: who talked, who hid, and what the next match needs more of.

The court is packed away by the same team that just played on it.

KEY POINTS

- Shoulder and calf care.
- Team reflection, not only personal.
- One communication target.
- Net and balls packed as a team.

UNIT 5 - TOPIC 5.8

Try this

1. Team circle: one keep, one change.
2. Shoulder stretch in pairs, carefully.
3. Write the serving order for the next lesson while it is still in your head.

WATCH OUT

Leaving the net half-wound is how the next class starts late.

COACH'S TIP

The quietest player on court is a tactical problem. Include them on purpose.

CHECK YOUR UNDERSTANDING

1. Which body parts need extra care after volleyball?
2. What belongs in a team reflection?
3. Why write the serving order down?

UNIT 5 - TOPIC 5.9

5.9 Collective assessment

Collective assessment is a match. Teachers watch pass quality, the habit of three contacts, movement to the ball, talk, rotation discipline and fair play.

You cannot hide on a six-person court. That is the point.

Collective assessment watches the whole six, including the player who never spikes.

KEY POINTS

- Serve receive and first contact.
- Three-contact habit.
- Rotation and serving order.
- Talk and encouragement.

UNIT 5 - TOPIC 5.9

Try this

1. Play a short assessed set.
2. Self-score talk from 1 to 4.
3. Name the job you will do if you are not the hitter.

WATCH OUT

Avoiding serve receive is visible from any chair.

COACH'S TIP

Be the person who makes the first contact playable. Teams remember that player.

CHECK YOUR UNDERSTANDING

1. What is the main assessment event?
2. Which habit is watched besides the spike?
3. What job exists if you are not attacking?

UNIT 6 • TERM 3

Sports Aerobics

High-energy movement to music. Strength, flexibility and timing come together in a short routine.

UNIT 6

In this unit you will

- ✓ Explain the purpose and safety principles of sports aerobics.
- ✓ Perform basic aerobic steps in time with music.
- ✓ Show simple strength and flexibility elements with control.
- ✓ Build and perform an individual and a group routine.
- ✓ Work with others on timing and spacing.
- ✓ Reflect on performance quality, not only energy.

Sports aerobics is not only fitness. It is controlled movement, clear shapes and teamwork with the music.

Topics in this unit

[6.1 Introduction and rules](#)[6.2 Warm-ups](#)[6.3 Basic skills](#)[6.4 Strength elements](#)[6.5 Flexibility](#)[6.6 Routine building](#)[6.7 Performance](#)[6.8 Cool-down and reflection](#)[6.9 Assessment](#)

Fitness this unit develops

- Cardiovascular endurance
- Coordination
- Flexibility
- Strength
- Balance
- Rhythm

Sporting values

- Give other groups a quiet space to rehearse.
- Count the music together.
- Support a classmate who is learning a new step.
- Finish the routine even if a move goes wrong.

Count together and give the other group the floor. Performance is a shared job.

UNIT 6 - TOPIC 6.1

6.1 Introduction and rules

Sports aerobics is a judged fitness sport under the FIG family of gymnastics. In school it is a way to train rhythm, strength, flexibility and performance without needing a full apparatus hall.

Safety is the first rule: land softly, keep knees in line with toes, and never force a flexibility shape. Music is a partner, not a race.

Routines are short. Quality of shape and timing beats a long sequence that falls apart.

A clear floor, a speaker and enough space: the equipment list is short on purpose.

KEY POINTS

- Control first, then speed.
- Land softly, joints stacked.
- Music has counts. Learn them.
- Space: know your personal square.

UNIT 6 - TOPIC 6.1

Try this

1. Clap an 8-count and step on each beat.
2. Mark a 2 m square of personal space with cones.
3. Write one safety rule in your own words.

WATCH OUT

Comparing your flexibility to the most mobile person in the room is how people get hurt.

COACH'S TIP

If the shape is ugly at slow speed, it will not become beautiful when the music is loud.

CHECK YOUR UNDERSTANDING

1. What does FIG have to do with this unit?
2. Why are routines kept short in Year 7?
3. What is an 8-count?

UNIT 6 - TOPIC 6.2

6.2 Warm-ups

Aerobic warm-ups follow the music from the start. March, step-touch, grapevine, easy hamstring and hip openers, then a little faster.

Include wrist and ankle circles if the lesson will contain floor strength elements.

A group warm-up is already a rehearsal of timing and spacing.

KEY POINTS

- Move with the music immediately.
- Raise pulse, then mobilise.
- Rehearse the basic steps you will use.
- Check the floor for slip hazards.

UNIT 6 - TOPIC 6.2

Try this

1. Follow an 8 x 8 warm-up led by a classmate.
2. Step-touch for two 8-counts, then grapevine for two.
3. Spot and remove one floor hazard.

WATCH OUT

Socks on a polished floor are not a style choice. Wear the shoes you were asked to wear.

COACH'S TIP

If you can smile and keep the count, the warm-up pace is right.

CHECK YOUR UNDERSTANDING

1. Which basic steps belong in a warm-up?
2. Why check the floor?
3. When should wrists be mobilised?

UNIT 6 - TOPIC 6.3

6.3 Basic skills

Basic aerobic skills are the vocabulary: march, jog, skip, knee lift, kick, jumping jack, step-touch, grapevine and a simple turn. Each has a clear arm pattern so the whole body reads as one phrase.

Learn them on the right lead and the left lead. Routines that only travel one way look unfinished.

A jumping jack is two legs and two arms, finished in one clear shape.

KEY POINTS

- Clear feet, clear arms.
- Both leads.
- Stay on the count.
- Finish each shape.

UNIT 6 - TOPIC 6.3

Try this

1. Perform each basic step for one 8-count.
2. Link four steps into a 4 x 8 phrase.
3. Teach your phrase to another pair.

WATCH OUT

Floppy arms make even good footwork look accidental.

COACH'S TIP

Hit the shape on the count, then move. Do not smear one step into the next.

CHECK YOUR UNDERSTANDING

1. Name five basic aerobic steps.
2. Why practise both leads?
3. What does 'finish the shape' mean?

UNIT 6 - TOPIC 6.4

6.4 Strength elements

Strength elements in school aerobics are controlled: a strong plank, a clean press-up, a tucked jump, a controlled squat. They are held or landed, not flung.

If you cannot do a full press-up, use a box or knee variation with the same body line. The line is the skill.

Light equipment is enough. The strength element is the body line.

KEY POINTS

- Stacked joints.
- A hold is still a performance.
- Land, then smile. Do not collapse.
- Choose the variation you can control.

UNIT 6 - TOPIC 6.4

Try this

1. 10-second plank with a straight line, twice.
2. 5 controlled squat jumps, quiet landings.
3. Press-up variation: 6 reps, film or partner-check the line.

WATCH OUT

A banana back in a plank is not a stronger plank. It is a different, worse shape.

COACH'S TIP

Strength in this unit is visible stillness. Anyone can shake.

CHECK YOUR UNDERSTANDING

1. What makes a plank a performance element, not just fitness?
2. When should you choose a variation?
3. What should a landing look like?

UNIT 6 - TOPIC 6.5

6.5 Flexibility

Flexibility is a range you can control. Dynamic swings to warm, then short holds. Never bounce into pain. Hips, hamstrings and shoulders matter most for the shapes in this unit.

A kick is a flexibility skill only if the standing leg is still and the hips stay level.

A controlled kick keeps the standing hip quiet. The height is secondary.

KEY POINTS

- Warm before you hold.
- Level hips on kicks.
- Breathe in the hold.
- No bouncing into pain.

UNIT 6 - TOPIC 6.5

Try this

1. Standing hamstring hinge, 20 seconds each side.
2. Controlled front kick, 6 each leg, hips level.
3. Shoulder flex: hold a band or towel, 20 seconds.

WATCH OUT

Comparing kick height is the fastest way to lose the standing-leg skill.

COACH'S TIP

Height without control is just a fall that has not happened yet.

CHECK YOUR UNDERSTANDING

1. What is the difference between dynamic and held flexibility?
2. What should the standing leg do during a kick?
3. Why is bouncing a bad idea?

UNIT 6 - TOPIC 6.6

6.6 Routine building

A Year 7 routine is 32 to 64 counts: a start shape, two or three travelling phrases, one strength or flexibility moment, and a finish shape that you actually hold.

Write it down. Counts on paper prevent arguments in the group and help you rehearse without the speaker.

Choreography on paper looks unromantic. It is how groups stay together.

KEY POINTS

- Start and finish are part of the dance.
- Travel, then a highlight, then a close.
- Write the counts.
- Leave space between bodies.

UNIT 6 - TOPIC 6.6

Try this

1. Draft a 4 x 8 individual routine.
2. In threes, build a 8 x 8 group routine with one highlight.
3. Rehearse once without music, counting aloud.

WATCH OUT

Copying a social-media routine you cannot land is not choreography.

COACH'S TIP

If you cannot count it, you cannot perform it.

CHECK YOUR UNDERSTANDING

1. How long should a Year 7 routine be?
2. What is a highlight?
3. Why write the counts down?

UNIT 6 - TOPIC 6.7

6.7 Performance

Performance is the routine plus the way you enter, face the audience and hold the last shape. Eyes up. A mistake that you continue from is better than a mistake that you narrate with your face.

In a group, the performance is the agreement: same count, same spacing, same energy on the highlight.

A group performance is timing plus spacing. The highlight only works if both are shared.

KEY POINTS

- Enter on purpose.
- Recover from errors without stopping.
- Hold the last shape.
- Applaud other groups as you want to be applauded.

UNIT 6 - TOPIC 6.7

Try this

1. Perform your individual phrase to a small audience.
2. Group performance: one take, filmed if possible.
3. Watch another group and name one precise strength.

WATCH OUT

Laughing through your own routine teaches the audience not to take you seriously. Save the laugh for after the hold.

COACH'S TIP

The last shape is the photograph. Give it two full counts.

CHECK YOUR UNDERSTANDING

1. What should you do when you miss a step?
2. Why hold the last shape?
3. What is a useful comment to another group?

UNIT 6 - TOPIC 6.8

6.8 Cool-down and reflection

Cool down with slower music: march, side stretch, hamstring and hip holds. Bring the pulse down before you sit and talk.

Reflection: which count still wobbles, and who in the group holds the formation together?

Slow music at the end is a physiological tool, not a mood.

KEY POINTS

- Slower music to finish.
- Longer holds than the warm-up.
- Name the wobbly count.
- Thank the group.

UNIT 6 - TOPIC 6.8

Try this

1. Lead a 1-minute cool-down to a quiet track.
2. Circle: one keep, one change, no names of blame.
3. Rewrite the wobbly 8-count only.

WATCH OUT

Skipping the cool-down because you want to watch the film back is still skipping the cool-down.

COACH'S TIP

Fix one 8-count. Do not rebuild the whole routine out of nerves.

CHECK YOUR UNDERSTANDING

1. How should the music change in the cool-down?
2. What is a useful team reflection rule?
3. Why rewrite only the wobbly count?

UNIT 6 - TOPIC 6.9

6.9 Assessment

Assessment is a short individual or group performance plus a simple written plan of counts. Teachers watch timing, control of strength or flexibility elements, spacing and the way you recover from a mistake.

Energy matters. Chaos does not.

Assessment watches control and timing. The extra move you do not quite own can wait.

KEY POINTS

- Timing with the music.
- Controlled elements.
- Spacing and finish.
- A written 8-count plan.

UNIT 6 - TOPIC 6.9

Try this

1. Perform the assessed phrase once, then once more after 30 seconds of quiet.
2. Hand in the written counts.
3. Self-score control from 1 to 4.

WATCH OUT

Adding a new move on assessment day is how controlled work becomes a fall.

COACH'S TIP

Show the routine you own, not the routine you saw last night.

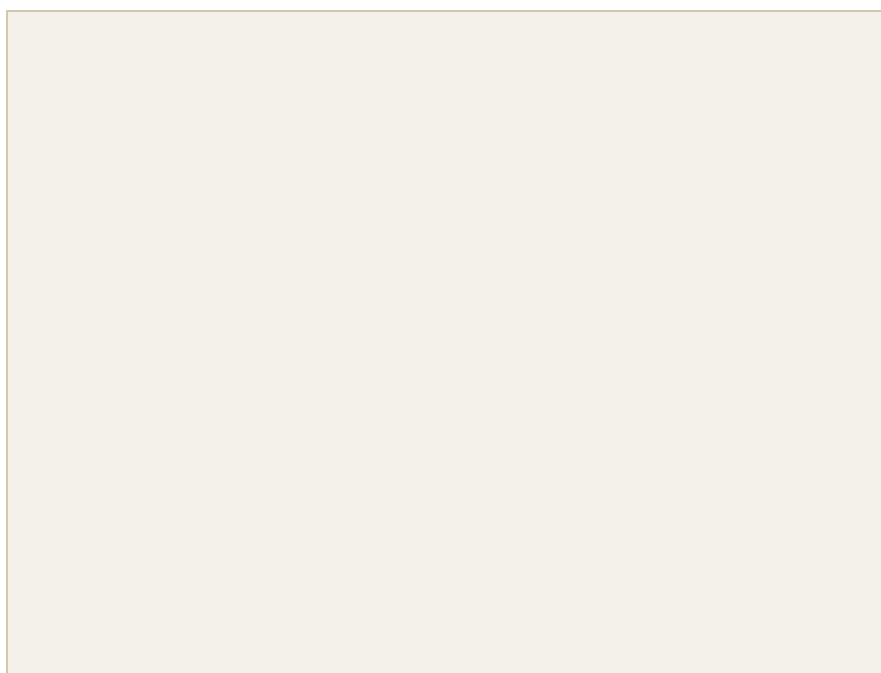

CHECK YOUR UNDERSTANDING

1. What evidence sits beside the performance?
2. Which qualities are assessed?
3. Why is a second take after 30 seconds useful in rehearsal?

Your year in six sports

Look back across the three terms. The aim was not to become a specialist in one sport. It was to leave Year 7 able to join a game, look after your body and help a teammate.

Unit	One skill I can now explain	One habit I will keep
Futsal		
Cross Country		
Basketball		
Badminton		
Volleyball		
Sports Aerobics		

Fitness in this book is a personal record. Compare yourself with the runner you were in September.

WRITE THREE SENTENCES

1. The sport in which I improved most, and why.
2. The moment I helped someone else play better.
3. The habit I will take into Year 8.

Keep moving after the last lesson

Physical Education is a school subject. Physical activity is a life habit. The two only meet if you choose them to. You do not need a club trial to stay active. You need a plan you will actually keep.

IN SCHOOL

Join a lunch club. Offer to referee. Help set up the next class.

OUT OF SCHOOL

Walk or cycle a regular route. Play a small-sided game in the park.

WITH OTHERS

Invite someone who does not usually play. Teach them one skill from this book.

ON YOUR OWN

Ten minutes of mobility or an easy run still counts. Write it down.

A FAIR TARGET

Pick one session a week that is not a PE lesson. Put it on a calendar. If you miss it, restart the next week. Do not wait for September.

The six sports in this book will return, in harder forms, in Years 8 and 9. The students who enjoy those years are usually the ones who kept the simple habits: a decent warm-up, an honest first touch, and a word for the person next to them.

Word list

These words are used in the units. The definition matches the way the book uses the word.

Agility	The ability to change direction quickly and under control.
Attack line	The three-metre line in volleyball that limits back-row attacks.
Base	The recovery position on a badminton court, usually near the centre in singles.
Clear	A high, deep badminton shot to the back of the court.
Cool-down	Easy movement and stretching that bring the pulse down after work.
Extra player	The attacker who is free because teammates have drawn defenders away.
FIG	Fédération Internationale de Gymnastique, the international gymnastics federation.
First touch	The first contact that receives a moving ball and sets up the next action.
Free ball	A gentle volleyball return that lets the receiving team run a full offence.
Help and recover	Leaving your player briefly to stop a drive, then returning.
Pivot	A futsal attacker who plays with their back to goal and links play.
Platform	The flat surface made by the forearms in a volleyball pass.
Rally scoring	A system in which every rally wins a point, not only the serving side.
Split step	A small hop just as the opponent hits, so you can push off in any direction.
Talk test	A simple check: if you can speak a sentence, the endurance pace is about right.
Travelling	In basketball, taking too many steps without dribbling.

Sources and references

Facts about rules and governing bodies were checked against the organisations named below. School adaptations (court sizes, time, and the way assessments run at Prime School) follow the department course file that supplied the scope of this book.
