

Physical Education

Year 10

Student Book

PRIME BOOKS

About this book

This Year 10 Physical Education student book is for Upper Secondary students who already know how to join a game and are ready to train, analyse and lead.

The course follows the department year plan: futsal and cross country in Term 1, athletics and aerobics in Term 2, korfball and non-contact American football in Term 3. Each unit moves from rules and safety to advanced technique, tactics, match play and assessment.

Year 10 writing is exam-facing. You will meet training principles, energy systems, levers and performance analysis beside the sport they belong to. Coach's tips are written in a staff voice. No teacher is named on a pupil page.

Term 1 · Futsal

Term 1 · Cross Country

Term 2 · Athletics

Term 2 · Aerobics

Term 3 · Korfball

Term 3 · American Football

Product title: Physical Education Year 10 Student Book. Interior art prepared for this edition. Source material for scope and sequence: department Year 10 Physical Education course file.

Editorial Board

The Prime Books Physical Education series has been developed under the guidance of the Pedagogical Academic Group for Physical Education and coordinated by the Pedagogical Team of Prime School.

We thank the Pedagogical Department and the Content Creation Team of Prime School for their work on this book.

Welcome

Year 10 asks you to think like an athlete. Technique still matters. So do the decisions around it: when to press, when to wait, how to pace a race, how to lead a group that is tired.

You will train across six sports. Some are familiar. Korfball and flag football may be new. Treat every new rule as a problem to solve, not as a reason to stand still. Fitness, analysis and fair play run through every unit.

Each unit opener carries its own plate. The pictures match the page: a futsal hall on futsal pages, a trail on cross-country pages, a korf on korfball pages. Read the caption. It tells you what to look for, not only that an image is there.

What this year is for

By the end of the course you should be able to:

- ✓ Perform advanced sport-specific skills with control under pressure.
- ✓ Apply FITT and SPORT principles to a short training block.
- ✓ Name the energy system that dominates a named effort.
- ✓ Use tactics in individual and team sports, then explain the choice.
- ✓ Lead, officiate and communicate without losing respect.
- ✓ Analyse performance with a simple notational record.
- ✓ Keep habits that support lifelong physical activity.

1 INTRODUCTION

History, rules, equipment, safety and the point of the sport.

2 SKILL

Techniques taught in order, with coaching points you can rehearse.

3 PRACTICE

Drills that raise good repetitions and force a decision.

4 GAME

Constrained scenarios, then more open match or race play.

5 ANALYSIS

Why the skill works: body, energy, lever or tactic.

6 ASSESSMENT

Skills shown in authentic play, plus fitness or written evidence.

How to use this book

Read the unit introduction before the first drill. Year 10 lessons move quickly. If you skip the rule, you will practise the wrong picture.

Feature	What it is for
Introduction	Rules, equipment and the point of the sport.
Skill focus	The technique, written so you can rehearse it.
Coach's tip	One piece of unnamed staff advice.
Watch out	The common mistake, named before you make it.
Try this	Drills and tasks. Do them.
Analyse	A Year 10 question that links the skill to theory.
Check	Short questions. Discuss them in class.

COACH'S TIP

Master the first picture of each skill before you chase speed. A calm repetition teaches more than a messy one at match pace.

Three terms

Term	Sports	What develops
1	Futsal and Cross Country	Close control, tactics, endurance, pacing and outdoor judgement.
2	Athletics and Aerobics	Speed, power, throwing, jumping, rhythm, strength and performance.
3	Korfball and American Football	Mixed teams, flag play, communication, design of attacks and defence.

Learner habits

CONFIDENT

Take the weaker side and the new role.

RESPONSIBLE

Look after people, kit and the rules.

REFLECTIVE

Name what changed after feedback.

INNOVATIVE

Solve the next picture, not the last one.

ENGAGED

Arrive ready and help the group finish well.

FAIR

Tell the truth about the line, the foul and the effort.

How you are assessed

Assessment gives you more than one way to show what you can do: practical performance, fitness, and written knowledge if practical evidence is missing. It follows an Upper Secondary Physical Education course: skill, tactics, analysis, leadership and a habit of staying active.

Type	What it looks at	When
Collective sports	Skills, tactics, talk, fair play in a team game.	End of a half-term or term
Physical fitness	Strength, endurance and change over time.	Across the year
Written knowledge	Rules, techniques, tactics, safety, training and terms.	When practical evidence is incomplete

Collective sports assessment

At the end of a team unit you will play. Isolated drills may support the picture, but the game is the main evidence. Teachers watch whether you can show techniques under pressure, make useful decisions, communicate, and respect rules, officials, teammates and opponents.

Fitness tests and written fallback

Fitness scores are personal. The question is whether you improved, not whether you beat the person next to you.

Test	Component
Press-up test	Upper-body strength and endurance
Sit-up test	Core strength and endurance
20 m shuttle run (beep test)	Aerobic endurance

A simple record (clipboard, watch, one focus) is enough for Year 10 analysis. Count one action well rather than ten badly.

If you miss practical lessons

If there is not enough practical evidence, you will sit a written paper on the sports of that term: rules, techniques, tactics, safety, equipment, training ideas and terms. It is marked out of 100 per cent and contributes to the year.

UNIT 1 • TERM 1

Futsal

A fast indoor invasion game. Year 10 play is about the next pass, not the next trick.

UNIT 1

In this unit you will

- ✓ Explain FIFA futsal rules that change the outdoor game.
- ✓ Control, pass, shoot and keep with both feet under pressure.
- ✓ Apply a 2-2 or 3-1 shape in attack and a press-cover-balance defence.
- ✓ Analyse a possession using energy systems and decision time.
- ✓ Lead a restart and talk for a teammate.
- ✓ Show fair play on a hard court.

Topics in this unit

1.1 Introduction

1.2 Warm-ups

1.3 Ball control

1.4 Passing

1.5 Shooting and finishing

1.6 Goalkeeping

1.7 Attacking strategies

1.8 Defensive strategies

1.9 Game scenarios

1.10 Cool-down and reflection

1.11 Collective assessment

Fitness this unit develops

- Agility
- Speed
- Coordination
- Anaerobic power
- Reaction time
- Repeat sprint ability

Sporting values

- Respect officials on a fast court.
- Pass to the open player, not only the closest friend.
- Help the player who has just lost the ball.
- Stop play at once if someone is hurt.

Write one personal target before the first skill page. Make it a behaviour you can film: a first touch, a split time, a clean landing, a call that arrives early. Scores can wait.

UNIT 1 - TOPIC 1.1

1.1 Introduction

Futsal grew in Uruguay and Brazil as indoor football on a hard court. FIFA governs the international game. The low-bounce size 4 ball and the kick-in restart keep the ball on the floor and force a first touch that is close to the foot.

A school match is five including a goalkeeper. There is no offside. Unlimited rolling substitutions keep the intensity high. Year 10 futsal is not outdoor football played inside. It is its own sport.

Safety is footwear, no jewellery, and no slide tackles. The court does not give way. You do.

KEY POINTS

- Five players, rolling substitutes, no offside.
- Kick-in, not throw-in. Four seconds in the full game.
- Low-bounce ball: kill the bounce, then look.
- Hard-court safety: no slides, clean indoor shoes.

UNIT 1 - TOPIC 1.1

Try this

1. Walk the court and name goal line, touch line, penalty mark and corner arc.
2. List three rules that would change if this were outdoor football.
3. Write one technical target for the unit, not a score target.

WATCH OUT

Treating the hall like grass. Slide tackles and studs do not belong here.

COACH'S TIP

Learn the restart first. Most Year 10 turnovers happen at the kick-in, not in open play.

ANALYSE

A 4-second restart is an ATP-PC action. What happens to decision quality if the same player takes every kick-in without a substitute?

CHECK YOUR UNDERSTANDING

1. Why does a low-bounce ball change the skills you need?
2. Name two restarts that differ from outdoor football.
3. What will you measure as success besides winning?

UNIT 1 - TOPIC 1.2

1.2 Warm-ups

A futsal warm-up raises pulse and rehearses the shapes of the lesson: short passing, stopping under control, and a change of direction.

Start with easy jogging and dynamic mobility for ankles, hips and calves. Add the ball while you can still talk. A full-speed shot as the first touch of the lesson is too late and too sharp.

A futsal warm-up looks like the game: short steps, a ball, and a change of direction.

KEY POINTS

- Pulse raiser: 3 to 4 minutes.
- Dynamic mobility, not long static holds.
- Ball activation on the move.
- One short reaction game before the main drill.

UNIT 1 - TOPIC 1.2

Try this

1. Lead a 60-second pulse raiser for your group.
2. Eight changes of direction in a 6 m square, then the same with a ball.
3. Name one muscle group you felt and why it matters on a hard court.

WATCH OUT

Long static stretches at the start cool the tissue you are about to load.

COACH'S TIP

If you can still speak in full sentences, the first two minutes are about right.

ANALYSE

Which energy system are you waking in a 4-minute pulse raiser, and which one will the first match sprint use?

CHECK YOUR UNDERSTANDING

1. What are the two jobs of a futsal warm-up?
2. Give one dynamic stretch for this sport.
3. When should the ball first appear?

UNIT 1 - TOPIC 1.3

1.3 Ball control

First touch is a pass to yourself. Cushion with the inside of the foot, or the sole, and send the ball into the space you already chose. A heavy first touch turns you into a defender.

Dribbling is done in a tight box. Sole to stop and roll, inside and outside to change direction. Keep the ball within a step. Head up between touches.

First touch with the whole body in the picture: legs, balance, and a head that is already up.

KEY POINTS

- Cushion, do not stab.
- First touch away from the arriving press.
- Sole, inside, outside: three tools, one close ball.
- Head up between touches.

UNIT 1 - TOPIC 1.3

Try this

1. Wall work: 20 first touches each foot.
2. 1 v 1 in a 6 m square: keep the ball for 8 seconds.
3. Sole-roll slalom, weaker foot only.

WATCH OUT

Watching the ball for the whole dribble. You will run into a player you never saw.

COACH'S TIP

Aim the first touch where the next picture of the game already is.

ANALYSE

A first touch is a closed skill that becomes open as soon as a marker arrives. What changes in the technique when the press is late rather than early?

CHECK YOUR UNDERSTANDING

1. Which surface is safest for a firm incoming pass?
2. Why is a sole roll useful on a hard court?
3. What should the first touch do if a marker arrives from your right?

UNIT 1 - TOPIC 1.4

1.4 Passing

Passing is short, early and often. The inside-foot pass is the base. Add the sole pass when the ball is under you and a driven floor pass when you must beat a line of pressure.

The receiver is part of the pass. Show a target, call, and move again. Standing still after a pass is how attacks die on a small court.

Passing lanes appear and disappear quickly. The player without the ball creates the next one.

KEY POINTS

- Inside foot for accuracy, ankle locked.
- Pass to the safe foot, away from the marker.
- Move after you pass: give an angle.
- Use both feet.

UNIT 1 - TOPIC 1.4

Try this

1. Triangle passing, then switch direction.
2. Keep-ball 3 v 1 in an 8 m square.
3. One-touch around a square. Reset if the ball stops.

WATCH OUT

A clever pass that a teammate cannot control is a turnover with extra steps.

COACH'S TIP

Look at the receiver's feet, not only the space.

ANALYSE

In a 3 v 1, why does the extra player usually stand on a different line from the ball, not beside it?

CHECK YOUR UNDERSTANDING

1. Name two futsal passes and when you would use each.
2. What should you do in the second after you pass?
3. Why is a pass to the safe foot better than a pass to the nearest foot?

UNIT 1 - TOPIC 1.5

1.5 Shooting and finishing

Finishing is often from a crowd. Accuracy beats wild power. The laces drive is for a clear sight of goal. The inside-foot placement is for the far corner when the goalkeeper has stepped out.

Standing foot beside the ball, head still, follow through toward the target. Practise both feet. Follow the shot: rebounds are part of the finish.

A composed finish starts with the standing foot and a still head, not with a longer backswing.

KEY POINTS

- Pick a target before you swing.
- Low shots are harder for the goalkeeper on a hard court.
- Follow in.
- Do not shoot when a simple pass creates a better chance.

UNIT 1 - TOPIC 1.5

Try this

1. Ten placed finishes to the far corner from 8 m, each foot.
2. Receive, set, shoot in two touches.
3. 3 v 2 toward one goal. First-time finish if it is on.

WATCH OUT

Leaning back sends the ball over the bar.

COACH'S TIP

The best shot is the one the goalkeeper has to move for.

ANALYSE

A low shot uses a shorter lever and a more stable base. Why does that raise accuracy when you are off balance after a first touch?

CHECK YOUR UNDERSTANDING

1. When is a placed finish better than a driven shot?
2. What does the standing foot do?
3. Why follow the shot?

UNIT 1 - TOPIC 1.6

1.6 Goalkeeping

The futsal goalkeeper is a field player with hands in a small area. Stance is low, hands ready, feet ready to close the angle. Distribution starts the next attack: a calm roll beats a hopeful punt.

Every outfield player should spend time in goal. Understanding the goalkeeper's picture makes you a more honest attacker.

The goal is small, so positioning beats spectacular diving.

KEY POINTS

- Ready stance: knees bent, weight forward.
- Get big. Do not dive early.
- Distribute with the hands when you can.
- Communicate: left, right, time, keeper.

UNIT 1 - TOPIC 1.6

Try this

1. Angle work: close down three cones as shots arrive.
2. Roll to a moving target 10 times each side.
3. Rotate the goalkeeper every two minutes in a 3 v 3.

WATCH OUT

Rushing off the line with your hands down leaves the near post empty.

COACH'S TIP

Your first job is to see the ball. Your second job is to tell the defence what you see.

ANALYSE

Closing the angle is geometry. If you step 1 m off the line toward the ball, what happens to the size of the goal the shooter can see?

CHECK YOUR UNDERSTANDING

1. What is the ready stance?
2. Give two ways a goalkeeper starts an attack.
3. Why should outfield players train in goal?

UNIT 1 - TOPIC 1.7

1.7 Attacking strategies

Attacks need width, depth and a spare player. One holds, one supports underneath, one stretches the far side. The fourth reads whether to join or to balance.

A Year 10 pattern is pass and move behind the first defender. Do not all run toward the ball. The court is already small.

Attacks breathe when players occupy different lines, not the same square metre.

KEY POINTS

- Create a diamond, not a crowd.
- Use the pivot as a back-to-goal link.
- Switch play when one side is blocked.
- Shoot when the extra player is free.

UNIT 1 - TOPIC 1.7

Try this

1. 4 v 2 keep-ball, then attack a goal on a call.
2. Pivot combination: bounce, lay off, third player runs.
3. Freeze a 4 v 4 and point to the spare player.

WATCH OUT

Dribbling into a teammate's space is a lost passing lane.

COACH'S TIP

The extra player is the attack. Find them with the pass you have.

ANALYSE

Why does a 3-1 often create a higher shot than a 2-2 against a set defence?

CHECK YOUR UNDERSTANDING

1. What three shapes should an attack keep?
2. What is the pivot's job?
3. When should you shoot rather than pass again?

UNIT 1 - TOPIC 1.8

1.8 Defensive strategies

Defence starts on turnover. The nearest player presses. The next covers the passing line. The rest drop into a compact shape between ball and goal.

If your player receives facing your goal, you arrived too late. Show them onto the weaker foot and do not dive in.

A compact defensive shape leaves no easy split pass through the middle.

KEY POINTS

- Press, cover, balance.
- Show the attacker onto the weaker foot.
- Do not dive in.
- Talk: I have the ball, you have the next pass.

UNIT 1 - TOPIC 1.8

Try this

1. 1 v 1: stay between ball and goal for 8 seconds.
2. 2 v 2: the covering defender stays connected.
3. On every turnover the nearest player sprints to the ball.

WATCH OUT

Ball-watching lets the free attacker walk into the penalty area.

COACH'S TIP

Good defenders defend the next pass, not only the player who already has the ball.

ANALYSE

A high press costs more ATP-PC than a mid-block. When would you choose the cheaper shape in the last two minutes?

CHECK YOUR UNDERSTANDING

1. What should the nearest player do on turnover?
2. What does the covering defender protect?
3. Why is a sideways force better than a dive-in?

UNIT 1 - TOPIC 1.9

1.9 Game scenarios

Match play is where skills become decisions. Play 3 v 3 and 4 v 4 before 5 v 5. Give each game one constraint: two-touch, weaker-foot finish, or a pass before a shot.

Rotate roles. The quiet player on the wing this game is the pivot next game.

A constrained small-sided game teaches one decision at a time.

KEY POINTS

- Small-sided first, then 5 v 5.
- One constraint per game.
- Everyone plays. Everyone keeps.
- Stop the game to coach one picture, then play on.

UNIT 1 - TOPIC 1.9

Try this

1. 4 v 4 two-touch, first to five.
2. Power-play: the trailing team adds a fifth player for two minutes.
3. After each game, one sentence from each team: what worked.

WATCH OUT

Turning a teaching game into an argument about the score wastes court time.

COACH'S TIP

Play the next ball. The last mistake is only useful if it changes the next choice.

ANALYSE

A two-touch constraint reduces decision time. Which players benefit, and which hide?

CHECK YOUR UNDERSTANDING

1. Why start with 3 v 3 before 5 v 5?
2. Give one useful constraint for a finishing game.
3. How should roles rotate?

UNIT 1 - TOPIC 1.10

1.10 Cool-down and reflection

Cool-down is easy movement, then slower stretches for calves, hip flexors and groin, the tissues that work hardest on a hard court.

Write one thing that improved and one thing to practise. 'Weaker-foot pass' is useful. 'Play better' is not.

Cool-down is still movement: stretch the tissues the hard court worked hardest.

KEY POINTS

- Lower the pulse before you sit.
- Hold stretches after the work, not before.
- Name a behaviour, not a feeling.
- Drink. Hard courts dry you out.

UNIT 1 - TOPIC 1.10**Try this**

1. Lead a 3-minute pulse-lower for your group.
2. Hold two stretches for 20 seconds each.
3. Write one keep and one change for the next lesson.

WATCH OUT

Sitting against the wall the moment the game ends.

COACH'S TIP

If you cannot name the change, the lesson has not finished.

ANALYSE

Why does a hard court raise the need for calf and groin care compared with grass?

CHECK YOUR UNDERSTANDING

1. Which tissues need the most attention after futsal?
2. When do static stretches belong?
3. Give one precise reflection sentence?

UNIT 1 - TOPIC 1.11

1.11 Collective assessment

Collective assessment is a game, not a cone drill. Teachers watch technique under pressure, decisions, talk, leadership and fair play.

You will play. Isolated skills may support the picture. The match is the evidence. If you miss too many lessons, a written paper on rules, tactics and safety replaces the missing practical evidence.

Collective assessment is a game. Isolated cone drills are only support.

KEY POINTS

- The game is the main evidence.
- Talk and fair play count.
- Fitness tests sit beside the sport, not instead of it.
- Written fallback if practical evidence is missing.

UNIT 1 - TOPIC 1.11

Try this

1. Play a 5 v 5 with rolling substitutes.
2. After the game, name one decision you would take again and one you would not.
3. Complete the three fitness tests on a later lesson and record your own scores.

WATCH OUT

Saving your best touches for the assessment and coasting in the lessons that teach them.

COACH'S TIP

Assessors notice the pass you make when you are tired.

ANALYSE

Why is a 5 v 5 a more valid assessment of Year 10 futsal than a 20-pass wall test?

CHECK YOUR UNDERSTANDING

1. What is the main evidence in a collective assessment?
2. Name three things teachers record besides goals.
3. What happens if practical evidence is missing?

UNIT 2 • TERM 1

Cross Country

Endurance over changing ground. Pace, posture and judgement beat a fast first minute.

UNIT 2

In this unit you will

- ✓ Explain course rules, terrain types and outdoor safety.
- ✓ Use efficient posture, arm drive and hill technique.
- ✓ Plan a training week using FITT and the aerobic system.
- ✓ Apply even-pace and negative-split race strategies.
- ✓ Show perseverance and respect on the trail.
- ✓ Reflect with a split time, not a slogan.

Topics in this unit

2.1 Introduction and rules

2.2 Warm-ups

2.3 Running techniques

2.4 Endurance development

2.5 Race strategies

2.6 Race scenarios

2.7 Cool-down and reflection

2.8 Individual assessment

Fitness this unit develops

- Aerobic endurance
- Muscular endurance
- Stamina
- Mental resilience
- Hill strength

Sporting values

- Leave the trail as you found it.
- Encourage the last runner as well as the first.
- Tell a teacher if you feel faint or lost.
- Do not cut the course.

Write one personal target before the first skill page.
Make it a behaviour you can film: a first touch, a split time, a clean landing, a call that arrives early. Scores can wait.

Cross-country fitness is time on hills and grass. Compare yourself with the runner you were in September.

UNIT 2 - TOPIC 2.1

2.1 Introduction and rules

Cross country is endurance running over natural ground: grass, trail, hill and sometimes sand or mud. There is no lane. The course is marked. Cutting it is cheating.

School races are usually 2 to 4 km for this year. You start together, but you run your own race. Safety is footwear with grip, knowing the course, and telling a teacher if you feel faint or lost.

KEY POINTS

- Stay on the marked course.
- Grip on the shoe matters more than colour.
- Know the start, the hill and the finish before the gun.
- Look after the runner beside you as well as your time.

UNIT 2 - TOPIC 2.1

Try this

1. Walk 400 m of the course and name three surface changes.
2. Check a partner's laces and any jewellery.
3. Write a one-sentence race aim that is not 'win'.

WATCH OUT

A sprint from the gun on a course you have not walked.

COACH'S TIP

The hill you fear is easier if you have already walked it once.

ANALYSE

On mixed terrain the aerobic system still dominates a 3 km race. When does the lactic system join in?

CHECK YOUR UNDERSTANDING

1. What makes cross country different from a track 1500 m?
2. Name two safety checks before a race.
3. Why is cutting the course a fairness issue, not only a time issue?

UNIT 2 - TOPIC 2.2

2.2 Warm-ups

An outdoor warm-up is longer when the air is cold. Easy jogging, dynamic mobility for hips and calves, then a few short strides on the first surface you will race.

Do not stand still after the strides. Keep moving until the start.

An outdoor warm-up is longer when the air is cold: jog, then dynamic work, then a few strides.

KEY POINTS

- Longer pulse raiser in the cold.
- Dynamic mobility for hips and calves.
- Two or three strides, not a time trial.
- Stay moving until the gun.

UNIT 2 - TOPIC 2.2

Try this

1. Lead a 5-minute outdoor pulse raiser.
2. Four walking lunges each side, then four skips.
3. One stride of 60 m at 80 per cent, then walk back.

WATCH OUT

Sitting on damp grass between strides.

COACH'S TIP

Warm shoes stay on until the last minute.

ANALYSE

Cold muscle has less elasticity. Which injury risk rises if you skip the pulse raiser on a wet morning?

CHECK YOUR UNDERSTANDING

1. Why is an outdoor warm-up often longer?
2. What is a stride?
3. What should you do between the last stride and the start?

UNIT 2 - TOPIC 2.3

2.3 Running techniques

Efficient running is a tall posture, a quick light cadence, and arms that drive forward and back, not across the chest. On the flat, think quiet feet.

Uphill: shorten the stride, lean slightly from the ankles, keep the arms working. Downhill: let the stride open a little, keep the hips over the feet, do not brake with the heels.

Tall posture, quiet feet, arms driving forward and back. The trail asks for all three.

KEY POINTS

- Tall, not stiff.
- Arms drive the rhythm.
- Shorten uphill, open downhill.
- Eyes on the next 5 m of ground, not on the horizon only.

UNIT 2 - TOPIC 2.3

Try this

1. 20 m of high knees, 20 m of skips, 20 m of easy run.
2. Walk a hill, then run it with short steps.
3. Film 10 seconds of a partner's arms and give one coaching point.

WATCH OUT

Over-striding downhill. The heel becomes a brake and a risk.

COACH'S TIP

Count three quiet steps. If you can hear a slap, you are landing too hard.

ANALYSE

A shorter uphill stride reduces the moment arm at the hip. Why does that save energy even though you take more steps?

CHECK YOUR UNDERSTANDING

1. What should change in your stride on a hill?
2. What do the arms do?
3. Why is a heel brake on a descent a problem?

UNIT 2 - TOPIC 2.4

2.4 Endurance development

Endurance is built by time on your feet, not by one heroic session. Use FITT: frequency, intensity, time, type. A Year 10 week might hold one long easy run, one interval session and one fartlek.

Easy running is aerobic. Intervals and hills tap the lactic system. Both belong. Neither belongs every day.

Energy systems: which one you use depends on time and intensity

KEY POINTS

- FITT plans the week.
- Easy running builds the base.
- Intervals raise speed you can still hold.
- Rest is part of the plan.

UNIT 2 - TOPIC 2.4

Try this

1. Write a 7-day plan with one rest day.
2. Run 4×2 minutes at a hard but controlled pace, 2 minutes easy between.
3. Name which session was aerobic and which was mixed.

WATCH OUT

Copying a club 10 km plan. You are not that athlete yet.

COACH'S TIP

If you cannot speak a short sentence, the easy run has stopped being easy.

ANALYSE

A student runs hard every day for two weeks and then gets slower. Which SPORT principle did they break?

CHECK YOUR UNDERSTANDING

1. What does each letter of FITT stand for?
2. Give one example of an aerobic session.
3. Why is rest a training method?

UNIT 2 - TOPIC 2.5

2.5 Race strategies

Even pace wins more school races than a fast first minute. Negative split means the second half is at least as quick as the first. That takes trust.

On a hill, do not sprint the bottom and walk the top. Stay even. Use other runners as moving references, not as people to hunt from the gun.

A watch and a pair of spikes do not make a plan. Splits do.

KEY POINTS

- Even pace, then negative split.
- Hills: even effort, not even speed.
- Pass on the outside, do not clip heels.
- The last 300 m is earned, not stolen from the first 300 m.

UNIT 2 - TOPIC 2.5

Try this

1. Run 1 km, record 200 m splits, and look at the pattern.
2. Practise a last-300 m change of pace at the end of an easy run.
3. Write a three-part race plan: start, hill, finish.

WATCH OUT

Chasing the first runner in the first 20 seconds.

COACH'S TIP

If the first 200 m feels easy, you have probably started about right.

ANALYSE

Why does a fast start recruit more lactic metabolism and leave less aerobic reserve for the last kilometre?

CHECK YOUR UNDERSTANDING

1. What is a negative split?
2. How should effort change on a hill?
3. Why is a fast first minute often expensive?

UNIT 2 - TOPIC 2.6

2.6 Race scenarios

Race day is a rehearsal of the plan. Walk the start, note the first bottleneck, know where parents and teachers stand so you do not look for them mid-race.

Team scoring in school cross country often adds the places of the first four or five finishers. Your fifth runner can beat another school's fifth even if your first does not win.

Race day is the plan, not a hunt from the gun. The pack still matters.

KEY POINTS

- Walk the first 200 m before the gun if you can.
- Do not stop in a gateway.
- Team scores care about the pack, not only the winner.
- Thank the marshals.

UNIT 2 - TOPIC 2.6

Try this

1. Set out a mini course with three surface changes and race it twice.
2. Calculate a team score from five places.
3. Practise a bottle hand-up without stopping.

WATCH OUT

Stopping dead at the line. Move through, then walk.

COACH'S TIP

A teammate 20 m behind you is still your race.

ANALYSE

In a pack finish, why is place more important than a few seconds of personal time for the team score?

CHECK YOUR UNDERSTANDING

1. Why walk the start?
2. How can a fifth runner change a team result?
3. What should you do in the 10 seconds after the finish?

UNIT 2 - TOPIC 2.7

2.7 Cool-down and reflection

Cool down with easy walking and jogging, then calves, quads and hip flexors. Change out of wet kit.

Write the time, the feel of the hill, and one change for the next race. That is the training log.

Keep moving after the line, then stretch calves, quads and hip flexors.

KEY POINTS

- Keep moving after the line.
- Change wet kit.
- Log time and one technical note.
- Eat and drink within the hour.

UNIT 2 - TOPIC 2.7

Try this

1. Walk 400 m together as a group.
2. Two calf stretches, 20 seconds each.
3. Write a three-line race log.

WATCH OUT

Sitting in a cold wind in a wet shirt.

COACH'S TIP

The log you write today is the plan you trust next month.

ANALYSE

Why does wet kit raise heat loss after a race, and why does that matter for recovery?

CHECK YOUR UNDERSTANDING

1. What should you do in the first two minutes after finishing?
2. Name two stretches for this unit.
3. What belongs in a race log?

UNIT 2 - TOPIC 2.8

2.8 Individual assessment

Individual assessment is a timed run over a known course plus a short written or spoken explanation of your pacing plan.

Improvement against your own previous time matters more than the order you finish today.

Individual assessment is a timed run on a known course plus a pacing plan you can explain.

KEY POINTS

- Known course, honest time.
- A plan you can explain.
- Personal improvement is the first score.
- Written fallback if you cannot run.

UNIT 2 - TOPIC 2.8

Try this

1. Run the assessment course.
2. Hand in a five-line pacing plan before the start.
3. Compare the plan with the splits afterwards.

WATCH OUT

Sandbagging an early time trial so the later one looks like magic.

COACH'S TIP

Assessors can see a dishonest first run. So can you.

ANALYSE

Is a 3 km time a valid measure of cross-country skill if the course has no hill? What is missing?

CHECK YOUR UNDERSTANDING

1. What two pieces of evidence make the assessment?
2. Why is personal improvement the first score?
3. What replaces a missed practical run?

UNIT 3 • TERM 2

Athletics

Run, jump and throw with a reason. Year 10 athletics is technique plus the lever that makes it work.

UNIT 3

In this unit you will

- ✓ Explain track and field safety, lanes and official roles.
- ✓ Sprint from blocks with a legal start.
- ✓ Perform long jump, high jump, shot, javelin and discus with school implements.
- ✓ Link each event to a lever or projectile idea.
- ✓ Compete fairly and measure honestly.
- ✓ Set a technical target after each trial.

Topics in this unit

3.1 Introduction and rules

3.2 Warm-ups

3.3 Sprinting

3.4 Long jump

3.5 High jump

3.6 Shot put

3.7 Javelin

3.8 Discus

3.9 Cool-down and reflection

3.10 Individual assessment

Fitness this unit develops

- Speed
- Power
- Coordination
- Flexibility
- Reaction time
- Core strength

Sporting values

- Stay behind the throwing arc until the official calls.
- Walk back on the track, do not cut a lane.
- Cheer a legal jump, not a foul that looked far.
- Carry implements, never throw them in warm-up.

Write one personal target before the first skill page. Make it a behaviour you can film: a first touch, a split time, a clean landing, a call that arrives early. Scores can wait.

UNIT 3 - TOPIC 3.1

3.1 Introduction and rules

Athletics is track and field: sprints, jumps and throws. Officials run the meeting. You run only in your lane, you jump only when called, and you throw only into a clear sector.

School implements are lighter than senior ones. That is not a reason to treat them as toys. A discus or javelin travels.

400 m track: run in lanes, stagger on bends, finish on the home straight

**KEY POINTS**

- Wait for the all-clear before you throw.
- Lanes are law on the track.
- Walk back, do not cut across.
- Carry implements vertically, never throw them in warm-up.

UNIT 3 - TOPIC 3.1

Try this

1. Walk the sector lines of one throwing event.
2. Name three officials and what each one watches.
3. Write one safety rule you will keep even if nobody is looking.

WATCH OUT

Turning to chat with a javelin on your shoulder.

COACH'S TIP

If you cannot see the landing area, you are not ready to throw.

ANALYSE

Why do throwing events need a sector and a cage or empty field, while sprints need lanes?

CHECK YOUR UNDERSTANDING

1. When may you enter a throwing sector?
2. Why are school implements still dangerous?
3. What is the safe way to carry a javelin?

UNIT 3 - TOPIC 3.2

3.2 Warm-ups

An athletics warm-up is event-specific after a shared pulse raiser. Sprinters need shorter, sharper strides. Throwers need hips and trunk. Jumpers need stiffness in the take-off leg and mobility in the free leg.

Do event drills in the order you will compete. Do not throw for distance in warm-up.

A shared pulse raiser first: high knees and skips, then the event drills.

KEY POINTS

- Shared pulse raiser, then event drills.
- No full-effort throws in warm-up.
- Spikes on only when the surface is right.
- Stay off the landing areas.

UNIT 3 - TOPIC 3.2

Try this

1. Lead a 4-minute group pulse raiser.
2. Four A-skips and four build-up strides.
3. Three standing throws at 60 per cent, not 100 per cent.

WATCH OUT

Borrowing someone else's spikes that do not fit.

COACH'S TIP

Warm-up is rehearsal, not a second competition.

ANALYSE

A thrower who does three full-effort throws in warm-up is spending ATP-PC before the trial that counts. Why is that a poor plan?

CHECK YOUR UNDERSTANDING

1. Why do throwers and sprinters split after the pulse raiser?
2. What must you not do in a throwing warm-up?
3. When do spikes go on?

UNIT 3 - TOPIC 3.3

3.3 Sprinting

A sprint start is a legal reaction, not a guess. On your marks, set, go. In the set position the hips are slightly higher than the shoulders, the front knee is about 90 degrees, and the eyes look a metre ahead.

Drive out, do not pop up. The first steps are short and powerful. You rise over 20 to 30 m, not in two steps.

Set position: hips slightly above the shoulders, then drive out. Do not pop up.

KEY POINTS

- React, do not anticipate.
- Hips above shoulders in the set.
- Drive, then rise.
- Stay in your lane.

UNIT 3 - TOPIC 3.3

Try this

1. Practise the set position without a gun.
2. Three starts to 15 m, walk back.
3. A partner watches whether you rise too soon.

WATCH OUT

Rocking in the set. That is a false start waiting to happen.

COACH'S TIP

Push the blocks away. Do not reach for the finish from the first step.

ANALYSE

The start is a third-class lever at the ankle. Why does a stiff ankle in the first two steps raise horizontal force?

CHECK YOUR UNDERSTANDING

1. What is the set position?
2. Why do the first steps stay short?
3. What is a false start?

UNIT 3 - TOPIC 3.4

3.4 Long jump

Long jump is a sprint plus a take-off. The board is a target, not a brake. Last two steps: slightly shorter, then a strong upward drive. In the air, hold a tall shape. Land with feet ahead and hips following.

Measure from the nearest mark in the sand back to the board. A jump that starts over the board is a foul, however far it looks.

The sand records the nearest mark. The board records whether the jump was legal.

KEY POINTS

- Speed on the runway, then a tall take-off.
- Do not look down at the board on the last step.
- Feet ahead on landing.
- Walk out of the pit forward.

UNIT 3 - TOPIC 3.4

Try this

1. Six-stride jumps off a take-off zone, not a full run.
2. Mark a consistent start point.
3. Watch a partner's last two steps and name one change.

WATCH OUT

Slowing down to 'hit' the board. You will jump standing.

COACH'S TIP

A legal 4.20 m beats a foul 4.80 m in every meeting that matters.

ANALYSE

A longer last stride drops the hips and kills vertical velocity. Why does that shorten the flight even if the run-up was fast?

CHECK YOUR UNDERSTANDING

1. What do the last two steps do?
2. How is a jump measured?
3. What makes a foul?

UNIT 3 - TOPIC 3.5

3.5 High jump

School high jump is usually the flop: a curved approach, take-off on the outside foot, back to the bar, then hips over, then legs. The mat is for landing, not for bouncing toward the bar.

The bar is a height, not a dare. Miss three times at a height and you are out. Choose a starting height you can clear when you are still cold.

The bar is thin and the mat is deep. The approach curve is what makes the back layout possible.

KEY POINTS

- Curve, then take off on one foot.
- Hips over the bar, then the legs.
- Land on the mat, on your back.
- Do not start at a height you have never cleared.

UNIT 3 - TOPIC 3.5

Try this

1. Walk the J-approach and mark the take-off.
2. Scissor jumps over a low elastic before the flop.
3. Three attempts at a height you can clear, then one raise.

WATCH OUT

Taking off on two feet. That is not high jump.

COACH'S TIP

The bar you clear with space is more useful than the bar you dislodge with your heels.

ANALYSE

The flop lets the hips pass above the bar while the centre of mass passes closer to it. Why does that matter?

CHECK YOUR UNDERSTANDING

1. Which foot takes off in the flop?
2. What is the landing position?
3. How many failures end your competition at a height?

UNIT 3 - TOPIC 3.6

3.6 Shot put

Shot put is a push, not a throw. The shot stays against the neck until the last moment. Power comes from the legs and the turn of the hips, then the arm extends.

A standing put is the Year 10 base. The glide or rotation comes later, and only if the standing put is clean. The shot must land in the sector. You must not touch the top of the stop board.

A standing put: shot against the neck, legs driving, stop board in front. Push, do not throw.

KEY POINTS

- Chin, knee, toe in line at the start of a standing put.
- Push, do not throw from the elbow.
- Release above the shoulder, thumb down.
- Stay in the circle until the official calls.

UNIT 3 - TOPIC 3.6

Try this

1. Ten standing puts with a medicine ball first.
2. Three legal puts into the sector.
3. A partner watches whether the shot leaves the neck early.

WATCH OUT

Dropping the elbow. The shot becomes a dangerous short throw.

COACH'S TIP

If the legs did not work, the arm cannot save the put.

ANALYSE

The shot is a linear push using a sequence of levers. Why does the hip rotation come before the arm extension?

CHECK YOUR UNDERSTANDING

1. Why is the shot a push?
2. What is a foul at the stop board?
3. Where must the shot land?

UNIT 3 - TOPIC 3.7

3.7 Javelin

Javelin is a throw along a runway with a crossover and a braced front leg. The point stays high. The javelin must land point first in the sector.

School javelins are light. The danger is the point, not the mass. Carry vertically. Throw only when the field is clear. Never throw back to the group.

Crossover, braced front leg, point high. The javelin must land point first in the sector.

KEY POINTS

- Carry vertical off the runway.
- Withdrawal, crossover, brace, throw.
- Point first in the sector.
- Never throw back toward people.

UNIT 3 - TOPIC 3.7

Try this

1. Walk the withdrawal and crossover without a javelin.
2. Three standing throws at a low effort.
3. Check a partner's carry on the way back.

WATCH OUT

A sideways 'sling'. The elbow will complain and the point will not land first.

COACH'S TIP

The front leg is a brace. If it collapses, the javelin goes nowhere useful.

ANALYSE

A javelin is a projectile. What happens to distance if the release angle is much higher than about 35 degrees?

CHECK YOUR UNDERSTANDING

1. How must a javelin land to count?
2. What is the safe carry?
3. Why is the front leg a brace?

UNIT 3 - TOPIC 3.8

3.8 Discus

Discus is a slinging throw from a circle. The discus leaves the hand off the index finger with a flat spin. A standing throw is the Year 10 base. Turns come later.

The cage, or a clearly empty field, is not optional. A discus that slips early travels in the wrong direction.

A flat discus, not a ball. Sweep long and late, stay in the circle after release.

KEY POINTS

- Flat discus, not a plate on its edge.
- Sweep long and late.
- Stay in the circle after release.
- Never collect a discus while another person is in the circle.

UNIT 3 - TOPIC 3.8

Try this

1. Bowling-style rolls along the grass to feel the spin.
2. Three standing throws at 70 per cent.
3. A partner stands well behind the cage and watches the release angle.

WATCH OUT

Snatching with the arm only. The discus will stall and drop.

COACH'S TIP

The discus should be quiet in the hand until the last moment, then it should spin, not tumble.

ANALYSE

A spinning discus is more stable in flight than a tumbling one. Which axis of rotation are you trying to create?

CHECK YOUR UNDERSTANDING

1. How should a discus leave the hand?
2. Why is a cage or empty field required?
3. When may you walk into the sector?

UNIT 3 - TOPIC 3.9

3.9 Cool-down and reflection

Cool down by event. Throwers need trunk and shoulder. Jumpers need calves and hips. Sprinters need the same plus a longer pulse-lower.

Record the best legal mark, not the best-looking foul. Write one technical cue for the next session.

Cool down by event: throwers need trunk and shoulder, jumpers calves and hips.

KEY POINTS

- Event-specific mobility after the pulse-lower.
- Log the legal mark.
- One cue, not five.
- Implements away before you sit.

UNIT 3 - TOPIC 3.9

Try this

1. Put every implement back.
2. Two stretches for your event.
3. Write the best legal mark and one cue.

WATCH OUT

Leaving a javelin on the grass because 'we will use it next lesson'.

COACH'S TIP

The meeting is not over until the sector is empty.

ANALYSE

Why is a foul that looked far a dangerous number to remember?

CHECK YOUR UNDERSTANDING

1. What mark belongs in the log?
2. Name one stretch for a thrower and one for a jumper.
3. When is the lesson finished?

UNIT 3 - TOPIC 3.10

3.10 Individual assessment

Assessment is one track event and one field event, or a three-event mini meeting if time allows. Marks are legal marks. Technique and safety sit beside distance and time.

A written paper on rules, levers and safety replaces missing practical evidence.

Assessment is a legal mark: one track event and one field event, plus safety.

KEY POINTS

- Legal marks only.
- Safety is part of the grade.
- One track, one field if the meeting is short.
- Written fallback if needed.

UNIT 3 - TOPIC 3.10

Try this

1. Compete in your two events.
2. Officiate one trial for a classmate.
3. Hand in a five-line technical comment on your best legal attempt.

WATCH OUT

Choosing only the event you already like.

COACH'S TIP

A clean second-best event often scores more than a wild favourite event.

ANALYSE

Why is officiating a classmate a valid part of an athletics assessment?

CHECK YOUR UNDERSTANDING

1. What two kinds of event make the assessment?
2. Why do fouls not count even if they look far?
3. What replaces a missed practical?

UNIT 4 • TERM 2

Aerobics

Rhythm, strength and control in time with music. A routine is a sequence you can still breathe through.

UNIT 4

In this unit you will

- ✓ Explain aerobics as fitness and as a performance form.
- ✓ Perform basic steps, strength elements and balances safely.
- ✓ Improve flexibility with controlled range, not bouncing.
- ✓ Build and perform a group routine with musical timing.
- ✓ Evaluate quality: alignment, amplitude, synchronisation.
- ✓ Show commitment and respect in a shared studio.

Topics in this unit

4.1 Introduction and rules

4.2 Warm-ups

4.3 Basic skills

4.4 Strength elements

4.5 Flexibility

4.6 Routine building

4.7 Performance

4.8 Cool-down and reflection

4.9 Individual assessment

Fitness this unit develops

- Cardiovascular endurance
- Strength
- Flexibility
- Coordination
- Balance
- Rhythm

Sporting values

- Give people space on the floor.
- Count aloud so the group stays together.
- Do not laugh at a balance that is still being learned.
- Wipe mats and put speakers away.

Write one personal target before the first skill page. Make it a behaviour you can film: a first touch, a split time, a clean landing, a call that arrives early. Scores can wait.

UNIT 4 - TOPIC 4.1

4.1 Introduction and rules

Aerobics here means rhythmic, whole-body movement to music, used for fitness and for a short group performance. It is not a dance exam and it is not a silent gym circuit.

Safety is space, shoes that turn, and knowing how to stop a move. The speaker is equipment. So is the floor.

**KEY POINTS**

- Find your personal space and keep it.
- Count the music in 8s.
- Land softly, knees soft.
- Stop a move you cannot control.

UNIT 4 - TOPIC 4.1

Try this

1. Stand in a grid and check you can raise both arms without touching anyone.
2. Clap an 8-count together.
3. Name one move you will not attempt until it has been taught.

WATCH OUT

Showing off a social-media trick that has not been taught.

COACH'S TIP

If you cannot hear the count, you are not ready to add arms.

ANALYSE

Aerobic work in a 4-minute routine is mainly the aerobic system. When do strength holds switch the demand?

CHECK YOUR UNDERSTANDING

1. What is aerobics in this book?
2. Why does personal space matter?
3. What is an 8-count?

UNIT 4 - TOPIC 4.2

4.2 Warm-ups

Warm up with the music at a lower volume and a smaller range. Pulse raiser, then mobility for ankles, hips and shoulders, then the first two steps of today's routine at half size.

Do not stretch into the splits as a start. Save long holds for the end.

Warm up with smaller range: pulse raiser; mobility, then the first steps at half size.

KEY POINTS

- Smaller range first.
- Mobility before amplitude.
- Rehearse the first steps slowly.
- No long static holds at the start.

UNIT 4 - TOPIC 4.2

Try this

1. March and step-touch for 2 minutes.
2. Shoulder circles and ankle rolls.
3. The first 8-count at half size.

WATCH OUT

Full high-impact moves on a cold ankle.

COACH'S TIP

The warm-up music can be the same track. The size of the move cannot.

ANALYSE

Why is a high-impact jump an ATP-PC action even inside an aerobic class?

CHECK YOUR UNDERSTANDING

1. How should the first moves differ from the performance moves?
2. When do long stretches belong?
3. Name two joints to mobilise.

UNIT 4 - TOPIC 4.3

4.3 Basic skills

Basic skills are the vocabulary: march, step-touch, grapevine, V-step, knee lift, hamstring curl, jumping jack. Learn them on the right lead, then on the left.

Arms come after the feet are safe. A clean low-impact version is always acceptable.

Feet first: march, step-touch, grapevine, V-step. Arms come after the feet are safe.

KEY POINTS

- Feet first, arms second.
- Both leads.
- Low-impact options always exist.
- Eyes up, not at your own feet.

UNIT 4 - TOPIC 4.3

Try this

1. Four 8-counts of step-touch, then grapevine.
2. Add a simple arm on the third repeat.
3. Teach a partner the V-step in 30 seconds.

WATCH OUT

Watching your feet so hard that you travel into someone else.

COACH'S TIP

If the feet are late, drop the arms. Do not add more.

ANALYSE

Which of these steps is high-impact, and how do you make a low-impact version of a jumping jack?

CHECK YOUR UNDERSTANDING

1. Name four basic steps.
2. Why learn both leads?
3. When should you drop the arms?

UNIT 4 - TOPIC 4.4

4.4 Strength elements

Strength elements are controlled: squat, lunge, plank, push-up from knees or toes, a simple balance. Quality is a still shape, not a shake.

Use a step or light weights only when the body-weight version is clean. The step is a platform, not a trampoline.

The step is a platform for control. Both feet belong on it before you stand up.

KEY POINTS

- Control the lowering phase.
- Breathe. Do not hold your breath in a plank.
- A balance is still, or it is a wobble you are still learning.
- Weights only after the pattern is clean.

UNIT 4 - TOPIC 4.4

Try this

1. Eight squats at a slow count of 4 down, 2 up.
2. A 20-second plank with a partner checking hips.
3. Four step-ups each leg, whole foot on the platform.

WATCH OUT

A bouncing press-up that never reaches a straight line.

COACH'S TIP

The lowering phase teaches more than the jump back up.

ANALYSE

A slow squat is more time under tension. Which training principle are you applying when you slow the lowering phase?

CHECK YOUR UNDERSTANDING

1. What makes a strength element 'clean'?
2. When may you add a step or a weight?
3. What should a partner watch in a plank?

UNIT 4 - TOPIC 4.5

4.5 Flexibility

Flexibility is controlled range. Move into a stretch, breathe, hold, then come out. Do not bounce. Do not force a partner's limb.

Year 10 targets are hamstrings, hip flexors, calves and chest: the tissues that shorten from sitting and from running.

A mat and a little time. Flexibility is a session, not a 3-second pose for a photograph.

KEY POINTS

- No bouncing.
- No forcing a partner.
- Hold about 20 seconds after the work.
- Equal left and right.

UNIT 4 - TOPIC 4.5

Try this

1. A standing hamstring stretch each side.
2. A hip-flexor lunge stretch each side.
3. Write which side felt tighter and do not ignore it next time.

WATCH OUT

A partner pushing your back toward your knees.

COACH'S TIP

The tighter side is the programme, not the embarrassment.

ANALYSE

Why is static stretching more useful after aerobics than before the first jump?

CHECK YOUR UNDERSTANDING

1. Why do we not bounce?
2. Which tissues does this year target, and why?
3. How long is a useful hold after work?

UNIT 4 - TOPIC 4.6

4.6 Routine building

A routine is a sequence with a start, a build, a strength or balance moment, and a finish you can hold. Write it in 8-counts before you decorate it.

Year 10 groups of four to six. Everyone must be able to do every move, or you rewrite the move.

Write the 8-counts first. Everyone in the group must be able to do every move.

KEY POINTS

- Write the counts first.
- Everyone can do every move.
- Travel with a plan, not a drift.
- Finish on a still shape.

UNIT 4 - TOPIC 4.6

Try this

1. Write an 8 × 8-count outline.
2. Teach two counts to another group.
3. Film one run and tick which counts were together.

WATCH OUT

A routine that only the most confident student can finish.

COACH'S TIP

If one person is lost, the choreography is too clever.

ANALYSE

Synchronisation is a closed-skill problem inside an open studio. What one change would raise it fastest in your group?

CHECK YOUR UNDERSTANDING

1. What four parts should a routine contain?
2. Why must every student be able to do every move?
3. How do you know a count was together?

UNIT 4 - TOPIC 4.7

4.7 Performance

Performance is the routine under eyes. Enter, hit the first count, keep going if someone misses, and hold the last shape until the music ends.

Quality marks: alignment, amplitude you can control, timing, and the way you recover from a mistake. A smile is optional. A panic stop is not useful.

Enter, hit the first count, recover if someone misses, and hold the last shape.

KEY POINTS

- Start on the first count.
- Recover, do not freeze.
- Hold the last shape.
- Leave the floor the way you found it.

UNIT 4 - TOPIC 4.7

Try this

1. Perform once for another group.
2. Give two comments: one keep, one change.
3. Perform a second time and change only that one thing.

WATCH OUT

Apologising in the middle of the music.

COACH'S TIP

The recovery is part of the performance. So is the silence after the last beat.

ANALYSE

Why is a second performance, after one change, a better assessment than a single polished run you never revise?

CHECK YOUR UNDERSTANDING

1. What should you do if a teammate misses a count?
2. Name three quality marks.
3. When is the performance over?

UNIT 4 - TOPIC 4.8

4.8 Cool-down and reflection

Cool down to a slower track. Pulse-lower, then the flexibility work from 4.5. Put mats, steps and speakers away. Write which counts fell apart and which strength element shook. That is the next rehearsal.

Cool down to a slower track, then flexibility, then put the mats away.

KEY POINTS

- Slower music at the end.
- Flexibility after the work.
- Studio reset.
- Log the weak counts.

UNIT 4 - TOPIC 4.8

Try this

1. Two minutes of marching and breathing.
2. The two stretches you need most.
3. A three-line rehearsal note.

WATCH OUT

Leaving a step in the walkway.

COACH'S TIP

A tidy studio is part of the last 8-count.

ANALYSE

Why does a group that logs weak counts improve faster than a group that only says 'it was messy'?

CHECK YOUR UNDERSTANDING

1. What belongs in the last five minutes?
2. What do you write down?
3. Who resets the studio?

UNIT 4 - TOPIC 4.9

4.9 Individual assessment

Assessment is a group routine plus a short individual comment on one strength or flexibility element. Timing, control and cooperation count as much as decoration.

A written paper on safety, FITT and basic steps replaces missing practical evidence.

Assessment is a group routine plus a short comment on one strength or flexibility element.

KEY POINTS

- Group routine is the main evidence.
- Control over decoration.
- Individual comment on one element.
- Written fallback if needed.

UNIT 4 - TOPIC 4.9

Try this

1. Perform the assessed routine.
2. Write five lines on one strength or flexibility element.
3. Officiate another group's timing with a simple tick sheet.

WATCH OUT

Adding a new trick on the morning of the assessment.

COACH'S TIP

The routine you can repeat is the routine you should show.

ANALYSE

Is a more difficult routine always a better assessment performance? Use validity in your answer.

CHECK YOUR UNDERSTANDING

1. What two pieces of evidence make the assessment?
2. Why does decoration not outrank control?
3. What replaces a missed practical?

UNIT 5 • TERM 3

Korfball

A mixed invasion game with no dribble and no backboard. Movement creates the shot.

UNIT 5

In this unit you will

- ✓ Explain korfball rules, zones and the mixed-team idea.
- ✓ Pass, cut and shoot at a korf without a backboard.
- ✓ Defend without contacting the shooter illegally.
- ✓ Use 2-2 attacking shapes and rebound roles.
- ✓ Communicate across the mid-line.
- ✓ Show fair play in a mixed game.

Topics in this unit

5.1 Introduction and rules

5.2 Warm-ups

5.3 Passing and movement

5.4 Shooting

5.5 Defending and rebounding

5.6 Team strategies

5.7 Game scenarios

5.8 Cool-down and reflection

5.9 Collective assessment

Fitness this unit develops

- Agility
- Coordination
- Jump endurance
- Speed
- Aerobic base
- Reaction time

Sporting values

- Guard the person you are matched with, not the person you prefer.
- Call for the ball with a hand and a name.
- Do not crowd the korf.
- Respect the no-dribble rule even when it feels slow.

Write one personal target before the first skill page. Make it a behaviour you can film: a first touch, a split time, a clean landing, a call that arrives early. Scores can wait.

UNIT 5 - TOPIC 5.1

5.1 Introduction and rules

Korfball is a mixed invasion game. Teams have women and men. You may only defend the opponent of the same gender. There is no dribble. The korf is a basket without a backboard, 3.5 m high in the adult game, lower in some school sets.

The court is split into two zones. Attackers stay in one, defenders in the other, then they swap after two goals. That rule forces everyone to attack and everyone to defend.

Korfball: two zones, one korf each end, no backboard

KEY POINTS

- Mixed teams, same-gender marking.
- No dribble. Pass and move.
- No backboard. The shot must drop in.
- Zones swap after two goals.

UNIT 5 - TOPIC 5.1

Try this

1. Walk the court and stand in an attack zone, then a defence zone.
2. Practise a static pass: you may not move with the ball.
3. Write one rule that would surprise a basketball player.

WATCH OUT

Taking a bounce as if this were basketball.

COACH'S TIP

If you have the ball, your next job is a pass or a shot, not a tour.

ANALYSE

The no-dribble rule removes a closed skill and forces an open one. Which open skill becomes the whole game?

CHECK YOUR UNDERSTANDING

1. Who may you defend?
2. Why is there no dribble?
3. What happens after two goals?

UNIT 5 - TOPIC 5.2

5.2 Warm-ups

Warm up with passing on the move, then cuts toward a korf without a shot, then a few close shots. Shoulders and ankles first.

Because you cannot run with the ball, the warm-up must rehearse giving the ball away on time.

Warm up with passing on the move, then cuts toward a korf. You cannot run with the ball.

KEY POINTS

- Passing on the move.
- Cuts without the ball.
- A few close shots, not a long shooting contest.
- Practise the 3-second idea: you cannot hold the ball forever.

UNIT 5 - TOPIC 5.2

Try this

1. Keep-ball 4 v 1 with no dribble.
2. Cut, receive, pass in one count.
3. Five close shots each, collect your own miss.

WATCH OUT

A shooting line that leaves the rest of the court empty.

COACH'S TIP

The warm-up that looks like korfball is passing and cutting, not a queue.

ANALYSE

Holding the ball is a rest for you and a rest for the defence. Why is that a problem in a no-dribble game?

CHECK YOUR UNDERSTANDING

1. Why must the warm-up rehearse giving the ball away?
2. What should you do after a missed warm-up shot?
3. Name two joints to mobilise.

UNIT 5 - TOPIC 5.3

5.3 Passing and movement

Passing is two-handed from the chest or a short one-handed feed. The receiver shows a target and then moves again. Standing still after a catch is how attacks stall.

Movement is cutting into space, not jogging beside your marker. Change of pace matters more than a long run.

Show a target, pass, then move again. Standing still after a catch is how attacks stall.

KEY POINTS

- Show a target, then move again.
- Pass to the space the cutter is entering.
- Change of pace beats a long jog.
- Do not travel with the ball.

UNIT 5 - TOPIC 5.3

Try this

1. 4 v 0: pass and cut, 20 completed passes.
2. 4 v 2: keep-ball, no dribble.
3. A cutter must receive on the move, not standing.

WATCH OUT

A pretty high pass that nobody can catch.

COACH'S TIP

The pass is successful when the next pass is already possible.

ANALYSE

Why does a cutter who changes pace 2 m before the ball arrives lose a marker more often than a cutter who runs at one speed?

CHECK YOUR UNDERSTANDING

1. What should you do in the second after you catch?
2. Why is a change of pace useful?
3. What is travelling in this game?

UNIT 5 - TOPIC 5.4

5.4 Shooting

Shooting is one-handed or two-handed, but the ball must drop into a korf with no backboard to forgive a miss. A running shot is harder. A set shot after a clean catch is the Year 10 base.

Do not shoot through a defender who is already marking you closely. That is a blocked shot and a poor decision. Pass, relocate, shoot.

The korf has no backboard. A free close shot beats a marked long one.

KEY POINTS

- Set shot first.
- Eyes on the korf, not on the defender's hands.
- Do not shoot through a tight marker.
- Follow the shot for the rebound.

UNIT 5 - TOPIC 5.4

Try this

1. Ten set shots from a marked spot.
2. Catch, one-count, shoot.
3. 3 v 3: a shot only counts if the shooter was free.

WATCH OUT

A hope-shot from distance because you do not want to pass.

COACH'S TIP

The korf is small and honest. A free close shot beats a marked long one.

ANALYSE

Without a backboard, the release angle has a narrower useful window. Why does that punish a faded leaning shot?

CHECK YOUR UNDERSTANDING

1. Why is there no backboard forgiveness?
2. When should you not shoot?
3. What should you do after the shot?

UNIT 5 - TOPIC 5.5

5.5 Defending and rebounding

Defence is between your opponent and the korf, an arm's length, without illegal contact. You may attempt to block a shot if you are in a legal defending position.

Rebound is a role. One attacker and one defender should own the space under the korf when a shot goes up. Standing and watching the ball in the air is how easy scores happen on the second chance.

Stay between your opponent and the korf, an arm's length, without illegal contact.

KEY POINTS

- Same-gender marking.
- Legal distance, no holding.
- Block only from a legal position.
- Someone must own the rebound.

UNIT 5 - TOPIC 5.5

Try this

1. 1 v 1: stay between opponent and korf for 15 seconds.
2. Call 'shot' and crash the rebound zone.
3. Switch markers every two goals, as the real rule will ask.

WATCH OUT

Reaching across a player of the other gender because they were nearer the ball.

COACH'S TIP

Your first job is the person you are allowed to mark. The ball is second.

ANALYSE

Zone swaps after two goals force every student to defend. Why is that a fairer assessment than a game where three people never leave attack?

CHECK YOUR UNDERSTANDING

1. Who may you mark?
2. What is a legal defending position?
3. Why does rebound need a named person?

UNIT 5 - TOPIC 5.6

5.6 Team strategies

A simple attacking shape is 2-2: two high, two nearer the korf. One cutter, one shooter, one rebounder, one safety pass. If that picture is not there, do not force a shot.

After two goals, you swap zones. The best Year 10 teams treat the swap as a reset, not as a rest.

A 2-2: cutter, shooter, rebounder, safety. If you cannot name the rebounder, do not shoot.

KEY POINTS

- 2-2 before decoration.
- Name the rebounder before the shot.
- Swap zones with a plan.
- Patience. The korf will still be there.

UNIT 5 - TOPIC 5.6

Try this

1. Freeze a 4 v 4 and point to shooter, cutter, rebounder, safety.
2. Play to four goals and practise the zone swap.
3. A rule: no shot until three passes.

WATCH OUT

All four attackers standing on the same side of the korf.

COACH'S TIP

If you cannot name the rebounder, you are not ready to shoot.

ANALYSE

A three-pass rule raises assist count and lowers hope-shots. Which students does it expose?

CHECK YOUR UNDERSTANDING

1. What four roles sit in a 2-2 attack?
2. What should happen at a zone swap?
3. When is a shot a poor decision?

UNIT 5 - TOPIC 5.7

5.7 Game scenarios

Game scenarios: 3 v 3 on one korf, then 4 v 4 on a half, then a full mixed game. Give each game one constraint: shots only from a free shooter, or a mandatory rebounder.

Rotate so that nobody lives only in attack.

Small-sided first, then a mixed game. Everyone attacks and everyone defends.

KEY POINTS

- Small-sided first.
- One constraint.
- Everyone attacks and defends.
- Stop to coach one picture, then play.

UNIT 5 - TOPIC 5.7

Try this

1. 3 v 3 to three scores.
2. Full game with a three-pass rule.
3. After each swap, one sentence from each zone.

WATCH OUT

The same two students taking every shot.

COACH'S TIP

A constraint that hides a passenger is a bad constraint.

ANALYSE

In a mixed game, what happens to validity if marking rules are ignored 'to keep it flowing'?

CHECK YOUR UNDERSTANDING

1. Why start 3 v 3?
2. Give one useful constraint.
3. How do you stop one pair owning every shot?

UNIT 5 - TOPIC 5.8

5.8 Cool-down and reflection

Cool down with easy passing and then calves, shoulders and hip flexors. Write one pass you would take again and one shot you would not.

Korfball is new for many Year 10 groups. Confusion is allowed. Repeating the same illegal dribble is not.

Easy passing, then calves, shoulders and hip flexors. Name the rule you still break.

KEY POINTS

- Easy passing to lower the pulse.
- Shoulders and calves.
- Log one keep and one change.
- Name the rule you still break.

UNIT 5 - TOPIC 5.8

Try this

1. Two minutes of walking passes.
2. Two stretches.
3. A three-line log.

WATCH OUT

Leaving korfs out in a walkway.

COACH'S TIP

The rule you still break is the first line of the next warm-up.

ANALYSE

Why is 'I keep dribbling' a more useful reflection than 'I was bad at korfball'?

CHECK YOUR UNDERSTANDING

1. Which tissues need care after jumping and shooting?
2. What belongs in the log?
3. What must be put away?

UNIT 5 - TOPIC 5.9

5.9 Collective assessment

Collective assessment is a mixed game. Teachers watch legal marking, passing under the no-dribble rule, shot choice, rebound and talk.

A written paper on rules and roles replaces missing practical evidence.

Collective assessment is a mixed game: legal marking, passing, shot choice, rebound and talk.

KEY POINTS

- The game is the evidence.
- Legal marking counts.
- Shot choice counts.
- Written fallback if needed.

UNIT 5 - TOPIC 5.9

Try this

1. Play the assessed game.
2. After it, name one legal defensive action you made.
3. Complete fitness tests on another day.

WATCH OUT

Guarding whoever is nearest because it is easier.

COACH'S TIP

Assessors notice the pass you make when you are not the shooter.

ANALYSE

Why is legal same-gender marking part of the grade, not only a courtesy?

CHECK YOUR UNDERSTANDING

1. What is the main evidence?
2. Name three things teachers record besides goals.
3. What replaces a missed practical?

UNIT 6 • TERM 3

American Football

Non-contact flag football. Plays, routes and talk, never tackles.

UNIT 6

In this unit you will

- ✓ Explain scoring, downs and school flag rules.
- ✓ Throw, catch and carry the ball safely.
- ✓ Run simple routes and flag-pull defence.
- ✓ Design and call a short offensive play.
- ✓ Lead a huddle without shouting over people.
- ✓ Keep the game non-contact.

Topics in this unit

6.1 Introduction and rules	6.2 Warm-ups	6.3 Ball handling	6.4 Attacking skills	6.5 Defensive skills
6.6 Game strategies	6.7 Game scenarios	6.8 Cool-down and reflection	6.9 Collective assessment	

Fitness this unit develops

- Speed
- Agility
- Power
- Coordination
- Reaction time
- Repeat sprint ability

Sporting values

- Pull the flag, do not hold the body.
- Stop at the whistle.
- No diving at knees.
- Celebrate a complete pass, not a heavy hit that should not exist.

Write one personal target before the first skill page. Make it a behaviour you can film: a first touch, a split time, a clean landing, a call that arrives early. Scores can wait.

UNIT 6 - TOPIC 6.1

6.1 Introduction and rules

This unit is non-contact flag football. You score by carrying or catching the ball in the end zone. You stop an attack by pulling a flag, not by tackling. Contact with the body is a foul.

School games use a smaller field, fewer players (often 5, 6 or 7), and a short set of downs. If you do not gain enough ground in those downs, the ball turns over.

Flag football field (school): end zones, midfield, no tackling

KEY POINTS

- Flags, never tackles.
- End zone scores.
- A short set of downs.
- Stop at the whistle.

UNIT 6 - TOPIC 6.1**Try this**

1. Walk the field: end zones, midfield, sidelines.
2. Practise clipping a flag belt on and off.
3. Write the one rule you must not break.

WATCH OUT

A 'friendly' shoulder because the flags feel slow.

COACH'S TIP

If you are close enough to tackle, you are close enough to pull a flag.

ANALYSE

Removing the tackle changes the valid skills of the game. Which skills rise in importance, and which must disappear?

CHECK YOUR UNDERSTANDING

1. How do you stop the ball carrier?
2. How do you score?
3. What happens after a completed set of downs with no score?

UNIT 6 - TOPIC 6.2

6.2 Warm-ups

Warm up with agility: short shuttles, side steps, then a few easy throws. Shoulders, hips and ankles. Flags on from the first movement game so you learn to pull them while you still have breath.

Do not start with a long bomb. Hands and timing come first.

Agility first: shuttles and side steps with flags on, then a few easy throws.

KEY POINTS

- Agility before throwing power.
- Flags on early.
- Easy throws, both sides if you can.
- No diving in warm-up.

UNIT 6 - TOPIC 6.2**Try this**

1. 4 × 10 m shuttles.
2. Ten easy throws to a partner at 8 m.
3. A 1 v 1 flag-pull on a slow jog, not a sprint.

WATCH OUT

A full-speed collision in the first minute.

COACH'S TIP

If the flag does not come off in a jog, it will not come off in a game.

ANALYSE

A shuttle is a repeat-sprint action. Which energy system does the fourth shuttle start to tax?

CHECK YOUR UNDERSTANDING

1. What should come before long throws?
2. Why are flags on in the warm-up?
3. What contact is never part of warm-up?

UNIT 6 - TOPIC 6.3

6.3 Ball handling

The hold is across the laces, two hands when you run, one hand only when you throw. A catch is eyes on the ball, hands together or a diamond, then tuck.

You may not throw a ball at a person's head to 'test' them. You may not launch yourself at a catch if you will land on someone.

Eyes on the ball, two hands, then tuck. A pretty catch that pops out is incomplete.

KEY POINTS

- Two hands when you run.
- Eyes on the ball until it is tucked.
- Throw to a chest, not a face.
- No diving onto people.

UNIT 6 - TOPIC 6.3

Try this

1. Ten stationary catches.
2. Ten catches on the move.
3. Carry 15 m with two hands and a flag belt on.

WATCH OUT

One-handed show catches in a teaching drill.

COACH'S TIP

A tucked ball is a finished catch. A pretty catch that pops out is incomplete.

ANALYSE

Catching is a closed skill in a drill and an open skill in a game. What one constraint turns the drill into a game?

CHECK YOUR UNDERSTANDING

1. How should you hold the ball when running?
2. What makes a catch complete in this lesson?
3. Where should a teaching throw aim?

UNIT 6 - TOPIC 6.4

6.4 Attacking skills

Attacking skills are the throw, the catch, the hand-off and the route. A route is a path with a name: go, out, slant, curl. The quarterback and the receiver must share the name before the snap.

Year 10 routes are short. A 8 to 12 m out is more useful than a 40 m hope-ball.

Name the route in the huddle. Short and complete beats long and lucky.

KEY POINTS

- Name the route in the huddle.
- The receiver sits in the space at the right depth.
- The quarterback steps and throws on time.
- Short and complete beats long and lucky.

UNIT 6 - TOPIC 6.4

Try this

1. Walk an out route, then jog it, then run it.
2. Five timed throws on a slant.
3. One huddle, one play, then reset.

WATCH OUT

A receiver who invents a new route after the snap.

COACH'S TIP

If you are not where the play said, the throw is not late. You are.

ANALYSE

A slant attacks the space in front of a defender. Which defensive habit does it punish?

CHECK YOUR UNDERSTANDING

1. What is a route?
2. Name three simple routes.
3. Why are short routes the Year 10 base?

UNIT 6 - TOPIC 6.5

6.5 Defensive skills

Defence is position, then a flag. Stay in front of your receiver, see the quarterback with your peripheral vision, and pull the flag at the hip, not at the arm or the neck.

Do not hold, trip or push. A clean flag is the whole tackle.

Stay in front, then pull the flag at the hip. Holding is not the correction for a miss.

KEY POINTS

- Stay in front.
- Flag at the hip.
- No holding, no trips.
- Talk: ball, pull, dead.

UNIT 6 - TOPIC 6.5**Try this**

1. Mirror a receiver for 8 seconds without touching them.
2. Pull a flag on a slow runner, then on a faster one.
3. Call 'dead' the moment the flag comes off.

WATCH OUT

Grabbing a shirt because the flag was missed.

COACH'S TIP

Missed flags are part of the game. Holding is not the correction.

ANALYSE

Why is a flag pull at the hip safer and more valid than a grab at the shoulder?

CHECK YOUR UNDERSTANDING

1. Where do you pull the flag?
2. What must you not do after a missed flag?
3. What do you call when the flag is off?

UNIT 6 - TOPIC 6.6

6.6 Game strategies

A play is a plan: who receives, who blocks by standing in a legal screen without contact, who runs a decoy. Draw it. Name it. Run it twice before you invent another.

Defence can play person-to-person or a simple zone. Year 10 teams that talk beat teams that have more plays on paper.

Draw it. Name it. Run it twice. Two plays you can run are an offence.

KEY POINTS

- One play, run twice.
- A decoy is a real route.
- Talk on defence.
- No contact screens.

UNIT 6 - TOPIC 6.6**Try this**

1. Draw two plays on a mini whiteboard.
2. Run each play three times.
3. Defence: call the receiver you have.

WATCH OUT

A playbook of twelve plays that nobody can name.

COACH'S TIP

Two plays you can run are an offence. Twelve plays you cannot name are a queue.

ANALYSE

Why does a decoy route only work if the receiver runs it at full pace?

CHECK YOUR UNDERSTANDING

1. What three roles can exist on one play?
2. Why run a play twice before inventing another?
3. What is a legal screen in this school game?

UNIT 6 - TOPIC 6.7

6.7 Game scenarios

Scenarios: 4 v 4 on a short field, then a full flag game with a short set of downs. One constraint: no runs on first down, or a completed pass before a run, so the throw appears.

Rotate the quarterback. The loudest student is not automatically the only one who may throw.

Short field first, then a full flag game. The whistle ends the play.

KEY POINTS

- Short field first.
- One constraint.
- Rotate the quarterback.
- Whistle ends the play.

UNIT 6 - TOPIC 6.7**Try this**

1. 4 v 4 to two scores.
2. A four-down series with a named play each down.
3. After the series, one sentence: what the defence learned.

WATCH OUT

The same quarterback for the whole lesson.

COACH'S TIP

A constraint that forces a pass also forces a decision. That is the lesson.

ANALYSE

If one student throws every down, which assessment objectives become impossible to evidence for the others?

CHECK YOUR UNDERSTANDING

1. Why start on a short field?
2. Why rotate the quarterback?
3. What ends a play?

UNIT 6 - TOPIC 6.8

6.8 Cool-down and reflection

Cool down with easy jogging and shoulder mobility. Flags and balls away. Write one route that worked and one contact you almost made and must not make again.

This sport only stays in a PE lesson if the flags stay the tackle.

Easy jogging and shoulder mobility. Flags and balls away. The last play is a safety risk.

KEY POINTS

- Shoulders after throwing.
- Flags and balls away.
- Log a route and a near-miss contact.
- The non-contact rule is the unit.

UNIT 6 - TOPIC 6.8**Try this**

1. Two minutes of easy jogging.
2. Arm circles and a chest stretch.
3. A three-line log.

WATCH OUT

A 'last play' that becomes a tackle because people are tired.

COACH'S TIP

The last play is the one assessors remember if someone gets hurt.

ANALYSE

Fatigue raises contact errors. Which part of the lesson should therefore be shortest and most tightly whistled?

CHECK YOUR UNDERSTANDING

1. Which joints need care after throwing?
2. What belongs in the log?
3. Why is the last play a safety risk?

UNIT 6 - TOPIC 6.9

6.9 Collective assessment

Collective assessment is a flag game. Teachers watch throwing and catching, routes, flag pulls, talk and the absence of contact.

A written paper on rules, routes and safety replaces missing practical evidence.

Collective assessment is a flag game: throwing, routes, flag pulls, talk, and no contact.

KEY POINTS

- The game is the evidence.
- Non-contact is part of the grade.
- Talk and routes count.
- Written fallback if needed.

UNIT 6 - TOPIC 6.9**Try this**

1. Play the assessed game.
2. After it, name one legal flag pull and one complete pass you made or helped.
3. Fitness tests on another day.

WATCH OUT

A late hit after the whistle 'because it was the assessment'.

COACH'S TIP

The cleanest player is often the most useful player.

ANALYSE

Why would a spectacular diving catch that lands on a defender score worse than a standing catch in this assessment?

CHECK YOUR UNDERSTANDING

1. What is the main evidence?
2. Why is the absence of contact part of the grade?
3. What replaces a missed practical?

Your year in six sports

Look back across the three terms. The aim was not to become a specialist in one sport. It was to leave Year 10 able to train with purpose, join a game, analyse a performance and help a teammate.

Unit	One skill I can now explain	One habit I will keep
Futsal		
Cross Country		
Athletics		
Aerobics		
Korfball		
American Football		

WRITE THREE SENTENCES

1. The sport in which I improved most, and why.
2. The moment I helped someone else play better.
3. The habit I will take into Year 11.

Keep moving after the last lesson

Physical Education is a school subject. Physical activity is a life habit. The two only meet if you choose them to.

IN SCHOOL

Join a lunch club. Offer to referee. Help set up the next class.

OUT OF SCHOOL

Walk or cycle a regular route. Play a small-sided game in the park.

WITH OTHERS

Invite someone who does not usually play. Teach them one skill from this book.

ON YOUR OWN

Ten minutes of mobility or an easy run still counts. Write it down.

A FAIR TARGET

Pick one session a week that is not a PE lesson. Put it on a calendar. If you miss it, restart the next week.

Word list

These words are used in the units. The definition matches the way the book uses the word.

Aerobic system	Energy system that uses oxygen; dominates longer, steadier work.
ATP-PC	Immediate energy system for efforts of about 0 to 10 seconds.
Down	One play in flag football. A short set of downs is given to advance or score.
FITT	Frequency, intensity, time, type: a way to plan training.
Flag football	Non-contact American football in which a pulled flag ends the play.
Korf	The basket in korfbal. It has no backboard.
Lactic system	Energy system for hard work of about 10 seconds to 2 minutes.
Lever	A bone-and-joint system that applies force. Used to explain throws and take-offs.
Negative split	Running the second half of a race at least as quickly as the first.
Pivot	Futsal attacker who plays with their back to goal and links play.
Rebound	Winning the ball after a missed shot at a korf or ring.
Route	A named path run by a receiver in flag football.
Sector	The legal landing area for a throw in athletics.
SPORT	Specificity, progression, overload, reversibility, tedium: training principles.
Travelling	Moving illegally with the ball in korfbal (there is no dribble).

Sources and references

Facts about rules and governing bodies were checked against the organisations named below. School adaptations follow the department course file that supplied the scope of this book.

1. FIFA. Futsal laws of the game: number of players, no offside, kick-in restarts. Checked for this edition as scope, not copied as prose.
2. World Athletics competition and safety practice: lanes, sectors, legal marks. School implements and school rules apply on site.
3. International Korfball Federation. Mixed teams, no dribble, korf without a backboard, zone swap. School korf height may be lower.
4. NFL Flag / non-contact school adaptations: flag pull ends the play; no tackling. Prime School plays the non-contact version only.
5. Association of Athletics training ideas in common use: FITT, SPORT, energy systems (ATP-PC, lactic, aerobic). Taught as Year 10 theory beside the sport.
6. Prime School Physical Education department course file 2026–2027: year plan, assessment policy, six-sport sequence. Scope only.

Photographs and still-life plates were prepared for this edition. Diagrams of courts and tracks are teaching sketches, not official construction drawings.

For teachers

This Student Book covers the Year 10 Physical Education course as mapped from the department source file: Futsal, Cross Country, Athletics, Aerobics, Korfbal and non-contact American football. Source unit numbers 7, 6, 13 and 14 are renumbered 3 to 6 here so the year reads as one book. Teaching prose is original.

Assessment pages match the source policy: collective game assessment, three fitness tests, and a written paper when practical evidence is missing.

Coach's tips are written in a staff voice without naming individual teachers. The printed title is Physical Education, Year 10. Gym is not used as a title. Body type is 11 pt Source Sans 3.

There are no blank padding leaves. Unit openers follow the previous page immediately, on the user's instruction for this title.
