Count it. Check it. Then say how you know.

Down under the roots of the old oak there is a schoolroom. Otto the owl counts acorns, Hattie the hedgehog guesses and then checks, and Milo the mouse asks the question that matters most: how do you know?

Sixteen units of real mathematics, six projects along the way and a counting fair of your own at the end. Every page is meant to be written in.

INSIDE THIS BOOK

- Sixteen units, six projects, a counting fair to finish
- Every page meant to be written in
- Count it, check it, say how you know
- A second method whenever there is one
- Original watercolour illustration throughout
