

Global Perspectives

Year 5

Cambridge Primary
Student Manual

Global Perspectives • Year 5

Student Book • Look Outwards

Ask. Listen. Compare. Act with care.

About this book

Prime School Press • Global Perspectives • Year 5 Student Book • *Look Outwards • Wider Horizons*
First edition 2026

This book invites you to look further than last year: at how people communicate, why laws exist, how trade and ideas cross borders, how work is changing, how countries cooperate, and how to live wisely in a digital world. You will **ask, listen, compare** and **act** with care.

Prime School Press is the publishing imprint of Prime School, Portugal. www.primeschool.pt

Imprint

Prime School Press Global Perspectives • Year 5 • Student Book

All rights reserved. British English • metric measures • euros where money appears First edition 2026

All continuous prose, activities and illustrations in this edition are original to Prime School Press unless a Sources entry says otherwise.

Editorial Board

The Prime School Press Subject Series has been developed under the guidance of the Pedagogical Academic Group for each subject and coordinated by the Pedagogical Team of Prime School.

This publication reflects our shared commitment to academic excellence, educational quality, professional integrity, and the continuous advancement of teaching and learning. Through the collective expertise and dedication of our educators, we aim to provide meaningful and engaging learning resources that support students' academic growth.

We extend our sincere appreciation to the Pedagogical Department and the Content Creation Team of Prime School for their invaluable contributions, dedication, and collaborative efforts in making this publication possible.

Welcome

Hello.

You are nine (or nearly ten). You already know how to ask a careful question and listen to a friend. Global Perspectives in Year 5 asks you to hold **bigger questions** still: how do laws keep people safe, how does a T-shirt travel the world, how do countries talk when they disagree, and how do apps try to hold your attention?

In this book you will:

- strengthen communication, including online
- explore rights, duties and human rights
- follow trade, culture and shared global problems
- think about work, machines and green choices
- practise ideas of diplomacy and fair sharing
- become a digital detective and a careful creator

You do not need every answer. You need a good **question**, evidence you can check, and the courage to change your mind when a better fact arrives.

The class that guides you is the **Look Outwards Club**. Their stories are invented for teaching. The facts in **Did you know?** panels are real and checked in **Sources**.

Who you will meet

Name	What they are for
Inês	Asks careful questions before anyone decides
Jamal	Notices how people feel when they speak
Sofia	Compares life here with life in other places
Mateo	Turns ideas into small, kind actions

They are classmates in a Portuguese primary class, now in Year 5. Disagree with their ideas, not with them.

How to use this book

This book uses the same page furniture as Year 4 Global Perspectives, written a step older for Year 5.

Panel	What it means
Unit opener	Full-page art, unit title and the big question on a solid magenta panel (Year 5 cover colour)
In this unit you will	Numbered outcomes with a short explanation under each number
Look closer (QR)	Adult-held device only; free public page that supports the unit idea
Getting started	The unit story and the big question in class talk
Do you remember?	Something you already know
Boots on!	A quick action or talk before the teaching
Let us find out	Short teaching. Read it twice.
Your turn	Numbered practice with room to write
Did you know?	A verified fact (after the unit has started)
From another chair	Two or more views of the same idea
Look Outwards notes	Draw or write what you noticed
One step further	Stretch when you finish early
Project	A longer make-and-share task

Write in the book when a line or box waits for you. Use pencil. Be neat enough for a partner to read.

QR rule: a grown-up holds the device. You look together. Never scan alone without permission.

Running heads show the topic number, for example 2.3 • LET US FIND OUT .

Getting set up

You need:

- this book and a pencil
- a partner for talk tasks
- sometimes plain paper for maps, posters and projects
- a device only when your teacher says so (Units 1, 4 and 6)

Class rule: **respect every perspective**. Disagree with ideas, not people.

UNIT 1

1

Improving communication

Wider Horizons · Words, listening, language bridges and kind persuasion

THE BIG QUESTION

Is communication only about talking?

Unit 1 • Improving communication

Look Outwards Club • Wider Horizons

Luggage tags: Equation, Bridges, Codes, Online, Persuasion, Listening.

🕒 IN THIS UNIT YOU WILL

1. Explain the communication equation.

Words, tone, body language and listening work together. If one part is missing, the message can fail.

2. Build bridges when people do not share a language.

Gestures, pictures, simple shared words, patience and a trained interpreter all count.

3. Read cultural codes with respect.

Direct or soft, loud or quiet: styles differ across families and places. Different is not wrong.

4. Practise digital citizenship.

Online words travel further and last longer, so you think, check and then send.

5. Separate fair persuasion from pressure.

A clear claim, evidence you can check, and a respectful ask beat shouting.

6. Use active listening to understand someone first.

You will try say-it-back and open questions before you reply.

📱 LOOK CLOSER (QR) • UNIT 1

Ask an **adult** to hold the device and open this page with you.

What you will find: UNICEF education pages on listening and taking part (adult-supervised). **URL:** <https://www.unicef.org/education>

✦ GETTING STARTED

Inês has put three clues on the board: a written note, a wave, and a quiet pause. Jamal says a pause is not communication. Sofia says a raised eyebrow can be a whole sentence. Mateo wants to film a class film in three languages. Before they argue, Inês asks the big question again: is communication only about talking?

Collect five classroom examples that use **no spoken words**. Write who noticed each one. Do not settle the argument yet. You will need evidence from the topics.

1.1

The communication equation

↻ DO YOU REMEMBER?

In Year 4 you practised talking **and** listening. Which part do you still find harder on most days?

● BOOTS ON!

In pairs, say the same sentence three ways: cheerful, tired, annoyed. Keep the words identical. What changes?

► LET US FIND OUT

Think of communication as an **equation**, not a single word:

words + tone + body language + listening = a message that can be understood

- **Words** are what you choose.
- **Tone** is how the voice sounds: kind, sharp, rushed, calm.
- **Body language** is face, hands and posture.
- **Listening** is the other half of the equation. A brilliant sentence is wasted if nobody is taking it in.

If any part is missing, the message can go wrong. In a Lisbon playground, "Come here" can mean join the game or stop that now, depending on the voice and the hands. A nod in class may mean "I understand" or "I am still thinking".

Good communicators check: "Did I hear you right?"

■ WATCH ME WORK ONE OUT

Mateo says, "I'm fine," with a smile and open hands. Jamal says the same words with folded arms and a flat voice.

Step 1. The words match. **Step 2.** The tone and body do not. **Step 3.** A careful listener asks a check question instead of guessing.

The equation failed on tone and body, not on spelling.

Talking and listening are both parts of the equation.

The same words change when faces and bodies change.

• YOUR TURN

1. Write the communication equation in your own words. Leave nothing out.
2. Tick which parts you used this morning: words · tone · body · listening.
3. Rewrite "Come here" as a kind invitation and as a safety warning. Keep the two words. Change only tone clues (you may add a face or a hand).

✦ DID YOU KNOW?

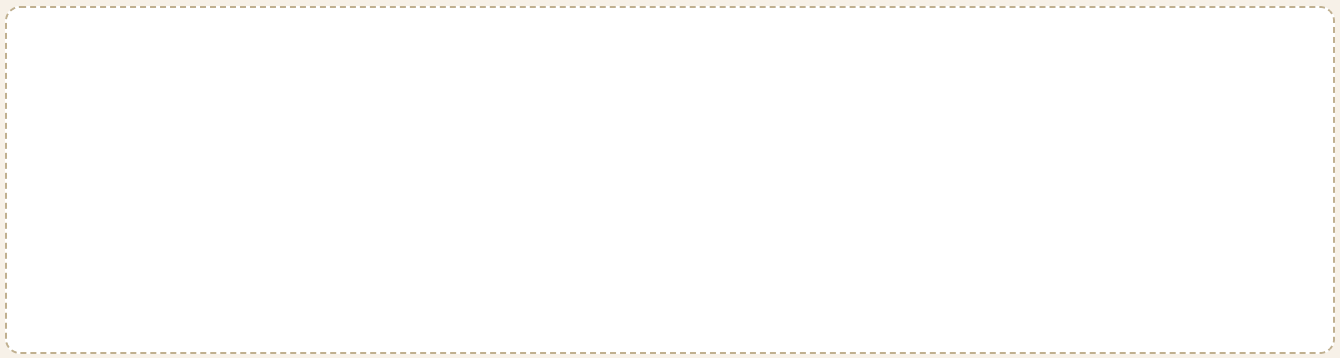

Many workplaces train adults in non-verbal awareness because meetings often go wrong when faces and words disagree. The idea is not new: actors have practised tone and posture for centuries.

◆ FROM ANOTHER CHAIR

- *Mateo says:* If the words are clear, tone does not matter.
- *Jamal says:* Tone is half the message. I stop listening when someone sounds bored.
- *Then:* Inês's question: when have you been misunderstood even though the words were simple?

▢ LOOK OUTWARDS NOTES

Sketch a message that needs both words and a face. Write one warning for speakers.

1.2

Bridging the language gap

🕒 DO YOU REMEMBER?

Have you ever tried to understand someone who did not share your language?

🎯 BOOTS ON!

Sixty seconds: invent three silent signs for water, toilet and thank you. Test them on a partner. Which sign was guessed first?

► LET US FIND OUT

When people do not share a language, they build **bridges**. A bridge is a fair tool so both sides can be heard. It is not a test of who is "clever".

Useful bridges:

- **gestures** that both people can guess
- **drawings** and objects (a boat, a tree, a cup)
- **simple shared words**, spoken slowly
- **patience** and a second try
- a **school interpreter** or a trusted adult when the message matters

Portugal is a good place to notice bridges. New classmates, visitors and families from Portuguese-speaking countries overseas may share Portuguese, or they may not. Shouting the same sentence louder is not a bridge. It is only noise.

A welcome buddy who points the way to lunch is a human bridge. A translation app can help, but it needs adult care: it can guess wrongly, and it should not store a classmate's private details.

Pictures can carry meaning when words do not match.

A welcome buddy is a human language bridge.

• YOUR TURN

1. List three bridge tools you could use if a new pupil spoke only French.
2. Circle which tool needs an adult: translation app · drawing · smile · school interpreter.
3. Write one kind classroom rule for language-bridge moments. Start with "We will...".

✦ DID YOU KNOW?

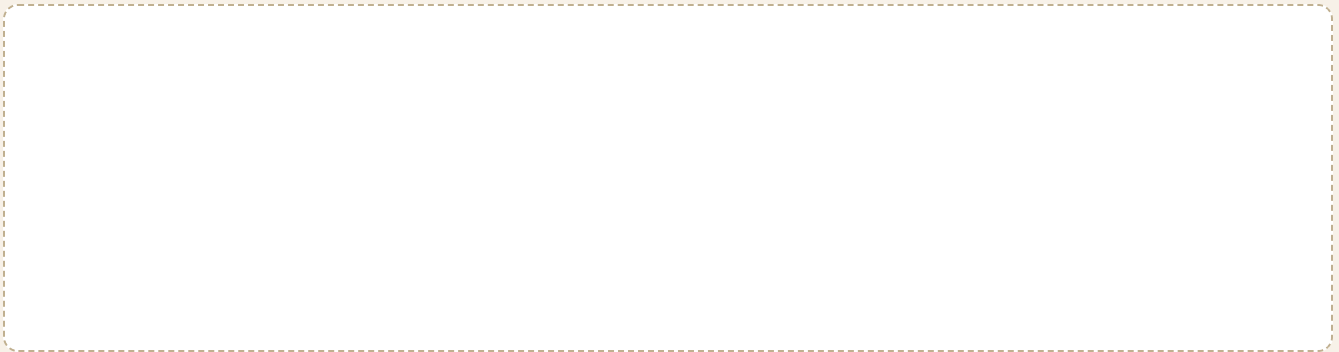

The United Nations and many public services use professional interpreters so people can take part in meetings in the language they know best. Schools do a smaller version of the same fairness.

→ ONE STEP FURTHER

Ask an adult which languages they meet at work or in town. Write one that surprised you, and one bridge they use.

▢ LOOK OUTWARDS NOTES

Design a pocket card with four picture signs for visitors to your school.

Cultural codes

🔄 DO YOU REMEMBER?

Does everyone in your family greet people the same way?

👤 BOOTS ON!

Stand up. Show a greeting you know: a wave, a handshake mime, a small bow of the head. No touching if you prefer not to.

▶ LET US FIND OUT

A **cultural code** is an unwritten habit about how people speak and behave: how close to stand, how direct to be, whether interrupting is rude, how long to wait before answering.

Codes are not "right" or "wrong" like a maths sum. They are patterns people learn at home, in class and in their town.

- In some homes, children speak only when invited. In others, lively overlap is normal.
- In Portugal you may kiss cheeks in family settings. In other places a small bow or a handshake is preferred.
- A quiet style can still be clear. A lively style can still be kind.

The skill is **notice, ask, respect**. Mocking a style is not curiosity. Matching your style to the moment is part of the same skill: a library needs a quieter voice than a football pitch, even if both voices belong to you.

People communicate in different styles, and all can be respected.

Match your style to the moment: quieter in a library, brighter on a pitch.

● YOUR TURN

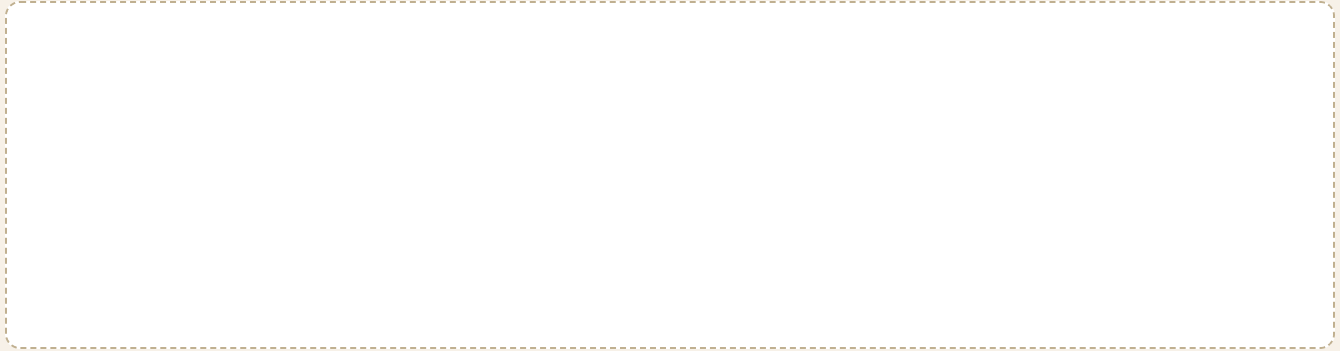

1. Write two communication habits you see in your home.
2. Write one habit you have seen in a film, book or trip that is different. Stay respectful.
3. Finish the sentence: Before I judge a style, I will...

◆ FROM ANOTHER CHAIR

- *Sofia says:* Direct speech is always best because nobody is confused.
- *Jamal says:* Soft speech can still be clear, and it protects feelings.
- *Then:* Which style helps when someone is upset? Why?

LOOK OUTWARDS NOTES

Draw two chairs labelled Direct and Soft. Under each, write one good use.

1.4

Digital citizenship

DO YOU REMEMBER?

What is the difference between a private chat and a public post?

BOOTS ON!

Write a two-word text that could be read two ways (for example "Fine."). Share how tone might be misread when there is no face.

► LET US FIND OUT

Digital citizenship means taking part online with the same respect you owe a person in the room, plus extra care.

Online communication has three extra risks:

1. **No face.** Tone is easy to miss.
2. **Fast send.** A thumb can travel faster than a second thought.
3. **Forwarding.** A private joke can become a public message.

A message can leave a **trail**, like footprints in sand. Even if you delete it on your screen, someone else may still have a copy. Tools that help:

Kindness in the playground and kindness on a screen are the same duty.

A digital message can leave a trail, like footprints in sand.

• YOUR TURN

1. Rewrite this message so it is clearer and kinder: "u r so dumb lol".
2. Tick private or public: class group chat · school website · family photo shared with friends · password.
3. Write one school rule you would invent for kind digital talk.

✦ DID YOU KNOW?

Many European schools teach e-safety as part of citizenship and computing, not only as a one-day talk. Better Internet for Kids is one public hub that adults use when they choose age-suitable advice.

→ ONE STEP FURTHER

With an adult, find your school's e-safety rule (or a family rule). Copy one line you agree with.

▢ LOOK OUTWARDS NOTES

Design a three-step checklist: Think · Check · Send.

The art of persuasion

🔄 DO YOU REMEMBER?

When did someone convince you with a good reason, not by shouting?

🎯 BOOTS ON!

In thirty seconds, persuade a partner to try a healthy snack using only two reasons. No nagging.

▶ LET US FIND OUT

Persuasion means inviting someone to agree using reasons, stories and evidence they can check. It is how ideas travel across a class, a town and the world.

It is not the same as:

- **pressure:** threats, shame, endless nagging
- **tricks:** false claims, hidden facts, "everyone is doing it" with no proof

Fair persuasion asks three questions:

1. What is my **claim**?
2. What is my **evidence**?
3. **Who might disagree, and why?**

Year 5 pupils can share ideas in a class assembly, a poster or a short film script. The claim still needs facts. A loud colour is not evidence.

■ WATCH ME WORK ONE OUT

Claim: Our class should collect clean paper for recycling. **Evidence:** The bin by the art sink fills by Thursday. Paper can be made into new sheets. **Respectful ask:** Please bring spare paper on Monday. **Counter-view:** Someone might say the caretaker already sorts it. **Reply:** Then we can ask the caretaker what would actually help, before we print a poster.

Fair persuasion uses a real object as evidence, not a shout.

A calm presentation still needs a claim, evidence and a respectful ask.

• YOUR TURN

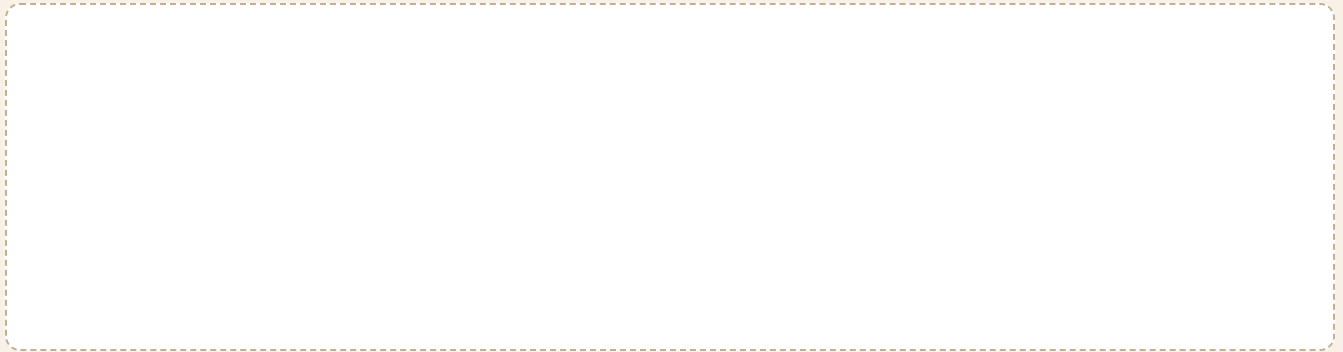

1. Write a claim about recycling or water use in one sentence.
2. Add one piece of evidence (something you can observe, or a trusted source).
3. Write one counter-view a classmate might hold, then one respectful reply.

◆ FROM ANOTHER CHAIR

- *Mateo says:* The loudest poster wins.
- *Inês says:* The clearest evidence wins, even in a quiet voice.
- *Then:* Which poster would you trust: loud colours, or sources listed at the bottom?

LOOK OUTWARDS NOTES

Sketch a fair poster layout: claim, evidence, respectful ask. Leave the boxes empty of invented numbers.

1.6

Active listening

DO YOU REMEMBER?

What does your body do when you are really listening?

BOOTS ON!

Partner A speaks for twenty seconds about weekend plans. Partner B must say it back in their own words. Swap.

► LET US FIND OUT

Active listening means listening to **understand**, not only to reply.

Tools:

- a quiet body
- eyes if that is comfortable (some people listen better looking slightly aside)
- no interrupting
- **say-it-back:** repeat the idea in your own words and check
- **open questions:** How... Why... What happened next...

Closed questions need yes or no. Open questions need a reason. "Did you like it?" is closed. "What surprised you?" is open.

In class discussion, active listening is how different perspectives get a fair turn. In later units (laws, work, other countries) you will need the same skill so you do not jump to a stereotype.

Listening is a skill. It can be practised like a sport.

Say-it-back shows you listened to understand.

Open questions invite a story, not only yes or no.

• YOUR TURN

1. Write two open questions you could ask a new classmate.
2. Write one closed question (yes or no) and one open version of it.
3. Rate your last group talk from 1 (I only waited to speak) to 5 (I understood someone first). Explain one point.

✦ DID YOU KNOW?

Counsellors and mediators train in reflective listening because repeating key ideas reduces conflict. You can start the habit long before you train for a job.

▢ LOOK OUTWARDS NOTES

Write a four-word personal listening motto.

☑ WHAT WE LEARNED

- [] I can name the four parts of the communication equation.
- [] I can suggest a language bridge without mocking.
- [] I can explain a cultural style with respect.
- [] I can rewrite an unkind digital message.
- [] I can tell persuasion from pressure.
- [] I can use say-it-back listening.

★ PROJECT

Bridge card project. In pairs, design a double-sided card for visitors to your school: four picture signs, two welcome phrases (Portuguese plus another language you know), and one listening tip. Share in a two-minute presentation. Listeners ask one respectful question. Use the communication equation: words, tone, body and listening all count in the talk.

→ LOOKING AHEAD

What is one careful question you want to take into Unit 2, where people write laws so communities can live together?

UNIT 2

2

Obeying the law

Wider Horizons · Why rules exist, rights, duties and fair consequences

THE BIG QUESTION

Who are laws for?

Unit 2 • Obeying the law

Look Outwards Club • Wider Horizons

Luggage tags: Purpose, Rights, Human rights, Consequences, Cases.

⦿ IN THIS UNIT YOU WILL

1. Explain why communities write laws.

Laws aim for safety, fairness and shared order, not only punishment.

2. Link rights to responsibilities.

A right you enjoy is matched by a duty that protects others.

3. Describe human rights in age-safe language.

Dignity, education, protection and a voice that is heard.

4. Discuss fair consequences for breaking rules.

Consequences should protect people and help repair harm where possible.

5. Study real examples carefully and kindly.

No gossip; no names of classmates; focus on principles.

■ LOOK CLOSER (QR) • UNIT 2

Ask a **grown-up** to hold the device and open this page with you.

What you will find: UN page introducing the Universal Declaration of Human Rights in simple language (adult-supervised). **URL:** <https://www.un.org/en/about-us/universal-declaration-of-human-rights>

✦ GETTING STARTED

Sofia has pinned a class charter next to a photo of a zebra crossing in Porto. Mateo asks why adults get fined for parking on a pavement. Jamal wonders who writes laws, and Inês opens a notebook labelled "fair or unfair?". Before opinions become noise, they collect three school rules and three town rules. Then they ask: who are laws for?

2.1

Why laws exist

Look for a shared rule that keeps people safer on the road, not only a punishment.

🔄 DO YOU REMEMBER?

What is one rule that keeps people safe at school?

● BOOTS ON!

In groups of three, invent a tiny island with five people. Write two laws you would need on day one.

► LET US FIND OUT

Laws are formal rules made by a community or country so people can live together with **safety**, **fairness** and **predictability**. Traffic laws, food safety laws and school policies are different layers of the same idea: shared order.

Laws are not perfect. They can be improved when evidence shows harm. That is why parliaments debate and update them. For Year 5, the key is: laws are for **people**, including people who will never meet each other.

● YOUR TURN

1. Write one school rule and one town rule. What harm does each try to prevent?
2. Finish: A law without a reason is...
3. Draw a simple map of your journey to school. Mark one law that protects you on the way.

✦ DID YOU KNOW?

Portugal's parliament is the Assembly of the Republic. Elected members debate and vote on laws.

▢ LOOK OUTWARDS NOTES

Write a one-sentence purpose for a classroom "quiet work" rule.

Rights and responsibilities

Look for rights and duties balanced fairly.

🕒 DO YOU REMEMBER?

What is a right you enjoy every school day?

👟 BOOTS ON!

List three rights you think every pupil should have. Then add one responsibility next to each.

► LET US FIND OUT

A **right** is something you are entitled to because you are a person in a community (for example, to learn in safety). A **responsibility** (duty) is something you should do to protect others' rights (for example, not blocking a fire exit).

Rights without responsibilities become selfish. Responsibilities without rights become harsh. Good communities hold both.

Example: the right to speak in class discussion is paired with the duty to listen and not shout over others.

• YOUR TURN

1. Match: right to play safely / responsibility to...
2. Write a two-column list for your classroom: Rights | Duties.
3. Explain why a right to privacy is hard if people photograph others without asking.

◆ FROM ANOTHER CHAIR

- *Mateo says:* Rights are more important than duties.
- *Sofia says:* Duties protect rights, so they travel together.
- *Then:* Give one example where ignoring a duty harms someone else's right.

LOOK OUTWARDS NOTES

Design a badge: one right + one matching duty.

2.3

Human rights

Look for rights that protect dignity: learning, safety, care and a fair chance.

DO YOU REMEMBER?

What do all children need to grow with dignity?

● BOOTS ON!

Silent think: write three needs every child should have, wherever they live.

► LET US FIND OUT

Human rights are basic entitlements every person should have because they are human: dignity, safety, education, health care, freedom from cruel treatment, and a fair process when accused.

After the Second World War, countries wrote the **Universal Declaration of Human Rights** (1948) to set a shared standard. Children's rights are also described in later agreements, including the Convention on the Rights of the Child.

Human rights are not pocket money for some countries only. They are a promise to everyone, including children who never leave their town.

● YOUR TURN

1. Circle which belong to human rights: food · education · a new phone every year · protection from violence.
2. Write one human right that schools help deliver.
3. Write one way a class can respect dignity during a disagreement.

✦ DID YOU KNOW?

The Universal Declaration of Human Rights was adopted by the United Nations General Assembly in 1948.

→ ONE STEP FURTHER

With an adult, open a child-friendly summary of children's rights. Copy one article in simple words.

LOOK OUTWARDS NOTES

Illustrate one human right without using words.

2.4

Consequences of breaking the law

Look for a calm talk about fair consequences.

DO YOU REMEMBER?

What is the difference between a mistake and a deliberate harm?

● BOOTS ON!

Rank these from least serious to most serious for a school setting (discussion only): late homework, unkind name, damaging property, threatening harm. Agree as a group why the order is fair.

► LET US FIND OUT

When people break laws, communities use **consequences**: warnings, fines, community service, or, for serious adult crimes, courts and prisons. For children, systems usually aim to educate and protect, not to copy adult punishment.

Fair consequences try to: stop the harm, protect others, and help the person repair damage where possible. Unfair consequences are random, cruel or applied only to some groups.

This topic is not about naming classmates. It is about principles.

● YOUR TURN

1. Write one fair consequence for damaging a library book on purpose.
2. Write one unfair consequence for the same act.
3. Explain repair: how could someone make things better after a harm?

✧ DID YOU KNOW?

Many justice systems for young people emphasise education and rehabilitation more than adult-style punishment.

LOOK OUTWARDS NOTES

Write a fair-consequence checklist of three questions adults should ask.

2.5

Real-life examples (carefully)

Look for community rules that keep people safe.

DO YOU REMEMBER?

Why might a story about law be better with no real pupil names?

● BOOTS ON!

Read the case frames below with your teacher. No googling private people.

► LET US FIND OUT

We study **cases** to practise thinking, not to gossip.

Case A: A town bans parking on zebra crossings after near-misses. Drivers complain about convenience. Pedestrians feel safer.

Case B: A school updates its anti-bullying policy after listening to pupils. Some pupils say it is strict; others say it was needed.

Discuss: Who is protected? Who has a duty? What evidence would help improve the rule?

Never share private details of real classmates as "examples". Use principles.

● YOUR TURN

1. For Case A, write one right and one duty.
2. For Case B, write one way pupils can help a rule work without becoming police.
3. Invent Case C (one paragraph) about litter in a park. Keep it respectful.

◆ FROM ANOTHER CHAIR

- *Jamal says:* Rules only matter when someone is watching.
- *Inês says:* Rules matter most when nobody is watching, because that is when trust lives.
- *Then:* Which view builds a safer playground?

▢ LOOK OUTWARDS NOTES

Write a newspaper-style headline for Case A that is fair, not sensational.

☑ WHAT WE LEARNED

- ☐ I can explain a purpose of laws.
- ☐ I can pair a right with a responsibility.
- ☐ I can name human rights in simple language.
- ☐ I can describe a fair consequence.
- ☐ I can discuss a case without gossip.

★ PROJECT

Class charter 2.0. Rewrite five classroom rules as rights + duties. Display as a poster. Vote once, then live with the charter for two weeks and review.

→ LOOKING AHEAD

What is one careful question you want to take into the next unit?

UNIT 3

3

Globalisation

Wider Horizons · Trade chains, travelling ideas, culture mix and shared problems

THE BIG QUESTION

How connected is your ordinary day?

Unit 3 • Globalisation

Look Outwards Club • Wider Horizons

Luggage tags: Trade, Ideas, Culture, Fairness, Shared problems, Citizenship.

🕒 IN THIS UNIT YOU WILL

- 1. Map a simple supply chain for an everyday object.**
You will follow materials, makers and miles.
- 2. Explain how information and ideas travel fast.**
News, music and memes cross borders in minutes.
- 3. Describe cultural mixing without erasing local life.**
Same brands can sit beside local food and festivals.
- 4. Weigh who gains and who risks in global trade.**
Fair questions about winners and losers.
- 5. Name problems that ignore borders.**
Pollution, disease and climate need shared care.
- 6. State one role you can play as a global citizen.**
Small choices still count.

📱 LOOK CLOSER (QR) • UNIT 3

Ask a **grown-up** to hold the device and open this page with you.

What you will find: UN Sustainable Development Goals overview for learners (adult-supervised).

URL: <https://sdgs.un.org/goals>

✦ GETTING STARTED

Mateo holds up a football shirt. Sofia finds a mango sticker. Jamal scrolls a song chart from another continent (adult device, short look). Inês draws arrows from Portugal to places the shirt might have touched. The big question: how connected is your ordinary day? List five objects within arm's reach and guess one other country each object might link to.

3.1

Supply chains and interdependence

Look for the steps of a supply chain: grow or make, ship, sell, and your hands.

🔄 DO YOU REMEMBER?

Where do you think your breakfast food began its journey?

🔴 BOOTS ON!

Choose a pencil or a snack wrapper. List three stages it might have passed through before it reached you.

► LET US FIND OUT

A **supply chain** is the path from raw material to finished product to your hands: grow or mine, make, pack, ship, sell. **Interdependence** means countries and people rely on one another along that path.

A football may use rubber, fabric, factories, ships and shops. If one link fails, prices or availability can change far away. That is why "made in" on a label is only part of the story.

• YOUR TURN

1. Draw a five-box chain for a cotton T-shirt.
2. Mark one risk (weather, strike, storm at sea) on your chain.
3. Write one way a Portuguese shop depends on workers it will never meet.

✦ DID YOU KNOW?

Container ships move a large share of world trade goods between ports.

▢ LOOK OUTWARDS NOTES

Label your chain with one Portuguese port that might appear in a real route (for example Sines or Leixões).

How ideas travel

Look for how ideas move through books, talk and devices.

🔄 DO YOU REMEMBER?

How quickly can a song or sports clip reach another country?

🎯 BOOTS ON!

In pairs: name a film, sport or food that started far away and is now common here.

▶ LET US FIND OUT

Ideas travel through books, radio, television, the internet, migration and school. Today digital networks act like a **nervous system**: a message can jump continents in seconds.

Speed is useful for science and family contact. Speed is risky for rumours. The skill is the same as in Unit 1: check before you treat a post as fact.

• YOUR TURN

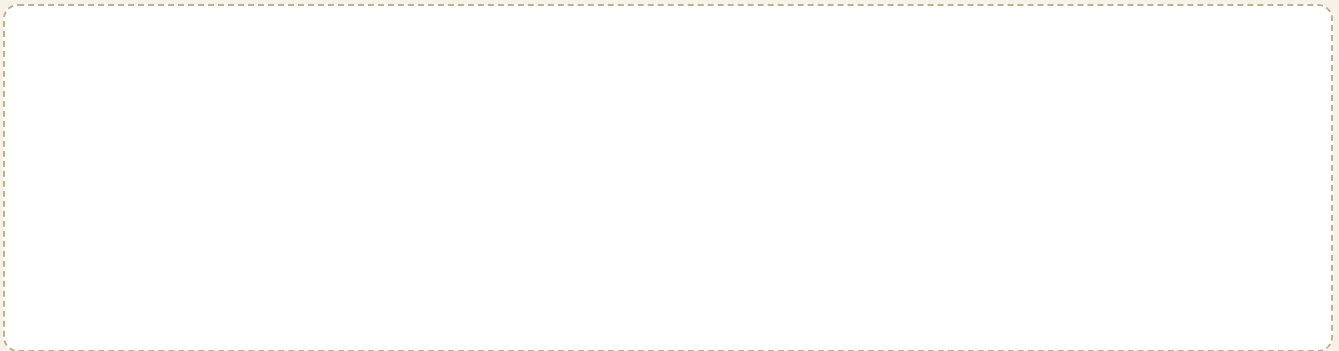

1. List three channels ideas use to travel.
2. Write one benefit and one risk of very fast news.
3. Invent a two-step check for a surprising claim you see online.

→ ONE STEP FURTHER

Ask an adult which news source they trust and why. Write one reason that is about evidence, not only habit.

▢ LOOK OUTWARDS NOTES

Draw a "idea journey" from a creator to your classroom.

Culture: same and mixed

Look for culture that is both shared and mixed.

DO YOU REMEMBER?

Can two cultures share a street without one disappearing?

BOOTS ON!

Quick list: one global brand you know and one local Portuguese food or festival.

LET US FIND OUT

Globalisation can make high streets look similar (same logos). It can also create **hybrid** culture: local recipes with new ingredients, music that mixes styles, bilingual street signs.

Homogenisation means everything becoming the same. Hybridisation means mixing. Neither word is pure good or pure bad. The question is: who chooses, and is local voice respected?

• YOUR TURN

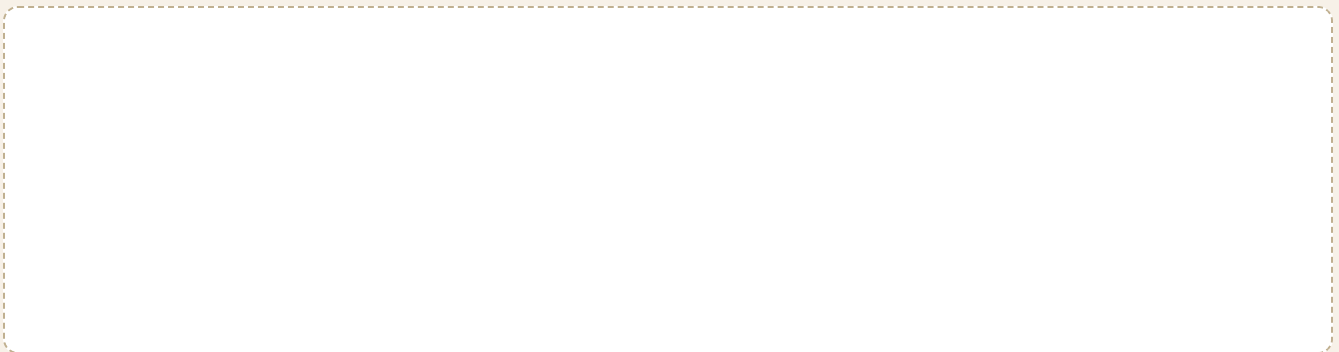

1. Write one example of sameness you notice in shops.
2. Write one example of local mix you value.
3. Finish: A respectful visitor to another culture should...

◆ FROM ANOTHER CHAIR

- *Sofia says:* Same shops everywhere is convenient.
- *Jamal says:* Same shops everywhere can erase special local places.
- *Then:* How can a town keep both convenience and character?

▢ LOOK OUTWARDS NOTES

Sketch a street with one global shop and one local stall. Caption why both matter.

Winners and losers

Look for people at each step of making and selling goods.

DO YOU REMEMBER?

Can a trade deal help one group and hurt another at the same time?

BOOTS ON!

Role cards (teacher assigns): factory worker, shopper, shop owner, farmer. Each says one hope and one fear about cheaper imports.

LET US FIND OUT

Global trade can lower prices and create jobs. It can also close factories, push wages down in some places, or encourage unsafe conditions if rules are weak.

A fair enquiry asks: Who gains money? Who gains choice? Who risks health or work? There is rarely one number that settles the whole story.

• YOUR TURN

1. Write one possible gain for a Portuguese family buying cheaper clothes.
2. Write one possible risk for workers in a far factory if safety is ignored.
3. Design a three-question checklist for ethical shopping (age-safe).

✦ DID YOU KNOW?

Fair trade labels exist to signal that certain standards for producers were checked. Labels still need critical reading.

▢ LOOK OUTWARDS NOTES

Write a balanced sentence starting with "On one hand... On the other hand..."

Problems without passports

Look for problems that cross borders: pollution, shared air, and people working together.

DO YOU REMEMBER?

Which problems cannot be solved by one country alone?

BOOTS ON!

Sort cards (or list): river pollution, playground argument, flu outbreak, classroom noise. Which need more than one community?

LET US FIND OUT

Some problems ignore borders: pandemics, air and sea pollution, climate change, and wildlife loss. A river can carry waste downstream to another region. Smoke does not stop at a fence.

Shared problems need shared care: science, rules, aid and everyday habits. Fear should not turn into blame of whole peoples. Evidence and cooperation beat panic.

• YOUR TURN

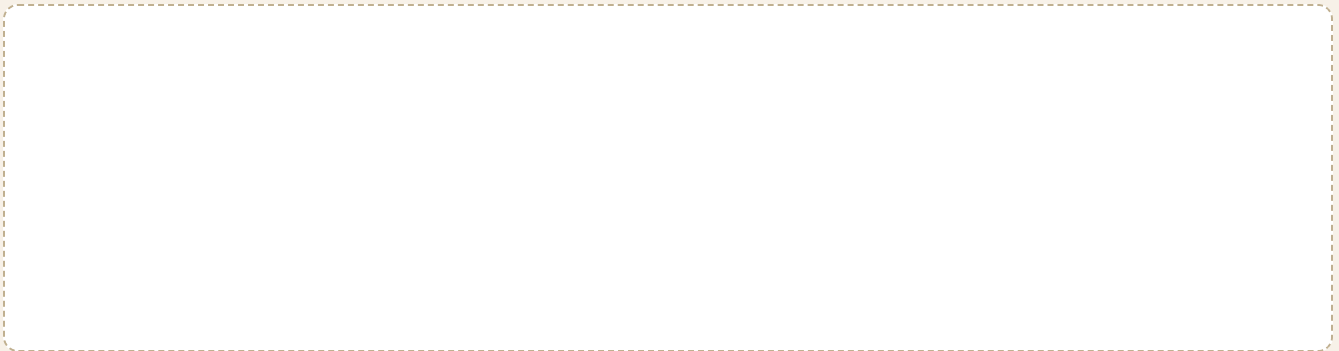

1. Name two borderless problems.
2. Write one action a family can take and one action only governments can lead.
3. Explain why blaming a whole nationality is unfair science.

✦ DID YOU KNOW?

The World Health Organization (WHO) coordinates international health responses; countries still make many local decisions.

▢ LOOK OUTWARDS NOTES

Draw a cloud of smoke crossing two country outlines. Write one shared response.

Your role as a global citizen

Look for local actions that care for a wider world.

🔄 DO YOU REMEMBER?

What does "citizen of the world" mean if you still have a home street?

🎯 BOOTS ON!

Write three circles: Me · My community · The wider world. Place one action in each circle.

▶ LET US FIND OUT

A **global citizen** cares about fairness beyond their own postcode, while still serving their local community. Roles for Year 5 are real but sized for age: learn, share accurate facts, reduce waste, welcome newcomers, support trusted charities with adults, and keep asking who is missing from the story.

You do not need to solve the planet alone. You do need to refuse indifference.

• YOUR TURN

1. Write one local action and one global-minded learning goal for this term.
2. Tick which habits show global citizenship: checking a source · mocking accents · reducing food waste · spreading rumours.
3. Write a promise sentence starting "As a Look Outwards learner, I will..."

▢ LOOK OUTWARDS NOTES

Illustrate your three circles with one icon each.

☑ WHAT WE LEARNED

- [] I can sketch a supply chain.
- [] I can explain fast idea travel and its risks.
- [] I can discuss cultural mix with respect.
- [] I can name winners and losers questions.
- [] I can identify a borderless problem.
- [] I can state a personal global-citizen action.

★ PROJECT

Object biography. Choose one everyday object. Research (with adult help) a plausible supply chain. Make a one-page biography: materials, possible countries, one worker role, one environmental question, one fair-choice idea.

→ LOOKING AHEAD

What is one careful question you want to take into the next unit?

UNIT 4

4

The world of work

Wider Horizons · Global jobs, flexible work, machines, green choices and skills

THE BIG QUESTION

How is work changing, and what skills still matter?

Unit 4 • The world of work

Look Outwards Club • Wider Horizons

Luggage tags: Global work, Flexibility, Machines, Green jobs, Enterprise, Skills.

🕒 IN THIS UNIT YOU WILL

- 1. Explain why goods are made in many places.**
Skills, costs, materials and rules shape where work happens.
- 2. Describe flexible and remote work fairly.**
Not every job can be done from a laptop.
- 3. Discuss automation and AI without panic.**
Machines change tasks; people still decide values.
- 4. Explore green jobs and careful shopping.**
Work can protect or harm the planet.
- 5. Practise an entrepreneurial problem-to-idea habit.**
Spot a need, test a small solution.
- 6. Build a skills portfolio mindset.**
Learning continues after school.

📱 LOOK CLOSER (QR) • UNIT 4

Ask a **grown-up** to hold the device and open this page with you.

What you will find: ILO youth / future of work overview for adults supporting learners (adult-supervised). **URL:** <https://www.ilo.org/global/topics/youth-employment/lang--en/index.htm>

✦ GETTING STARTED

Sofia interviews the school caretaker. Mateo times a remote video call his uncle makes for work. Jamal lists jobs that need hands on site. Inês starts a skills wall: teamwork, coding curiosity, care, languages. Big question: how is work changing, and what skills still matter?

4.1

Why work is shared across countries

Look for many workers in different places who help one product reach a shop.

🔄 DO YOU REMEMBER?

Look at a clothing label. What does "Made in..." tell you, and what does it hide?

● BOOTS ON!

Bring (or recall) one label from home. Record country of manufacture if shown.

► LET US FIND OUT

Work is shared across countries because of materials, wages, skills, transport and laws. A T-shirt might be designed in one place, sewn in another, and sold in a third. This is sometimes called a **division of labour** across borders.

"Made in Bangladesh" (or anywhere) is not a joke and not an insult. It names real workers. Fair questions are about safety, pay and dignity, not about mocking countries.

● YOUR TURN

1. Write three reasons companies move manufacturing.
2. Write one fair question a shopper could ask about a cheap shirt.
3. Explain why mocking a country's workers is unhelpful to fairness.

✦ DID YOU KNOW?

Bangladesh is a major exporter of ready-made garments in the world economy.

▢ LOOK OUTWARDS NOTES

Redraw a shirt and annotate design / make / sell countries as a hypothesis.

Flexible and remote work

Look for flexible work at home and school side by side.

🔄 DO YOU REMEMBER?

Can every job be done from home? Why or why not?

🔴 BOOTS ON!

Sort jobs: nurse · app designer · bus driver · online tutor · baker. Remote possible?
Yes/No/Sometimes.

▶ LET US FIND OUT

Remote work means working away from a central office, often with digital tools. **Gig work** means short tasks or contracts rather than one fixed job. Both can offer flexibility. Both can bring uncertainty about hours and rights.

A hospital cleaner, a train driver and a restaurant cook still need to be on site. Year 5 learners should notice both the laptop story and the hands-on story.

• YOUR TURN

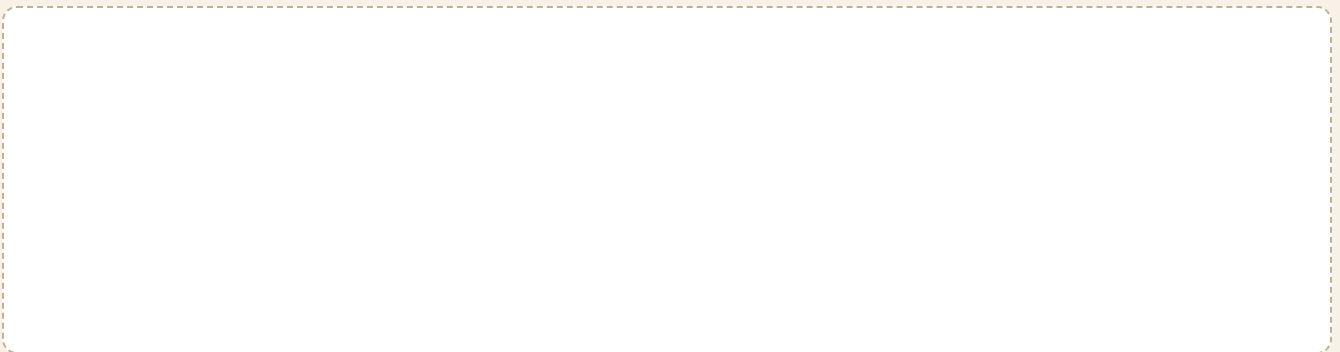

1. List two jobs that can be remote and two that cannot.
2. Write one benefit and one risk of gig-style work for a family budget.
3. Design a fair school rule for adult visitors who work from the school café area.

◆ FROM ANOTHER CHAIR

- *Mateo says:* Future work is all online.
- *Sofia says:* Bodies still need care, food and transport in real places.
- *Then:* Which jobs must stay local even if tech improves?

▢ LOOK OUTWARDS NOTES

Draw a split poster: On site | Remote.

A large dashed rectangular box intended for a student to draw a split poster. The box is empty and occupies most of the width and height of the section.

Machines, robots and AI at work

Look for people and machines working carefully together.

🔄 DO YOU REMEMBER?

What is a task a machine does well that a human finds boring or dangerous?

🔴 BOOTS ON!

List three school tasks. Which could a robot help with? Which should stay human?

▶ LET US FIND OUT

Automation uses machines to do tasks. **AI** systems can sort patterns, suggest text or recognise images, but they do not care like a person cares.

Some jobs change when machines arrive. New jobs also appear (repair, design, care, teaching machines with good data). Panic titles ("robots will take everything") are too simple. The better question is: which tasks shift, and how do we retrain fairly?

• YOUR TURN

1. Write one dangerous task better done by a machine.
2. Write one task that needs human kindness.
3. Invent a one-line rule for using AI help on homework honestly.

✦ DID YOU KNOW?

Many factories already use robots for heavy lifting and precise assembly; humans still plan and maintain systems.

▢ LOOK OUTWARDS NOTES

Caption a drawing: Human strength · Machine strength.

Green jobs and careful choices

Look for green jobs: energy from the sun, growing plants, repair and care for nature.

🔄 DO YOU REMEMBER?

What job helps the planet rather than only using it?

👟 BOOTS ON!

Brainstorm five green jobs (for example solar technician, park ranger, recycling sorter).

▶ LET US FIND OUT

A **green job** helps reduce harm to the environment or restore nature: renewable energy, efficient buildings, clean transport, conservation, repair and recycling.

Ethical consumerism means choosing products with care when you can: less waste, longer use, fairer supply. Not every family can buy the expensive option. Fair talk avoids shaming and focuses on better systems plus small habits.

● YOUR TURN

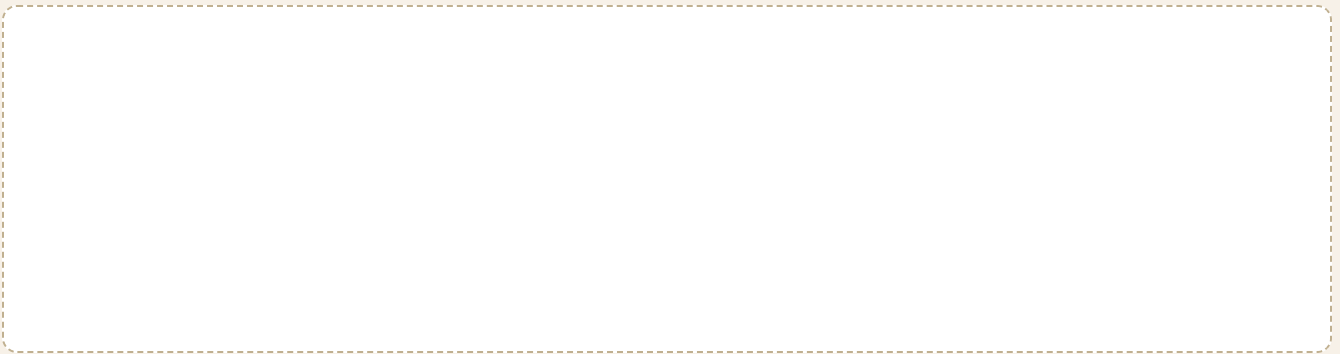

1. Name three green jobs and what each protects.
2. Write one cheap habit and one bigger system change (for towns or countries).
3. Design a lunchbox sticker that reduces food waste without blaming anyone.

→ ONE STEP FURTHER

With an adult, find one green job advertised in Portugal or the EU. Copy the job title only.

▢ LOOK OUTWARDS NOTES

Sketch a town with three green-job icons.

Problems as opportunities

Look for young people turning a problem into a helpful idea.

🕒 DO YOU REMEMBER?

What small problem in your school could become a helpful project?

👟 BOOTS ON!

Walk-and-spot (classroom): find one friction (lost pencils, noisy corridor). Propose a tiny fix.

▶ LET US FIND OUT

Entrepreneurs spot a problem and test a solution. At Year 5 scale, that means a lost-and-found system, a buddy bench idea, a compost trial, or a kinder lunch queue, not a giant company.

Good enterprise is honest about who benefits. "Opportunity" never means taking advantage of people in need.

● YOUR TURN

1. State a problem in one sentence.
2. Propose a solution in three steps.
3. Name who must be consulted before you act.

▢ LOOK OUTWARDS NOTES

Storyboard your idea in four boxes.

4.6

Skills you keep building

Look for skills collected like a growing portfolio.

🔄 DO YOU REMEMBER?

Which skill have you improved since Year 4?

● BOOTS ON!

Make a quick portfolio list: 3 skills you have, 1 you want, 1 someone else notices in you.

▶ LET US FIND OUT

A **skills portfolio** is a living list of what you can do: literacy, numeracy, teamwork, languages, digital care, creativity, resilience. Work changes; learning does not stop at the school gate.

Lifelong learning means adults retrain too. Your job now is curiosity with evidence, not choosing a forever career at age nine.

● YOUR TURN

1. Build a six-box portfolio (draw or list).
2. Star one skill that helps in any job.
3. Write a thank-you to someone who taught you a skill outside school.

✦ DID YOU KNOW?

Many countries promote lifelong learning policies because careers span longer lives and changing technology.

📁 LOOK OUTWARDS NOTES

Decorate a portfolio cover titled "Skills in progress".

☑️ WHAT WE LEARNED

- ☐ I can explain multi-country making.
- ☐ I can sort remote and on-site jobs.
- ☐ I can discuss machines without panic.
- ☐ I can name green jobs and careful habits.
- ☐ I can turn a problem into a small plan.
- ☐ I can start a skills portfolio.

★ PROJECT

Skills portfolio poster. One page: six skills, evidence of each (photo permission or drawing), one green-job interest, one question for a visitor worker.

→ LOOKING AHEAD

What is one careful question you want to take into the next unit?

UNIT 5

5

Working with other countries

Wider Horizons · Interests, diplomacy, shared resources, soft power and crisis help

THE BIG QUESTION

How do countries work together when they want different things?

Unit 5 • Working with other countries

Look Outwards Club • Wider Horizons

Luggage tags: Interests, Diplomacy, Resources, Soft power, Crisis, Future.

🕒 IN THIS UNIT YOU WILL

- 1. Describe national interests in simple terms.**
Safety, trade, culture and resources shape goals.
- 2. Explain diplomacy as talking tools.**
Embassies, treaties and meetings before force.
- 3. Explore shared resources and compromise.**
Rivers, seas and sky need fair rules.
- 4. Define soft power with examples.**
Culture, sport and ideas can influence without weapons.
- 5. Outline how countries help in crises.**
Aid, rescue skills and coordination matter.
- 6. Imagine future cooperation zones.**
Space and cyberspace need rules too.

📱 LOOK CLOSER (QR) • UNIT 5

Ask a **grown-up** to hold the device and open this page with you.

What you will find: United Nations Peace, dignity and equality overview (adult-supervised). **URL:** <https://www.un.org/en/global-issues>

✦ GETTING STARTED

Inês draws two flags sharing a river. Mateo wants a space station story. Sofia lists foods Portugal imports. Jamal asks who decides fishing rules. Big question: how do countries work together when they want different things? Write one thing Portugal might want from cooperation and one thing it might offer.

5.1

National interests

Look for countries explaining what they need and value.

🔄 DO YOU REMEMBER?

What might a country try to protect for its people?

🎯 BOOTS ON!

List four: safety · food · energy · culture · friendship · money. Rank for a coastal country like Portugal.

► LET US FIND OUT

National interests are the goals a country prioritises: security, prosperity, health, culture and relationships. Interests can overlap (clean seas help everyone) or clash (two countries want the same fishing zone).

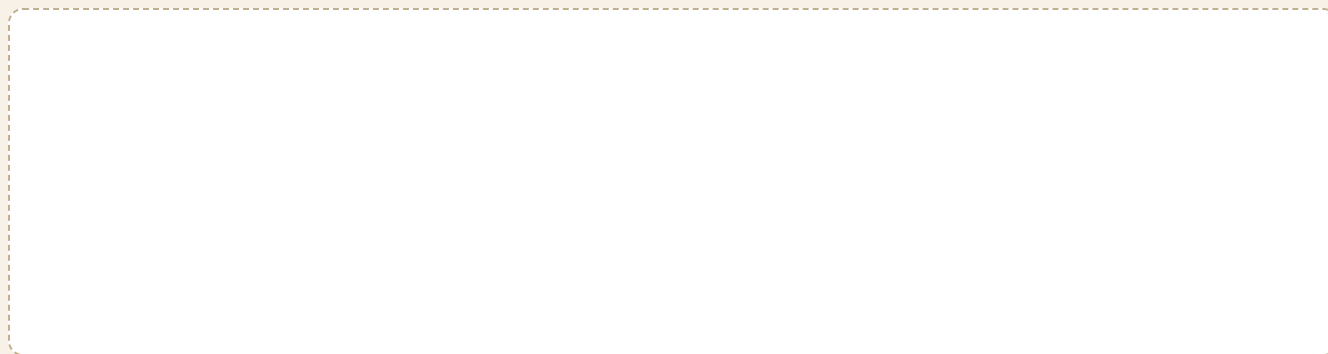

Interests are not the same as "being selfish". They are the starting point for negotiation. Good global thinking names interests honestly, then looks for fair deals.

• YOUR TURN

1. Write three interests Portugal might hold as a coastal European country.
2. Write one interest that might clash with a neighbour and one that might match.
3. Explain why hiding your real interest can make talks harder.

▢ LOOK OUTWARDS NOTES

Draw a shield with four interest icons.

Diplomacy toolbox

Look for diplomacy tools: a meeting table, careful talk, and agreement before force.

🔄 DO YOU REMEMBER?

What tools exist before countries fight?

🎭 BOOTS ON!

Mime four tools: handshake, letter, meeting table, trade deal signature (no props needed).

▶ LET US FIND OUT

Diplomacy is the practice of managing relationships between countries through talk, negotiation, embassies and agreements. Tools include summits, treaties, trade talks, cultural exchanges and quiet phone calls.

Diplomacy is slow and sometimes frustrating. It is still how most international problems are handled every day without headlines.

• YOUR TURN

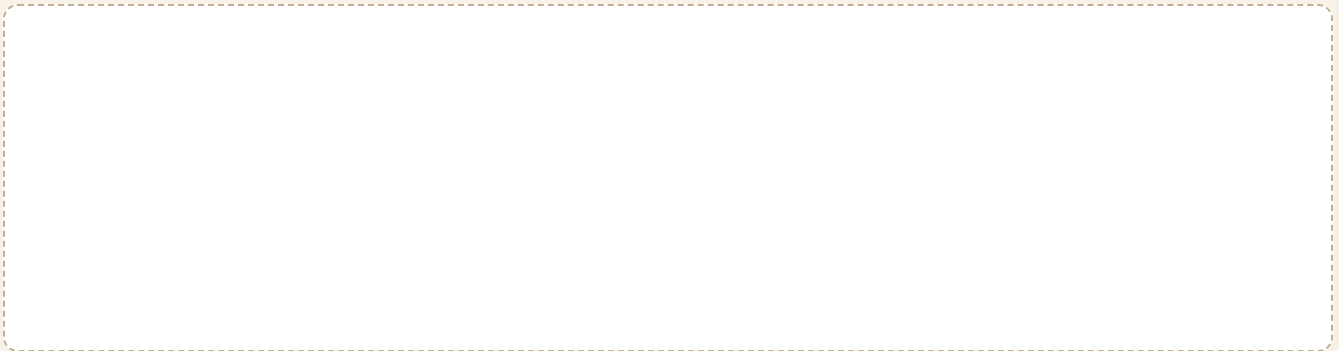

1. Name three diplomacy tools.
2. Write why an embassy (or consulate) might help a family abroad.
3. Role-play (with teacher): two countries share a bridge. Invent a fair repair plan.

✦ DID YOU KNOW?

Portugal is a member of the European Union and the United Nations, which are forums for cooperation.

▢ LOOK OUTWARDS NOTES

Design a "talk first" poster for nations (and for playgrounds).

Shared resources

Look for a shared river: both sides need fair rules so water and life are protected.

DO YOU REMEMBER?

Who owns a river that runs through two countries?

BOOTS ON!

Discuss: a mountain river starts in Country A and ends in Country B. Who may build a dam?

LET US FIND OUT

Shared resources (water, fish stocks, clean air, climate stability) need rules. Without rules, the upstream user can harm the downstream user. Compromise may include quotas, seasons, joint science and dispute panels.

Conflict is possible. So is creative sharing. Geography makes neighbours of people who must cooperate whether they like each other or not.

• YOUR TURN

1. Write one shared resource near Portugal (think Atlantic, rivers, air routes).
2. Propose a fair rule in two sentences.
3. List two emotions that make compromise hard, and one calm tool that helps.

◆ FROM ANOTHER CHAIR

- *Mateo says:* The country that finds it first owns it.
- *Inês says:* The people who depend on it must have a voice.
- *Then:* Which view protects children living downstream?

▢ LOOK OUTWARDS NOTES

Map a simple river across two colours. Write a joint rule.

Soft power

Look for soft power: culture, sport and friendship that attract without force.

DO YOU REMEMBER?

Can a song, a sport or a language change how people see a country?

BOOTS ON!

Name one Portuguese cultural export (music, food, literature, football style) that travels.

LET US FIND OUT

Soft power is influence through attraction: culture, education, sport, science and values, rather than force. A film festival, a university scholarship, or a national football team can shape how others feel about a country.

Soft power can be used kindly or manipulatively. Year 5 skill: notice influence, ask who benefits, keep your own critical mind.

• YOUR TURN

1. Define soft power in your own words.
2. Give one soft-power example from sport and one from culture.
3. Write how soft power differs from a threat.

✦ DID YOU KNOW?

The term "soft power" was popularised by scholar Joseph Nye to describe non-military influence.

▢ LOOK OUTWARDS NOTES

Poster: Hard tools | Soft tools (age-safe icons only).

Help in a crisis

Look for careful help packed for people in need.

🔄 DO YOU REMEMBER?

What should arrive first after a flood or earthquake?

🎯 BOOTS ON!

Priority sort: food · rumours · rescue dogs · cameras for selfies · medicine · shelter.

▶ LET US FIND OUT

When disaster or conflict harms people, other countries and organisations may send **humanitarian aid**: search teams, medical help, food, shelter and money through trusted channels.

Good response needs coordination, respect for local leaders, and protection of children. Curiosity is fine; disaster tourism and rumour-spreading are not.

• YOUR TURN

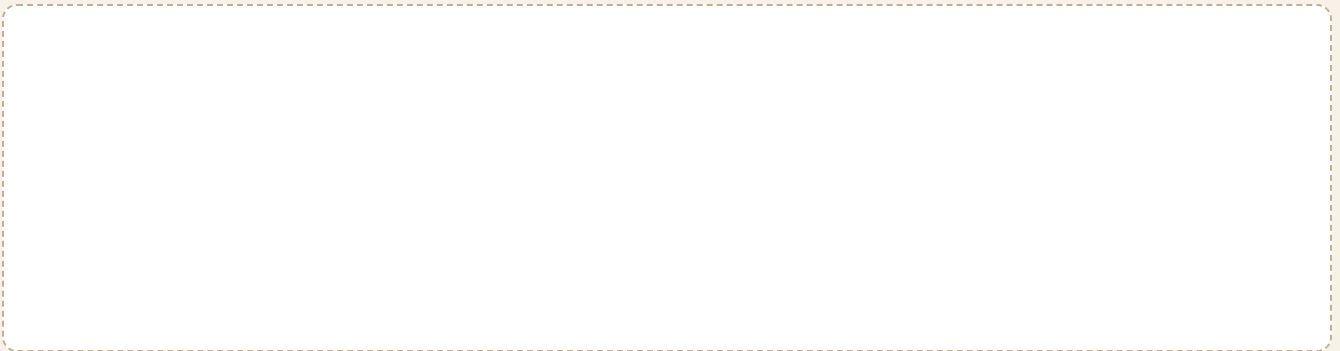

1. List four helpful crisis responses.
2. Write one harmful "help" (for example dumping unusable goods).
3. Explain why adult-trusted charities matter more than random online appeals.

→ ONE STEP FURTHER

With an adult, name one organisation known for disaster response (for example Red Cross / Red Crescent).

▢ LOOK OUTWARDS NOTES

Design a relief backpack with five essential items labelled.

Future cooperation: space and cyberspace

Look for shared care of space and digital networks.

🔄 DO YOU REMEMBER?

Why might space debris or cyber attacks need international rules?

🎯 BOOTS ON!

Two-minute think-pair: invent one rule for satellites and one rule for online harm across borders.

▶ LET US FIND OUT

New domains need cooperation. **Space** holds satellites that power weather forecasts, GPS and communications. Debris and conflicting claims need agreements. **Cyberspace** crosses borders instantly; attacks and crime can start far away.

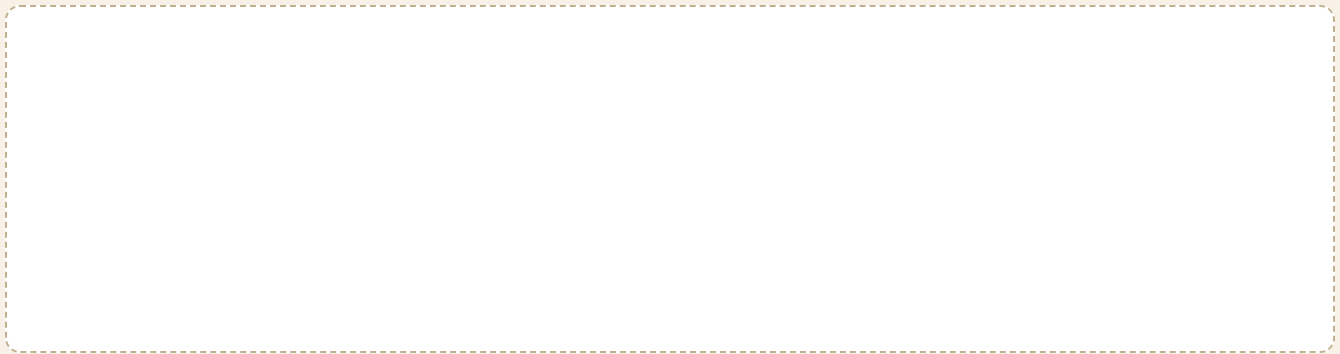

Future cooperation is not science fiction only. It is today's treaties and tomorrow's habits of evidence and restraint.

• YOUR TURN

1. Write one reason satellites help ordinary people.
2. Write one cyber problem that a single country cannot fix alone.
3. Propose a classroom cyber-cooperation rule that mirrors international care.

▢ LOOK OUTWARDS NOTES

Draw Earth with one satellite and one fibre cable under the sea.

☑ WHAT WE LEARNED

- ☐ I can name national interests simply.
- ☐ I can list diplomacy tools.
- ☐ I can discuss shared resources fairly.
- ☐ I can explain soft power with an example.
- ☐ I can outline helpful crisis response.
- ☐ I can connect space/cyber to cooperation.

★ PROJECT

River treaty simulation. Two teams share a paper river. Negotiate a one-page treaty: water use, pollution limit, science sharing, dispute steps. Present for peer review.

→ LOOKING AHEAD

What is one careful question you want to take into the next unit?

UNIT 6

6

Digital world

Wider Horizons · Networks, attention, truth, citizenship, creating and AI

THE BIG QUESTION

Who is in charge of your attention online?

Unit 6 • Digital world

Look Outwards Club • Wider Horizons

Luggage tags: Networks, Attention, Truth, Citizenship, Creating, AI.

🕒 IN THIS UNIT YOU WILL

1. Describe the internet as connected networks.

Cables, servers and protocols, not magic.

2. Explain attention designs on apps.

Notifications and endless scroll are choices.

3. Practise media literacy as a digital detective.

Check source, date, evidence and motive.

4. State digital rights and responsibilities.

Safety, respect and honesty online.

5. Move from consumer to careful creator.

Make things that help, not only watch.

6. Define AI in honest, limited terms.

Pattern tools, not human minds.

📱 LOOK CLOSER (QR) • UNIT 6

Ask a **grown-up** to hold the device and open this page with you.

What you will find: Safer Internet / child online safety hub (adult-supervised; use national safer-internet centre if preferred). **URL:** <https://www.betterinternetforkids.eu/>

✦ GETTING STARTED

Jamal turns off notifications for a timed experiment. Sofia freezes a screenshot of a too-perfect claim (adult device). Mateo wants to publish a class podcast. Inês draws servers as blocks linked by lines under the Atlantic. Big question: who is in charge of your attention online?

6.1

How the internet really works

Look for the internet as real paths: home, cable under the sea, and a distant server.

🔄 DO YOU REMEMBER?

What physical things must exist for a video call to work?

🔴 BOOTS ON!

Trace a message: your device → home router → bigger networks → a server → back again. Sketch it.

► LET US FIND OUT

The internet is a global system of **networks** linked by cables (including under the sea), wireless links, routers and servers. Protocols are agreed rules so machines can exchange packets of data.

When a page "loads", data travels in pieces and re-assembles. Understanding the architecture reduces magical thinking and supports better safety habits (for example, knowing a public Wi-Fi is still a real network with risks).

• YOUR TURN

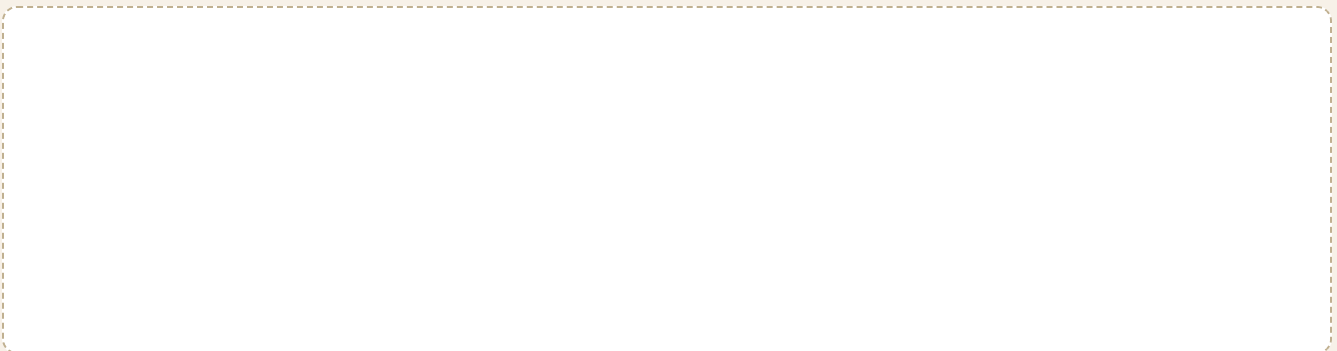

1. Label a simple four-step diagram of a message path.
2. Write why cutting undersea cables could affect many countries.
3. Explain one difference between the internet and a single app.

✦ DID YOU KNOW?

Undersea fibre-optic cables carry a huge share of international internet traffic.

▢ LOOK OUTWARDS NOTES

Draw the Atlantic with one cable line from Portugal toward another continent.

The attention economy

Look for a healthy choice: put the screen down and notice the world outside.

🔄 DO YOU REMEMBER?

Why do some apps want you to stay longer?

🎯 BOOTS ON!

Count notifications on a family device (with permission) for one evening hour. Record the number only.

▶ LET US FIND OUT

Many free apps earn money from **attention**: ads, data and time spent. Designs may use streaks, autoplay, bright badges and infinite scroll. That does not mean you are weak; it means the product was engineered.

Your power is awareness: timers, grey-scale modes, adult settings, and hobbies offline. Schools and families set boundaries because developing brains deserve protection.

- YOUR TURN

1. Name three design tricks that hold attention.
2. Write one personal boundary that protects sleep or homework.
3. Design a "pause card" you can keep near a screen.

- ◆ FROM ANOTHER CHAIR

- *Mateo says:* If it is free, it costs nothing.
- *Inês says:* If it is free, you might be paying with time and data.
- *Then:* Which payment is harder to see?

- ▢ LOOK OUTWARDS NOTES

Poster: Designed to hook | Designed by me (my rules).

Digital detectives (misinformation)

Look for pupils checking claims before they share them.

🔄 DO YOU REMEMBER?

What is the difference between a mistake and a lie told on purpose?

● BOOTS ON!

Teacher shows three sample claims (invented). Sort: likely true / need check / likely false. Explain one reason each.

► LET US FIND OUT

Misinformation is false or misleading information. Sometimes it is a mistake; sometimes it is deliberate. Detectives check: Who posted this? When? What evidence? Can a trusted source confirm it? What emotion is it trying to trigger?

Never share a shocking claim to be first. Being first with a falsehood still harms.

• YOUR TURN

1. Write a four-step check list for a viral claim.
2. Rewrite a sensational headline into a careful one.
3. Explain why a photo without a date can mislead.

✦ DID YOU KNOW?

Fact-checking organisations and public broadcasters often publish methods for verifying claims; adults can model those habits.

→ ONE STEP FURTHER

With an adult, open one reputable fact-check site and read a single example together.

▢ LOOK OUTWARDS NOTES

Detective badge: Claim · Source · Evidence · Decision.

Digital citizenship

Look for online rights and duties learned together.

🔄 DO YOU REMEMBER?

What rights should you have online, and what duties protect others?

● BOOTS ON!

Two columns on mini-whiteboards: Rights online | Duties online.

▶ LET US FIND OUT

Digital citizenship means belonging to online spaces with **rights** (safety, privacy, fair treatment) and **responsibilities** (honesty, respect, reporting harm).

Global community online means your words can reach strangers. Laws about hate, threats and copyright still apply. Age rules on platforms exist for a reason.

• YOUR TURN

1. List three digital rights and three duties.
2. Write when you should tell a trusted adult immediately.
3. Create a class digital-citizenship sentence everyone can sign.

▢ LOOK OUTWARDS NOTES

Illustrate a digital citizen passport page (fictional).

6.5

From consumer to creator

Look for a pupil making, not only consuming, media.

🔄 DO YOU REMEMBER?

What is the last thing you made (not only watched)?

🎯 BOOTS ON!

Two-minute make: a four-panel comic teaching one e-safety tip.

▶ LET US FIND OUT

A **creator** makes something others can use: a podcast script, a how-to card, a map, a code project, a kindness campaign. Creating teaches structure, audience and responsibility for what you publish.

Credit others' work. Ask permission before filming people. Prefer useful making over empty noise.

• YOUR TURN

1. Plan a five-line script for a 30-second helpful video (no filming required).
2. List three permissions you need before publishing a class photo.
3. Write how creating differs from only consuming.

📐 LOOK OUTWARDS NOTES

Storyboard your helpful video.

Artificial intelligence, honestly

Look for AI as a pattern tool on the desk, with a human still deciding what is true and fair.

🔄 DO YOU REMEMBER?

Can a tool that predicts words understand your feelings?

● BOOTS ON!

Try (with teacher): list tasks AI might help vs tasks needing a human friend.

▶ LET US FIND OUT

AI systems learn patterns from large data to generate predictions: text, images, recommendations. They can be useful for draft ideas, translation support and science. They can also invent false details, copy biases in their training data, and seem more sure than they are.

AI is not a person. It has no childhood and no care. Your job is to use tools with adult guidance, check outputs, and keep human judgement in charge.

• YOUR TURN

1. Write a simple definition of AI for a Year 3 child.
2. Give one helpful use and one risky use at school age.
3. Write a honesty rule for AI-assisted homework.

✦ DID YOU KNOW?

Many AI tools work by predicting likely next words or pixels from patterns, not by living a human life.

◆ FROM ANOTHER CHAIR

- *Jamal says:* AI will replace teachers.
- *Sofia says:* Teachers notice feelings and fairness in a room; tools do not.
- *Then:* Which parts of school should stay human-first?

▢ LOOK OUTWARDS NOTES

Label a robot drawing: Pattern tool, not a friend.

☑ WHAT WE LEARNED

- ☐ I can sketch how the internet carries data.
- ☐ I can name attention designs and a boundary.
- ☐ I can run a four-step claim check.
- ☐ I can state digital rights and duties.
- ☐ I can plan a helpful creation.
- ☐ I can define AI without magic thinking.

★ PROJECT

Digital detective agency. In groups of four, invent an agency name, a four-step method poster, and one case file (invented claim) solved with evidence. Present in five minutes.

→ LOOKING AHEAD

What is one careful question you want to take into the next unit?

Word list

Glossary input - Global Perspectives Year 5

> INPUT for the printed word list. Age 9-10 wording. British English.

Unit 1 • Improving communication

- active listening - listening to understand, then checking what you heard
 - body language - messages sent by face, hands and posture
 - communication equation - words + tone + body language + listening
 - cultural code - an unwritten habit about how people speak and behave
 - digital citizenship - taking part online with respect and extra care
 - language bridge - a fair tool that helps people understand without sharing a language
 - persuasion - inviting someone to agree using reasons and evidence
 - tone - how words sound (kind, sharp, tired)
-

Unit 2 • Obeying the law

- consequence - what follows when a rule or law is broken
 - human rights - basic entitlements every person should have
 - law - a formal rule made for a community or country
 - responsibility - a duty that protects other people's rights
 - right - something you are entitled to in a fair community
-

Unit 3 • Globalisation

- global citizen - someone who cares about fairness beyond their own street
- globalisation - growing links between places through trade, ideas and travel
- interdependence - relying on one another across a chain or border
- supply chain - the path from materials to finished product to buyer
- hybrid culture - local and global styles mixed together

Unit 4 • The world of work

- automation - using machines to do tasks people used to do
- green job - work that helps protect or restore the environment
- remote work - working away from a central office, often online
- skills portfolio - a living list of what you can do and are learning
- division of labour - sharing different jobs among people or countries

Unit 5 • Working with other countries

- diplomacy - managing country relationships through talk and agreements
- humanitarian aid - help sent to people in crisis (food, shelter, rescue)
- national interest - goals a country prioritises for its people
- soft power - influence through culture, sport and ideas rather than force
- treaty - a written agreement between countries

Unit 6 • Digital world

- artificial intelligence (AI) - computer systems that learn patterns to make predictions
- attention economy - businesses earning from your time and focus online
- digital citizenship - rights and duties when you take part online
- misinformation - false or misleading information
- network - linked systems that carry data between devices

Sources and references

Source log - Global Perspectives Year 5

House notes

- Invented Look Outwards Club scenes are teaching fiction.
- Case frames in Unit 2 are invented for discussion, not reports of private incidents.
- No continuous prose copied from any third-party Input PDF.
- Refresh any live statistics before assembly quotes.
- Content figures are original Prime illustrations, not third-party Input art.

Answers

Most tasks are open. Value reasoning, evidence and respectful language over a single key. Where a sort or rewrite has a clear set, teachers may accept equivalent wording.

Unit 1 • Improving communication

Topic	Guide
1.1	Equation = words + tone + body + listening; "I'm fine" fails on tone/body
1.2	Bridge tools: gestures, drawings, patience, interpreter; apps need adult care; shouting louder is not a bridge
1.3	Codes are habits, not maths right/wrong; notice, ask, respect
1.4 rewrite	Clearer/kinder without insult; private vs public; Think · Check · Send
1.5	Claim + evidence + counter-view + respectful ask; loud colour is not evidence
1.6	Open vs closed questions; say-it-back; 1-5 rating with a reason

Unit 2 • Obeying the law

Topic	Guide
2.1	Laws aim at safety/fairness/predictability
2.2	Rights paired with duties
2.3	Phone upgrade is not a human right; food, education, protection are
2.4-2.5	Fair consequences + no gossip; cases are principles

Unit 3 • Globalisation

Topic	Guide
3.1	Five-stage chain plausible; risk marked
3.3	Sameness vs local mix both discussed respectfully
3.4	Gains and risks both named
3.5	Borderless problems need shared care, not blame of peoples
3.6	Local action + learning goal

Unit 4 • The world of work

Topic	Guide
4.1	Multi-country making; dignity for workers
4.2	Remote possible / not possible sorts
4.3	Dangerous task vs kindness task
4.4-4.6	Open; portfolio and enterprise sized for age

Unit 5 • Working with other countries

Topic	Guide
5.1-5.2	Interests + diplomacy tools
5.3	Shared resource rules; downstream voice
5.4	Soft power = attraction, not threat
5.5	Helpful vs harmful \"help\"
5.6	Space/cyber need cross-border rules

Unit 6 • Digital world

Topic	Guide
6.1	Device-router-network-server path
6.2	Design tricks + personal boundary
6.3	Four-step claim check
6.4	Rights + duties + tell an adult
6.5-6.6	Creator permissions; AI = pattern tool, not person

For teachers

Intent

This Student Book follows the Edu360 Global Y5 topic sequence (six chapters; Unit 2 has five topics, others six). Prose and activities are original to Prime School Press. Input files are **scope and sequence only**.

House rules

- British English; no em-dashes.
- Enquiry before judgement; Portuguese and global contexts.
- Number facts only after a unit has started.
- Digital units assume school e-safety policy leads; book supports, never replaces it.
- Law unit: no graphic crime detail; no naming real classmates as cases.
- Imprint: Editorial Board present; no third-party framework disclaimer block (house style).

Assessment ideas

- Exit tickets: one fact, one feeling, one action.
- Project rubrics (Units 1, 3, 5, 6): clarity, fairness, evidence, kindness.
- Observation of active listening (Unit 1) and case discussion (Unit 2).
- Skills portfolio (Unit 4) as formative evidence, not career locking.

Curriculum note

Independent publication. Map topics to your school Global Perspectives / citizenship plan as needed. Folder name on disk may read **Global Perspectives** (historical spelling); product title uses **Global Perspectives**.

Global Perspectives

PRIME BOOKS

Global Perspectives

Year 5 · Cambridge Primary · Student Manual

My Look Outwards notes.

Six units, one careful habit of mind. Research the world, check the source, debate fairly, and act on what you found out.

INSIDE THIS BOOK

- Research, evaluate, reflect and act
- Sources checked, never guessed
- A team project in every unit
- Notes pages for your own look outwards
- Original watercolour illustration throughout
