

Computing & Robotics

Year 8

Cambridge Lower Secondary
Student Manual

PRIME BOOKS

Computing & Robotics

Year 8 · Cambridge Lower Secondary · Student Manual

Think it. Program it. Build it.

From algorithms to autonomous machines: a hands-on course that takes you from your first line of code to robots that sense, decide and act.

INSIDE THIS BOOK

- Algorithms and problem-solving from first principles
- Real programming, tested and debugged every unit
- Sensors, circuits and control in hands-on projects
- A design-and-build robotics project every term
- Digital citizenship and computational thinking woven throughout
