First edition 2026–2027. Independent school publication.

Product title: Physical Education Year 9 Student Book. Interior art prepared for this edition. Source material for scope and sequence: department Year 9 Physical Education course file.

Editorial Board

The Prime Books Physical Education series has been developed under the guidance of the Pedagogical Academic Group for Physical Education and coordinated by the Pedagogical Team of Prime School.

This publication reflects a shared commitment to academic quality, professional integrity and the continuous advancement of teaching and learning. We thank the Pedagogical Department and the Content Creation Team of Prime School for their work on this book.

YEAR 9 • 2026–2027

Welcome

This book is your Year 9 Physical Education course. It is written for Lower Secondary students who are ready to move from basic skills toward tactics, training sense and honest reflection.

Across three terms you will study six sports. Each unit starts with rules and safety, then builds techniques, then asks you to use those techniques in games. Fitness, cooperation and fair play run through every page. The aim is not only to win the lesson. It is to leave Year 9 able to join a game, look after yourself and help a teammate.

Term 1 • Volleyball

Term 1 • Cross Country

Term 2 • Badminton

Term 2 • Korfbal

Term 3 • American Football

Term 3 • Sports Aerobics

What this year is for

By the end of the course you should be able to:

- ✓ Perform sport-specific movement skills with control.
- ✓ Improve fitness: strength, endurance, flexibility, speed, agility, balance and coordination.
- ✓ Apply tactics in individual and team sports.
- ✓ Communicate, lead and cooperate under the pressure of a game.
- ✓ Show respect, discipline and fair play.
- ✓ Reflect on performance and name a precise next step.
- ✓ Build habits that support a lifetime of physical activity.

How each unit is built

1 INTRODUCTION

History, rules, equipment, safety and the point of the sport.

2 SKILL

Techniques taught in order, with a clear picture of what good looks like.

3 PRACTICE

Individual, pair and team drills that raise the number of good repetitions.

4 GAME

Scenarios with one constraint, then more open match play.

5 ASSESSMENT

Skills shown in authentic play, plus fitness or written evidence when needed.

6 REFLECTION

Cool-down, then one keep and one change.

How to use this book

Start every unit by reading the introduction. Understand the rules and the first techniques before you chase speed. Each topic page follows the same furniture so you can find your way in a busy gym.

Feature	What it is for
Introduction	Rules, equipment and the point of the sport.
Skill focus	The technique, written so you can rehearse it.
Coach's tip	One piece of advice that usually changes the next attempt.
Watch out	The common mistake, named before you make it.
Try this	Drills and tasks. Do them. Do not only read them.
Game scenarios	The skill inside a real decision.
Check	Short questions. Answers are at the back of the book.

COACH'S TIP

Begin each unit with the introduction. Understanding the rules, objectives and first techniques will help you learn the sport with confidence.

HOW TO STUDY A UNIT

1. Read the introduction and walk the court or course.
2. Watch the demonstration, then try the skill slowly.
3. Complete the drills with a partner who tells you the truth.
4. Use the skill in the game scenario.
5. Write one precise reflection.

Three terms

Term	Sports	What develops
1	Volleyball and Cross Country	Net systems, communication, endurance, pacing and outdoor judgement.
2	Badminton and Korfball	Racket skills, mixed-team invasion, movement and decision-making.
3	American Football and Sports Aerobics	Routes, touch defence, rhythm, strength, flexibility and performance.

Learner habits

CONFIDENT

Try the weaker side and the new role.

RESPONSIBLE

Look after people, kit and the rules.

REFLECTIVE

Name what changed after feedback.

INNOVATIVE

Solve the next picture of the game, not the last one.

ENGAGED

Arrive ready, stay in the task, help the group finish well.

FAIR

Tell the truth about the line, the foul and the effort.

Fitness work in this book is a way to measure your own change, not a way to rank your friends.

How you are assessed

Assessment gives you more than one way to show what you can do: practical performance, fitness, and written knowledge if practical evidence is missing. It follows the aims of a Lower Secondary Physical Education course: skill, teamwork, responsibility, reflection and a habit of staying active.

Type	What it looks at	When
Collective sports	Skills, tactics, talk, fair play in a team game.	End of a half-term or term
Physical fitness	Strength, endurance and change over time.	Across the year
Written knowledge	Rules, techniques, tactics, safety and terms.	When practical evidence is incomplete

Collective sports assessment

At the end of a team unit you will play. Isolated drills may support the picture, but the game is the main evidence. Teachers watch whether you can:

- Show the techniques of the sport under pressure.
- Make useful decisions.
- Communicate and cooperate.
- Respect rules, officials, teammates and opponents.

Fitness tests

Fitness scores are personal. The question is whether you improved, not whether you beat the person next to you.

Test	Component
Press-up test	Upper-body strength and endurance
Sit-up test	Core strength and endurance
20 m shuttle run (beep test)	Aerobic endurance

If you miss practical lessons

Regular attendance is part of the subject. If there is not enough practical evidence, you will sit a written paper on the sports of that term: rules, techniques, tactics, safety, equipment and terms. It is marked out of 100 per cent and contributes to the year.

What teachers record

- Observations in lessons and matches.
- Fitness tests.
- Your own reflections.
- Written work when it is needed.

ASSESSMENT PHILOSOPHY

Assessment is designed to measure performance and to encourage growth, resilience, teamwork and a lifelong habit of physical activity. Every student is given more than one way to show what they know and what they can do.

UNIT 1 • TERM 1

Volleyball

A net game of three contacts and constant talk. Year 9 asks you to run a system, not only a rally.

UNIT 1

In this unit you will

- ✓ Explain rally-point scoring, rotation and the main faults.
- ✓ Perform forearm pass, set, serve, spike and block with control.
- ✓ Use a simple offensive and defensive system in a game.
- ✓ Call every ball and recover to base after each contact.
- ✓ Show leadership and support for teammates.
- ✓ Reflect after a match and name one team improvement.

The set is the decision in the middle of the rally. A quiet setter makes the whole court smaller.

Topics in this unit

[1.1 Introduction and rules](#)[1.2 Warm-ups](#)[1.3 Ball control](#)[1.4 Attacking skills](#)[1.5 Defensive skills](#)[1.6 Game strategies](#)[1.7 Game scenarios](#)[1.8 Cool-down and reflection](#)[1.9 Collective assessment](#)

Year 9 step-up

Year 9 volleyball is about systems: serve-receive, a 4-2 or 6-6 shape, and a block that reads the hitter.

Fitness this unit develops

Component	How it shows in this sport
Agility	Recover to base after a block or a dig.
Coordination	Pass, set and attack as three timed contacts.
Balance	Land a spike on two feet and stay in the rally.
Jumping power	A block or spike that is timed, not only high.
Reaction time	Read the setter before the ball leaves the hands.
Anaerobic endurance	Play the fifth set of a long rally as cleanly as the first.

Sporting values

- Call the ball early: mine, yours, help.
- Celebrate a good pass, not only a winning spike.
- Rotate without argument.
- Help retrieve balls so the next rally can start.

WRITE BEFORE THE FIRST LESSON

My target:

How I will know it improved:

UNIT 1 - TOPIC 1.1

1.1 Introduction and rules

Volleyball is a net game of six players. A rally is won when the ball lands in the opponents' court or they commit a fault. Modern school matches use rally-point scoring: every rally scores, whoever served.

A team has three contacts to send the ball back. The usual pattern is pass, set, attack. A player may not hit the ball twice in a row except after a block. The ball may touch any part of the body.

Year 9 adds rotation discipline. After you win the serve you rotate clockwise. Standing in the wrong place is a fault, even if the hit looked good.

Volleyball: centre line and attack lines (3 m from the net)

KEY POINTS

- Six players. Three contacts. Rally-point scoring.
- Rotate clockwise when you win the serve.
- Net touch, foot over the centre line and a double hit are common faults.
- The ball is in if it touches the line.

UNIT 1 - TOPIC 1.1

Try this

1. Walk the court and name sideline, baseline, attack line and centre line.
2. In sixes, stand in rotation 1 to 6 and rotate on a clap.
3. Write one personal target: a skill, not a score.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Serving before the referee or teacher is ready is a fault and a wasted point.

COACH'S TIP

Learn the court and the three-contact idea before you chase a jump serve.

CHECK YOUR UNDERSTANDING

1. What happens after your team wins the serve?
2. How many contacts may a team use to return the ball?
3. When is a ball on the line in or out?

UNIT 1 - TOPIC 1.1

Year 9 lab • Make the court talk

Year 9 teams lose points to quiet rotations more often than to weak spikes. Before the first serve, every player should be able to point to their seat and to the person they rotate toward.

Walk a full rotation in silence, then again with one word per player: serve, pass, set, hit, block, cover. If a word is missing, the system is not ready.

Do this in today's lesson

1. Stand in rotation 1. Name your job on the first rally.
2. Rotate six times. After each clap, the player who is now serving raises a hand.
3. Write the one fault your group made most often.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 1 - TOPIC 1.2

1.2 Warm-ups

A volleyball warm-up raises the pulse and rehearses the first contacts of the lesson: passing angles, a light set, and a jump that lands on two feet.

Start with easy jogging and dynamic work for ankles, hips and shoulders. Then add partner ball work while you can still talk. The first full spike of the lesson should not be the first jump.

KEY POINTS

- Pulse raiser: 3 to 4 minutes of easy movement.
- Shoulder and wrist mobility before overhead work.
- Partner passing on the move.
- A short reaction game before the main drill.

UNIT 1 - TOPIC 1.2

Try this

1. Lead a 60-second pulse raiser for your group.
2. 30 forearm passes with a partner, then 20 sets.
3. Name one muscle group you felt and why it matters at the net.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Static long holds at the start cool you down. Save them for the end.

COACH'S TIP

If you can still talk in full sentences, the first two minutes are about right.

CHECK YOUR UNDERSTANDING

1. What are the two jobs of a volleyball warm-up?
2. Why mobilise the shoulders before serving?
3. When should you first jump in the lesson?

UNIT 1 - TOPIC 1.3

1.3 Ball control

The forearm pass is the first contact after most serves. Platform together, arms straight, legs do the work. The ball should rise in a friendly arc to the setter, not shoot off toward the sideline.

The overhead set uses the fingertips, not the palms. Meet the ball above the forehead, extend the legs, and finish with the hands toward the target. A set that is too low forces a weak attack.

Digging is a low forearm pass when the attack is already coming down. Get the platform under the ball. A spectacular dive that misses is worse than a simple step.

A forearm pass is a platform. The legs aim the ball; the arms stay quiet.

KEY POINTS

- Platform: thumbs together, elbows long.
- Set: fingertips, not a slap.
- The pass is successful when the setter can play it.
- Move your feet first. The arms only finish the job.

UNIT 1 - TOPIC 1.3

Try this

1. Wall passing: 20 forearm, 20 overhead, each side of the body.
2. Triangle: pass, set, catch. Then pass, set, pass.
3. Dig a tossed ball that lands short of you. Count clean platforms.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Swinging the arms from the shoulders sends the ball long.

COACH'S TIP

Watch the server's hand, not the ball after it has already crossed the net.

CHECK YOUR UNDERSTANDING

1. Which part of the arms should meet a forearm pass?
2. What makes a set useful for the attacker?
3. When would you choose a dig rather than a standing pass?

UNIT 1 - TOPIC 1.3

Year 9 lab • Pass to the setter's hands

A Year 9 pass is judged by where the setter takes it, not by how pretty the platform looked. If the setter has to run through the three-metre line, the pass failed even if it stayed in court.

Practise a target: a cone or a person standing in the setter's spot. Count only the balls they can set without a step.

Do this in today's lesson

1. 20 forearm passes to a standing setter. Count the ones they can set in place.
2. Repeat with an overhead set as the first contact.
3. Name one change you made after a miss.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 1 - TOPIC 1.4

1.4 Attacking skills

Attacking in Year 9 is more than a big swing. Approach, jump, contact and land. The last two steps are quick-quick. Contact the ball in front of the hitting shoulder, high, with a firm wrist.

A tip is a soft attack when the block is up. A roll shot drops just over the block. The best attackers in this year can choose, not only smash.

Serving starts the rally. An underhand serve is legal and useful. An overhand serve adds speed. A jump serve is a Year 9 option only when the toss is consistent.

A spike is timed, not wild. High contact and a two-foot landing protect the next rally.

KEY POINTS

- Approach, jump, high contact, two-foot landing.
- Tip and roll are attacks, not admissions of defeat.
- Serve to a space, not to the best passer.
- Do not attack if a simple set would be better.

UNIT 1 - TOPIC 1.4

Try this

1. Three-step approach without a ball, then with a tossed ball.
2. 10 tips and 10 full swings from a partner set.
3. Serve 8 balls: 4 to zone 1, 4 to zone 5.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Landing on one foot after a spike is how ankles get hurt.

COACH'S TIP

The toss is the serve. If the toss is wrong, catch it and start again in practice.

CHECK YOUR UNDERSTANDING

1. What are the four parts of a spike?
2. When is a tip a better choice than a hard swing?
3. Why serve to a space rather than to a player?

UNIT 1 - TOPIC 1.4

Year 9 lab · Serve to a zone

A Year 9 serve is a tactic. Zone 1 and zone 5 are the deep corners. A short serve to zone 2 can break a lazy serve-receive shape.

Write the zone before you toss. A serve that 'just goes over' is Year 7. A serve that has an address is Year 9.

The toss is the serve. A still toss to a named zone beats a wild swing.

Do this in today's lesson

1. Serve 6 to zone 1 and 6 to zone 5. Record how many landed.
2. One short serve in every three.
3. After 12 serves, name the zone you trust and the zone you will practise.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 1 - TOPIC 1.5

1.5 Defensive skills

Blocking is a defensive attack. Watch the setter, then the hitter's shoulders. Hands reach over the net without touching it. A well-timed block takes away the sharp cross-court line.

Back-court defence starts in base: knees bent, hands ready, eyes on the hitter. After the block, uncover the space the block does not cover.

Reading is a Year 9 skill. A hitter who opens the shoulders toward the line is likely to hit the line. Move before the contact, not after the bounce.

A block is a wall with timing. Hands reach over the net and the feet land ready to play the next ball.

KEY POINTS

- Hands over the net, not on it.
- Base first, then the extra step.
- The uncovered angle is your job.
- Talk: line, cross, deep, short.

UNIT 1 - TOPIC 1.5

Try this

1. Shadow block: jump, reach, land, recover, ten times.
2. 3 v 3 with a live block. Defenders start in base.
3. Freeze a rally and point to the uncovered space.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Drifting under the net on a block is a fault and a collision.

COACH'S TIP

A late block that touches nothing still changes the hitter if your hands are in the right window.

CHECK YOUR UNDERSTANDING

1. What should a blocker watch before jumping?
2. What is base in back-court defence?
3. Why does a block that misses still help?

UNIT 1 - TOPIC 1.5

Year 9 lab · Read the hitter

Blockers who watch only the ball arrive late. Watch the setter's shoulders, then the hitter's approach. A hitter who opens toward the line is likely to hit the line.

A serve-receive shape that talks ('mine', 'short', 'deep') saves more points than a spectacular solo dig.

Serve-receive is a shape. Platforms ready, one voice, and a setter who can stand still.

Do this in today's lesson

1. In threes: one sets, one hits, one starts in base and names the angle before contact.
2. Run a 3-person serve-receive for 8 serves.
3. Write the word you will call on the next serve.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 1 - TOPIC 1.6

1.6 Game strategies

A simple Year 9 offence is pass-set-hit with the setter in the front row or coming from the back. A 4-2 uses two setters. A 6-6 lets anyone set if they are in the right place. Choose one system and keep it for a match.

On defence, a 2-1-3 or a player-up / player-back shape is enough. The point is that everyone knows who takes the tip and who takes the deep ball.

Rotation is a tactic, not only a rule. Hide a weaker passer in a quieter serve-receive seat. Put your best blocker opposite the other team's best hitter when you can.

KEY POINTS

- One offensive system per match.
- Name who takes the tip and who takes deep.
- Serve-receive is a planned shape.
- Talk before the serve, not after the fault.

UNIT 1 - TOPIC 1.6

Try this

1. Draw your team's serve-receive on a mini whiteboard.
2. Play 6 v 6 with a named setter only.
3. After three rotations, say who is hiding where.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Changing the system every rally is not clever. It is confusion.

COACH'S TIP

The best tactic is the one the quietest player on your team can still explain.

CHECK YOUR UNDERSTANDING

1. What is the job of a 4-2 system?
2. Who should take a tip in your defensive shape?
3. How can rotation hide a weaker passer?

UNIT 1 - TOPIC 1.6

Year 9 lab · One system, one match

Pick 4-2 or 6-6 and keep it for a whole game. Changing the system every rally is how Year 9 teams talk themselves out of points.

Draw the serve-receive on a card. The quietest player on the team must be able to teach it back.

Do this in today's lesson

1. Choose the system and write who sets in each rotation.
2. Play to 8 using only that system.
3. Ask the quietest player to explain the tip-and-deep jobs.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 1 - TOPIC 1.7

1.7 Game scenarios

Game play is where skills become decisions. Start with 3 v 3 on a short court, then 4 v 4, then 6 v 6. Give each game one constraint: two-touch, must set, or serve to a zone.

Stop the game to coach one picture, then play on. Year 9 students can take a 20-second freeze without losing the match.

KEY POINTS

- Small-sided first, then 6 v 6.
- One constraint per game.
- Everyone serves. Everyone passes.
- Review one rally, not the whole score.

UNIT 1 - TOPIC 1.7

Try this

1. 4 v 4, must use three contacts. First to 8.
2. Power play: the trailing team chooses the next serve zone.
3. After each game, one sentence from each team: what worked.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Arguing the score wastes the only court time you have.

COACH'S TIP

Play the next ball. The last mistake is only useful if it changes the next choice.

CHECK YOUR UNDERSTANDING

1. Why start with 3 v 3 before 6 v 6?
2. Give one useful constraint for a setting game.
3. What should a freeze-frame coach?

UNIT 1 - TOPIC 1.7

Year 9 lab • Freeze one picture

A teaching game is allowed to stop. Freeze the rally, point to the extra player or the uncovered angle, then play the next ball. Twenty seconds is enough.

Keep one constraint visible on the whiteboard so the scoreboard does not eat the lesson.

Do this in today's lesson

1. Play 4 v 4 to 7 with a three-contact rule.
2. Freeze twice. Each freeze names one fact, not a lecture.
3. Write the constraint you would use tomorrow.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 1 - TOPIC 1.8

1.8 Cool-down and reflection

Cool-down is easy movement, then slower stretches for calves, shoulders and the lower back, the tissues that jump and reach.

Reflection is part of the lesson. Write one thing that improved and one thing to practise. 'Call earlier' is useful. 'Play better' is not.

KEY POINTS

- Lower the pulse before you sit.
- Hold stretches after the work, not before.
- Hydrate.
- One precise target for next time.

UNIT 1 - TOPIC 1.8

Try this

1. Lead a 90-second stretch circuit.
2. Complete keep / change / ask.
3. Thank the people you played with.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Leaving the court at a sprint after the last point teaches the body the wrong ending.

COACH'S TIP

The session is not over until the pulse is down and the next target is written.

CHECK YOUR UNDERSTANDING

1. Which joints need extra care after volleyball?
2. What makes a useful reflection sentence?
3. Why cool down before you stretch?

UNIT 1 - TOPIC 1.9

1.9 Collective assessment

The collective assessment looks at you in a real game. Teachers watch technical control, tactical choices, communication, fair play and how you respond when the other team has the ball.

You will play a short match or a series of small-sided games. Isolated skills still matter, but they count most when they appear under pressure.

The collective assessment is a real game: skills, talk and fair play under pressure.

KEY POINTS

- Technical: pass, set, serve, attack, block.
- Tactical: position, system, recovery.
- Social: talk, encourage, respect officials.
- Personal: effort, honesty, improvement.

UNIT 1 - TOPIC 1.9

Try this

1. Self-score each area from 1 to 4 before the game.
2. Ask a partner to name one strength they saw.
3. Set one in-game focus word: call, platform, or recover.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Hiding from the serve is visible.

COACH'S TIP

Play the game you practised. Assessment is not a different sport.

CHECK YOUR UNDERSTANDING

1. What four areas are assessed in the collective game?
2. Why is a drill score not enough on its own?
3. Name your focus word and why you chose it.

UNIT 1 - TOPIC 1.9

Year 9 lab · Play the game you practised

Assessment is not a different sport. The collective game looks at the same four areas you have been writing: technical, tactical, social, personal.

A focus word on a wrist or a shoe is allowed. 'Call' or 'platform' is better than 'try hard'.

Do this in today's lesson

1. Self-score the four areas before the match.
2. Play the assessed game.
3. Ask a partner for one piece of evidence, not a compliment.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 2 • TERM 1

Cross Country

Endurance running over natural ground. Year 9 is about pace judgement, not a brave first minute.

UNIT 2

In this unit you will

- ✓ Explain the purpose, rules and safety of cross-country running.
- ✓ Adapt posture, arm drive and stride to different terrain.
- ✓ Build endurance through interval, fartlek and steady runs.
- ✓ Apply start, pack and finish strategies in a race.
- ✓ Show perseverance and respect for other runners.
- ✓ Set a realistic endurance goal and review it honestly.

Cross-country courses change under your feet. The stride that works on grass is wrong on a steep climb.

Topics in this unit

2.1 Introduction and rules

2.2 Warm-ups

2.3 Running techniques

2.4 Endurance development

2.5 Race strategies

2.6 Game scenarios

2.7 Cool-down and reflection

2.8 Individual assessment

Year 9 step-up

Year 9 runners learn to read a course, hold a planned pace and finish with a controlled last 400 metres.

Fitness this unit develops

Component	How it shows in this sport
Cardiovascular endurance	Hold a planned pace after the first kilometre.
Muscular endurance	Keep posture on the third climb.
Stamina	Finish the last 400 m with a choice still left.
Leg strength	Shorten the stride on a steep rise.
Mental resilience	Stay on the marked route when the pack breaks.
Balance	Stay upright on uneven ground without braking wildly.

Sporting values

- Stay on the marked route.
- Give space at the start.
- Help a fallen runner if they are hurt.
- Leave the trail as you found it.

WRITE BEFORE THE FIRST LESSON

My target:

How I will know it improved:

UNIT 2 - TOPIC 2.1

2.1 Introduction and rules

Cross-country running is racing over natural ground: grass, trails, hills and sometimes mud. In school it is also a method for endurance and judgement.

The rules are simple and strict. Follow the marked course. Do not cut corners. Give space at the start. Help a fallen runner if they are hurt, then report it.

The course is the first thing to read. Where is the climb? Where can you recover? Where is the ground uneven?

KEY POINTS

- Stay on the marked route.
- A controlled start, not a sprint into a bottleneck.
- Team events often score by adding finishing places.
- Kit: suitable shoes, no headphones, water before and after.

UNIT 2 - TOPIC 2.1

Try this

1. Walk 200 m of the course and name three surface changes.
2. Write the start routine: jog, strides, line-up, first 30 seconds.
3. Explain why cutting a corner is both unsafe and unfair.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A fast first 100 m on a narrow path causes falls.

COACH'S TIP

Cross-country rewards the runner who manages pace, stays focused and finishes strong.

CHECK YOUR UNDERSTANDING

1. What is the main rule of a marked course?
2. Why is a sprint start often a mistake?
3. How do team scores often work?

UNIT 2 - TOPIC 2.1

Year 9 lab · Read the course first

Year 9 runners walk or jog the first 200 m of a new course before they race it. Name the first climb, the first narrow path and the first place you can recover.

A course drawing on a card beats a surprise on the start line.

Do this in today's lesson

1. Sketch the course in four marks: start, climb, recover, finish.
2. Walk the first 200 m and name one risk.
3. Write your first-minute pace in words, not only a time.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 2 - TOPIC 2.2

2.2 Warm-ups

A running warm-up wakes the ankles, hips and lungs. Easy jogging, dynamic mobility, then a few stride-outs at a pace you could still speak through.

On cold days add an extra minute of pulse work. On hot days drink before you start and shorten the first block.

A running warm-up starts easy: jogging and dynamic mobility before any race pace.

KEY POINTS

- Easy jog first.
- Dynamic, not long static holds.
- Two or three stride-outs.
- Check laces, course and partner.

UNIT 2 - TOPIC 2.2

Try this

1. Lead a 90-second mobility sequence for calves and hips.
2. Run three stride-outs of 40 m, walk back.
3. Name one safety check you made today.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Static stretching before a run can leave you slower, not safer.

COACH'S TIP

The warm-up is part of the run. Treat it as the first kilometre, not as waiting.

CHECK YOUR UNDERSTANDING

1. What comes first in a cross-country warm-up?
2. Why use stride-outs?
3. What changes on a hot day?

UNIT 2 - TOPIC 2.3

2.3 Running techniques

Efficient running is tall posture, a quiet head and an arm drive that matches the hill. The foot lands under you, not far in front.

Uphill: shorter steps, stronger arms, eyes on a point ahead. Downhill: let the stride open a little, keep the core firm, do not brake with the heels.

Year 9 runners practise both. A good downhill is free speed if you stay in control.

Tall posture, quiet head, foot landing under the body.

KEY POINTS

- Tall, not stiff.
- Arms drive the hill.
- Shorten up, open down.
- Breathe in a rhythm you can keep.

UNIT 2 - TOPIC 2.3

Try this

1. Film 10 seconds of your run and name one posture change.
2. Repeat a 40 m hill: three ups, easy down.
3. Count breaths for 30 seconds at steady pace.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Leaning from the waist on a climb wastes the legs.

COACH'S TIP

Think of the hill as a set of short steps, not as one long fight.

CHECK YOUR UNDERSTANDING

1. What should your arms do on a climb?
2. How does the stride change downhill?
3. Where should the foot land?

UNIT 2 - TOPIC 2.3

Year 9 lab · Uphill and downhill as skills

The hill is not a personality test. Shorten the stride, drive the arms, pick a point to look at. After the crest, do not sit down in your stride. That is where places are won.

Downhill: let the stride open, keep the core firm, do not brake with the heels.

A climb is short steps and honest arms. The race often starts after the crest, not on it.

Do this in today's lesson

1. Three hill repetitions. Same shape on the last as the first.
2. One controlled downhill of 40 m.
3. Write one cue that actually changed your climb.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 2 - TOPIC 2.4

2.4 Endurance development

Endurance is built, not wished for. Year 9 uses three tools: a long slow run, intervals with a measured rest, and fartlek, where the ground tells you when to lift the pace.

The long run should feel conversational. Intervals should feel hard but repeatable. If you cannot complete the last repetition with the same shape as the first, the rest was too short or the pace was too proud.

Intervals have a measured rest. The last repetition should still look like running.

KEY POINTS

- Easy, interval, fartlek: three tools.
- The last repetition should still look like running.
- Write the session before you start.
- Recovery is part of the training.

UNIT 2 - TOPIC 2.4

Try this

1. Complete 4 x 2 minutes hard, 1 minute walk.
2. A 12-minute fartlek: lift on every uphill.
3. Record how the last interval felt compared with the first.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Turning every session into a race leaves you slower by Friday.

COACH'S TIP

The session you can repeat next week is better than the session that destroys you today.

CHECK YOUR UNDERSTANDING

1. Name the three endurance tools in this unit.
2. What is the test of a well-paced interval?
3. Why is recovery part of training?

UNIT 2 - TOPIC 2.4

Year 9 lab · Write the session before you run it

Year 9 endurance work has a sentence on paper: 4 x 2 minutes, 1 minute walk; or 12 minutes fartlek, lift on every rise. If you cannot say the session, you will turn it into a race.

The last repetition is the test. If it falls apart, the rest was too short or the pride was too large.

Do this in today's lesson

1. Write today's session in one line.
2. Complete it. Record the last repetition against the first.
3. Decide whether next week needs more rest or less pride.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 2 - TOPIC 2.5

2.5 Race strategies

A race has three parts: a controlled start, a honest middle, and a finish you have saved for. The pack can help you if you sit in it, and it can ruin you if you chase the first 30 seconds.

Position matters on a narrow path. Go wide only if you can see a gap. On a hill, settle, then pass on the flatter ground after the crest.

The last 400 metres is a decision, not a surprise. Practise finishing when you are already tired.

A controlled start. The pack can help you if you sit in it.

KEY POINTS

- Start in control.
- Use the pack, do not fight it.
- Pass after the crest, not on the steepest step.
- Practise the last 400 m.

UNIT 2 - TOPIC 2.5

Try this

1. Run a 1 km time trial with a planned first 200 m.
2. In a pair, sit on a shoulder for 3 minutes, then change.
3. Finish a tired 200 m at the end of the lesson.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Looking back in the last 50 m costs the step you need.

COACH'S TIP

The race is won by the runner who still has a choice in the last minute.

CHECK YOUR UNDERSTANDING

1. What are the three parts of a race?
2. When is it wise to pass on a hill?
3. Why practise a tired finish?

UNIT 2 - TOPIC 2.5

Year 9 lab · Save the last 400 metres

A race plan has three numbers you can say: how the first 200 m will feel, where you will sit in the pack, and when you will choose to finish.

Practise a tired 200 m at the end of a lesson so the last 400 m is not a surprise.

Do this in today's lesson

1. Run a 1 km with a planned first 200 m.
2. Sit on a partner's shoulder for 3 minutes, then change.
3. Finish with a tired 200 m and write how it felt.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 2 - TOPIC 2.6

2.6 Game scenarios

School 'game' days for this unit are relays, time trials and a class race. The point is to use the techniques under a little pressure, not to create a ranking that follows anyone home.

Relays teach handover discipline and the honesty of running your own leg. Time trials teach pace without a crowd to hide in.

Relays teach handover honesty and running your own leg.

KEY POINTS

- Relay: receive in control.
- Time trial: even pace.
- Class race: course first, place second.
- Cheer the last runner as loudly as the first.

UNIT 2 - TOPIC 2.6

Try this

1. 4 x 400 m relay. Write a handover rule before you start.
2. An individual 1.2 km time trial on mixed ground.
3. After the race, name one moment you followed the plan.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Cutting the handover short is a false win.

COACH'S TIP

The only comparison that matters is with the runner you were last month.

CHECK YOUR UNDERSTANDING

1. What does a relay teach that a solo run does not?
2. What is the aim of a time trial?
3. How should a class treat the last finisher?

UNIT 2 - TOPIC 2.6

Year 9 lab · Relay honesty

A school relay is a test of handover and of running your own leg. Cutting the zone short is a false win. Cheering the last runner is part of the event, not decoration.

Do this in today's lesson

1. Write a handover rule before the first baton or clap.
2. Run a 4 x 400 m or a course relay.
3. Name one honest moment and one you would rerun.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 2 - TOPIC 2.7

2.7 Cool-down and reflection

Cool-down is a walk that becomes a slower walk, then stretches for calves, hip flexors and the lower back. Breathe out longer than you breathe in for one minute.

Write one keep and one change. 'I held the hill' is a keep. 'I will eat before period 5 on race day' is a change.

Cool-down is a walk, then stretches for calves, hip flexors and the lower back.

KEY POINTS

- Walk before you sit.
- Stretch after the pulse is down.
- Breathe on purpose.
- One keep, one change.

UNIT 2 - TOPIC 2.7

Try this

1. Lead a 2-minute walk-and-stretch.
2. Complete the reflection box.
3. Check a partner's shoes for stones.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Stopping dead at the finish line makes some people dizzy.

COACH'S TIP

The cool-down is the first gift to next week's session.

CHECK YOUR UNDERSTANDING

1. Which muscles need extra care after a hilly run?
2. Why walk before you stretch?
3. Give one example of a useful change.

UNIT 2 - TOPIC 2.8

2.8 Individual assessment

The individual assessment is your running: technique under fatigue, pacing, and how you handle the course. A timed run may support the picture. It does not replace it.

You are also assessed on safety, etiquette and the way you support others. Cross-country is a personal sport with a public standard of behaviour.

The assessment is your running: technique under fatigue, pacing and etiquette.

KEY POINTS

- Technique under fatigue.
- Pacing that matches the plan.
- Safety and etiquette.
- A goal about how you will run, not only the time.

UNIT 2 - TOPIC 2.8

Try this

1. Write your race plan in three sentences.
2. Self-score posture, pace and etiquette from 1 to 4.
3. Ask a partner what they saw in the last 200 m.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Ignoring a course marshal is a fail, whatever the time.

COACH'S TIP

Assessment is the race you already practised, run honestly.

CHECK YOUR UNDERSTANDING

1. What three things are assessed besides the stopwatch?
2. Why can a time not stand alone?
3. What belongs in a three-sentence race plan?

UNIT 2 - TOPIC 2.8

Year 9 lab · The plan is the assessment

Your three-sentence race plan is the assessment as much as the time. Technique under fatigue, pacing and etiquette are visible. A course marshal ignored is a fail.

Write the plan. Run it. Then say which sentence you kept.

Do this in today's lesson

1. Write start, middle and finish in three sentences.
2. Run the assessed course.
3. Tick the sentence you kept. Rewrite the one you did not.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 3 • TERM 2

Badminton

A net game of timing, footwork and shot choice. Fast feet create the space for a good racket.

UNIT 3

In this unit you will

- ✓ Explain rally-point scoring, court lines and service rules.
- ✓ Use forehand and backhand grips with efficient footwork.
- ✓ Perform serves, clears, drops, drives and smashes.
- ✓ Apply singles and doubles tactics.
- ✓ Call lines honestly and play fairly.
- ✓ Set a personal target after match play.

A high clear buys time. Year 9 players use that time to recover the centre, not to admire the shot.

Topics in this unit

[3.1 Introduction and rules](#)[3.2 Warm-ups](#)[3.3 Grips and footwork](#)[3.4 Basic strokes](#)[3.5 Attacking strokes](#)[3.6 Game strategies](#)[3.7 Game scenarios](#)[3.8 Cool-down and reflection](#)[3.9 Individual assessment](#)

Year 9 step-up

Year 9 badminton is shot sequences: clear to drop, drive to net, smash only when the shuttle is high enough.

Fitness this unit develops

Component	How it shows in this sport
Agility	Recover the centre after a wide clear.
Coordination	Change grip between a clear and a net shot.
Speed	Arrive early enough to choose the next shot.
Balance	A lunge that still lets you stand up for the smash.
Flexibility	A low net shot without collapsing the back.
Reaction time	The split step as the opponent hits.

Sporting values

- Call the shuttle fairly, even against yourself.
- Return the shuttle to the server, not at them.
- Shake hands after the last point.
- Look after rackets and shuttles.

WRITE BEFORE THE FIRST LESSON

My target:

How I will know it improved:

UNIT 3 - TOPIC 3.1

3.1 Introduction and rules

Badminton is a racket sport of singles and doubles. A rally is won when the shuttle lands in the opponents' court or they hit it out, into the net, or twice. School matches use rally-point scoring.

The court has two widths. Singles uses the inner side lines. Doubles uses the outer. The service court also changes. Learn the lines before you argue them.

A serve must be struck below the ribcage and land in the diagonal service court. Year 9 players who rush the serve gift easy points.

Badminton: singles is the inner side lines; doubles uses the outer

KEY POINTS

- Rally-point scoring.
- Singles: inner sides. Doubles: outer sides.
- Serve low, diagonal, under the ribcage.
- The shuttle is dead when it hits the floor or the net post.

UNIT 3 - TOPIC 3.1

Try this

1. Walk the singles court, then the doubles court.
2. Serve 10 legal serves to the correct box.
3. Write one etiquette rule you will keep.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A serve that starts above the ribcage is a fault, however pretty the arc.

COACH'S TIP

Call the line you saw, not the line you wanted.

CHECK YOUR UNDERSTANDING

1. Which side lines does singles use?
2. Name two rules of a legal serve.
3. What scoring system does this book use?

UNIT 3 - TOPIC 3.1

Year 9 lab · Lines before arguments

Year 9 matches die in line arguments. Walk the singles court, then the doubles court, and say the serve rule out loud. Call the line you saw.

A legal serve is below the ribcage and diagonal. Practise ten before you play a point.

Do this in today's lesson

1. Trace singles and doubles with a shuttle on the floor.
2. Serve 10 legal serves into the correct box.
3. Write the one line you still have to think about.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 3 - TOPIC 3.2

3.2 Warm-ups

A badminton warm-up is a pulse raiser, then shadow movement to the four corners, then a few easy hits. The shoulder and the calf both need to be awake.

Shadow badminton is footwork without a shuttle: split step, lunge, recover. It is not jogging in a circle.

Shadow badminton is footwork without a shuttle: split step, lunge, recover.

KEY POINTS

- Pulse, shadow, then shuttle.
- Split step before every shot in the shadow.
- Easy clears first.
- Check grip and grip tape.

UNIT 3 - TOPIC 3.2

Try this

1. Lead 8 shadow corners.
2. 10 easy cooperative clears.
3. Name one joint you prepared and why.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

The first smash of the lesson should not be the first overhead.

COACH'S TIP

If the split step is late, every shot is late.

CHECK YOUR UNDERSTANDING

1. What is shadow badminton for?
2. When should the first smash appear?
3. Why check the grip tape?

UNIT 3 - TOPIC 3.3

3.3 Grips and footwork

The basic forehand grip is like shaking hands with the racket. The backhand grip rotates so the thumb can support the back of the handle. The change happens in the fingers, quietly, between shots.

Footwork is a split step as the opponent hits, then a move to the shuttle, then a recovery to the centre. A beautiful stroke from the wrong place is still a lost rally.

The forehand grip is like shaking hands with the racket.

KEY POINTS

- Handshake forehand, thumb-supported backhand.
- Change grip in the fingers.
- Split step, move, recover.
- The centre is home.

UNIT 3 - TOPIC 3.3

Try this

1. Hold each grip and show a partner.
2. Shadow 10 split steps, then add a lunge.
3. Play a cooperative rally where you must recover to centre.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A tight fist kills the wrist snap you need for a drop.

COACH'S TIP

The recovery is part of the shot. If you stay and admire it, the next shuttle is behind you.

CHECK YOUR UNDERSTANDING

1. How does the backhand grip differ from the forehand?
2. When do you split-step?
3. Why recover to the centre?

UNIT 3 - TOPIC 3.3

Year 9 lab • Split step or late forever

If the split step is late, every shot is late. The hop happens as the opponent hits, not after the shuttle has crossed the net.

Shadow four corners with a partner clapping the 'hit'. Recover to centre every time.

The split step is the shot before the shot. Late feet make every racket late.

Do this in today's lesson

1. 20 split steps on a clap.
2. Add a lunge and a recovery to each corner.
3. Play a cooperative rally where a missed recovery costs a point.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 3 - TOPIC 3.4

3.4 Basic strokes

The clear is a high, deep shot that pushes the opponent back. The drop falls just over the net. The drive is flat and fast, useful in doubles.

Year 9 players build sequences: a clear to move them, a drop to bring them in, a drive if they are late. One pretty shot is not a tactic.

A clear is high and deep. It buys time to recover the centre.

KEY POINTS

- Clear: high and deep.
- Drop: just over, not into the tape.
- Drive: flat, early.
- Sequences beat isolated winners.

UNIT 3 - TOPIC 3.4

Try this

1. 20 cooperative clears, then 10 clear-to-drop pairs.
2. Drive rallies in a narrow channel.
3. Name the sequence you will try in the next game.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A clear that lands mid-court is an invitation to be smashed.

COACH'S TIP

Aim the clear at the back tramlines, not at the person.

CHECK YOUR UNDERSTANDING

1. What is the job of a clear?
2. When is a drive more useful than a clear?
3. Why think in sequences?

UNIT 3 - TOPIC 3.4

Year 9 lab • Build a sequence

A clear that is not followed by a plan is only exercise. Year 9 sequences: clear to drop, drop to drive, drive to net. Write the three-shot idea before you play it.

Aim the clear at the back tramlines, not at the person.

A drop falls just over the net. Write the three-shot idea before you play it.

Do this in today's lesson

1. Cooperative: 6 clear-to-drop pairs.
2. Then play to 7, score only after a clear.
3. Write the sequence you will try in the next match.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 3 - TOPIC 3.5

3.5 Attacking strokes

The smash is a steep downward hit from a high contact. It needs a side-on body, a high elbow and a snap, then an immediate recovery. A smash from a low shuttle is just a fast clear.

Net kills finish a weak lift. Fast flat play in doubles keeps the shuttle below the tape so the opponents cannot smash.

A smash is steep and recovered. The point after the smash is still your responsibility.

KEY POINTS

- Smash only from a high shuttle.
- Land and recover at once.
- Net kill: early racket, soft hands if needed.
- Keep doubles play below the tape when you can.

UNIT 3 - TOPIC 3.5

Try this

1. 10 shadow smashes, then 8 from a high feed.
2. Net-kill feeds from a partner lift.
3. Doubles: first to five, smash only after a clear.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Jumping smash on a wet hall floor is how knees meet wood.

COACH'S TIP

The smash you can recover from is better than the smash that wins the highlight and loses the next point.

CHECK YOUR UNDERSTANDING

1. When should you not smash?
2. What does a net kill punish?
3. Why keep doubles play flat?

UNIT 3 - TOPIC 3.5

Year 9 lab · Smash only from a high shuttle

A smash from a low shuttle is a fast clear and a gift. Year 9 attackers wait for height, then recover at once. The point after the smash is still yours.

In doubles, keep the shuttle below the tape when you can so the smash is yours, not theirs.

Smash only from a high shuttle, then recover at once.

Do this in today's lesson

1. 8 smashes from a high feed. Recover after each.
2. Doubles: smash only after a clear.
3. Name the smash you should not have played.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 3 - TOPIC 3.6

3.6 Game strategies

Singles is a game of the four corners and the centre. Move the opponent, then attack the space they left. Doubles is a game of front and back, or side by side in defence.

Serve long in singles more often. Serve short in doubles more often. These are starting ideas, not laws.

Singles is a game of the four corners and the centre.

KEY POINTS

- Singles: corners and centre.
- Doubles: front-and-back in attack.
- Serve to the weaker return.
- Talk in doubles before the serve.

UNIT 3 - TOPIC 3.6

Try this

1. Singles: score only with a drop after a clear.
2. Doubles: freeze and name front and back.
3. Write one serve plan for your next match.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Both doubles partners attacking the same shuttle is a collision, not a tactic.

COACH'S TIP

The extra player in doubles is a gift only if you leave them a role.

CHECK YOUR UNDERSTANDING

1. What is the basic singles idea?
2. When do doubles partners stand side by side?
3. How do singles and doubles serves often differ?

UNIT 3 - TOPIC 3.6

Year 9 lab • Doubles need a map

Front and back in attack, side by side in defence. If both partners chase the same shuttle, the court behind them is empty.

Talk before the serve: who is front, who takes the next smash.

Doubles: front and back in attack so the court behind you is not empty.

Do this in today's lesson

1. Freeze a doubles rally and name front and back.
2. Play to 7 with a must-talk-before-serve rule.
3. Write one sentence your pair will say on every serve.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 3 - TOPIC 3.7

3.7 Game scenarios

Mini matches, conditioned rallies and a short class tournament put the strokes under scoreboard pressure. Keep the condition visible: first to 7, must use a drop, or no smash until a clear.

Rotate partners. Year 9 doubles improves when you can play with more than one friend.

A short tournament still has a teaching condition on the board.

KEY POINTS

- One condition per match.
- Rotate partners.
- Call lines.
- Shake hands.

UNIT 3 - TOPIC 3.7

Try this

1. First to 7, must hit one clear each rally.
2. A three-pair round robin.
3. After two matches, name one tactic that worked.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A tournament that forgets water and rotation is a queue, not a lesson.

COACH'S TIP

Play the next shuttle. The argument can wait until the handshake.

CHECK YOUR UNDERSTANDING

1. Why use a condition in a teaching match?
2. Why rotate partners?
3. What happens at the end of a match?

UNIT 3 - TOPIC 3.7

Year 9 lab • A short tournament with a brain

A class tournament is still a lesson. One condition stays on the board. Rotate partners so you learn more than one friend's habits.

Water and rotation are part of the event, not an interruption.

Do this in today's lesson

1. A three-match round robin, first to 7.
2. One condition for the whole rotation.
3. After two matches, name one tactic that survived the scoreboard.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 3 - TOPIC 3.8

3.8 Cool-down and reflection

Cool-down is a gentle rally, then stretches for calves, shoulders and the forearm. The gripping muscles work harder than they look.

Peer feedback: one thing your partner did that you will steal, one thing you will both practise.

Cool-down is a gentle rally, then stretches for calves, shoulders and the forearm.

KEY POINTS

- Gentle rally first.
- Forearm and calf stretches.
- One steal, one practise.
- Rackets away clean.

UNIT 3 - TOPIC 3.8

Try this

1. A 2-minute cooperative rally.
2. Swap one piece of feedback.
3. Count the shuttles back into the tube.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Leaving shuttles on the floor is how the next class starts late.

COACH'S TIP

The last rally of the lesson should still look like badminton.

CHECK YOUR UNDERSTANDING

1. Which muscles need extra care after badminton?
2. What is useful peer feedback?
3. Why collect the shuttles?

UNIT 3 - TOPIC 3.9

3.9 Individual assessment

The individual assessment is your match: strokes under pressure, footwork, decisions and etiquette. A skills station may support the grade. The game is still the main evidence.

The individual assessment is your match, not only a smash.

KEY POINTS

- Strokes in a rally, not in isolation only.
- Footwork and recovery.
- Tactical choice.
- Etiquette and honesty.

UNIT 3 - TOPIC 3.9

Try this

1. Play a short assessed match.
2. Self-score four areas from 1 to 4.
3. Write one target for the next unit.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A smash-only game is not a full assessment.

COACH'S TIP

Show the whole sport: the clear, the drop and the honest call.

CHECK YOUR UNDERSTANDING

1. What is the main evidence in this assessment?
2. Name two things besides winners that will be watched.
3. Why is etiquette part of the grade?

UNIT 3 - TOPIC 3.9

Year 9 lab · Show the whole sport

Assessment that is smash-only is not badminton. Show a clear, a drop, a legal serve and an honest call. Etiquette is a criterion, not a decoration.

Shake hands after the last point. Etiquette is part of the assessment.

Do this in today's lesson

1. Play the assessed match.
2. Self-score strokes, footwork, decisions, etiquette.
3. Write one target that is not 'hit harder'.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 4 • TERM 2

Korfball

A mixed-team invasion game. You may not shoot if you are defended, so movement without the ball is the sport.

UNIT 4

In this unit you will

- ✓ Explain korfball rules, mixed-team play and the defended shot.
- ✓ Pass, pivot, shoot and rebound with control.
- ✓ Create space and rotate in attack.
- ✓ Mark, intercept and rebound in defence.
- ✓ Communicate so every player is used.
- ✓ Show inclusion, respect and fair play.

The korf sits above the post. A set shot needs a still base and a free attacker, not a crowded duel.

Topics in this unit

4.1 Introduction and rules

4.2 Warm-ups

4.3 Passing and movement

4.4 Shooting

4.5 Defending and rebounding

4.6 Team strategies

4.7 Game scenarios

4.8 Cool-down and reflection

4.9 Collective assessment

Year 9 step-up

Year 9 korfball is about the defended-shot rule, attack rotation and mixed-team cooperation under pressure.

Fitness this unit develops

Component	How it shows in this sport
Coordination	Catch on the move and pivot to a new line.
Agility	A second cut when the first is marked.
Endurance	Attack and defend in the same lesson without fading.
Balance	A set shot that stays tall.
Speed	Beat the defender to the rebound space.
Jumping	A running shot with a controlled take-off.

Sporting values

- Pass to the free player, not only your usual partner.
- Respect the defended-shot rule even when no one is watching.
- Talk across the mixed team.
- Help set the posts and collect balls.

WRITE BEFORE THE FIRST LESSON

My target:

How I will know it improved:

UNIT 4 - TOPIC 4.1

4.1 Introduction and rules

Korfball is a mixed invasion game invented in the Netherlands. A team has four women and four men, split into two zones. You may only shoot if you are free: a defender with an arm raised within arm's reach makes the shot defended and therefore illegal.

You may not run with the ball. You may pivot. You may not shoot from the defended position. These three rules create the sport: movement without the ball is everything.

Goals are scored by throwing the ball down through the korf. After two goals the teams swap zones and often swap attack and defence roles.

Korfball: two zones, one korf in each. Attackers may not enter the other zone

KEY POINTS

- Mixed teams. Two zones. One korf each.
- No running with the ball.
- No shot if you are defended.
- Roles swap after two goals.

UNIT 4 - TOPIC 4.1

Try this

1. Walk the two zones and stand at each korf.
2. In pairs, show a defended and a free shooting position.
3. Write why the defended-shot rule changes the game.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A shot over a raised defending arm is not brave. It is a fault.

COACH'S TIP

If you cannot shoot, you must move or pass. Standing still is how attacks die.

CHECK YOUR UNDERSTANDING

1. When is a shot defended?
2. May you run with the ball?
3. What happens after two goals?

UNIT 4 - TOPIC 4.1

Year 9 lab • The defended shot is the sport

If you can shoot whenever you like, you are not playing korfball. A defender within arm's reach with an arm raised makes the shot illegal. Practise seeing that picture before you rise.

In pairs, freeze a defended shape and a free shape. The difference should be obvious from the side.

Do this in today's lesson

1. Show a defended and a free shooting position.
2. 8 attacks: pass if defended, shoot only if free.
3. Write why the rule forces movement without the ball.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 4 - TOPIC 4.2

4.2 Warm-ups

A korfball warm-up is pulse work, then passing on the move, then a small movement game that forces you to get free.

Dynamic work for ankles and hips matters because the shot is often a one-foot take-off after a cut.

A korfball warm-up is pulse work, then passing on the move.

KEY POINTS

- Pulse, pass, then get-free games.
- Hips and ankles awake.
- Pass to the moving player.
- Talk names, not only 'here'.

UNIT 4 - TOPIC 4.2

Try this

1. 3 minutes of keep-ball in a small square.
2. A cut-and-pass game: you may only pass after a change of direction.
3. Name one teammate you have not passed to yet, then pass to them.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Standing still and calling for the ball is not a warm-up.

COACH'S TIP

The first skill of korfball is arriving in space, not catching in a crowd.

CHECK YOUR UNDERSTANDING

1. What should a korfball warm-up rehearse?
2. Why prepare the hips?
3. Who should you pass to first?

UNIT 4 - TOPIC 4.3

4.3 Passing and movement

Chest and overhead passes are the base. The pass is successful when the teammate can shoot or pass again without a bobble.

Pivoting lets you protect the ball and see the korf. Creating space is a cut, a screen of space (not a foul barge), and a second cut if the first is marked.

Pivot, protect the ball, and look for the next pass.

KEY POINTS

- Pass to the hands, not to the feet.
- Pivot, do not travel.
- Cut, then cut again.
- The player without the ball starts the attack.

UNIT 4 - TOPIC 4.3

Try this

1. 30 chest and 20 overhead passes on the move.
2. Pivot 8 times and find a new passing line each time.
3. 3 v 1 keep-ball: the three must all touch before a shot.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A bounce pass on a dusty hall floor is a gamble.

COACH'S TIP

If you pass and stand, you have left the game.

CHECK YOUR UNDERSTANDING

1. What makes a pass successful?
2. What is the difference between a pivot and a travel?
3. Who starts the attack?

UNIT 4 - TOPIC 4.3

Year 9 lab • The cut starts the attack

The player without the ball starts the attack. A cut, a pass to the hands, a pivot, a second cut if the first is marked. Standing still and calling 'here' is Year 7.

Keep-ball 3 v 1 with a must-cut-before-pass rule teaches the habit faster than a lecture.

A korfball pass is to a moving teammate. The cut creates the next shot.

Do this in today's lesson

1. 3 v 1 keep-ball: cut before every pass.
2. Pivot to a new line after each catch.
3. Name the teammate you ignored, then use them.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 4 - TOPIC 4.4

4.4 Shooting

The set shot is two feet, or a calm one-two into a still base, ball high, eyes on the korf. The running shot is a controlled take-off after a cut. The penalty is unopposed, so it is a technique test.

Year 9 shooters check they are free before they rise. A beautiful shot that was defended does not count.

A korfball shot is taken when the attacker is free. The korf sits above the post, so the release is high.

KEY POINTS

- Free first, then shoot.
- High release.
- Running shot: control the take-off.
- Penalty: same routine every time.

UNIT 4 - TOPIC 4.4

Try this

1. 10 set shots from a marked free spot.
2. 8 running shots after a cut.
3. 5 penalties with the same pre-shot routine.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Fading away from the korf as you shoot is how the ball kisses the ring and stays out.

COACH'S TIP

If the defender's arm is up and near, pass. The rule is the tactic.

CHECK YOUR UNDERSTANDING

1. What must be true before any shot?
2. When would you choose a running shot?
3. Why use the same penalty routine?

UNIT 4 - TOPIC 4.4

Year 9 lab • Free first, then rise

Year 9 shooters check they are free before they leave the floor. A beautiful shot that was defended does not count. The penalty is a routine you can repeat when the hall is loud.

Free first, then rise. A defended shot does not count.

Do this in today's lesson

1. 10 set shots from a marked free spot.
2. 5 penalties with the same pre-shot words.
3. In 2 v 2, refuse one shot that was defended.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 4 - TOPIC 4.5

4.5 Defending and rebounding

Marking in korfball is close enough to defend the shot and honest enough not to hold. An interception is a pass you read, not a foul you hope for.

Rebounding is a Year 9 habit. One attacker and one defender should already be thinking about the missed shot before it leaves the hands.

Mark close enough to defend the shot, honest enough not to hold.

KEY POINTS

- Arm up and near to defend the shot.
- Do not hold the attacker.
- Read the next pass.
- Someone is always responsible for the rebound.

UNIT 4 - TOPIC 4.5

Try this

1. 1 v 1: keep the attacker from a legal shot for 8 seconds.
2. 2 v 2: name the rebounder before the shot.
3. Intercept a looping pass five times in a row.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Reaching across a player is a foul, not a steal.

COACH'S TIP

Good defenders defend the shot and the next pass, not only the person.

CHECK YOUR UNDERSTANDING

1. How do you make a shot defended?
2. What is a legal interception?
3. Who should think about the rebound?

UNIT 4 - TOPIC 4.5

Year 9 lab · Name the rebounder

Someone is always responsible for the miss. Before the shot, an attacker and a defender should already know who is going to the ring. An interception is a read, not a hold.

Name the rebounder before the shot leaves the hands.

Do this in today's lesson

1. 2 v 2: name the rebounder before every shot.
2. 1 v 1: keep a legal defended shape for 8 seconds.
3. Write the difference between a steal and a foul.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 4 - TOPIC 4.6

4.6 Team strategies

Attack rotation keeps someone free. If the first cut is marked, the second player cuts. Defence is a compact shape between ball and korf, with one player ready to rebound.

Communication is not optional. Mixed teams fail when half the voices disappear.

If the first cut is marked, the second player cuts.

KEY POINTS

- Rotate until someone is free.
- Compact defence, rebound covered.
- Use every voice.
- Swap roles cleanly after two goals.

UNIT 4 - TOPIC 4.6

Try this

1. 4 v 4 with a 'must rotate once before a shot' rule.
2. Freeze and point to the free attacker.
3. Play one attack where only the quieter pair may shoot.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Two players cutting to the same spot is a crowd, not a rotation.

COACH'S TIP

The free player is the attack. Find them with the pass you have.

CHECK YOUR UNDERSTANDING

1. Why rotate in attack?
2. What must a defensive shape cover?
3. Why does a mixed team need every voice?

UNIT 4 - TOPIC 4.6

Year 9 lab • Rotate until someone is free

If the first cut is marked, the second player cuts. Two people in the same square is a crowd. The free player is the attack. Find them with the pass you have.

Rotate until someone is free. The cut starts the attack.

Do this in today's lesson

1. 4 v 4 with a must-rotate-once rule before a shot.
2. Freeze and point to the free attacker.
3. Play one attack where only the quieter pair may shoot.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 4 - TOPIC 4.7

4.7 Game scenarios

Small-sided games, then a full 8 v 8, then a short tournament. Keep the defended-shot rule live even when the game gets loud.

Condition one game: no shot until three passes. Condition another: only the running shot. Then play open.

KEY POINTS

- Rules stay live under pressure.
- One condition at a time.
- Everyone attacks and defends.
- Reset quickly after a goal.

UNIT 4 - TOPIC 4.7

Try this

1. 4 v 4 to 5 goals, three-pass condition.
2. A three-team tournament, four minutes each.
3. After two games, name one rule you almost forgot.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Letting a defended shot 'count because it went in' teaches the wrong sport.

COACH'S TIP

The referee in your head should be as honest as the one on the floor.

CHECK YOUR UNDERSTANDING

1. Why keep the defended-shot rule in a tournament?
2. Give one useful condition.
3. What happens after a goal?

UNIT 4 - TOPIC 4.7

Year 9 lab • Keep the rule when it is loud

A tournament that lets a defended shot 'count because it went in' is a different game. The referee in your head should be as honest as the one on the floor.

Keep the defended-shot rule when the tournament is loud.

Do this in today's lesson

1. 4 v 4 to 5, three-pass condition.
2. Call your own defended shots.
3. After two games, name one rule you almost forgot.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 4 - TOPIC 4.8

4.8 Cool-down and reflection

Cool-down is easy passing, then stretches for calves, hips and the throwing shoulder. Reflection is one keep and one change about movement, not only about goals.

Cool-down is easy passing, then stretches for the throwing shoulder.

KEY POINTS

- Easy passing first.
- Shoulder and hip care.
- Keep / change about movement.
- Posts and balls away.

UNIT 4 - TOPIC 4.8

Try this

1. A 2-minute walking pass.
2. Write keep / change.
3. Help stack the posts.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A missed shot is not a reason to skip the cool-down.

COACH'S TIP

The next lesson starts with the habits you leave on the floor today.

CHECK YOUR UNDERSTANDING

1. Which joints need extra care after korfball?
2. What should a reflection mention besides the score?
3. Who puts the posts away?

UNIT 4 - TOPIC 4.9

4.9 Collective assessment

The collective assessment is a real game. Teachers watch passing, movement, legal shooting, defence, talk and fair play. Isolated shooting can support the picture. It cannot replace it.

The collective assessment is a real mixed-team game.

KEY POINTS

- Legal shots only.
- Movement without the ball.
- Talk across the mixed team.
- Fair play on the defended rule.

UNIT 4 - TOPIC 4.9

Try this

1. Self-score four areas from 1 to 4.
2. Ask a partner for one strength.
3. Set a focus word: cut, free, or rebound.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Hiding from the ball is as visible as a wild shot.

COACH'S TIP

Play the game you practised. Assessment is not a different set of rules.

CHECK YOUR UNDERSTANDING

1. What is the main evidence?
2. Name two social things that will be watched.
3. Why can a shooting drill not stand alone?

UNIT 4 - TOPIC 4.9

Year 9 lab · Movement is the evidence

A shooting drill cannot stand alone. The collective game watches legal shots, movement without the ball, talk across the mixed team, and the defended-shot rule under pressure.

Movement without the ball is the evidence, not only a static shot.

Do this in today's lesson

1. Self-score four areas.
2. Play the assessed game.
3. Ask a partner for one strength that is not a goal.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 5 • TERM 3

American Football

A team invasion game of downs, routes and decisions. This book uses touch, not tackle.

UNIT 5

In this unit you will

- ✓ Explain downs, scoring and school touch rules.
- ✓ Throw, catch and carry the ball safely.
- ✓ Run simple routes and make a run-or-pass choice.
- ✓ Mark a receiver and protect space on defence.
- ✓ Communicate a play without arguing on the line.
- ✓ Show leadership and sportsmanship.

A short spiral to a moving target is more useful than a long throw that nobody can catch.

Topics in this unit

5.1 Introduction and rules

5.2 Warm-ups

5.3 Ball handling

5.4 Attacking skills

5.5 Defensive skills

5.6 Game strategies

5.7 Game scenarios

5.8 Cool-down and reflection

5.9 Collective assessment

Year 9 step-up

Year 9 football is play design: a snap, a route, a decision to run or pass, and a defence that talks.

Fitness this unit develops

Component	How it shows in this sport
Speed	A slant that beats the first step of the marker.
Agility	Change from a route to a block of space.
Coordination	A spiral the receiver can see early.
Power	A short throw that still has a true spin.
Reaction time	A two-hand touch at the moment of the catch.
Cardiovascular endurance	Four honest downs without walking back.

Sporting values

- Touch, never tackle, in this course.
- Stop the play the moment someone is hurt.
- Listen to the play call the first time.
- Celebrate a block of space, not only a score.

WRITE BEFORE THE FIRST LESSON

My target:

How I will know it improved:

UNIT 5 - TOPIC 5.1

5.1 Introduction and rules

American football in this book is a touch game. A down ends when the ball carrier is touched with two hands, or the pass is incomplete, or the team scores. Four downs to make a target line, or the ball is turned over.

Scoring is a touchdown (ball carried or caught in the end zone) and, in some school games, a simple extra-point play. There is no tackling, no blocking through the body, and no helmets required because we are not playing the collision sport.

The field is shortened for school. Learn the end zones, the line of scrimmage and the idea of a play clock even if the teacher is the clock.

Touch football field: end zones and yard lines. School games use a shortened pitch

KEY POINTS

- Touch, not tackle.
- Four downs to the target line.
- Touchdown in the end zone.
- No collision blocking.

UNIT 5 - TOPIC 5.1

Try this

1. Walk the field and stand in both end zones.
2. In a pair, show a legal two-hand touch.
3. Write why this course uses touch, not tackle.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A shoulder into the chest is a foul in this game, whatever you have seen on a screen.

COACH'S TIP

The sport here is timing and space. Leave the collision version for places that train it properly.

CHECK YOUR UNDERSTANDING

1. How does a down end in this course?
2. What is a touchdown?
3. Why are there no tackles in these lessons?

UNIT 5 - TOPIC 5.1

Year 9 lab • Touch is the law of this course

Four downs, a target line, a two-hand touch. There is no tackle and no collision block in these lessons. A shoulder into the chest is a foul, whatever a screen has shown you.

Walk both end zones. Practise a legal touch that is obvious and safe.

A legal two-hand touch ends the play. There is no tackle in this course.

Do this in today's lesson

1. Show a legal two-hand touch at walking pace, then at a jog.
2. Walk a four-down series without a ball.
3. Write why this book uses touch, not tackle.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 5 - TOPIC 5.2

5.2 Warm-ups

Warm-up is pulse work, then passing in pairs, then short sprints and change-of-direction. Hands and eyes need to be awake before the first live throw.

Warm-up is pulse work, then passing in pairs, then short sprints.

KEY POINTS

- Pulse, pass, then speed.
- Catch at different heights in the warm-up.
- Short sprints, not a long run.
- Check the ball and the space.

UNIT 5 - TOPIC 5.2

Try this

1. 20 pair throws, short then longer.
2. A 5-10-5 change-of-direction run.
3. Name one safety check you made.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

The first long throw of the lesson should not be a cold throw.

COACH'S TIP

Catching in the warm-up is cheaper than dropping in the first play.

CHECK YOUR UNDERSTANDING

1. What three parts does this warm-up have?
2. Why pass before you sprint?
3. What should you check besides your own body?

UNIT 5 - TOPIC 5.3

5.3 Ball handling

Throwing is a short step, a sideways body, and a spiral that the receiver can see early. The long throw is a different skill. Practise short until it is boring, then add length.

Catching is hands out, eyes on the ball, then tuck. High, low and over the shoulder are three different pictures. Running with the ball means two hands when a touch is near.

A school throw is a short step and a spiral the receiver can see. Length comes after accuracy.

KEY POINTS

- Spiral you can see.
- Hands first, then tuck.
- Two hands in traffic.
- Short throws before long ones.

UNIT 5 - TOPIC 5.3

Try this

1. 15 short spirals each way.
2. Catch 8 high, 8 low, 8 over the shoulder.
3. A 10 m carry with a two-hand finish.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A one-handed casual catch in a crowd is a turnover waiting to happen.

COACH'S TIP

The throw is a gift to the receiver's hands, not a test of your arm.

CHECK YOUR UNDERSTANDING

1. What makes a useful spiral?
2. What do you do after the catch?
3. When must you use two hands on the ball?

UNIT 5 - TOPIC 5.3

Year 9 lab · Short throws until they are boring

Year 9 arms want the long throw. The sport wants a spiral the receiver can see. Practise short until it is boring, then add length. Two hands in traffic.

Short throws until they are boring. The ball stays in the hands until the pass.

Do this in today's lesson

1. 15 short spirals each way.
2. Catch 6 high, 6 low, 6 over the shoulder.
3. A 10 m carry that finishes in two hands.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 5 - TOPIC 5.4

5.4 Attacking skills

A play is a snap, a route and a decision. Simple routes in Year 9: a short out, a slant, a go. The quarterback looks at the first option, then the second, then runs if both are covered.

The receiver's job is to run the route that was called, not the route they prefer. Timing is a promise.

A play is a snap, a route and a decision: out, slant or go.

KEY POINTS

- Snap, route, decision.
- Out, slant, go.
- Second option before a panic run.
- Run the route that was called.

UNIT 5 - TOPIC 5.4

Try this

1. Walk three routes, then run them.
2. 3 v 1: quarterback plus two receivers versus one defender.
3. Call a play, then run exactly that play.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Changing the route halfway because you 'saw something' breaks the thrower's picture.

COACH'S TIP

A five-metre completion is a good play. So is a throw you do not make.

CHECK YOUR UNDERSTANDING

1. Name three simple routes.
2. What is the quarterback's third choice?
3. Why must the route match the call?

UNIT 5 - TOPIC 5.4

Year 9 lab · Run the route that was called

Out, slant, go. The receiver's job is the route on the card, not the route they prefer. The quarterback looks at the first option, then the second, then runs if both are covered.

A five-metre completion is a good play.

A catch is hands first, then a tuck. The route has to be the one that was called.

Do this in today's lesson

1. Walk three routes, then run them on a clap.
2. 3 v 1: two receivers, one defender.
3. Call a play and run exactly that play.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 5 - TOPIC 5.5

5.5 Defensive skills

Defence is marking a receiver and protecting space. Stay between your player and the end zone. Watch their hips, not their head. A two-hand touch ends the play: make it obvious and safe.

An interception is a bonus, not the plan. The plan is no easy catch and no missed touch.

Stay between your player and the end zone. Watch the hips.

KEY POINTS

- Hips, not head.
- Between player and end zone.
- Two-hand touch, obvious and safe.
- Interception is a bonus.

UNIT 5 - TOPIC 5.5

Try this

1. Mirror a partner for 8 seconds without a ball.
2. 1 v 1 route: prevent the catch, then touch if they catch.
3. Call 'ball' when you see a throw.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A dive at the ankles is a tackle in disguise.

COACH'S TIP

If you can still see the receiver's numbers, you are probably too far behind.

CHECK YOUR UNDERSTANDING

1. What should you watch when marking?
2. How does a play end on defence?
3. What is the main job, if not the interception?

UNIT 5 - TOPIC 5.5

Year 9 lab • Hips, not head

Mark the receiver by watching the hips. Stay between them and the end zone. The plan is no easy catch. An interception is a bonus. A dive at the ankles is a tackle in disguise.

Watch the hips, not the head. Stay between player and end zone.

Do this in today's lesson

1. Mirror a partner for 8 seconds.
2. 1 v 1: prevent the catch, then a legal touch if they catch.
3. Call 'ball' when you see the throw.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 5 - TOPIC 5.6

5.6 Game strategies

Offence needs a small playbook: two run plays, three pass plays, and a word for each. Defence needs a shape: player-to-player, or one extra player in the middle.

Communication is the snap count, the play name and the call after a turnover. Quiet teams give the ball away twice: once on the field and once in the argument.

A small playbook you can remember, and a word for each play.

KEY POINTS

- A small playbook you can remember.
- A named defensive shape.
- Talk before the snap.
- Reset fast after a score.

UNIT 5 - TOPIC 5.6

Try this

1. Write a four-play playbook on one card.
2. Play 5 v 5 with only those plays.
3. After a turnover, the new offence has 10 seconds to name a play.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Inventing a new play on the line every down is how Year 9 teams stall.

COACH'S TIP

The best play is the one the quietest player still knows.

CHECK YOUR UNDERSTANDING

1. How many plays should a Year 9 playbook hold?
2. What must happen before the snap?
3. What should a team do after a turnover?

UNIT 5 - TOPIC 5.6

Year 9 lab • A playbook you can remember

Four plays on one card. A snap count. A word for the play after a turnover. Inventing a new play on the line every down is how Year 9 offences stall.

Four plays on one card. Inventing a new play every down stalls the offence.

Do this in today's lesson

1. Write a four-play card.
2. Play 5 v 5 using only those plays.
3. After a turnover, name the next play in 10 seconds.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 5 - TOPIC 5.7

5.7 Game scenarios

Small-sided games, conditioned games (must pass once, or no run on first down), then a mini tournament. Keep touch rules live. Keep the play clock honest.

Keep the two-hand touch live in every conditioned game.

KEY POINTS

- Conditions teach decisions.
- Touch rules stay live.
- Everyone plays a skill position at least once.
- Water and rotation.

UNIT 5 - TOPIC 5.7

Try this

1. 5 v 5 to two touchdowns, must pass on first down.
2. A three-team tournament, six-minute games.
3. After two games, name one play that actually worked.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A tournament that forgets the two-hand touch is no longer this course.

COACH'S TIP

Win the next down. The last one is already in the book.

CHECK YOUR UNDERSTANDING

1. Why use a must-pass condition?
2. What rule must stay live in a tournament?
3. Why rotate skill positions?

UNIT 5 - TOPIC 5.7

Year 9 lab • The tournament stays a touch game

Conditions teach decisions: must pass on first down, or no run until second down. The two-hand touch stays live. Everyone plays a skill position at least once.

The tournament stays a touch game. Everyone plays a skill position.

Do this in today's lesson

1. 5 v 5 to two scores, must pass on first down.
2. Rotate the quarterback after each score.
3. Name the play that actually worked twice.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 5 - TOPIC 5.8

5.8 Cool-down and reflection

Cool-down is a walk, then stretches for calves, hips and the throwing shoulder. Peer feedback: one throw or route you will keep, one you will change.

Cool-down is a walk, then stretches for calves, hips and the throwing shoulder.

KEY POINTS

- Walk first.
- Shoulder care after throwing.
- One keep, one change.
- Balls counted back.

UNIT 5 - TOPIC 5.8

Try this

1. A 2-minute walk-and-talk.
2. Write keep / change.
3. Count the balls into the bag.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A tired arm still needs a stretch, not a last long throw for fun.

COACH'S TIP

The next lesson's first throw is prepared by this lesson's last five minutes.

CHECK YOUR UNDERSTANDING

1. Which joints need extra care after this unit?
2. What belongs in the reflection?
3. Who counts the balls?

UNIT 5 - TOPIC 5.9

5.9 Collective assessment

The collective assessment is a game. Teachers watch throwing or catching, route running or marking, decisions, communication and fair touch. Isolated drills may support the picture.

The collective assessment is a complete play, not only a long throw.

KEY POINTS

- Skills under a snap count.
- Decisions: run or pass.
- Legal touch.
- Talk and leadership.

UNIT 5 - TOPIC 5.9

Try this

1. Self-score four areas from 1 to 4.
2. Ask a partner for one strength.
3. Set a focus word: spiral, route, or touch.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A player who never touches the ball cannot be fully assessed, and that is also a team problem.

COACH'S TIP

Show the sport: a complete play, not only a long throw.

CHECK YOUR UNDERSTANDING

1. What is the main evidence?
2. Name two things besides scoring that will be watched.
3. Why must everyone touch the ball?

UNIT 5 - TOPIC 5.9

Year 9 lab · A complete play is the evidence

Assessment is a snap, a route or a mark, a decision, a legal touch and some talk. A player who never touches the ball cannot be fully assessed, and that is also a team problem.

Do this in today's lesson

1. Self-score four areas.
2. Play the assessed game so everyone touches the ball.
3. Write a focus word: spiral, route or touch.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 6 • TERM 3

Sports Aerobics

High-energy movement to music. Strength, flexibility and timing come together in a short routine.

UNIT 6

In this unit you will

- ✓ Explain the purpose and safety of sports aerobics.
- ✓ Perform basic aerobic steps in time with music.
- ✓ Show simple strength and flexibility elements with control.
- ✓ Build and perform an individual and a group routine.
- ✓ Synchronise spacing and timing with others.
- ✓ Reflect on performance quality, not only energy.

Sports aerobics is controlled movement, clear shapes and teamwork with the music, not only sweat.

Topics in this unit

6.1 Introduction and rules

6.2 Warm-ups

6.3 Basic skills

6.4 Strength elements

6.5 Flexibility

6.6 Routine building

6.7 Performance

6.8 Cool-down and reflection

6.9 Individual assessment

Year 9 step-up

Year 9 routines need transitions, musicality and a group that counts together.

Fitness this unit develops

Component	How it shows in this sport
Cardiovascular endurance	Hold quality through eight eights of music.
Coordination	Feet and arms on the same count.
Flexibility	A range you can control, not force.
Strength	A press-up or balance that lasts the count.
Balance	A shape that does not wobble on the strong beat.
Rhythm	The group sounding like one count.

Sporting values

- Give other groups a quiet space to rehearse.
- Count the music together.
- Support a classmate who is learning a new step.
- Finish the routine even if a move goes wrong.

WRITE BEFORE THE FIRST LESSON

My target:

How I will know it improved:

UNIT 6 - TOPIC 6.1

6.1 Introduction and rules

Sports aerobics is a judged performance sport: movement to music, strength, flexibility and teamwork. In school it is also a way to train those qualities without needing a competition floor.

Safety is the first rule. Land softly, keep knees in line with toes, and do not attempt a skill you cannot control slowly. The music is not an excuse to rush.

Sports aerobics is movement to music, strength, flexibility and teamwork.

KEY POINTS

- Music, control, teamwork.
- Land softly.
- No skill you cannot control slowly.
- Space around every jumper.

UNIT 6 - TOPIC 6.1

Try this

1. Stand in your performance space and mark a safe landing zone.
2. Clap an 8-count together.
3. Write one safety rule for your group.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A trick you saw online is not a Year 9 syllabus item.

COACH'S TIP

Precision looks more impressive than chaos, even at the same heart rate.

CHECK YOUR UNDERSTANDING

1. What four qualities does sports aerobics train?
2. What is the landing rule?
3. When must you refuse a skill?

UNIT 6 - TOPIC 6.1

Year 9 lab • Control is the first trick

A skill you cannot do slowly does not belong in a Year 9 routine. Land softly, keep knees in line, and give every jumper space. Precision looks more impressive than chaos at the same heart rate.

Land softly, knees in line. A skill you cannot do slowly does not belong.

Do this in today's lesson

1. Mark a safe landing zone.
2. Clap an 8-count together until it is boring.
3. Refuse one skill your group is not ready to control.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 6 - TOPIC 6.2

6.2 Warm-ups

The warm-up is a pulse raiser, mobility for ankles, hips and spine, then a few easy steps on the music. By the end you should be able to count an 8 without looking at anyone else.

Find the 8-count before the routine starts.

KEY POINTS

- Pulse, mobility, then steps.
- Find the 8-count.
- Soft knees from the first march.
- Water nearby.

UNIT 6 - TOPIC 6.2

Try this

1. Lead a 90-second pulse raiser.
2. March 4 eights in time.
3. Name the beat: 1-2-3-4-5-6-7-8.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Starting the routine cold is how calves cramp in bar 3.

COACH'S TIP

If the group cannot count together, the routine is not ready, however good the steps look.

CHECK YOUR UNDERSTANDING

1. What are the three parts of this warm-up?
2. Why find the 8-count before the routine?
3. What should already be true of your knees?

UNIT 6 - TOPIC 6.3

6.3 Basic skills

Basic skills are marches, jogs, knee lifts, side steps and simple jumps, with arm patterns that match the feet. The head is quiet. The shoulders are down.

Year 9 quality is the same step done in time, in line, and with a finish. A messy jump is not more advanced than a clean march.

Marches, knee lifts and side steps, with the head quiet.

KEY POINTS

- Feet first, then arms.
- Quiet head.
- In time, in line, finished.
- Land in the same place you left.

UNIT 6 - TOPIC 6.3

Try this

1. March, knee lift, side step: 2 eights each.
2. Add a simple arm pattern.
3. Film 8 counts and name one timing error.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Looking at your own feet teaches the audience to do the same.

COACH'S TIP

If you can still hear the music and the count, you are not rushing.

CHECK YOUR UNDERSTANDING

1. Name four basic steps.
2. What does Year 9 quality look like?
3. Where should you land a jump?

UNIT 6 - TOPIC 6.3

Year 9 lab • In time, in line, finished

Year 9 quality is the same step done on the count, in the formation, with a finish. A messy jump is not more advanced than a clean march. Look out, not down.

In time, in line, finished. Look out, not down.

Do this in today's lesson

1. March, knee lift, side step: 2 eights each.
2. Add one arm pattern.
3. Film 8 counts and name one timing error.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 6 - TOPIC 6.4

6.4 Strength elements

Strength elements in school aerobics are controlled press-ups, a strong core hold, and a balance that lasts the count. They are not a chance to collapse for effect.

Every strength shape has an entry and an exit. Practise those as carefully as the shape itself.

A strength element has an entry, a still shape and an exit.

KEY POINTS

- Control over depth.
- A core that does not sag.
- Balance that lasts the count.
- Entry and exit are part of the skill.

UNIT 6 - TOPIC 6.4

Try this

1. 8 controlled press-ups, or a box version with the same shape.
2. A 16-count plank with quiet breathing.
3. A 4-count balance on each leg.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A bouncing press-up is not strength. It is a collapse with a beat.

COACH'S TIP

The strength element should look as musical as the step that comes after it.

CHECK YOUR UNDERSTANDING

1. What makes a press-up a strength element rather than a collapse?
2. Why practise entry and exit?
3. How long should a balance last?

UNIT 6 - TOPIC 6.4

Year 9 lab • The shape lasts the count

A bouncing press-up is a collapse with a beat. Entry and exit are part of the element. The audience cannot see a centimetre. They can see control.

A strength element has an entry, a still shape and an exit. The count is part of the skill.

Do this in today's lesson

1. 8 controlled press-ups, or a box version with the same line.
2. A 16-count plank with quiet breathing.
3. A 4-count balance on each leg.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 6 - TOPIC 6.5

6.5 Flexibility

Flexibility is useful range you can control. Dynamic mobility belongs near the start. Longer holds belong after the pulse is up, or in the cool-down.

Splits progressions are a maybe, never a must. A safe hamstring and hip sequence is enough for this course. Pain is a stop sign.

Flexibility is useful range you can control.

KEY POINTS

- Control the range you have.
- Dynamic early, longer holds later.
- Splits are optional.
- Pain means stop.

UNIT 6 - TOPIC 6.5

Try this

1. A 4-move dynamic sequence.
2. Two 20-second hamstring holds after the work.
3. Write one range you want to improve, and how you will not force it.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Bouncing in a stretch is an old habit and a bad one.

COACH'S TIP

The audience cannot see a centimetre. They can see control.

CHECK YOUR UNDERSTANDING

1. When do longer holds belong?
2. Are splits required in this course?
3. What do you do if a stretch hurts?

UNIT 6 - TOPIC 6.5

Year 9 lab • Range you can keep

Dynamic mobility near the start. Longer holds after the pulse is up. Splits are optional. Pain is a stop sign. Bouncing in a stretch is an old habit and a bad one.

Range you can keep. Pain is a stop sign.

Do this in today's lesson

1. A 4-move dynamic sequence.
2. Two 20-second holds after the work.
3. Write one range you will not force.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 6 - TOPIC 6.6

6.6 Routine building

A routine is steps plus transitions plus a beginning and an end. Musicality means the strong moves sit on the strong beats. Synchronisation means the group looks like one idea.

Write the routine in 8-counts before you decorate it. Eight eights is already a minute of music. That is enough for a Year 9 piece.

Write the routine in 8-counts before you decorate it.

KEY POINTS

- Count it before you decorate it.
- Transitions are choreography.
- Strong moves on strong beats.
- One group idea.

UNIT 6 - TOPIC 6.6

Try this

1. Write 4 eights on paper.
2. Add one transition and one strength shape.
3. Perform it once without music, once with.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Adding a new trick the day of the performance is how groups fall apart in public.

COACH'S TIP

If one person is lost, simplify. A clean easy routine beats a clever mess.

CHECK YOUR UNDERSTANDING

1. What three things make a routine more than a list of steps?
2. How long is eight eights of music, roughly?
3. What should you do if the group cannot stay together?

UNIT 6 - TOPIC 6.6

Year 9 lab • Count it before you decorate it

Write four eights on paper before you add a trick. Transitions are choreography. If one person is lost, simplify. A clean easy routine beats a clever mess on the day.

Count it before you decorate it. Simplify if one person is lost.

Do this in today's lesson

1. Write 4 eights.
2. Add one transition and one strength shape.
3. Perform once without music, once with.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 6 - TOPIC 6.7

6.7 Performance

Performance is the routine under eyes. Enter together, finish together, and keep going if a step goes wrong. Evaluation is kind and specific: timing, spacing, control, energy.

Group work is a Year 9 skill. The person at the back is as responsible as the person at the front.

A group routine is timing, spacing and a shared count. Energy without control is only noise.

KEY POINTS

- Enter and finish together.
- Do not stop if a step fails.
- Evaluate with evidence.
- Every place in the formation matters.

UNIT 6 - TOPIC 6.7

Try this

1. Perform for another group.
2. Give two pieces of evidence-based feedback.
3. Swap front and back and perform again.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Laughing through a mistake teaches the audience to laugh too. Recover, then laugh later.

COACH'S TIP

The last shape is what people remember. Hold it.

CHECK YOUR UNDERSTANDING

1. What should a group do when a step goes wrong?
2. Name two things to mention in feedback.
3. Why does the back row matter?

UNIT 6 - TOPIC 6.7

Year 9 lab • Keep going when a step fails

Performance is the routine under eyes. Enter together, finish together, hold the last shape. If a step goes wrong, recover. Laugh later. The back row is as responsible as the front.

Keep going when a step fails. Hold the last shape.

Do this in today's lesson

1. Perform for another group.
2. Give two pieces of evidence-based feedback.
3. Swap front and back and perform again.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

UNIT 6 - TOPIC 6.8

6.8 Cool-down and reflection

Cool-down is easy marching, then longer stretches and slower breathing. Reflection is about quality: one count you held, one transition you will clean.

Cool-down is easy marching, then longer stretches.

KEY POINTS

- March, then stretch.
- Breathe down.
- Reflect on quality.
- Leave the floor clear.

UNIT 6 - TOPIC 6.8

Try this

1. A 2-minute easy march.
2. Write one held count and one messy transition.
3. Stack cones and speakers if you used them.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

Sitting in a sweaty pile is not a cool-down.

COACH'S TIP

The body you bring next week is the body you look after today.

CHECK YOUR UNDERSTANDING

1. What comes after the easy march?
2. What should a reflection mention?
3. Who clears the floor?

UNIT 6 - TOPIC 6.9

6.9 Individual assessment

The individual assessment is your performance: timing, control, a strength or flexibility element, and how you work in the group. A written plan of the routine may support the picture.

Assessment is timing, control, a planned element and group work.

KEY POINTS

- Timing with the music.
- Control of every shape.
- A planned element.
- Group responsibility.

UNIT 6 - TOPIC 6.9

Try this

1. Perform the assessed routine.
2. Self-score timing, control, element, teamwork.
3. Write one target for the next time you perform.

DO IT WELL

- A partner can name the key point you were practising.
- The movement still looks like the key points when you go a little faster.
- You can say the decision, not only the action.

WATCH OUT

A solo show-off in a group piece is a lower mark, not a higher one.

COACH'S TIP

Show the plan you wrote. Assessment is not a surprise dance.

CHECK YOUR UNDERSTANDING

1. What four things are assessed?
2. How can a written plan help?
3. Why is show-off movement a problem in a group piece?

UNIT 6 - TOPIC 6.9

Year 9 lab · Show the plan you wrote

Assessment is timing, control, a planned element and group work. A solo show-off in a group piece is a lower mark. The written plan is part of the evidence.

Show the plan you wrote. A solo show-off lowers the group mark.

Do this in today's lesson

1. Perform the assessed routine.
2. Self-score the four areas.
3. Write one target for the next time you perform.

WRITE ONE SENTENCE

What changed after the lab, and what will you keep next time?

Your year in six sports

Look back across the three terms. The aim was not to become a specialist in one sport. It was to leave Year 9 able to join a game, look after your body and help a teammate.

Unit	One skill I can now explain	One habit I will keep
Volleyball		
Cross Country		
Badminton		
Korfball		
American Football		
Sports Aerobics		

WRITE THREE SENTENCES

1. The sport in which I improved most, and why.
2. The moment I helped someone else play better.
3. The habit I will take into the next year of PE.

Keep moving after the last lesson

Physical Education is a school subject. Physical activity is a life habit. The two only meet if you choose them to. You do not need a club trial to stay active. You need a plan you will actually keep.

IN SCHOOL

Join a lunch club. Offer to referee. Help set up the next class.

OUT OF SCHOOL

Walk or cycle a regular route. Play a small-sided game in the park.

WITH OTHERS

Invite someone who does not usually play. Teach them one skill from this book.

ON YOUR OWN

Ten minutes of mobility or an easy run still counts. Write it down.

A FAIR TARGET

Pick one session a week that is not a PE lesson. Put it on a calendar. If you miss it, restart the next week. Do not wait for September.

The six sports in this book will return, in harder forms, later in the school. The students who enjoy those years are usually the ones who kept the simple habits: a decent warm-up, an honest first contact, and a word for the person next to them.

Word list

These words are used in the units. The definition matches the way the book uses the word.

Attack line	The line 3 m from the net in volleyball. Back-row players may not attack a high ball in front of it.
Base	The ready place you return to after a contact or a shot.
Clear	A high, deep badminton shot that pushes the opponent back.
Defended shot	In korfball, a shot taken when a defender is within arm's reach with an arm raised. It does not count.
Down	One play in American football. In this course it ends on a two-hand touch or an incomplete pass.
Fartlek	A run where the ground or a simple rule tells you when to lift the pace.
Korf	The basket on top of the korfball post.
Platform	The flat forearm surface used to pass a volleyball.
Rally-point	A scoring system in which every rally scores, whoever served.
Rotation	In volleyball, moving one place clockwise when you win the serve.
Route	The path a receiver runs in American football.
Set	An overhead volleyball pass that prepares an attack.
Smash	A steep downward badminton hit from a high shuttle.
Spiral	An American football throw that spins around its long axis so it flies true.
Split step	A small hop as the opponent hits, so you can move in any direction.
Touch football	The version of American football used in this book: a two-hand touch ends the play.
Transition	The movement that joins two steps or two shapes in a routine.

Sources and references

Facts about rules and governing bodies were checked against the organisations named below. School adaptations (court sizes, time, and the way assessments run at Prime School) follow the department course file that supplied the scope of this book.

1. FIVB official volleyball rules, consulted for rally-point scoring, rotation and common faults (school adaptations noted in the unit).
2. World Athletics cross-country materials, consulted for course etiquette and the idea of a marked route.
3. BWF statutes, consulted for court lines, service height and scoring (school adaptations noted in the unit).
4. International Korfball Federation playing rules, consulted for mixed teams, zones and the defended-shot law.
5. NFL / school flag and touch football teaching summaries, consulted for downs and scoring language. This course is touch, not tackle.
6. FIG / school sports-aerobics teaching notes, consulted for the idea of strength, flexibility and musicality. School safety limits apply.
7. Prime School Year 9 Physical Education course file (PDF/Input/Year 9 Gym Prime Book.pdf): scope and sequence only.

Photographs and still-life plates were prepared for this edition. Diagrams of courts are teaching sketches, not official construction drawings.

For teachers

This Student Book covers the Year 9 Physical Education course as mapped from the department source file: Volleyball, Cross Country, Badminton, Korfbal, American Football and Sports Aerobics. Each unit keeps the source topic list. Teaching prose is original.

Assessment pages match the source policy: collective game assessment, three fitness tests, and a written paper when practical evidence is missing. Term dates and event days, if the school names them later, can be announced in class. They are not printed here as if they were already fixed.

Coach's tips are written in a staff voice without naming individual teachers. The printed title is Physical Education, Year 9.

Body type is 12 pt Source Sans 3. Do not shrink the type to fit a lesson onto fewer pages. Split the task instead.
