

Global Perspectives • Year 4

Student Book • Look Outwards • Ages 8-9 • Lower Primary

Ask. Listen. Compare. Act with care.

About this book

Prime Books • Global Perspectives • Year 4 Student Book • *Look Outwards* Ages 8-9 • Lower Primary • First edition 2026

This book invites you to look out from your classroom: at schools, conversations, moves, work and the digital world. You will **ask, listen, compare** and **act** with care.

Prime Books is the publishing imprint of Prime School, Portugal.
www.primeschool.pt

IMPRINT

Prime Books Global Perspectives · Year 4 · Student Book

Publisher: Prime Books, imprint of Prime School · www.primeschool.pt © Prime School 2026. All rights reserved. British English · metric measures · euros where money appears First edition 2026

All continuous prose, activities and illustrations in this edition are original to Prime Books unless a Sources entry says otherwise.

Editorial Board

The Prime Books Subject Series has been developed under the guidance of the Pedagogical Academic Group for each subject and coordinated by the Pedagogical Team of Prime School.

This publication reflects our shared commitment to academic excellence, educational quality, professional integrity, and the continuous advancement of teaching and learning. Through the collective expertise and dedication of our educators, we aim to provide meaningful and engaging learning resources that support students' academic growth.

We extend our sincere appreciation to the Pedagogical Department and the Content Creation Team of Prime School for their invaluable contributions, dedication, and collaborative efforts in making this publication possible.

Welcome

Hello.

You are eight (or nearly nine). You already know your school street, your friends and the games you play at break. Global Perspectives asks a bigger question: **how do people live and learn in other places**, and **what can we do that is fair and kind?**

In this book you will:

- meet children who get to school in different ways
- practise talking **and** listening
- think about families who move
- notice how work helps a town
- stay safer and kinder online

You do not need to know every answer. You need a good **question**, a careful **ear**, and the courage to change your mind when the evidence is better.

The class that guides you is called the **Look Outwards Club**. Their stories are invented for teaching. The facts in **Did you know?** panels are real and checked in **Sources**.

Who you will meet

Name	What they are for
Inês	Asks careful questions before anyone decides
Jamal	Notices how people feel when they speak
Sofia	Compares life here with life in other places
Mateo	Turns ideas into small, kind actions

They are classmates in a Portuguese primary class. Disagree with their ideas, not with them.

How to use this book

Panel	What it means
Unit opener	Full-page art, unit title and the big question on a panel in that unit's own colour
In this unit you will	Numbered outcomes with a short explanation under each number
Look closer (QR)	Adult-held device only; free public page that supports the unit idea
Getting started	The unit story and the big question in class talk
Do you remember?	Something you already know
Boots on!	A quick action or talk before the teaching
Let us find out	Short teaching. Read it twice.
Your turn	Numbered practice with room to write
Did you know?	A verified fact (after the unit has started)
From another chair	Two or more views of the same idea
Look Outwards notes	Draw or write what you noticed
One step further	Stretch when you finish early
Project	A longer make-and-share task

Write in the book when a line or box waits for you. Use pencil. Be neat enough for a partner to read.

QR rule: your teacher, or another adult at school, holds the device. You look together. Never scan alone without permission.

Running heads show the topic number, for example **2.3 • LET US FIND OUT**.

Getting set up

You need:

- this book and a pencil

- a partner for talk tasks
- sometimes scissors, glue or plain paper for projects
- a device only when your teacher says so (Unit 5)

Class rule: **respect every perspective.** Disagree with ideas, not people.

UNIT 1

1

Education for all

The Learning Path · Why learning matters, who gets to school, and how we help fairly

◎ THE BIG QUESTION

Is education only what happens at school?

Unit 1 · Education for all

The Learning Path · Look Outwards Club

Luggage tags: Learning, Journeys, Barriers, Helpers, Fairness.

🕒 IN THIS UNIT YOU WILL

1. Explain that education is more than books and tests.

You will notice learning at school, at home and in clubs, not only at a desk.

2. Compare ways children travel to school in different places.

Walk, bus, boat, bicycle: journeys are not the same for every child.

3. Name barriers that keep some children out of school.

Cost, distance, design and danger can block access; a barrier is not a personal failure.

4. Choose a kind, realistic way to help.

Fair helpers listen first, then act with the people who already lead the work.

5. Plan a dream school that includes more learners.

You will design one page that removes a barrier and welcomes more children.

■ KEYWORDS

Five words for this unit. Say each one out loud, then find it again on the page where it is taught.

- **education** growing knowledge and skills for life, not only school lessons
- **barrier** something that blocks access, such as cost, distance, danger or a building design
- **enquiry** careful asking and checking before you decide
- **inclusive** designed so that more people can take part
- **perspective** a way of seeing from somebody else's place and story

■ LOOK CLOSER (QR) • UNIT 1

Ask **your teacher**, or another adult at school, to hold the device and open this page with you.

What you will find: UNICEF Education hub (why every child should learn). **URL:** <https://www.unicef.org/education>

◆ SCENARIO

Room 4 at Prime School has a new noticeboard. It is empty, and Mrs Tavares has pinned one card in the middle of it: **Who is missing from school today, and why?**

By Friday the board is full. There is a photograph of a boat, a bus timetable, a drawing of a ramp, and a note from Jamal that says *my cousin walks 40 minutes each way*. Nothing on the board is an answer yet. Every card is a question the class will follow for the next six lessons.

Your class can start the same board. Keep it up all through this unit and add to it whenever you find something out.

✦ GETTING STARTED

Inês has drawn a map of every place she learns: classroom, kitchen, pitch, library. Jamal is listening to a story about a child who walks two hours to school. Sofia has pinned photos of schools by a river and schools on a hill. Mateo is already planning a fundraiser, and Inês puts a hand up: first we ask, then we act.

The big question, note printed beside it. Mateo says school is the only place that counts, because you get marks there. Sofia says her grandmother taught her to sew, and that was education too. Inês wants evidence, not opinions. Ask five people. Write who said what. Do not try to settle it yet.

UNIT 1 - TOPIC 1.1

What is education?

🔄 DO YOU REMEMBER?

In earlier years you learned that favourite means the one you like best. What is your favourite way to learn something new?

🎯 BOOTS ON!

Stand up. Show a skill you learned outside school with your body, no words. Can the class guess it?

▶ LET US FIND OUT

Education means growing knowledge and skills so you can live, work and care for others. It happens in school, at home, in clubs and outdoors. Reading a recipe, learning a song and practising a fair tackle are all education.

In a Lisbon classroom, children might measure flour for maths. On a farm path, a child learns which plants need water. In a library in Coimbra, a volunteer may help an adult learner practise Portuguese.

Some learning has a timetable and a teacher. Some happens because you were curious and asked. Both count, and both take practice.

Learning can happen at school, at home and outdoors.

A library helper and an adult learner practise reading together.

• YOUR TURN

1. Write one sentence that says what education means in your own words.
2. Tick every place where you have learned something real this week: school · home · park · club · kitchen · pitch.
3. Draw or list two details from life in Portugal that count as education.

✦ DID YOU KNOW?

The Universal Declaration of Human Rights, agreed in 1948, says in Article 26 that everyone has the right to education. That is why people call learning a right and not a prize.

◆ FROM ANOTHER CHAIR

- *Mateo says:* If it is not in a textbook, it is not real education.
- *Sofia says:* My uncle taught me to fix a bike. That was harder than any test.
- *Then:* Inês's question: which skills help a town run, even if they never appear on a spelling list?

▢ LOOK OUTWARDS NOTES

Draw yourself learning something that is not at a desk. Write one sentence saying why it matters.

UNIT 1 - TOPIC 1.2

Getting to school

↻ DO YOU REMEMBER?

How did you travel to school this morning?

● BOOTS ON!

In thirty seconds, name three ways a child might travel to school. No repeating a partner's idea.

► LET US FIND OUT

Some children walk. Some ride a bus or train. Some cross water by boat. Some share a bicycle. The journey can take ten minutes or two hours. Safe

roads, weather and distance all matter.

In some river communities a small boat is the school bus. In high villages children may set out before sunrise. In Porto a metro ride can be part of the morning, and in a small Alentejo village the whole walk may take four minutes.

Long journeys can make children tired before lessons begin. That is one reason a school close to home matters so much.

Different journeys: walk, bus, boat, bicycle.

A walking bus: children travel together safely.

• YOUR TURN

1. Circle how you usually travel: walk · bike · car · bus · train · other.
2. Write one journey that would be hard in heavy rain. Why?
3. Draw a simple map from home to school. Mark one safe spot and one careful spot.

✦ DID YOU KNOW?

When the road is far, some communities organise walking buses: groups of children walk together with adults so the journey is safer and less lonely.

→ ONE STEP FURTHER

Ask an adult how they travelled to school when they were your age. Write one difference and one same thing.

▲ CHALLENGE YOURSELF

Time your own journey to school for three days. Write the three times down, then work out the difference between the longest and the shortest.

Now answer in one sentence: what made the difference? Traffic, weather, waiting, or something else entirely?

▢ LOOK OUTWARDS NOTES

Invent a kind rule for a long school journey.

UNIT 1 - TOPIC 1.3

Barriers to education

↻ DO YOU REMEMBER?

What might stop a friend from coming to school for a week?

● BOOTS ON!

With a partner, list three reasons a child might miss school. Keep your voices respectful. No jokes about people.

► LET US FIND OUT

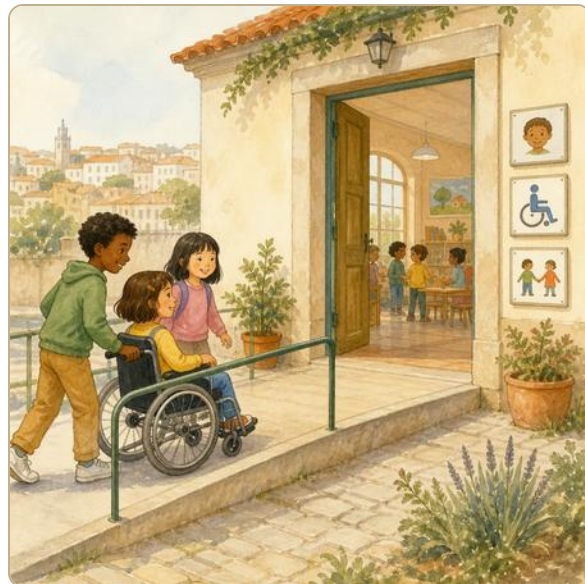

A **barrier** is something that blocks access. Barriers can include the cost of books or uniforms, long distances, illness, work at home, conflict, and buildings that are not safe for children with disabilities.

A barrier is not a personal failure. It is a problem a community can work on.

- **Fees:** when families cannot pay, children may stay at home.
- **Rainy season:** flooded roads can close a school for weeks.
- **Ramp:** a school without a ramp may shut out a wheelchair user.
- **Water:** where the nearest clean water is an hour away, fetching it can fill the school morning.

Barriers can be distance, cost or steps without a ramp.

A ramp and clear signs welcome more learners.

• YOUR TURN

1. Match each barrier to a possible fix: long walk → free bus pass or walking group · no books → shared class library · steps only → ramp and clear signs.
2. Write one barrier you refuse to laugh about. Why?
3. Rewrite this unkind sentence so it is fair: "They just do not care about school."

✦ DID YOU KNOW?

Organisations such as UNICEF work so that more children can complete primary school. The exact numbers change from year to year, so check a current figure before you quote one. The duty to include does not change.

◆ FROM ANOTHER CHAIR

- *Jamal says:* If school is free, every barrier is gone.
- *Inês says:* Free helps, but a child who cannot reach the door still waits outside.
- *Then:* Name one barrier that money alone does not fix.

▢ LOOK OUTWARDS NOTES

Draw a school entrance that welcomes more learners. Label one change.

UNIT 1 - TOPIC 1.4

Being a global helper

🔄 DO YOU REMEMBER?

When has somebody helped you in a way that felt kind, not bossy?

🎯 BOOTS ON!

Finish the sentence out loud: "Before I help, I should first..."

▶ LET US FIND OUT

Help is fair when it listens first. Ask: what do people need? Who already leads the work? Donating a pencil may help. Changing a rule so more children can enrol may help more. Helpers do not decide alone.

- **Listen:** a visitor asks the school council before buying gifts.
- **Share skills:** older pupils tutor younger readers after lunch.
- **Fundraiser:** a class raises money for books chosen by the school that needs them.

Good aid organisations publish how they spend money. Looking for clear reports is part of being a careful helper.

Good helpers listen before they act.

A careful fundraiser chooses books with the school that needs them.

• YOUR TURN

1. Sort these into **listen first** or **decide alone**: buy random toys · ask what is needed · copy a poster from the internet without checking · join a teacher-led collection.
2. Write one small help you could offer this month. Keep it realistic.
3. Why might "we know best" be a risky helper sentence?

✦ DID YOU KNOW?

Careful organisations share reports so that people who give can see how gifts are used. Looking for those reports is a careful habit you can start now.

▲ CHALLENGE YOURSELF

Design a three-question survey your class could use before any fundraiser. Every question must be one a real school could answer in one line.

Then test it: ask a teacher to answer your three questions as if they led a school that needed help. Change any question that was hard to answer.

▢ LOOK OUTWARDS NOTES

Write a helper promise in one sentence.

UNIT 1 - TOPIC 1.5

Global issues**🕒 DO YOU REMEMBER?**

How does education connect to health, work or peace?

🎯 BOOTS ON!

Draw three circles that overlap a little: school, health, jobs. Ready in one minute.

▶ LET US FIND OUT

When more children learn to read, communities can share health advice, run fair businesses and take part in decisions. Education links to health, work and peace. Keep your claims small and check the Sources page at the back.

Is a free school lunch a health idea or an education idea? It can be both: hungry children find it harder to learn, and learning helps people care for their health.

In 2015 the countries of the United Nations agreed seventeen Sustainable Development Goals. Goal 4 is quality education for all. Goals are shared targets, not magic.

Education links to health, work and community life.

A free school lunch helps hungry children learn.

• YOUR TURN

1. Draw arrows from education to two other big topics. Label each arrow with one word.
2. Write one careful claim (something you can check) and one wild claim (something you should not believe without proof).
3. Debate with a partner for one minute each: should school lunches be free? Use kind language.

✦ DID YOU KNOW?

The Sustainable Development Goals are seventeen shared targets for a fairer world by 2030. Goal 4 is the one about quality education.

◆ FROM ANOTHER CHAIR

- *Sofia says:* Big goals are only for presidents.
- *Mateo says:* Big goals need small class actions too.
- *Then:* Name one class action that links to Goal 4 without costing money.

▢ LOOK OUTWARDS NOTES

Write the link you care about most today.

UNIT 1 - TOPIC 1.6

Project • The dream school

↻ DO YOU REMEMBER?

Which barrier from 1.3 would you most like to remove?

● BOOTS ON!

In pairs, choose one word for your dream school: welcome • safe • fair • curious • calm. Say why in ten seconds.

★ PROJECT

Design a **dream school** plan on one page. Include:

1. Who can learn there
2. How they arrive
3. One barrier you remove
4. One kind rule
5. One sentence from a child who could not attend before

Present for two minutes. Listeners ask one respectful question.

Inclusive design is used in real architecture: wider doors, quiet corners, clear signs. You can sketch those ideas even if you are not an architect yet.

Design a dream school that welcomes more learners.

Present the dream school and listen to questions.

● YOUR TURN

1. Sketch rooms and outdoor space. Label three places.

2. List three barriers you refuse to accept.
3. Write the welcome rule on the school gate.
4. Practise your two-minute talk with a timer.

▲ CHALLENGE YOURSELF

Swap plans with another pair. Find one learner your partners' school still leaves out, and suggest one change that would let that child in.

Say it as a helper, not as a judge: "One more child could come if..."

▢ LOOK OUTWARDS NOTES

After presentations, write one idea you will borrow from another group.

☑ WHAT WE LEARNED

- Education is wider than books and tests.
- Journeys to school are not the same for every child.
- Barriers can be fixed by communities, not by children alone.
- Good helpers listen first.
- Your dream school plan is a kind design, not only a fantasy.

◆ EVALUATION

Read each outcome and tick one box. Be honest: "not yet" is a useful answer, because it tells your teacher what to teach next.

I can...	Not yet	Getting there	Yes
say what education means in my own words			
compare two different journeys to school			
name three barriers to education			
explain why a helper listens first			
plan a school that includes more learners			

☒ WHAT CAN YOU DO

Choose **one** action for the next two weeks. Small and finished beats big and forgotten.

1. Add three new cards to the class noticeboard from Scenario, each one a question with a source.
2. Walk one week of your journey with a younger pupil who lives nearby, with an adult who agrees to come.
3. Ask your school council one question about who our school still leaves out, and write down the answer.
4. Teach one skill you learned outside school to somebody at home, then ask them what was hard about learning it.

UNIT 2

2

Improving communication

The Talking Circle · Talk, listen, and include everyone

◎ THE BIG QUESTION

Can you understand somebody without interrupting them?

Unit 2 · Improving communication

The Talking Circle · Look Outwards Club

Luggage tags: Talk, Listen, Body, Questions, Turns, Styles.

◎ IN THIS UNIT YOU WILL

1. Name talking and listening as equal skills.

You will practise say-it-back so a partner feels heard, not just waited for.

2. Spot body language and tone that change a message.

Face, hands and voice can match or fight the words you choose.

3. Use calm phrases to cool small conflicts.

Tools such as "I feel... when..." help without name-calling.

4. Ask open questions like a careful detective.

Open questions need reasons, not only yes or no.

5. Take turns and include quieter voices.

Roles and timers make group talk fairer for everyone.

6. Respect different communication styles.

Some people talk, draw or think first; different is not wrong.

■ KEYWORDS

Five words for this unit. Say each one out loud, then find it again on the page where it is taught.

- **body language** messages your face, hands and posture send without words
- **tone** how a voice sounds: kind, sharp, tired, teasing
- **open question** a question that needs more than yes or no
- **closed question** a question that can be answered yes or no

- **I-message** naming your own feeling instead of blaming: "I feel... when..."

■ LOOK CLOSER (QR) · UNIT 2

Ask **your teacher**, or another adult at school, to hold the device and open this page with you.

What you will find: BBC Bitesize ideas about talking and listening. **URL:**

<https://www.bbc.co.uk/bitesize/topics/zvdx82>

◆ SCENARIO

Four chairs, one small table, and a broken game of football to sort out. Room 4 calls it the talking circle, and it has three rules pinned above it: one voice at a time, say it back before you answer, and no names.

On Monday the circle takes eleven minutes and nobody is happy. On Friday the same kind of problem takes four minutes, because Jamal has started saying it back first. Same children, same room, different habit.

Your class can build a talking circle too. Keep the three rules and add one of your own by the end of this unit.

✦ GETTING STARTED

All four are talking at once, which is the problem. Mateo has both hands up, explaining. Jamal has not said a word and is watching faces. Sofia is comparing two ways to say sorry. Inês raises one finger and waits. Nobody is listening yet.

The big question, note printed beside it. Mateo says if he heard the words, he listened. Jamal says waiting to speak is not the same as listening. Try it once, then write who turned out to be right for you.

UNIT 2 - TOPIC 2.1

Talking and listening

🕒 DO YOU REMEMBER?

Which is harder for you on most days: speaking or listening?

🎯 BOOTS ON!

Turn to a partner. They talk for thirty seconds about breakfast. You may only listen. Then say their idea back in one sentence.

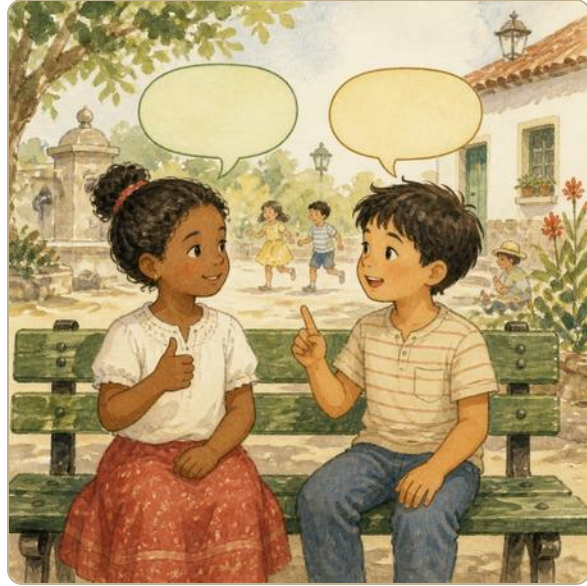

▶ LET US FIND OUT

A conversation needs two engines: clear speech and full attention. Listening means eyes, ears and patience. Interrupting is like snatching a ball mid-pass.

You know you were listening if you can say the other person's idea back, in your own words, and they say yes, that is what I meant. Teachers sometimes use talk partners because explaining an idea out loud strengthens memory.

Talking and listening are both needed.

Say-it-back shows you really listened.

● YOUR TURN

1. Play say-it-back. Write your partner's favourite game in their words, not yours.
2. Did you get it right? Ask them. Circle: yes exactly · nearly · not really.
3. Write one signal your class could use for "I want a turn".

✦ DID YOU KNOW?

Many classrooms use talk partners because saying an idea out loud helps the brain keep it.

◆ FROM ANOTHER CHAIR

- *Mateo says:* If I heard the words, I listened. What else is there?
- *Jamal says:* You heard them. You were already planning your reply. That is different.
- *Then:* Try say-it-back at home once. Notice the other person's face.

▢ LOOK OUTWARDS NOTES

Write one thing somebody told you today that you actually remember.

UNIT 2 - TOPIC 2.2

Body language and tone

↻ DO YOU REMEMBER?

Can you say "I'm fine" in a way that means the opposite?

● BOOTS ON!

Mime three feelings without words. The class guesses kindly. No mocking.

► LET US FIND OUT

Arms, faces and voice pitch carry meaning. Crossed arms may mean cold air or discomfort. Always check with words before you judge.

Try a tone trial: read the same line happy, tired and angry. Notice how the room changes. Eye contact norms differ between families and places.

Different is not rude by default. Ask, do not assume.

Body language and tone change the same words.

Kind tone helps hard news land softly.

• YOUR TURN

1. Circle what can change a message: face • hands • voice • speed • words only.
2. Write a kind check-in question you can ask if someone looks upset.
3. Why is guessing someone's feelings from only one clue risky?

✦ DID YOU KNOW?

Actors train for years to control tone and face. You already use both every day without thinking.

→ ONE STEP FURTHER

Watch a silent clip your teacher chooses. List three messages you think you saw. Then discuss.

▲ CHALLENGE YOURSELF

Run a tone trial. Choose one short line, such as "you can have the last one", and say it three ways: warm, flat, and teasing.

Ask three listeners to write down what they thought you meant each time. Then compare. Where did the same words land differently, and what carried the difference?

▢ LOOK OUTWARDS NOTES

Draw two faces saying the same word with different meaning.

UNIT 2 - TOPIC 2.3

Superpower phrases

🔄 DO YOU REMEMBER?

What words make an argument worse on the playground?

● BOOTS ON!

Sort these into heat up / cool down: "You always..." · "I feel... when..." · "Can we try again?" · name-calling · "I hear you saying..."

▶ LET US FIND OUT

Try these tools: "I feel... when..." · "Can we try again?" · "I hear you saying..."

Avoid name-calling and "you always". Phrases are tools, not magic spells. They work better when your body is calm too. Mediators in schools train for months. Year 4 can still start with respectful words.

Superpower phrases keep talk fair.

Please, thank you and I disagree kindly.

● YOUR TURN

1. Rewrite: "You stole my turn!" into an I-message.
2. Role-play a short playground disagreement with a partner. Swap roles.
3. Write one phrase you will practise this week.

✦ DID YOU KNOW?

I-messages help people name a feeling without attacking the other person. Many schools teach them in friendship programmes.

◆ FROM ANOTHER CHAIR

- *Sofia says:* Soft words are for babies.
- *Inês says:* Soft words can be strong. They stop a fight from growing.
- *Then:* Which phrase would help most after a broken game?

▢ LOOK OUTWARDS NOTES

Write your superpower phrase in big letters.

UNIT 2 - TOPIC 2.4

Great questions

🕒 DO YOU REMEMBER?

Which opens more doors: "Did you like it?" or "What surprised you?"

🎯 BOOTS ON!

Turn five closed questions into open ones. Thirty seconds each.

▶ LET US FIND OUT

Closed questions need yes or no. **Open questions** need explanation.

Detectives collect reasons, not only answers. Scientists write research questions before experiments. Historians do too. Upgrade: "Was lunch good?" becomes "What made lunch better or worse today?"

Great questions open thinking.

Closed questions get short answers; open ones invite stories.

• YOUR TURN

1. Label each question C (closed) or O (open): Do you play football? · How do you feel about moving seat? · Is blue your favourite? · What helps you concentrate?
2. Interview a staff member with two open questions about their day (with permission).
3. Pin the best class question of the week on a wall space your teacher chooses.

✧ DID YOU KNOW?

A good enquiry question is often hard to answer with one word, and that is the point.

→ ONE STEP FURTHER

Write three questions for Unit 3 before you open it.

▲ CHALLENGE YOURSELF

Interview somebody who works at your school, with permission, using only open questions. Four is plenty.

The hard part: when they answer, ask one more question that grew out of what they just said, not one you had written down. That is what turns a list of questions into a conversation.

▢ LOOK OUTWARDS NOTES

Your best open question today:

UNIT 2 - TOPIC 2.5

Groups and turns

↻ DO YOU REMEMBER?

Who spoke most in your last group task?

● BOOTS ON!

Stand in a line of four. Clap at the same moment. Not nearly the same moment. The same one.

► LET US FIND OUT

Fair groups rotate roles: speaker, notetaker, timekeeper, encourager. Quiet thinkers need wait time. Loud energy needs a pause button.

Practise the invite: "What do you think, Sam?" Many workplaces use short meetings with strict turn times so everyone is heard.

Groups work best when turns are fair.

One person talks while others listen.

● YOUR TURN

1. Assign four roles for a five-minute task. Write who does what.
2. Use a timer: each person gets one minute, no stealing.
3. Write one rule that protects quieter voices.

✧ DID YOU KNOW?

Taking turns is not only polite. It is how groups make better decisions, because more ideas reach the table.

◆ FROM ANOTHER CHAIR

- *Mateo says:* The fastest talker should lead.
- *Jamal says:* The best listener should lead sometimes.
- *Then:* Try both ways on a tiny task. Which felt fairer?

▢ LOOK OUTWARDS NOTES

Draw your group. Put a star on the encourager.

UNIT 2 - TOPIC 2.6

Different styles

🕒 DO YOU REMEMBER?

Does everyone show excitement the same way?

● BOOTS ON!

Tick how you like to share ideas: talking · drawing · writing · acting · quiet thinking first.

► LET US FIND OUT

Some people talk with their hands. Some prefer writing first. Some need quiet. Different is not wrong.

Agree class signals for "I need a break". Inclusive communication is part of disability rights and good teamwork everywhere. Offer a drawing option for

one oral task this week. Notice who blossoms.

People communicate in different styles.

Match your style to the moment.

● YOUR TURN

1. Complete a style map: how do you share ideas best?
2. Write one class rule that protects different styles.
3. Plan one adaptation for a partner who prefers drawing.

▲ CHALLENGE YOURSELF

Run one class task twice: once where everybody must speak, and once where anybody may answer by drawing or writing instead.

Count how many different people contributed each time. Then write one sentence on what the count tells you about the word "including".

▢ LOOK OUTWARDS NOTES

One style you will respect more carefully this week:

☑ WHAT WE LEARNED

- Listening is more than waiting for your turn.
- Body and tone carry meaning.
- Calm phrases cool conflict.
- Open questions open minds.
- Fair groups include quieter voices.
- Different styles can share the same goal.

◆ EVALUATION

Read each outcome and tick one box. Be honest: "not yet" is a useful answer, because it tells your teacher what to teach next.

I can...	Not yet	Getting there	Yes
say a partner's idea back in my own words			
explain how face, hands and tone change a message			
turn a blaming sentence into an I-message			
tell an open question from a closed one			
take a fair turn and invite a quieter voice			
name one style of sharing ideas that is not mine			

☒ WHAT CAN YOU DO

Choose **one** action for the next two weeks. Small and finished beats big and forgotten.

1. Be the encourager in every group task for a week, and keep a tally of how many people you invited in.
2. Use say-it-back once a day at home before you reply, and write down the first time it changed your answer.
3. Teach the three talking-circle rules to a younger class, with your teacher's help.
4. Choose one person you find hard to listen to, and give them a full thirty seconds without planning your reply.

UNIT 3

3

Moving to a new country

The Suitcase Path · Welcome, not gossip

◎ THE BIG QUESTION

What does a kind welcome look like on the first day?

Unit 3 · Moving to a new country

The Suitcase Path · Look Outwards Club

Luggage tags: Reasons, Feelings, Packing, Language, Culture, Welcome.

⦿ IN THIS UNIT YOU WILL

1. Give simple reasons why families move.

Work, safety, family, study or a fresh start: speak with respect, never gossip.

2. Name mixed feelings about moving.

Hope and worry can sit in the same suitcase on the same day.

3. Explain what people pack and leave behind.

Treasures and goodbyes both matter; some things cannot fit in a bag.

4. Show respect for new languages and cultures.

Mistakes are part of learning; mockery is never welcome.

5. Create a welcome guide for school and community.

Maps, kind rules and clear help make the first week less lonely.

■ KEYWORDS

Five words for this unit. Say each one out loud, then find it again on the page where it is taught.

- **migrate** to move from one place to live in another
- **settle** to make a new home in a place
- **community** people who share a place or an interest and help each other
- **culture** everyday ways of living: food, games, languages, holidays
- **perspective** a way of seeing from somebody else's place and story

■ LOOK CLOSER (QR) · UNIT 3

Ask **your teacher**, or another adult at school, to hold the device and open this page with you.

What you will find: UNICEF pages about children and migration (adult-led reading). **URL:** <https://www.unicef.org/migration>

◆ SCENARIO

It is the second week of February and there is a new name on the register. She has been in the country for nine days. She knows four words of Portuguese and one of them is "obrigada".

Room 4 has decided what to do about it, and their plan fits on one sheet of paper: show her where things are, learn to say her name correctly, and do not ask her to tell her whole story on the first day.

Keep that sheet in mind through this unit. By 3.6 you will write a proper version of it.

✦ GETTING STARTED

Sofia has a small suitcase on the carpet. Inside are a photo, a recipe card and a soft toy. Jamal names feelings without ranking them. Mateo wants to write a map to the canteen. Inês asks: who gets to tell this story, us or the person who moved?

The big question, note printed beside it. Mateo says a welcome is a smile. Jamal says a welcome is also knowing where the toilets are. Sofia says a welcome is not making someone perform their whole life story on day one. Collect three welcome ideas before you choose.

UNIT 3 - TOPIC 3.1

Why families move

🔄 DO YOU REMEMBER?

Why might a family leave one place for another?

🎯 BOOTS ON!

Sort reason cards into hope / need / both. Work in pairs. Keep voices soft.

▶ LET US FIND OUT

People move for work, safety, family, study or a fresh start. Some choices feel free. Some are forced by danger. We speak with respect, never gossip.

Useful words: **migrate** (to move to live somewhere else), **settle** (to make a new home), **community** (people who share a place or interest).

Portugal's cities, such as Lisbon and Porto, are home to many languages. That is part of everyday public life.

Families move for many reasons.

Work, safety or family can start a journey.

• YOUR TURN

1. Write two reasons a family might move. Keep them respectful.
2. Use each word once in a short sentence: migrate · settle · community.
3. Why do we not invent stories about classmates who have moved?

✦ DID YOU KNOW?

People have moved between places for thousands of years for food, work, safety and family. Moving is part of human history, not a modern surprise.

◆ FROM ANOTHER CHAIR

- *Mateo says:* People only move when something is wrong.
- *Sofia says:* People also move towards something good.
- *Then:* Can both be true on the same journey?

LOOK OUTWARDS NOTES

Draw a map pin for "from" and a pin for "to". No real addresses.

UNIT 3 - TOPIC 3.2

A suitcase of feelings

DO YOU REMEMBER?

Can you feel two feelings at once?

BOOTS ON!

On a scale of 1 to 5, mark how big these feelings can be on a move day: hope · worry · pride · sadness · curiosity. No wrong answers.

LET US FIND OUT

Moving can mix pride, hope, worry and sadness. All of those can be true on the same day. Feelings are information, not a problem to hide.

A partner's job is often to listen without fixing. Counsellors sometimes use feeling words with children who change school mid-year.

A suitcase can hold feelings as well as clothes.

Excitement and worry can travel together.

• YOUR TURN

1. Draw a suitcase. Pack three feelings as items.
2. Write one sentence that allows two feelings at once.
3. Practise with a partner: listen for thirty seconds without giving advice.

✦ DID YOU KNOW?

Feeling two things at once is normal. It does not mean you are confused. It means your brain is tracking a big change.

→ ONE STEP FURTHER

Invent a kind classroom signal for "I need a quiet minute".

▢ LOOK OUTWARDS NOTES

Which feeling would you unpack first on a hard day?

UNIT 3 - TOPIC 3.3

What do you pack?

🔄 DO YOU REMEMBER?

If you had one small bag, what would you take?

🎯 BOOTS ON!

List ten items max. Explain two of them out loud in twenty seconds each.

▶ LET US FIND OUT

People pack clothes, documents and treasures: a photo, a toy, a recipe card. They also leave rooms, friends and streets. Grief for a place is real.

Be careful with objects that are not yours to demand. A treasure is private unless someone chooses to share it.

What do you pack for a new life?

Some things stay; some things come with you.

• YOUR TURN

1. Your bag list (ten items or fewer). Star the two that matter most.
2. Write one thing you would miss that cannot fit in a bag.
3. Why might asking "Why did you leave?" on day one feel heavy?

✦ DID YOU KNOW?

Some families keep a recipe as carefully as a key. Food memories travel well.

◆ FROM ANOTHER CHAIR

- *Inês says:* Pack only useful things.
- *Jamal says:* A soft toy can be useful for sleep and courage.
- *Then:* Who decides what is useful?

LOOK OUTWARDS NOTES

Draw one treasure that is not expensive.

UNIT 3 - TOPIC 3.4

New sounds, new words

DO YOU REMEMBER?

How did it feel the last time you learned a new word?

BOOTS ON!

Teach a partner one word in a language you know (even a family word). They teach you one. Smile when you both mispronounce.

LET US FIND OUT

Learning a new language takes courage. Mistakes are part of the work, not proof you are "bad at it".

Helpful classmates: speak clearly, not louder; wait; offer a drawing; never mock an accent. Teachers may use dual labels on classroom doors for a while.

New sounds and new words take practice.

A welcome buddy helps with first words.

• YOUR TURN

1. Write three kind ways to help a new speaker of Portuguese (or English) in class.
2. Rewrite the unkind line: "Just talk normally."
3. Make a mini phrase card: hello · toilet · I need help · thank you.

✦ DID YOU KNOW?

Children often learn new school words faster when classmates include them in play, not only in worksheets.

→ ONE STEP FURTHER

Add pictures to your phrase card so meaning is clear without perfect spelling.

▲ CHALLENGE YOURSELF

Learn to say hello, thank you and one useful question in a language a classmate or neighbour speaks. Ask them to correct you until you get it right.

Then write down how it felt to be the one making mistakes. That feeling is the whole point of this topic.

▢ LOOK OUTWARDS NOTES

One word you will teach kindly this week:

UNIT 3 - TOPIC 3.5

Food, holidays and games

🔄 DO YOU REMEMBER?

What food, holiday or game makes your family feel like home?

● BOOTS ON!

Share one tradition in twenty seconds. Listeners only ask one curious question.

▶ LET US FIND OUT

Culture means everyday ways of living: food, games, languages, holidays, greetings and stories. It is not a performance for others.

Compare with care. "Different" is not a ranking. Try a game from another place the way you would try a new playground rule: with respect and a teacher nearby.

In Portugal you might meet many food traditions in one school street. That is normal city life for many children.

Food, holidays and games build belonging.

Learning a new game can make a friend.

• YOUR TURN

1. Complete: My family food memory is... / A holiday I know is... / A game I love is...
2. Write one respectful question about someone else's tradition (no personal invasion).
3. Plan a class "games from many places" afternoon with teacher approval.

✦ DID YOU KNOW?

Sharing food rules (what people eat, when, and with whom) is one of the oldest ways humans build community.

◆ FROM ANOTHER CHAIR

- *Mateo says:* We should all celebrate the same things.
- *Sofia says:* We can share some days and keep family days private too.
- *Then:* How do we make space for both?

▢ LOOK OUTWARDS NOTES

Draw a table set for welcome.

UNIT 3 - TOPIC 3.6

Project · Welcome guide

↻ DO YOU REMEMBER?

What did you wish somebody had told you on your first day at this school?

● BOOTS ON!

List five places a new pupil must find in the first week.

★ PROJECT

Make a **welcome guide** to our school and community on one or two pages. Include:

1. A kind hello in more than one language if you can
2. Map of key places (toilets, office, canteen, playground)
3. Three playground rules explained simply
4. One lunch tip
5. One "ask me" classmate role (with real volunteers)

Present for two minutes. Listeners check: would this help on day one?

A welcome guide helps newcomers.

Show the quiet places and kind people.

● YOUR TURN

1. Draft the map and labels.
2. Write the three rules in positive language (what to do, not only what not to do).

3. Add a quiet tip for someone who feels shy.
4. Rehearse with a timer.

▲ CHALLENGE YOURSELF

Test your welcome guide on somebody who has never seen it. Give them one task from it, such as finding the quiet corner, and watch without helping.

Anything they cannot do on their own is a page you need to rewrite. A guide that only works when you are standing next to it is not finished.

▢ LOOK OUTWARDS NOTES

After presentations, write one improvement for your guide.

☑ WHAT WE LEARNED

- Families move for many reasons.
- Mixed feelings are normal.
- Treasures and goodbyes both matter.
- Language learning needs patience.
- Culture is everyday life.
- A welcome guide is a real act of kindness.

◆ EVALUATION

Read each outcome and tick one box. Be honest: "not yet" is a useful answer, because it tells your teacher what to teach next.

I can...	Not yet	Getting there	Yes
give two respectful reasons why a family might move			
name mixed feelings without ranking them			
explain what people pack and what they leave behind			
show respect when somebody is learning our language			
write a welcome guide somebody could really use			

☒ WHAT CAN YOU DO

Choose **one** action for the next two weeks. Small and finished beats big and forgotten.

1. Learn to pronounce every name in your class correctly, and ask each person to check you.
2. Give your welcome guide to the school office, with your teacher's help, so the next new pupil gets it.
3. Sit with somebody new at lunch once a week, and talk about anything except moving.
4. Find out which languages are spoken in your school, and make an honest count for the noticeboard.

UNIT 4

4

The world of work

The Helping Town • Jobs keep a community standing

◎ THE BIG QUESTION

Does every useful job need a fancy title?

Unit 4 · The world of work

The Helping Town · Look Outwards Club

Luggage tags: Help, Skills, Places, Passion, Tech, Ideas.

⦿ IN THIS UNIT YOU WILL

1. Explain how work helps a community.

Goods and services keep a town moving; quiet jobs matter as much as famous ones.

2. Name skills Year 4 already practises.

Reading, measuring, listening and teamwork are work tools in training.

3. Compare jobs near and far.

Place shapes work; compare fairly without ranking countries as better or worse.

4. Link interests to effort (not only dreams).

Passion needs practice; many paths can grow from one interest.

5. Notice digital work honestly.

Screens are tools; people still decide what is kind, true and safe.

6. Imagine a simple enterprise idea.

Start from a real need, a fair plan and a kindness check.

■ KEYWORDS

Four words for this unit. Say each one out loud, then find it again on the page where it is taught.

- **skill** something you can do better with practice
- **goods** things you can hold that people make or grow
- **services** helpful work people do for others

- **entrepreneur** somebody who tries a new service or product to meet a need

■ LOOK CLOSER (QR) • UNIT 4

Ask **your teacher**, or another adult at school, to hold the device and open this page with you.

What you will find: ILO youth employment overview (adult-led reading). **URL:** <https://www.ilo.org/topics-and-sectors/youth-employment>

◆ SCENARIO

Stand at the school gate for ten minutes on a Tuesday morning and count the work you can see. The crossing patrol. The delivery van. The person sweeping. The two builders on the scaffold across the road. The bus driver. Somebody carrying bread.

Room 4 tried it and counted nineteen jobs in ten minutes. Then Inês asked the awkward question: which of those nineteen would we notice first if it stopped for a week?

Keep your own count as you work through this unit. The answer to Inês's question is rarely the job with the smartest uniform.

✦ GETTING STARTED

Mateo is interviewing the caretaker. Sofia is listing jobs she can see from the school gate. Jamal notices who smiles when their work is thanked. Inês asks which school skills already look like work skills.

The big question, note printed beside it. Sofia says doctors and pilots are the important jobs. Mateo says the person who keeps the toilets working is important too. Ask five people which job would be missed first if it vanished for a week.

UNIT 4 - TOPIC 4.1

How work helps us

DO YOU REMEMBER?

Who helped your day run smoothly before you even reached class?

BOOTS ON!

In one minute, list five jobs you can see or imagine on your school street.

LET US FIND OUT

Work is more than "having a job". Work is how people provide goods and services that help others live. Bakers, bus drivers, nurses, teachers, cleaners and shop workers all keep a community moving.

Some work is paid. Some care work at home is unpaid and still real. We speak about both with respect.

Work helps families and communities.

Care work and paid jobs both matter.

• YOUR TURN

1. Match job to help: bus driver · teacher · nurse · cleaner · grower of food.
2. Write one job that would be missed in one day if it stopped.
3. Write a thank-you sentence for a worker you notice this week.

✦ DID YOU KNOW?

Economists sometimes talk about goods (things you can hold) and services (help people do). Both count as work.

◆ FROM ANOTHER CHAIR

- *Sofia says:* The most famous job is the most important.
- *Jamal says:* The most needed job might be quiet and local.
- *Then:* Name a quiet job your school needs every day.

▢ LOOK OUTWARDS NOTES

Draw three workers who help your morning.

UNIT 4 - TOPIC 4.2

Skills for the future

🔄 DO YOU REMEMBER?

What are you learning NOW that adults also use at work?

● BOOTS ON!

Tick skills you used this week: reading · measuring · listening · teamwork · timing · problem-solving · kindness with words.

► LET US FIND OUT

Year 4 already practises future skills: reading instructions, measuring carefully, listening in a group, managing time, solving small problems and speaking kindly.

A skill grows with practice. Effort is not the enemy of talent. It is how talent shows up.

Skills for the future grow with practice.

Curiosity, kindness and problem-solving are skills too.

● YOUR TURN

1. Circle three skills you used today in school.
2. Write how one of them helps outside school.

3. Choose a skill to strengthen for two weeks. How will you practise?

✦ DID YOU KNOW?

Employers often value teamwork and clear communication as much as subject knowledge. You train those in group tasks already.

→ ONE STEP FURTHER

Interview an adult (with permission): which school skill do they still use?

▲ CHALLENGE YOURSELF

Pick one skill from this topic and practise it for ten minutes a day for five days. Measure something on day one and again on day five: how many, how fast, how neat.

Then write one sentence about the gap between the two numbers. That gap, not talent, is what the word "skill" means.

▢ LOOK OUTWARDS NOTES

My practice plan:

UNIT 4 - TOPIC 4.3

Jobs in different places

🕒 DO YOU REMEMBER?

Which jobs depend on the place where people live?

👟 BOOTS ON!

Sort job cards into more local / more global / both.

▶ LET US FIND OUT

Some jobs are shaped by place: fishing near the coast, mountain guides in high villages, tram drivers in cities like Porto, cork and tourism work in parts of Portugal.

Some jobs connect places: shipping, online design, translation. Local and global work can sit side by side in one family.

Compare fairly. Do not rank countries as "better". Rank the match between job and need.

Jobs look different in different places.

A market stall and a hospital both serve people.

● YOUR TURN

1. Name one job that needs a city and one that needs countryside.
2. Write one job that could exist in both Portugal and another country you name.
3. Why might weather change a day's work?

✦ DID YOU KNOW?

Tourism is important in many Portuguese regions, but it is not the only work people do. Everyday services still run when visitors leave.

◆ FROM ANOTHER CHAIR

- *Mateo says:* City jobs are more modern.
- *Sofia says:* Modern tools appear in villages too.
- *Then:* Give one example of tech in a rural job.

▢ LOOK OUTWARDS NOTES

Draw two workplaces: near and far.

UNIT 4 - TOPIC 4.4

From passion to profession

🕒 DO YOU REMEMBER?

What do you love to do when nobody is marking you?

👟 BOOTS ON!

Write one interest. Beside it, write one skill it needs.

▶ LET US FIND OUT

A passion is something you care about. A profession is work you do with skill and responsibility. The bridge is practice, teaching and chance.

Not every hobby becomes a job, and that is fine. Hobbies still grow character. If you love drawing, you might become an illustrator, a designer, a teacher or someone who sketches plans for buildings. Many paths.

Passion can grow into a profession.

Practice turns interest into skill.

● YOUR TURN

1. Interest → skill → possible helpful job (one chain).
2. Interview a partner: what do they love, and what skill does it train?
3. Write one sentence that keeps dreams kind: effort belongs in the picture.

✦ DID YOU KNOW?

Many adults change jobs more than once. Learning how to learn matters as much as choosing one forever job at age eight.

→ ONE STEP FURTHER

Find a library book about a job that matches your interest.

▢ LOOK OUTWARDS NOTES

My interest and one next practice step:

UNIT 4 - TOPIC 4.5

Technology and work

🔄 DO YOU REMEMBER?

Which jobs use computers or phones as tools, not only as toys?

🎯 BOOTS ON!

List three digital tools you have seen an adult use for work.

▶ LET US FIND OUT

Digital work includes coding, design, online shops, digital maps, video editing and tech support. It also includes people who fix machines and keep networks safe.

Be honest and age-right: not every job is "online", and online jobs still need human care, breaks and rules. Technology changes tasks; it does not remove the need for kindness and checking facts (see Unit 5).

Technology changes how some jobs are done.

People still guide the machines.

● YOUR TURN

1. Tick jobs that may use digital tools: nurse · farmer · pilot · shop worker · game tester · teacher.
2. Write one risk of only seeing "fun" digital jobs on social media.
3. Name one non-screen skill a digital worker still needs.

✦ DID YOU KNOW?

Many tech jobs are teamwork jobs: designers, testers and support staff solve problems together.

◆ FROM ANOTHER CHAIR

- *Mateo says:* Future jobs will all be online.
- *Inês says:* Bodies, food, roads and care still need people in the real world.
- *Then:* Name three jobs that need hands in a place, not only a cursor.

LOOK OUTWARDS NOTES

Draw a digital tool helping a real-world job.

UNIT 4 - TOPIC 4.6

Imagine creating a job

DO YOU REMEMBER?

What small problem in school life annoys people every week?

BOOTS ON!

In pairs, name one need in the playground or classroom. No magic wands: keep it realistic.

★ PROJECT

An **entrepreneur** tries a new service or product to meet a need. At Year 4 level, that means a simple idea, a clear user, a fair price idea (even if play money), and a kindness check: does this help without harming?

Your mini enterprise sketch:

1. The need
2. Your idea
3. Who it helps
4. What you need to start (skills, materials, permission)

5. One risk and one safety rule

Imagine a job that does not exist yet.

A new job should help people or the planet.

● YOUR TURN

1. Complete the five-point sketch above.
2. Design a simple poster for your idea.
3. Pitch in sixty seconds. Listeners ask one question about fairness.

▲ CHALLENGE YOURSELF

Take your enterprise idea and find the person it would inconvenience. Every real idea has one: somebody who waits longer, pays more, or loses a quiet street.

Write one sentence naming them, and one sentence on what you would change so the idea is still worth doing. That is the kindness check, done properly.

▣ LOOK OUTWARDS NOTES

One idea you will improve after hearing other pitches:

☑ WHAT WE LEARNED

- Work helps communities in many quiet ways.
- School skills are work skills in training.
- Place shapes jobs; comparison needs respect.
- Passion needs practice.
- Digital work is real work with real duties.
- Enterprise starts with a need, not only a dream.

◆ EVALUATION

Read each outcome and tick one box. Be honest: "not yet" is a useful answer, because it tells your teacher what to teach next.

I can...	Not yet	Getting there	Yes
explain how one quiet job helps a whole community			
name three skills I already practise at school			
compare jobs in two places without ranking people			
explain why passion still needs practice			
describe one digital job honestly			
start an enterprise idea from a real need			

☑ WHAT CAN YOU DO

Choose **one** action for the next two weeks. Small and finished beats big and forgotten.

1. Thank one person whose work at your school usually goes unnoticed, and say what specifically you noticed.
2. Interview somebody about their work using only open questions, and write up what surprised you.
3. Practise one school skill for ten minutes a day and keep the measurements.
4. Take your enterprise idea to a real test: ask three people whether they would actually use it, and write down what they said, not what you hoped.

UNIT 5

5

Digital world

The Careful Screen · Same manners as the playground

◎ THE BIG QUESTION

Can something on a screen be both fun and risky at the same time?

Unit 5 · Digital world

The Careful Screen · Look Outwards Club

Luggage tags: Digital, Footprint, Private, Kindness, Truth, Balance.

School e-safety policy leads. This unit supports it; it never replaces it.

⦿ IN THIS UNIT YOU WILL

1. **Explain that the digital world is more than games.**

Maps, lessons, messages and work tools all count as digital life.

2. **Describe a digital footprint in simple terms.**

Posts and data can last; pause before you post.

3. **Protect private information.**

Passwords and addresses are gold; strangers do not get the key.

4. **Choose upstander actions online.**

Support the target, seek help, and do not pile on.

5. **Check whether something online is true.**

Stop, ask who wrote it, and check with a trusted adult.

6. **Plan healthier screen-time balance.**

Sleep, outdoor play and family time still need room in the day.

■ KEYWORDS

Six words for this unit. Say each one out loud, then find it again on the page where it is taught.

- **digital world** the devices, apps and networks people use to learn, play and talk
- **digital footprint** the trail of posts and data you leave behind you

- **private information** facts that stay protected, such as passwords and addresses
- **upstander** somebody who supports the person being treated unkindly, and gets help
- **bystander** somebody who sees unkindness and does nothing
- **fact-check** testing a claim against sources you trust

■ LOOK CLOSER (QR) · UNIT 5

Ask **your teacher**, or another adult at school, to hold the device and open this page with you.

What you will find: Thinkuknow safety tips for ages 8-10.
URL: https://www.thinkuknow.co.uk/8_10/

◆ SCENARIO

One tablet, one class, and a question written on the board: **what did this device do today?**

By home time the list has fourteen entries. It found a bus time. It showed a river in Mozambique. It played music while the class tidied up. It sent a photograph of the tomato plants to another school. It also swallowed eleven minutes in a game nobody can quite remember playing.

Fourteen entries, and only one of them was a game. Keep your own list this unit. The digital world is bigger than the part that is most fun.

✦ GETTING STARTED

Mateo is excited about a new game. Inês asks who made the rules. Jamal notices how a mean comment feels even when it is only words. Sofia wants a family plan for screen time that is fair, not only strict.

The big question, note printed beside it. Mateo says fun means safe. Inês says fun can still need rules, like a swimming pool. Write three pool rules that also work for screens.

UNIT 5 - TOPIC 5.1

What is the digital world?

🕒 DO YOU REMEMBER?

Besides games, what else happens on phones, tablets or computers?

🎯 BOOTS ON!

Sort cards: digital / not digital / could be both.

▶ LET US FIND OUT

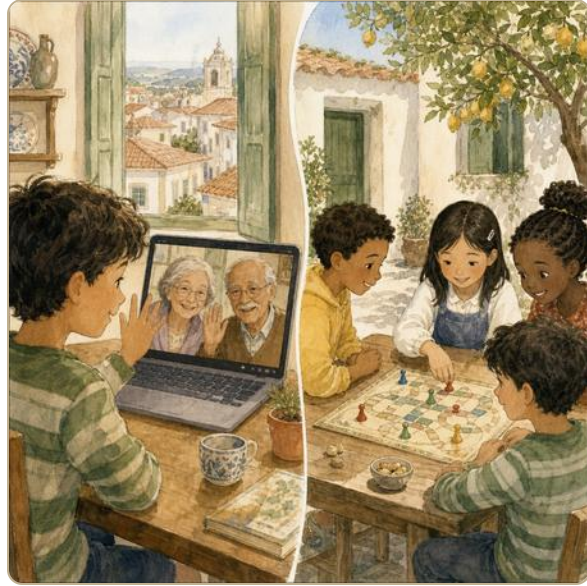

The **digital world** is the network of devices, apps, websites and messages people use to learn, play, shop, work and talk. It is more than games.

Examples: a map app that helps a bus driver, a video call with family abroad, a classroom quiz, a weather forecast, a library catalogue.

Tools are not good or bad by themselves. How people use them matters.

The digital world is tools plus people.

Online and offline life both count.

• YOUR TURN

1. List four digital tools you have seen this week (home or school).
2. Circle which ones help learning, which help play, which help both.
3. Write one offline activity that digital tools should never fully replace for you.

✦ DID YOU KNOW?

The internet began as a way for researchers to share information. Play and social apps came later.

◆ FROM ANOTHER CHAIR

- *Mateo says:* Digital life is only for fun.
- *Sofia says:* Digital life also holds school, health advice and family news.
- *Then:* Name one serious use and one playful use you accept as both real.

▢ LOOK OUTWARDS NOTES

Draw the digital tools in your week as a simple map.

UNIT 5 - TOPIC 5.2

Digital footprint

↻ DO YOU REMEMBER?

Have you ever wished you could unsay something?

● BOOTS ON!

Press a damp sponge on paper. Lift it. Talk about what stays.

► LET US FIND OUT

A **digital footprint** is the trail of data and posts you leave online: comments, photos, likes, accounts. Some footprints you choose. Some are collected by apps.

Think before you post. Ask: would I be happy if a teacher, an adult who cares for me, or my future self saw this? Deleting is not always complete.

A digital footprint is what you leave online.

Think before you post or share.

• YOUR TURN

1. Tick what can leave a footprint: photo · comment · username · search · game chat.
2. Rewrite a boastful post into something kinder and safer.
3. Family talk prompt: who can see my posts?

✦ DID YOU KNOW?

Many platforms keep copies of content even after you press delete. That is why pause-before-post is a superpower.

→ ONE STEP FURTHER

Design a class poster: "Pause. Would I say this in the playground?"

LOOK OUTWARDS NOTES

My pause question:

UNIT 5 - TOPIC 5.3

Private information

DO YOU REMEMBER?

Which facts should stay protected?

BOOTS ON!

Sort cards into share / ask an adult first / never share with strangers.

LET US FIND OUT

Private information includes passwords, home address, phone number, school name in public posts, and plans for when a house is empty. Photos can reveal private facts too (door numbers, uniforms, location tags).

Rules of thumb for Year 4:

- Never share passwords.
- Ask a trusted adult before sharing personal details.
- Use school accounts the way your teacher teaches.
- Kind people online still need the same safety rules.

Private information stays private.

Never share passwords or home address online.

• YOUR TURN

1. Circle the gold (private): favourite colour · password · street address · favourite animal · a home phone number.
2. Write what you do if a game asks for your address.
3. Role-play saying no kindly and firmly.

✦ DID YOU KNOW?

Passwords are like house keys. You would not glue your house key to a public noticeboard.

◆ FROM ANOTHER CHAIR

- *Mateo says:* If a site is popular, it must be safe.
- *Inês says:* Popular just means many people use it. Safety still needs checks.
- *Then:* Who do you ask when you are unsure?

▢ LOOK OUTWARDS NOTES

My trusted adults for online questions:

UNIT 5 - TOPIC 5.4

Kindness online

🕒 DO YOU REMEMBER?

What is the difference between a joke and a hurt?

● BOOTS ON!

Finish: "If I see unkindness online, I can..."

► LET US FIND OUT

An **upstander** supports a target of unkindness and seeks help. A bystander only watches. Online, unkind words can spread fast. Screenshot and tell a trusted adult when needed. Do not pile on.

Kind code:

- Same manners as the playground

- No pile-ons
- Report tools exist for a reason
- Defend without becoming unkind yourself

Kindness online looks like kindness offline.

If a message feels mean, stop and tell a trusted adult.

• YOUR TURN

1. Sort actions: upstander / bystander / unkind.
2. Write a short message that supports a classmate without attacking anyone.
3. Who will you tell if something online feels wrong?

✦ DID YOU KNOW?

Many platforms have report buttons. Knowing where they are is part of digital skill, not "telling tales".

→ ONE STEP FURTHER

Make a two-panel comic: bystander vs upstander.

▢ LOOK OUTWARDS NOTES

My upstander plan in one sentence:

UNIT 5 - TOPIC 5.5

Finding the truth

↻ DO YOU REMEMBER?

Have you ever believed something that later turned out false?

● BOOTS ON!

Look at two short claims your teacher provides. Which needs checking?

► LET US FIND OUT

Not everything online is real. Some posts exaggerate. Some are jokes. Some are tricks to get clicks. A few are scams.

Fact-check steps for Year 4:

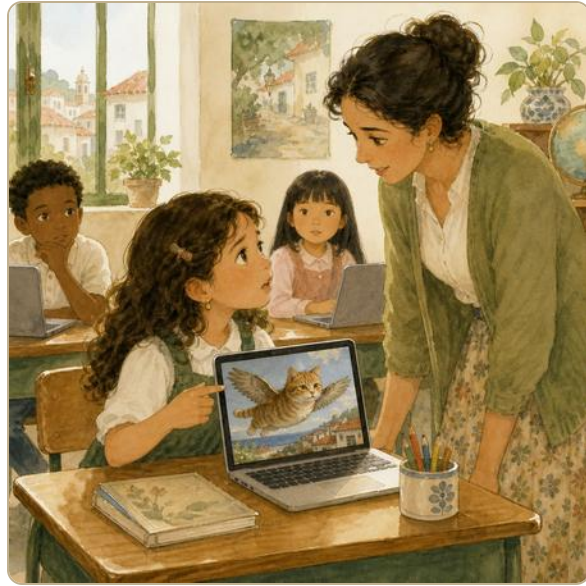

1. Stop and breathe.
2. Ask: who wrote this, and why?
3. Check with a trusted adult or a known safe source.

4. Do not forward until checked.

Deepfake and edited images exist. You do not need the technical details yet. You need the habit of checking.

Check who wrote it and why before you believe it.

Deepfakes and edits exist; ask for help.

• YOUR TURN

1. Label each habit helpful or risky: forward at once • ask who posted • check date • believe because friends sent it.
2. Write one question you can ask about any surprising claim.
3. Practise with a teacher-chosen example.

✦ DID YOU KNOW?

Professional fact-checkers compare claims with reliable sources before repeating them. You can start the same habit with adult help.

◆ FROM ANOTHER CHAIR

- *Mateo says:* If it is on a screen, it is true.
- *Sofia says:* Screens show true and false things. People still choose carefully.
- *Then:* Where will you check first?

▲ CHALLENGE YOURSELF

Find one claim that is going round your class or your street, and check it properly with an adult: who first said it, when, and does a source you trust agree?

Then report back with the honest answer, even when the honest answer is "we still do not know". Saying that out loud is harder than it sounds, and it is the whole skill.

▢ LOOK OUTWARDS NOTES

My fact-check question:

UNIT 5 - TOPIC 5.6

Screen time balance

↻ DO YOU REMEMBER?

How does your body feel after a very long screen session?

● BOOTS ON!

Sketch a simple day pie: sleep • school • play outdoors • screens • family. Talk about the slices.

► LET US FIND OUT

Screens can teach and connect. They can also crowd out sleep, outdoor play and face-to-face time. Balance is a family and school decision. This book does not replace your adult's rules.

Helpful habits:

- Device-free moments (meals, bedtime wind-down)
- Outdoor play most days
- Stretch eyes and body
- Stop when an adult says stop, without a long argument

Late screens can make sleep harder for many children. Sleep is not optional for learning brains.

Balance screen time with sleep, play and people.

A family agreement can protect rest and fun.

● YOUR TURN

1. Colour a weekly tracker: outdoor play each day.
2. Write one personal balance goal with an adult at home.
3. Design a "pause card" for when a game wants one more round.

▲ CHALLENGE YOURSELF

Keep an honest screen diary for three days: what you did, and for how long. Write it down at the time, not from memory at the end.

Then choose one swap you actually want to make, not one you think an adult wants to hear. A goal you chose is the only kind that survives a rainy Saturday.

▢ LOOK OUTWARDS NOTES

My balance goal for the next fortnight:

☑ WHAT WE LEARNED

- Digital life is more than games.
- Footprints last.
- Private information is gold.
- Upstanders help.
- Truth needs checking.
- Balance protects health and learning.

◆ EVALUATION

Read each outcome and tick one box. Be honest: "not yet" is a useful answer, because it tells your teacher what to teach next.

I can...	Not yet	Getting there	Yes
name three uses of the digital world that are not games			
explain a digital footprint in my own words			
sort private information from information I may share			
describe one upstander action I could really take			
check a claim before I repeat it			
plan a screen-time balance I chose myself			

☑ WHAT CAN YOU DO

Choose **one** action for the next two weeks. Small and finished beats big and forgotten.

1. Agree a screen-time plan with the adults at home, and write down what everybody, including them, agreed to change.
2. Be an upstander once: support somebody who is being treated unkindly online or offline, and tell a trusted adult.
3. Check three claims before repeating them, and keep a note of how many turned out to be true.
4. Teach a younger pupil the difference between private information and information they may share.

Word list

Glossary inputs • Global Perspectives Y4

Word	Working definition	Unit
education	Growing knowledge and skills for life, not only school lessons	1
barrier	Something that blocks access (cost, distance, danger, design)	1
enquiry	Careful asking and checking before deciding	1-5
perspective	A way of seeing from someone's place and story	1-5
inclusive	Designed so more people can take part	1
body language	Messages from face, posture and gesture	2
tone	How a voice sounds (kind, sharp, tired)	2
open question	A question that needs more than yes or no	2
closed question	A question that can be answered yes or no	2
I-message	Naming your own feeling instead of blaming: "I feel... when..."	2
migrate	To move from one place to live in another	3
settle	To make a new home in a place	3
community	People who share a place or interest and help each other	3
culture	Everyday ways of living: food, games, languages, holidays	3
skill	Something you can do better with practice	4
goods	Things you can hold that people make or grow	4
services	Helpful work people do for others	4

WORD LIST

Word	Working definition	Unit
entrepreneur	Someone who tries a new service or product to meet a need	4
digital world	Devices, apps and networks people use to learn, play and talk	5
digital footprint	The trail of data and posts you leave online	5
private information	Facts that should stay protected (passwords, address)	5
upstander	Someone who supports a target of unkindness and seeks help	5
bystander	Someone who sees unkindness and does not help	5
fact-check	Testing a claim with trusted sources	5

Sources and references

Sources log • Global Perspectives Y4

> Factual claims in pupil panels stay modest and age-right. Update when you add
 > a named statistic or organisation. Scheme titles come from Edu360; prose is original.

Claim / topic	Source / authority	Notes
Education as a human right, Article 26, agreed 1948	Universal Declaration of Human Rights, Article 26 (UN General Assembly, 10 December 1948)	Unit 1.1; year and article number are both printed, so both are checkable
Children and education access	UNICEF education overview	Unit 1.3; no exact millions printed, and the panel tells the reader numbers change yearly
Seventeen Sustainable Development Goals agreed 2015, Goal 4 quality education, target year 2030	United Nations, Transforming our world: the 2030 Agenda for Sustainable Development (2015); SDG 4	Units 1.5; https://www.un.org/sustainabledevelopment/education/reachable 2026-08-13
Walking bus / safe journeys	School travel practice (general)	Unit 1.2
Porto metro as part of a school morning	Metro do Porto is a public urban network used by residents	Unit 1.2; replaced an earlier claim about Porto trams, which are mainly heritage lines and not a normal school journey

Claim / topic	Source / authority	Notes
Fetching water can fill a school morning	Water access and school attendance (general, no statistic printed)	Unit 1.3
Charity transparency	Good giving practice (general)	Unit 1.4
Talk partners / oracy	Classroom oracy pedagogy	Unit 2.1
I-messages / friendship phrases	Primary PSHE practice	Unit 2.3
Migration as human pattern	Human geography (general)	Unit 3.1
Language learning and inclusion	EAL classroom practice	Unit 3.4
Goods and services	Primary economics vocabulary	Unit 4.1
Transferable skills	Careers education (primary)	Unit 4.2
Portugal mixed economy	General; no invented census numbers	Unit 4.3
Digital footprint / privacy / upstander	Standard primary e-safety	Unit 5; school policy leads
Sleep and late screens	Public health style guidance (general)	Unit 5.6; non-alarmist

Claim / topic	Source / authority	Notes
Scheme topic list	Edu360 Topic Global Y4.xlsx in PDF/Input	Scope only
Pedagogy model (structure)	Year 2 Global Perspectives Student Book	Structure and energy only; not copied prose

Answers

Most tasks are open. Value reasoning, evidence and respectful language over a single key. Where a match or sort has a clear set, teachers may accept equivalent wording.

Unit 1 • Education for all

Topic	Guide
1.1	Education = growing knowledge/skills in many places (own words OK)
1.2 Challenge	Three timings, then longest minus shortest. Accept any correct subtraction of the pupil's own numbers, and look for a named cause: traffic, weather, waiting, a slower walking partner
1.3 barriers to fixes	long walk → transport/group; no books → library; steps → ramp
1.3 unkind sentence	Any rewrite that moves the cause from the child to the barrier, e.g. "Something is stopping them from getting here"
1.4 sort	listen first: ask what is needed, join a teacher-led collection. decide alone: buy random toys, copy a poster without checking
1.4 Challenge	Three questions a school could answer in one line each, e.g. what do you need most, who decides, when would it help
1.5 careful vs wild claim	Careful = checkable against the Sources page. Wild = no source, or a promise about all people everywhere
1.6 project	Plan names who/how/barrier/rule; no single key
1.6 Challenge	Names one learner the partners' plan still leaves out, and one change phrased as a helper, not a judgement
Evaluation	Not marked. A "not yet" column with ticks in it is the useful outcome: reteach that outcome
What can you do	One action, chosen and finished. Judge follow-through, not ambition

Unit 2 • Improving communication

Topic	Guide
2.1	Say-it-back matches partner words
2.4 C/O	Do you play football? C; How do you feel...? O; Is blue...? C; What helps...? O

Unit 3 • Moving to a new country

Topic	Guide
3.1-3.6	Open: respect, no gossip, mixed feelings allowed

Unit 4 • The world of work

Topic	Guide
4.1-4.6	Open: community help, skills, fair comparison

Unit 5 • Digital world

Topic	Guide
5.3 private gold	password, street address, a home phone number (not favourite colour/animal)
5.5	forward at once = risky; ask who posted / check date = helpful

For teachers

Intent

This Student Book follows the Edu360 Global Y4 topic sequence (five chapters, six topics each). Prose and activities are original to Prime Books. Input files are **scope and sequence only**.

Pedagogy model

Closest to **Year 2 Global Perspectives** student-book energy:

- Look Outwards Club cast (Inês, Jamal, Sofia, Mateo)
- Big question + Getting started on each unit opener
- Per topic: Do you remember? · Boots on! · Let us find out · Your turn · Look Outwards notes
- Tools used intelligently: Did you know? · From another chair · One step further · Project
- Language and task demand lifted for **age 8** (Year 4), still Lower Primary

House rules

- British English; no em-dashes.
- Enquiry before judgement; Portuguese and global contexts.
- Number facts only after a unit has started.
- Digital unit assumes school e-safety policy leads; book supports, never replaces it.
- Imprint: Editorial Board present; no Cambridge disclaimer block (house style).

Assessment ideas

- Exit tickets: one fact, one feeling, one action.
- Project rubrics (Units 1 and 3): clarity, fairness, evidence, kindness.
- Observation of group turn-taking (Unit 2).
- Family balance goal conversation (Unit 5), never public shaming about screen time.

Curriculum note

Independent publication. Map topics to your school Global Perspectives / citizenship plan as needed.
